Returning to civilian life, he worked as a day laborer but could not continue because of his disabilities. He tried college under the VA vocational rehabilitation program but ran into problems because of his disabilities and the additional trauma of being a Vietnam veteran on a college campus during that period.

Determined to try again, he reentered college and completed his B.A. degree at Rutgers University. He went on to earn a master's degree in vocational rehabilitation. While in college, he worked with juvenile offenders and at the Damian School for Handicapped Children.

Following several years in the private sector, Mr. Tomsey began working for the Federal Government in 1978. He was serving at the VA's

Washington Regional Office when he was nominated for the award. In particular, Mr. Tomsey was cited for his active role in assisting hearing impaired veterans. As liaison with Gallaudet College, he also worked with children of veterans attending the institution.

In addition to membership in most of the major veterans organizations, he belongs to the National Rehabilitation Association, the American Personnel and Guidance Association, and the National Association of the Deaf. He is a board member of the Mount Vernon Mental Health Center and serves as chairperson for the Special Olympics.

Born in Tiffin, OH, Mr. Tomsey lives with his wife and son in Alexandria, VA. Mr. Tomsey has demonstrated a deeply felt commitment to Vietnam veterans and his compatriots.

Mr. Speaker, I know that my colleagues will want to join me in proudly saluting this remarkable man, 1 of the 10 Outstanding Handicapped Federal Employees of 1984.●

NATURAL GAS LEGISLATION

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

Mr. ROTH. Mr. Speaker, today I want to again pledge my support for H.R. 4277, the Sharp-Madigan natural gas bill. I am disappointed that Congress has not yet had the opportunity to vote on this important legislative solution to a problem which has caused great hardship for consumers across the Nation.

In January more than half of the Nation's gas production will be decontrolled. Lifting of price ceilings on more than half of the Nation's natural gas production may result in substantial increases in residential heating bills next year.

Unless Congress acts now, gas consumers will be forced to tolerate higher gas prices. Residential consumers have seen gas prices more than double since 1978. These increases have hurt senior citizens, homeowners, farmers, small businesses, and industry. Further increases in gas prices just cannot be tolerated.

This bill if passed, would freeze gas prices for 2 years so that contracts covering the gas scheduled to be decontrolled could be renegotiated. Together with amendments such as the proposed Gephardt amendment, consumers would save nearly $300 per household over the next 2 years.

In July, I joined with 217 of my colleagues in submitting a letter to the House leadership urging action to be scheduled on this bill which had been reported from the Energy and Commerce Committee in April. I am not alone in my commitment to protect consumers from soaring natural gas prices.

The cost of inaction is too high. Consumers need price relief. Congress must act before the start of another heating season and before the scheduled December decontrol date.

Mr. Speaker, I urge the House to consider H.R. 4277 and encourage swift approval in Congress.●

A TRIBUTE TO DR. GEORGE A. ROBERTS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. LEVINE of California. Mr. Speaker, I rise today in honor of Dr. George A. Roberts, a resident of Santa Monica, CA, who will be honored with the Americanism Award by the Great Western Council, Inc., Boy Scouts of America on October 29, 1984.

Past recipients of this prestigious award have included General Jimmy Doolittle, President Gerald Ford, and Bob Hope. In honor of this very special occasion, I would like to share Dr. Robert's impressive background with my colleagues in the U.S House of Representatives.

Dr. Roberts is currently the President of Teledyne, Inc. Prior to his election to the presidency of Teledyne in 1966, he was president and chairman of the board of Vasco Metals Corp.

Born in Uniontown, PA, February 18, 1919, Dr. Roberts entered the U.S. Naval Academy in 1935. He transferred to the Carnegie Institute of Technology (now Carnegie-Mellon University) in 1937, where he received his D.Sc. degree in Metallurgy in 1942. While at CMU he was associated with the Bell Telephone Laboratories as a laboratory technician. From 1941 to 1966, Dr. Roberts was employed by the Vasco Metals Corp.; first as research metallurgist, as chief metallurgist in 1945, as vice president of technology in 1953, and was elected president on October 31, 1961. He was made chairman of the board of directors of Vasco in 1964.

Dr. Roberts was elected a member of the National Academy of Engineering in 1978. He is a life trustee of the Carnegie-Mellon University. On October 17, 1980, he was awarded the Carnegie-Mellon University Distinguished Achievement Award. He is also a Fellow of The American Society for Metals and of The Metallurgical Society. He was president of The American Society for Metals (ASM) in 1954-55; and in 1955-56 was president of the ASM Foundation for Education and Research, and continued to serve as trustee through 1959 and again in 1963 through 1964. Dr. Roberts received the Gold Medal of The American Society for Metals in 1977. In addition, he is past chairman of the Pittsburgh Chapter of the ASM, and has served on the Publications Committee of the Society. He served as national director of the Metal Powder Association from 1952-55 and as President from 1957-58. He was president of the Metal Powder Industrial Foundation from 1958-61.

Dr. Roberts has published a number of technical papers and several books on Tool Steels. Subjects in which Dr. Roberts enjoys a particular expertise include Heat Treatment and Physical Metallurgy of steels, Alloy Steels, and Powder Metallurgy.

On February 15, 1984, Dr. Roberts was awarded the Humanitarian Award from the National Conference of Christians and Jews. He is a member of the Advisory Board of the Great Western Council, Inc., Boy Scouts of America; and began Scouting as a Lone Scout in Pennsylvania.

It is a pleasure to be able to highlight Dr. Roberts numerous accomplishments, and I ask that my colleagues join me in commending his for his outstanding achievements.●

DEPARTMENT OF ENERGY, INNOVATION AWARD RECIPIENTS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. SKELTON. Mr. Speaker, I would like to share with my colleagues the commendable achievements of the Central Missouri State University Safety Center, Cottey College, Missouri State Office of Administration and the Remington Arms Co. Each of these organizations received the National Award for Energy Innovation this week. The award is given by the Department of Energy for unique conservation and renewable energy projects which may be expanded for use throughout the country.

I congratulate these Energy Innovation Award recipients for their diligent and innovative efforts. Their achievements encourage other individuals and organizations and benefit all of us. To each individual contributing to energy savings projects, I take this means to extend my congratulations.●

THE PHILADELPHIA PROTESTANT HOME—94 YEARS OF SERVICE

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BORSKI. Mr. Speaker, it pleases me to join with the friends of the Philadelphia Protestant Home in recognizing its 94 years of service to the elderly and the community. Located in the Lawndale section of Philadelphia since 1890, the Home exemplifies the best principles of a life care community.

On Saturday, October 13, 1984, the Protestant Home will embark on another chapter in its distinguished history of care and service. In order to expand its commitment to quality care for the elderly, a cornerstone will be laid for a multimillion dollar expansion project on its 11-acre estate.

While the Philadelphia Protestant Home is already a thriving life care community for its over 400 residents, this project will permit it to offer comfort and security to substantially more people.

The Protestant Home is supported by 34 churches. Its services include both residential care and independent living arrangements, as well as a fully staffed medical clinic. The residential care program offers a worry-free life by providing residents with a spacious private room, three daily meals, housekeeping and maintenance services. Independent living arrangements, on the other hand, rely on greater self-sufficiency, although health care and other services are still available from the Home.

Its medicare-certified skilled care facility maintains the highest quality standards in caring for and attending to each of its residents. Not once in the Protestant Home's history has a resident been asked to leave due to a lack of funds. In fact, this year alone, almost $400,000 in free care was provided to residents unable to pay for services not reimbursable through either private insurance or Government programs.

Mr. Speaker, I want to commend the Philadelphia Protestant Home for its 94 years of quality life care. I am proud to be a part of the dedication ceremonies which signal that its commitment is strong and still growing. Let this occasion serve to remind us all to rededicate ourselves to the service of older Americans.●

LETTER FROM THE FARM

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DORGAN. Mr. Speaker, all of us receive many letters from constituents. Because I represent a rural State, a good number of the letters I receive are from farmers, and, because of the perilous state of the farm economy, a number of these are from farmers and ranchers who are losing their land.

But seldom do I receive a letter that sets out the difficulties facing our farmers, and the courage, strength and hard work with which farmers attempt to overcome these difficulties, with such eloquence as the one I recently received from a dairy farmer in my State. It is all the more poignant because Roger Drevlow's extraordinary efforts to stay in farming were defeated. On September 20 he and his wife Joanne held a farm auction to sell their cattle and farm machinery. He writes, he says, not to sound like sour grapes, but to try to change things for the better—"If our loss could help just one farmer in the future, it would give us reason to be proud," is the way he put it. I'd like to share this remarkable letter with my colleagues:

DEAR CONGRESSMAN DORGAN: On the 20th of September 1984 my wife, Joanne, and I are having a farm auction of all our cattle and farm machinery. I am writing to you because this situation is very troubling to me. I would doubt very seriously if there is anything that can be done to help Joanne and I to maintain our family farm, but if we do not speak out, the same problems will go on and on.

I am 32 years old. I have a wife and 5 children. We live on a dairy farm ten miles southwest of Maddock, North Dakota. We started farming in 1977. That year we experienced a complete drought. The crop from our entire farm was 160 small square bales of hay. 1978 proved to be a little better, but in December our hog barn burnt to the ground resulting in a great loss to us. We expanded our dairy herd to offset the loss and worked even harder.

In 1979 we started the year enthused about farming. We rented 140 extra acres, and with our own 200 acres we worked on. The crop was a beautiful one—the best we had ever seen, but the great North Dakota hail storm of '79 destroyed it completely. In December of '79 our house was burned completely to the ground with all of our belongings.

We struggled on, built a very modest new house and went on. We were encouraged to increase the dairy herd and we did, to around 50 cows. We were very short of space and FmHA borrowed us money to build an addition to the dairy barn. When we completed the barn and went back to FmHA for money to add more cows, they told us that they were very much against increasing the size of dairy herds in light of the huge dairy surplus and falling dairy prices.

We felt as if now we were not only fighting the elements but the Federal Government. We saw farmers financed with FmHA get disaster loans and in years when we were unable to buy clothes and food, watched them take trips to Europe, play the futures market and buy skads of new machinery. In years when we struggled night and day to make enough hay for our dairy cows out of sloughs and road ditches, we watched other farmers simply leave hay land that they considered too light to bother with. When there was an ASCS program for free oats we watched them haul truckload after truckload of government oats, while we did not qualify because we had put up everything we could find. When we went to buy land we would talk to FmHA as to what we could offer for a bid, and find that they would borrow $100-$200 more per acre to someone financed with them that already had a thousand acres.

When other farmers talked about their huge PIK payments we again found we were ineligible because we had never raised wheat. Those who created the huge surplus received the bulk of the payments.

I am not writing this letter to sound like sour grapes. We are losing our farm and we will come to terms with that. Joanne and I started farming in '77 with no family help. We went into it strictly on our own and too often now we hear that you really can't expect to make it without family help, and that is a shame. I have nothing against farms being passed on from generation to generation, but at the same time there is very little room for "new blood" in agriculture, and that is very sad. We have been a very strong positive addition to the community and I am sure that anyone here would testify that we have worked harder than most and contributed far more than the average to the community and church. We will be a loss to the community, and rural communities will die a little more.

In conclusion, let this be our lesson—lending agencies should look at each case on its own merits or problems. Government policies must be designed to benefit all sectors of agriculture, not just the large, and we must be concerned about the future of agriculture and rural America not only as an economic value, but from a personal standpoint.

Joanne and I entered agriculture because we felt it a very noble profession. We had been taught to love the smell of fresh turned soil and the sight of young crops coming through the soil. We worked hard, thinking we were producing food for a hungry world, only to have our own government tell us we produced too much, there was too much milk and grain, and still people starve, while this country builds weapons of destruction that cost millions.

I know that you are concerned about people and that is why I write. Our situation seems hopeless, but if we could just feel that our loss could help just one farmer in the future, it would give us reason to be proud. I know farm programs are necessary, that it is hard to make them fair; I know that it is hard to deal with large surpluses, but there has got to be a more humane way to dispose of them.

We have cried a thousand tears over losing our farm. We have built what we have here with the strength of our backs, sweat and love. We had a dream for the future and that is lost. We will find a new dream and serve our God and country as best we can. Please work hard to keep the dream alive for others.

With Respect and Hope for a Better Future.

ROGER DREVLOW.●

WASHINGTON GOLD MEDALISTS

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. CHANDLER. Mr. Speaker, I am proud to congratulate on the House floor today two Olympic gold medalists from Washington's Eighth Congressional District.

Kristi Norelius and her eight teammates were the first Americans ever to win gold medals in women's rowing. Their gold came in the eight-oars-with-coxswain category. The team trailed midway through the 1,000-meter race, but came from behind to take the gold and overcome a 3-year swing of second-place finishes in the World Championships.

Kristi is a graduate of Issaquah High School and Washington State University. Twelve members of her family traveled to Los Angeles to watch her compete.

William E. Buchan of Bellevue, with his crewman, Steve Erickson of Edmonds, in the neighboring First Congressional District, also staged a dramatic come-from-behind win to take the gold medal in the Star class competition in the yachting event. The same day, Bill's son, Carl, and crew Jonathan McKee, both from the first congressional district, won the gold in the Flying Dutchman class. Bill and Carl became the first father-and-son combination in Olympic history to win gold medals in separate yachting events.

Bill has been a world class sailor for more than 20 years and, at 49, was the oldest member of the U.S. Olympic team. The Buchans and their crew will be presented with signed copies of the Olympic Yachting Venue Charts in a ceremony in their honor on October 10.

I know I speak for the families and friends of Kristi Norelius and Bill Buchan and the people of Washington's Eighth Congressional District in saluting these outstanding athletes. After years of sacrifices, practice, and determination, they have reached the pinnacle of success in their events. I congratulate them on their victories and thank them for instilling in us a deep sense of national pride.●

TRIBUTE TO BARBER CONABLE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 3, 1984

● Mr. BIAGGI. Mr. Speaker, I rise to join scores of my colleagues in paying tribute to one of our finest—BARBER CONABLE who has elected to retire at the end of this 98th Congress. With this decision one of the most respected Members of this institution moves on to a different life.

BARBER CONABLE is a leader in this body—pure and simple. He has served with special distinction as the ranking minority member of the House Ways and Means Committee and in that capacity has had an enormous influence on the many legislative accomplishments this committee has produced not only in the 98th Congress but throughout BARBER'S 20 years in this House.

BARBER CONABLE, despite his considerable power and influence not only in this body but in our Nation is a humble self-assuming man. He recognizes that his is a position of public service and trust. He realizes that the concerns of his constituents are paramount above all others and as a result BARBER has a reputation which few can match in terms of constituent service.

BARBER CONABLE'S retirement is a significant loss to the Committee on Ways and Means, the Joint Committee on Taxation, the whole House, and the Nation. Having served with BARBER over the past 14 years on the New York congressional delegation, I know how much he has contributed to our work.

In our appreciation for our colleagues, we should never lose sight of the personal qualities that each possess. BARBER CONABLE is a warm, friendly and sincere man who can see the forest through the trees. He is a man who has chosen to retire rather than being forced to. He realizes that there are other things that he can and should do with his life. For those who have been fortunate to have BARBER as a friend, we will remember him for many reasons—but on this occasion only want to wish him the very best in his future endeavors whatever they might entail. He has left his mark in the House, one that will endure for years to come. To BARBER and Charlotte my best wishes now and in the future.●

IRVINGTON COLUMBUS DAY PARADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

Mr. RODINO. Mr. Speaker, I look forward with great anticipation to the honor of participating in the annual Columbus Day Parade sponsored by the Irvington Department of Parks and Recreation this Monday, October 8.

The parade takes on a special meaning this year, as we embark on the planning to celebrate in 1992 the Christopher Columbus Quincentenary Jubilee. The landing of Columbus on the island of San Salvador nearly 500 years ago was a remarkable feat, one that was destined to change the course of world history. We, the American people, are the prime beneficiaries of Columbus' vision and courage, so it is fitting that we have a truly national observance that will be carried out with dignity and distinction.

All of our people, not just Italian-Americans, will be honoring Columbus for his discovery of this blessed land. I like to think that the great story of Columbus and his discovery is part of a continuing story, of which an important chapter was written recently when we saw the first woman and the first Italo-American nominated as Vice Presidential candidate of one of our great political parties. The discovery of GERALDINE FERRARO is, in a larger sense, the rediscovery of America's meaning—that the American dream can indeed be realized by any man or woman. That is America's real greatness—and that is what we celebrate on Columbus Day.

The Irvington Parade will be an outstanding and a memorable affair. The grand marshal will be Rick Masucci, past commander of the Irvington Elks Club, who is being honored for his involvement in a vast array of community activities. The parade queen will be an Irvington high school senior, Ms. Rosalie Puerari. The festivities will culminate with an Italian Festival to be held after the parade in front of the Irvington Library.

Mr. Speaker, America has fulfilled the dreams of countless millions who have come to our shores in quest of a land where all people, regardless of origin, can reach their full potential. And I am proud that this fulfillment can be traced to Christopher Columbus, who is rightly called, "The Father of Immigration."

So it is with pride and pleasure that I will join with Irvington's Mayor Anthony Blasi and all my friends in the city of Irvington on Monday to commemorate Columbus Day.●

THE GOOD WORK OF RICK ALAN HAYMAN

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. MURTHA. Mr. Speaker, during the recent flood tragedy which was suffered in Glencoe in the area I represent, we once again saw how tragedy can lead to heroic actions.

I wish to take a second to commemorate Rick Alan Hayman who during the flooding risked his own life to save several lives. On another aspect of his character, my staff praised Rick for the helpfulness and aid he gave to

them as they worked to help the residents of the area recover.

I often remark that the greatest strength of America rests with its people, with their dedication to principles and concern for others. When I reflect that Rick is only 16 years old, it is another indication of the optimism we should all have about our Nation's future.

Once again, it is my pleasure to praise Rick Alan Hayman for his excellent work during the Glencoe flood.●

PUBLIC SUPPORT FOR SEATBELT LAWS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DINGELL. Mr. Speaker, I insert for the RECORD, and for the benefit of my colleagues, a September 21, 1984, article from the American Medical News which highlights a public opinion poll indicating that 77 percent of all New York adults and 69 percent of all adults nationally favor the idea of mandatory seatbelts. This data contradicts the age worn myth that mandatory seatbelt use requirements are overly intrusive and constitute a violation of individual freedom. After all, the right to endanger oneself behind the wheel of a car is no more an absolute privilege than it is to play Russian roulette in a crowded theater.

The public acceptability of mandatory seatbelt laws has been evidenced by the enactment of mandatory seatbelt legislation in New York, which will become effective January 1, 1985. Our domestic automakers are currently engaged in a vigorous campaign to encourage drivers to buckle up voluntarily and for States to pass mandatory belt use laws. I intend to reintroduce in the next Congress my legislation, H.R. 4175, currently cosponsored by 60 of my colleagues, to provide financial incentives to encourage States to pass seatbelt use laws.

What we are seeing is a recognition by the American public that significant strides can be made in saving lives in automobile accidents by making seatbelt use a priority, and a requirement. This can be done with little regulation and minimal expense. It is in the public interest to do so. We must achieve this goal.

POLLS: PUBLIC ENDORSES MANDATORY SEAT BELT USE

Mandatory seat belt use is an idea that now sits very well with the public, according to a recently released public opinion survey that was commissioned by the American Medical Association and the Medical Society of the State of New York.

In a survey of 400 New Yorkers, randomly selected to represent the state's adult population, and in a national survey of 1,503 people, respondents in both groups strongly endorsed the idea of seat belt use.

The survey, conducted by Kane, Parsons and Associates, a New York-based research organization, was conducted this year, just before New York became the first state in the nation to require seat belts in a new law that becomes effective Jan. 1, 1985.

In response to the question: "When driving or riding in a car, do you wear your seat belt always, sometimes, or never?" only 26 percent of the respondents nationally and 29 percent of the New Yorkers polled said they always wore seat belts, while a similar number, 29 percent nationally and 27 percent in New York, responded that they never wore the belts.

The main reason given for not using the belts, said the majority—37 percent in both the national and state polls—was being "too lazy or careless." To that same question, another large group—29 percent nationally and 28 percent statewide—said the belts were a "nuisance."

To the same question, only 9 percent in the national survey and 8 percent in New York replied that they did not use the belts because "seat belts are dangerous."

The respondents also resoundingly agreed—in an 88 percent majority in both polls—that "people riding in the front seat of a car should wear seat belts at all times."

Those surveyed also supported the idea of "federal or state government [proposals] requiring all motorists to wear seat belts." In New York, 77 percent of those individuals polled favored the idea of mandatory seat belts, while 69 percent nationally endorsed the idea.

Both groups surveyed overwhelmingly supported the idea of requiring children under a certain age to wear seat belts, with 93 percent in favor of the idea nationally and 95 percent affirming in New York.

Both the AMA and the Medical Society of the State of New York have long lobbied for the seat belt as an important public health measure, the medical society noted in releasing the survey.

The New York medical society, which will see its efforts realized next year, has been working for a mandatory seat belt law since 1982, when it formed the New York Coalition for Safety Belt Use in conjunction with the American Assn. for Automotive Medicine.●

TRIBUTE TO CARVER J. LEACH, JR., ROVING LEADER

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FAUNTROY. Mr. Speaker, in the city of Washington, DC, we have long appreciated and valued the talents, dedication and creativity of Carver J. Leach, Jr., director, Roving Leader Program.

The Roving Leader Program is a unique program that provides guidance, counseling and direct services to problem youths. While many cities across the United States have developed and sustained a variety of programs for troubled youth, none have been as exemplary as the Washington Roving Leader Program. The unique design, the successful working of this program, and its adoption in many other regions of our country and in foreign lands is a tribute to the dedication and efforts of Carver J. Leach, Jr.

In addition to working the street during public events, demonstrations, and special celebrations, a Roving Leader can be assigned to work in a particular block with a troublesome youth or group of youths. The Roving Leader has the training and mission to coordinate that youth's school work, his family life, his social contacts, and his behavior so that what was a delinquent pattern turns around. Countless youth have been guided to constructive and productive lives through the often round-the-clock services of the Roving Leader. For the first time in youth street work, the Roving Leader was able to maintain his contact with all parties concerned: The police, the courts, the school system, and the detention centers. In the case of the youth in the criminal justice system, this eliminated that fragmentation of services which often permitted the youth to slip through the cracks of the social service delivery system.

A Roving Leader serves in many other capacities and is a much respected, much appreciated community worker in services to be delivered to the nondelinquent youth as well.

It was in this context that I wish to commend with gratitude from all of the residents of the city of Washington the extraordinary energy and effort Carver Leach put forth in the July 4 Family Celebration Day in Lafayette Park this year, 1984. It was a hot day. The work of moving platforms, sound systems, directing program participants proved too much for Mr. Leach and he suffered a heart attack. Carver is slowly recovering from this unfortunate circumstance.

From all of us—in total gratitude and appreciation—I salute the years of unselfish humanitarian contributions of Carver J. Leach, Jr., and wish him a speedy, complete recovery.●

COMPREHENSIVE STUDY ON THE FUTURE OF NUCLEAR ARMS CONTROL

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FASCELL. Mr. Speaker, I would like to inform my colleagues that I have asked the Congressional Research Service to undertake a comprehensive study of the role of nuclear arms control in U.S. national security policy. This request reflects the Foreign Affairs Committee's longstanding interest in nuclear arms control matters. It is, however, more specifically, a direct outgrowth of committee hearings earlier this year entitled "the

Role of Arms Control in U.S. Defense Policy."

I believe that this study will reveal the important contribution that nuclear arms control has made to U.S. national security interests. I plan to coordinate this study on nuclear arms control policy with a series of briefings and hearings in the 99th Congress. It is my hope that this arms control agenda will facilitate an informed debate in 1985 on the numerous arms control issues which will come before the new Congress.

As chairman of the Foreign Affairs Committee and its Subcommittee on International Security and Scientific Affairs, my objective in requesting this study is to sustain careful congressional oversight of executive branch arms control policy while encouraging members of the Foreign Affairs Committee to continue to play a well-informed, active leadership role on arms control matters.

Just as the Committee on Foreign Affairs has forged and maintained a broad bipartisan consensus against binary nerve gas production, for the enhancement of the Arms Control and Disarmament Agency, and for acceptance of the nuclear freeze proposal by the House of Representatives during the 98th Congress, we need to create a similar bipartisan consensus in the 99th Congress in such areas as avoiding an arms race in space, in achieving a negotiated ban on nuclear weapons testing by the two superpowers, and in resuming nuclear arms control talks with the Soviet Union.

The study that I have requested will focus on the evolution of the basic components of U.S. nuclear arms control policy and how that policy has been put into practice in negotiations with the Soviet Union. It will illustrate how the questions of what to control, how to control it, and how to guarantee its control have been addressed at the national policymaking level and in negotiations with the Soviet Union. It will, most importantly, explore possible options for the future in this critical area.

A great deal can be learned from the arms control policy and negotiations of the past. As Members of Congress, we are aware of and share our constituents' deep concern about war and peace issues, nuclear weapons, and the fact that Ronald Reagan is the first President since Harry Truman not to have reached an agreement with the Soviet Union to control nuclear arms.

Congress can and must continue to provide leadership on nuclear arms control policy. Rhetorical solutions do not suffice when it comes to nuclear weapons and our national security. Congress must be prepared to offer constructive nuclear arms control alternatives. It is my hope that this comprehensive study will contribute to that effort.●

IN MEMORY OF MR. ADOLF O. IMMER

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. COURTER. Mr. Speaker, I would like to take a moment to remember a fine American who passed away Wednesday, Adolf Immer. Mr. Immer was a loving husband and devoted father who exemplified the true spirit of giving every day of his life. Handicapped himself, Mr. Immer donated much of his time to service organizations for the handicapped. He was a Veteran of World War II, serving in the Army.

Mr. Immer's dedication and unyielding spirit were inspirational to all who knew him. He was an active Republican and a member of the Somerset County Republican Campaign Committee.

I got to know Mr. Immer when he volunteered in my Somerville district office. He was a warm compassionate human being who devoted his entire life to helping others. I know I speak for many when I say he will be sadly missed.●

THE 250TH ANNIVERSITY OF THE EGYPT UNITED CHURCH OF CHRIST

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. RITTER. Mr. Speaker, I would like to commend the congregation and pastor, George S. Toth, of the Egypt United Church of Christ in Whitehall, PA, in my congressional district, on the occasion of the church's 250th anniversary. The church celebrated their 250th year through an 8-week series of services and special events, beginning on September 2, 1984.

This church has been serving the people of the Whitehall community for the past 250 years, and this service and sincere dedication to the word of God is worthy of much praise and recognition.

The church was founded on September 23, 1734, when David Traxel was baptized by the Reverend John Phillip Boehm. Services were first held in the homes of Peter Traxel, George Kern, and in the Deshler Fort.

In 1747 Michael Schlatter became the first ordained minister and was instrumental in distributing Bibles to the congregation. These Bibles were printed in German, and a copy of one of these Bibles is still with the church.

The church was originally known as the Egypt Reformed Church and in 1756 the Troxell-Steckel House was constructed, where services were held. This structure is still standing and is listed as a historical landmark. In 1759 the reformed church merged with the Egypt Lutheran Church to form the Egypt Union Church. A three-sided log church structure was built in 1764.

A new stone building was constructed in 1785 and the first organ was installed in 1786. There were not many organs in the area at that time, and the church's organ was a local novelty.

The first Sunday school was held in 1844, and in 1851 the present building was erected. Through the history of the church, several persons have been ordained into the ministry. They are: Herbert Rice of York and Linda Magyar of Mertztown. Also, the church has sent two missionaries into the field: Mary Fedde to Japan and Timothy G. Toth, son of the present pastor, to Conception, Chile. Since November 1, 1975, the church has been led by the Reverend George S. Toth, Jr. of Bethlehem.

The 250th anniversary committee was made up of: Mr. and Mrs. Robert Smith, Mr. and Mrs. Daniel Delong, Mr. and Mrs. Fred Feldman, Mr. and Mrs. Ralph Remaley, Edith Kuhns, Betty Nichols, Robert Nagle, Mr. and Mrs. Larry Jasper, Mr. and Mrs. Jack Welliver, Mr. and Mrs. Dollard Guth, Mr. and Mrs. Lloyd Gantz, and Mary-Etta Semmel.

Mr. Speaker let me once again praise the Egypt United Church of Christ for its fine history of service and commitment to the work of God and the community, and I hope the church is able to celebrate many more such anniversaries.●

DR. JACQUELINE HODGE HONORED

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. COELHO. Mr. Speaker, I rise today to offer congratulations to my good friend and constituent, Dr. Jacqueline Hodge, who was honored last week by the Congressional Black Caucus and awarded their first annual Education Braintrust Award for her contribution to education.

Dr. Hodge has distinguished herself in every facet of her life. She has served her community through her work with and for countless organizations; she has established herself as a respected writer and educator, having taught in the West Fresno Public Schools for 30 years; and she has raised five children and instilled in them the same values and strength of character that has been the driving force in her life.

Dr. Hodge is one of only 24 black women school superintendents in the

entire country. It is truly an honor for me to acknowledge the work of this outstanding individual for her contribution to excellence in education.●

HONORING MR. PAUL KAPCHAN

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. ACKERMAN. Mr. Speaker, I would like to ask my colleagues in the U.S. House of Representatives to take this moment to join me in honoring Mr. Paul Kapchan, president of the Democratic Club of Flushing-Whitestone-College Point in Queens County, NY.

The Democratic Club is paying tribute to our Republican colleague JAMES SCHEUER, and Mr. Kapchan for their many years of dedication and service to the public, at an annual dinner-dance on October 26, 1984.

Mr. Speaker, I know my colleagues in this body are aware of Congressman SCHEUER's vital contributions to the House of Representatives, his constituents, and the citizens of this Nation. But I would like to take a few moments to describe what the contributions of someone they may not know have accomplished for the people of Flushing.

Paul Kapchan's ideas, leadership, and spirit of tolerance and understanding have dramatically changed the appearance and the heart of Flushing. Although he is serving his first term as president of the Democratic Club, he has been deeply involved in the club and the community for many years, to the benefit of every citizen in Flushing. As president of the Flushing Merchants Association, Paul has been the catalyst for revolutionizing the relationships between immigrant and resident merchants, and between the business community and surrounding neighborhoods.

Paul has fought hard, with persistence and diplomacy, for a safer, cleaner, more dynamic Flushing. Through his efforts in negotiating better cooperation between merchants and the police department, every citizen now enjoys better protection and a safer way of life. He led a drive to welcome and support Chinese and Korean immigrant merchants and to break down barriers of prejudice and misunderstanding among business owners.

Paul Kapchan is not an out-of-town merchant seeking to influence policies and politics that don't affect him. He has lived in Flushing for many years, built his life, his business, and his friendships there. As a cofounder of the Democratic Club in Flushing and proprietor of a men's clothing store, he had a vision for the community—a vision of harmony between businesses and neighborhoods; of people working together for a common goal; of successful business owners extending the hand of friendship to struggling immigrant merchants.

Mr. Speaker, that vision is being realized in Flushing. Some citizens wish for a better, brighter way of life for themselves and their children. Paul Kapchan turns those ideals into reality.

I ask every Member of the U.S. House of Representatives to join with me now in paying tribute to Mr. Paul Kapchan.●

MAYOR HAROLD LEATHERS COMMENDED

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DAUB. Mr. Speaker, the frontlines of representative democracy is local government, and no group of elected officials lives closer to the needs and problems of their constituents than the mayors of our Nation's cities.

For the past 12 years, the residents of LaVista, NE, have benefited by the seasoned leadership of their neighbor and mayor, Harold Leathers. The mayor has an exemplary record of meeting the needs and solving the problems of the citizens of LaVista, and for this good reason, they continually returned this outstanding executive to office.

To our regret, Mayor Leathers has recently announced his retirement. He and his remarkable wife, Mary, plan to spend some time visiting their beautiful new granddaughter, and we know he will bring the same enthusiasm and energy to being a grandfather as he did to being mayor.

His impressive public service career will stand as a lasting tribute to this true gentleman and friend, and I appreciate this opportunity to share this with my colleagues and join with his many friends in wishing Mayor Harold Leathers a rewarding and fulfilling retirement.●

TRIBUTE TO MERCY VOCATIONAL HIGH SCHOOL

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. BORSKI. Mr. Speaker, I rise to pay tribute to Mercy Vocational High School, in Philadelphia, for being recognized by the exemplary private school recognition project.

The project, sponsored by the Council for American Private Education through a grant from the U.S. Department of Education, is an outgrowth of the National Commission on Excellence in Education, and seeks to identify schools that exemplify overall good educational practices.

Mercy Vocational was 1 of only 60 private schools nationally to be selected for this honor, from among the over 6,000 private schools across the country which were eligible to compete. Together, these exemplary schools represent a national profile of private schools. They are denominational and secular, coeducational and single-sex, large and small, as well as urban, suburban and rural.

Although many factors were considered, the council sought to recognize those schools which are successful at helping students do their best intellectually, creatively, developmentally and artistically. An effort was also made to identify those schools which are vitally interested in and attentive to their students as growing human beings.

Mr. Speaker, perhaps what makes Mercy Vocational's selection all the more special, is that this school emphasizes vocational training for students, some of whom had little success in other educational settings. In fact, this outstanding Philadelphia institution was the only vocational school so honored. While I am pleased to learn the accomplishments of Mercy Vocational were recognized by the council, I am certainly not surprised.

Rich in tradition and founded in 1950 to provide an education within a Catholic atmosphere for students whose abilities and interests lay in vocational skills rather than in the pursuit of a purely academic roster, Mercy Vocational has an outstanding record of educational achievement. The school's program is rooted in Christian principles, which touch not only the academic curriculum but also other curricular and extracurricular activities. Its philosophy is to give students an appreciation of the dignity of work, and through personal interest, patience and encouragement aims to prepare students for economic independence and individual fulfillment.

Because I recognize that a good education is such a critical factor in the development of our young, it especially pleases me to congratulate the faculty and student body of Mercy Vocational for achieving this prestigious recognition they so richly deserve. Through its standards of excellence, Mercy Vocational offers students not only the opportunity for the best possible education, but also the best possible chance for success in life.

Again, Mr. Speaker, I salute Mercy Vocational High School, and wish this exemplary learning facility continued success in the pursuit of its commitment to education.●

CALIFORNIA ESCROW ANNIVERSARY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. DANNEMEYER. Mr. Speaker, in 1984, the California Escrow Association celebrates its 60th anniversary. It is also the 34th anniversary of the Orange County Escrow Association. In October, the association holds its 29th Annual Education Conference. It is entirely fitting that October be known as "Escrow Month."

These associations perform a vital public service in educating the escrow community in the highest professional standards. The 31 regional associations also serve related industries in accounting, title insurance, and real estate law. Workshops on current legislation, loan processing, manufactured housing, business escrow, county recorder's offices, notary, and many other topics ensure a well-informed escrow community for serving the public.

The Orange County Association of 350 members and its State parent have been a vital link in the dramatic development of the county and State. Mr. Speaker, I am certain that all Members of the California delegation would subscribe to the following resolution which honors this profession of trust:

Whereas, the Orange County Escrow Association, a regional association of the California Escrow Association, a state association, which in turn is part of the American Escrow Association, a national association, has been dedicated to the continuing education and elevation of the Escrow Profession through adherence to its Code of Ethics for 34 years; and

Whereas, the parent group, the California Escrow Association, formerly the Los Angeles Escrow Association, similarly devoted its efforts since 1924 and now has nearly 3,500 members within thirty-one regional associations through the State of California; and

Whereas, the Orange County Escrow Association has faithfully pursued its covenant to foster, promote and improve escrow education and service to its members and to the public to elevate the standards of the Escrow Profession;

Now, therefore, the Orange County and California Escrow Associations are to be commended for their outstanding contributions to the people of this state on the occasion of the 29th Annual Education Conference.●

THE SPIRIT OF ISRAEL COMES TO ORANGE COUNTY

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. PATTERSON. Mr. Speaker, the Jewish Federation of Orange County, CA, in association with affiliated organizations and the synagogues in our area has decided to hold its annual Israel Fair Day on October 28. The Israel Fair provides a unique opportunity for all citizens in our metropolitan area to learn more about Jewish heritage and culture.

Although Jews represent a tiny segment of the human race—14 million out of 3.5 billion—it is hard to conceive of a group that has had more influence on Western civilization than the Jewish people. The values that we hold dear: free expression of religious and political conviction; protection of human rights; perseverance and unfaltering faith; the pursuit of art and knowledge; a nurturing family; and the work ethic, are values that the Jewish people have brought to the forefront of our culture. For the last 3,000 years, man's history and Jewish history have been intertwined. Today, the State of Israel is as much a symbol of man's struggle as it is a symbol of the struggle of the Jews.

Over the last 10 years, I have worked with the Orange County Jewish community on many issues of common concern, including problems affecting older Americans and our young people, business and trade issues, and the sale of American-made weaponry to hostile nations in the Middle East. Most recently, the drastic drop in emigration from the Soviet Union has given me particular cause for concern. As the status of United States-Soviet relations has deteriorated under the Reagan administration, emigration from Russia has plummeted to fewer than 100 per month for the first half of 1984—only 2 percent of the 4,000 emigrees allowed to emigrate per month in 1979.

The promise of the State of Israel has been denied to more than half a million Jews who await emigration. The Israel Fair is a time for celebration but it is also a time to remember. We must continue to press the Soviets to increase emigration and to reduce the degree of internal oppression of Jews in the Soviet Union. The Israel Fair can serve as the impetus for our renewed commitment. Together we spark the hope that may someday ignite the flame of freedom.●

MART NIKLUS

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. McKINNEY. Mr. Speaker, today I would like to bring the attention of this body two noteworthy anniversaries, neither of which were happy occasions. September 1984 marked 40 years of Russian occupation in the country of Estonia, as well as the 50th birthday of Mart Niklus, the symbol of Estonian resistance to the Soviet occupation. Unfortunately, for Mr. Niklus, his birthday was spent in solitary confinement in the infamous Chirstopol prison.

The Estonian people have lost their freedom. Since 1944, when the Soviets began their occupation of their country, Estonian human rights activists have been arrested and sent to prison and labor camps for doing nothing more than speaking their minds, a freedom that we here in the United States take for granted as an everyday occurrence. Mart Niklus is one of those Estonians trying desperately to regain his country's freedom.

Being accused of so-called anti-Soviet activity, Mr. Niklus has repeatedly been sentenced to years of imprisonment in Soviet labor camps and prisons. In 1958, he was sentenced to 10 years of hard labor followed by 3 years of internal exile for sending 15 photographs depicting the terrible conditions in Soviet-occupied Estonia to a Western journalist. After his release in 1966, he found work as a teacher, but was still repeatedly arrested. After pressure from the KGB, he was released from his teaching position in 1979.

Mr. Niklus' harassment has not ended. Several articles denouncing him appeared in newspapers. In 1980, he was refused permission to leave Estonia and live with relatives in Sweden. Subsequently, on March 19, 1980, Niklus was again arrested and sentenced to 13 days confinement for "disobeying a government official." After his release, he checked into Maarjamoisa Hospital for treatment of radiculitis, a disease afflicting the spinal cord which he had contacted in Siberian prison camps. Again, after pressure from the KGB, he was forced to leave the hospital before being fully recovered. The day after leaving the hospital, he was arrested and placed in isolation in Tallinn's central prison.

At a trial staged in Tallinn, the supreme court of the Estonian SSR sentenced Mr. Niklus to 10 years special regime hard labor camp and 5 years internal exile for "anti-Soviet agitation and propaganda." Despite his weakened condition due to a lengthy hunger strike and his worsening radiculitis, Mr. Niklus was sent to a labor camp at the foot of the Ural Mountains in the Soviet Union. In 1983, he was transferred to the infamous Christopol prison, where he spent his 50th birthday in continuing solitary confinement. He is currently in the midst of another hunger strike, which his mother fears may be his last.

Together with innumerable other Estonian dissidents, Mart Niklus is a symbol of Estonian resistance to the Soviet occupation of their homeland. He has earned the deep respect and

31-059 O-87-16 (Pt. 22)

admiration of his fellow Estonians who are all suffering under the Soviet regime. As the 98th Congress concludes and we return to our districts, we must continue to keep his plight as well as all other prisoners of conscience before the public's attention. If we continue to do so, perhaps Mr. Niklus can celebrate his 51st birthday in freedom.●

IN RECOGNITION OF BUSINESS AND PROFESSIONAL BUSINESS WOMEN'S WEEK OCTOBER 21 THROUGH OCTOBER 28, 1984

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. TORRICELLI. Mr. Speaker, I rise today to take the opportunity to recognize the Palisades Chapter of the Business and Professional Women's Club of New Jersey. The membership and executive committee, specifically, President Mary C. Marcopul, President-Elect Colleen Hart, First Vice President Raymond Kizma, Second Vice President Mary Kizma, Treasurer Sophie Marcopul, and Secretaries Nancy Gasewind and Alice Heck have made significant efforts to promote the contributions of working women throughout Bergen County in the State of New Jersey.

The week of October 21 through October 28 will be acknowledged as National Business Women's Week. This time has been officially designated to encourage the celebration of the achievements of all business and professional women as they contribute daily to our economic, civic, and cultural growth.

On behalf of all women across our country who have benefited from the dedication of this organization, I applaud their talents and perseverance and extend my wishes for their continued achievement.●

THE LEGACY OF NASRA COURY

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, October 5, 1984

● Mr. FEIGHAN. Mr. Speaker, the late Hubert H. Humphrey often spoke of our responsibilities to those in the twilight of life, the elderly and those in the shadows of life, the sick and needy.

The caring of those who are unable to help themselves is a great vocation and I would like to honor the members of an outstanding family from my district who have greatly contributed to such a vocation.

The Coury family opened its first nursing home, the Aristocrat West, on the west side of Cleveland, in 1966. Since that time, the family has expanded its elderly-care operation, known as Aristocrat Management, to 10 facilities throughout northern Ohio.

But behind the bricks and mortar of the Coury empire, lies another story.

The family matriarch, Nasra Coury, immigrated to America from Lebanon in 1910. It was here where she met her husband Joseph, a Pennsylvania coal miner. After her husband's death in 1951, she moved her eight children: Elias, Anthony, Joseph, John, Thomas, Robert, Anne, and Martha to Cleveland and continued raising the family in her quiet but determined style.

In September of this year, Mrs. Coury died. She was 85 years old. The last 4 years of her life were spent in one of the nursing facilities owned and operated by Aristocrat Management, now a monument to her life.

The nursing home operation extends care to over 1,000 patients and employs over 1,500 people, including 25 family members,

One unique notion of the Coury approach to caring for the elderly is that of rehabilitation. They believe that a person enters a nursing home, not to die but to regain strength and return to the community."Never give up" is their philosophy. It's the philosophy that Nasra Coury held all her life and it's the philosophy that the Coury's expect their patients to adopt.●

SENATE—*Tuesday, October 9, 1984*

(Legislative day of Monday, September 24, 1984)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Commit your way unto the Lord, trust also in Him, and He shall bring it to pass.—Psalm 37:5.

Father in Heaven, we are here under duress, but we have imposed this upon ourselves. All of us would rather be some place else, doing something else. Plans have had to be changed, commitments canceled, families and others as well as ourselves disappointed. We invoke Your presence here today—Your wisdom—Your enablement—that deadlock may be broken, differences compromised, and agreement achieved. Gracious God, intervene in the deliberations and lead Congress to a true and just and wise resolution. We pray for the sake of Your honor and glory and the welfare of all. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDING OFFICER. The majority leader is recognized.

SENATE SCHEDULE

Mr. BAKER. Mr. President, over the years, I have made sometimes facetious and sometimes serious remarks about the opening prayer of our distinguished Chaplain. But I say again facetiously, although somewhat seriously, that he has never been more right than he was today when he said that we are here under duress.

Frankly, Mr. President, I confess that I had not planned to be here today at all. I had planned for the Senate to have adjourned sine die and to find my leisure on the campaign trail in behalf of worthy Republican candidates. But other factors have intervened to interrupt my plans, and here I am.

It was a pleasure, as it always is, to meet this morning informally with the press accredited to the Senate gallery, but I had not planned to do that today. I had planned on their future careers subsisting on someone else's flesh, but that was not to be. So I am here, and the Senate is once more in session, and there is nothing we can do about it.

Someone asked today in the press gallery, "How long are we going to be in session?" or, "When are we going to adjourn?" I said, again facetiously, "In the immortal words of Thomas Jefferson, how in the world would I know?"

All I can say is that we are not out today and we probably will not be out tomorrow. This is why I say that: We have a conference committee meeting on the continuing resolution. The chairman of the Senate Appropriations Committee is not here. He is not here not because he does not wish to attend to his duties and responsibilities; he is not here because of fog in Chicago.

So the Lord acts in strange and wondrous ways, his miracles to perform. The chairman is in Des Moines, and the chairman is trying hard to figure out how you get from Des Moines to Washington, which is a pastime that many of us have inquired about from time to time in Presidential campaigns. But in this case, it is the question of how you get from Des Moines to Washington, DC, because of the weather.

So I do not know when we will have the conference report on the continuing resolution completed, but we must do that before we can adjourn. I do not know when we are going to have the debt limit finished, but we must do that before we can adjourn. I do not know when all of those things are going to occur, but I am sure we will continue working and doing the things that are necessary while we wait for those two things to occur.

So, Mr. President, after these verbal meanderings, may I say that it is the plan of the leadership on this side to continue our debate on the debt limit resolution and to try to finish that today. If we finish the debt limit today or if, for some reason, it appears that we cannot finish the debt limit resolution today, it is the intention of the leadership on this side to ask the Senate to proceed during this day, at some point, to consideration of the OCS revenue sharing conference report, which is at the desk and is privileged.

After that, it would be the intention of the leadership, if we are still here and still have not done the continuing resolution and the debt limit, to proceed to the consideration of the Genocide Convention.

Mr. President, that is an ambitious schedule, but that is the schedule until we finish the continuing resolution and the debt limit. There may be other matters that we can do and will do.

I know that my distinguished friend from Arizona, Senator GOLDWATER, is extremely anxious to do a cable TV bill. We thought we had it cleared on Friday, and it turned out at the last moment that we did not.

Incidentally, I say to Senator GOLDWATER, who is in the Chamber, that I tried to contact a Member on the other side who is also interested in this matter, and I find that he is in Cleveland—also because of the weather, I believe.

In any event, we have other matters that may be cleared for action as they present themselves and as the leadership can contrive it. But two things we have to do are the continuing resolution conference report and the debt limit.

The present short continuing resolution expires tonight at midnight. I have attempted to reach the Speaker, who is not yet in, to ask him to consider our plight in that respect. If we do not have a continuing resolution finished shortly and passed by the House, which must act first, and presented to the Senate today—which I think would be short of a religious miracle—I see no alternative except to consider another short continuing resolution, much as I hate to say that.

I will have a further report to make in that respect after I have had an opportunity to consult with the minority leader and the Speaker of the House and the minority leader of the House.

Mr. President, that is more than I had planned to say today—indeed, I had not planned to be here today.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that today, after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business until 12 noon.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

ORDER FOR RECESS FROM 12 NOON UNTIL 2 P.M.

Mr. BAKER. Mr. President, today being Tuesday, I ask unanimous consent that at 12 noon the Senate stand in recess, in order to accommodate a requirement for caucuses away from

the floor of the Senate, until 2 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that in the time for the transaction of routine morning business, Senators may speak for not more than 5 minutes each, with the exception of the two leaders, against whom no limitation of time will apply.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I ask those Senators who asked for leader time if that would work just as well in morning business time which has now been provided?

I gather that it would.

Mr. President, with that, I am prepared now to yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the Democratic leader is recognized.

SENATE SCHEDULE

Mr. BYRD. Mr. President, may I say the distinguished majority leader is very realistic in his prognosis of the schedule and I find that he is, I think, precisely on point.

The two things that have to be accomplished before we adjourn sine die are the debt limit extension and the continuing resolution conference report.

I will work with the majority leader in an effort to find other matters if at times during the day we see that we are not making progress and need to take up something else that is important. We will on our side attempt to help as much as we possibly can to move things along so that adjournment sine die will be realized as early in the week as possible.

If the distinguished majority leader has no objection, I yield to my friend Mr. EXON.

Mr. EXON. I thank the minority leader.

Mr. President, I am wondering if the majority leader might answer a question or two that I have.

I certainly understand the difficult position that both the majority and minority leaders are in. Therefore, while there are some of us who may have wanted to add things on to the debt ceiling bill, I would hope that my colleagues could reserve as much as possible the practice of putting things on the debt ceiling bill because it seems to me it is going to only cause future problems in working out a schedule.

While we are not doing anything very important then in the meantime I would ask the majority leader if it would be possible to clear Calendar Order No. 952, S. 1407, that is reported and has been languishing on the calendar since June of this year.

I think this is a bill essentially that has universal acceptance in the Senate. I understand we have a hold on that side of the aisle.

I have talked to my distinguished colleague from Missouri, who is in the Chamber, and who had an integral part in passing out this odometer fraud bill, which is a major piece of anticrime legislation. I am wondering if we might get that cleared and get that passed today, if he could enlighten me on that. I suspect his answer will be no. But from his remarks, and I think I understand and appreciate them, we are here under duress, but we are here to carry out our duties so I do not apologize for that. I know that the majority leader and minority leader feel as badly as the rest of us. We are here because we have to be here, so I do not complain too much about that.

Second, is there any preliminary date that the majority leader feels we might adjourn this week or does he plan, if necessary, to go through Saturday and through Sunday? What is his plan for the upcoming weekend so we may have some idea as to arranging the schedules that have been interrupted by all of the Members of the Senate because of the untimely delay on the matters that confront us?

Mr. BAKER. Mr. President, I thank the Senator.

Let me answer his first question first. I will be glad to recheck Calendar Order No. 952 and see what its status is.

There are 68 pages of calendar today and our calendar staff has been working very hard to clear as much of that as possible. That will become very difficult in the closing moments of the session. But I will take another look at that matter and see what might be done with it.

On the question of the date, I told the minority leader earlier in private conversation that I really am not yet prepared to make an estimate. So much depends on when the conference committee meets again and how fast they can proceed. Then the House of Representatives must act first on the continuing resolution and then we must act and then we have to find out with some assurance whether or not the President will sign the resolution or whether he is going to veto it, and all of those things are so interdependent, each upon the other, that I really cannot make a prediction right now except to say that I think it is unlikely we are going to get out of here before Thursday.

We might make it Wednesday night, but it would be a dramatic and swift set of moves by Congress if that were to occur.

I think Members probably are going to have to assume it will be later than Wednesday, but I will consult with the minority leader on that as soon as I have information and I will try to have an announcement to make further, and I will make a further announcement as circumstances warrant it.

Mr. EXON. I thank the majority leader.

I am wondering if my friend from Missouri could enlighten us any at this time on Calendar Order No. 962, S. 1407, with which he is thoroughly familiar and of which is a strong supporter.

Mr. DANFORTH. Mr. President, I am familiar with it and I am attempting to track down the source of the Senator's problem, and we will discuss it with the Senator from Nebraska forthwith.

Mr. EXON. I thank the Senator.

Mr. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The minority leader has 4 minutes remaining.

Mr. BYRD. Mr. President, I ask unanimous consent that I may yield those 4 minutes to Mr. PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent to use those 4 minutes in connection with the 5 minutes that I will later have during the morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

The Senator from Maryland is recognized.

HOWARD H. BAKER, JR.

Mr. MATHIAS. Mr. President, the milestones of life not only mark our passage, but also remind us to take stock that we may know what we have spent, what we have gained and what we have left. The adjournment of Congress, sine die, is such a milestone that reminds us to pause for a moment of reflection.

The realization that HOWARD BAKER is taking his leave from the Senate is the sober fact that we must confront. The question of how we shall manage without him springs to mind. But before the answer to that question is apparent, we are warmed by the awareness of how fortunate we have been.

When the Senate is blessed with a successful leader, each Senator's life is

better, more satisfying, less hectic, and less frustrating. That is a desirable condition, but does not alone mark a successful leader. It is the work of the Senate, not the convenience of the Senate that is appraised.

It is by this standard that I would evaluate the years of leadership that HOWARD BAKER has given the Senate. Even the most cursory summary reveals the unusual nature of this political experience. It calls to mind the observation made by Woodrow Wilson:

In what then, does political leadership consist? It is leadership in conduct, and leadership in conduct must discern and strengthen the tendencies that make for development. The legislative leader must perceive the direction of the nation's permanent forces and must feel the speed of their operation. There is initiative here, but not novelty; there are old thoughts, but a progressive application of them.

HOWARD BAKER fulfills this perceptive definition of political leadership so completely that it is almost as if President Wilson had anticipated him.

As a Republican in a border State, HOWARD BAKER very early learned to read the vital signs and to determine the basic trends of people and events. Against all the odds, he applied this political instinct so successfully that he became the first elected Republican Senator in the history of Tennessee. Having achieved that victory, he then consolidated his gain by a combination of competence and knowledge that goes beyond the native shrewdness that propelled his rise. He thinks old thoughts and gives them progressive applications. He has recognized that restraint is important as well as activity. Again, he meets the Wilsonian standard:

Let us fairly distinguish . . . the peculiar and delicate duties of the popular leader from the not very peculiar or delicate crimes of the demagogue. Leadership, for the statesman, is interpretation. He must read the common thought, he must test and calculate very circumspectly the preparation of the nation for the next move in the progress of politics. The nice point is to distinguish the firm and progressive popular thought from the momentary and whimsical popular mood, the transitory and mistaken popular passion.

One of the most astounding things about HOWARD BAKER is his wealth of information and knowledge. His reserve in flaunting these resources is unusual. But in casual conversation or relaxed exchanges it shines through the cloak of modesty that he wears so well. It is clear that he knows more about atomic and nuclear energy, civilian, and military, than anybody now serving in the Congress, he can speak the arcane language of central bankers, he understands both the constitutional foundation and the political structure of the civil rights movement. But he also likes the landscapes of Capability Brown and has very definite opinions about the restoration of the Capitol. His camera has become famous, but it is the discriminating and observant eye being the lens that is responsible for the pictures. He volunteers very little of this deep and wide reservoir of knowledge, but it is always on tap. His friends make a mistake when they do not call upon him to use it and his adversaries err when they forget about it.

This is the sort of remarkable man who should be remembered in Government, not because it will add much to his own self-esteem, but because it is an example for others to emulate. To ensure that his career is recalled beyond the memory of those with whom he worked it would be appropriate to associate his name with a part of the fabric of the Capitol. No place could be more fitting than the rooms in which he himself exercised his powers of leadership, the office now reserved for the Republican leader of the Senate. HOWARD BAKER has a very personal affection for these rooms and has seen to their maintenance and care with a full appreciation of their historic character. He boasts that their windows have the best view in Washington, in spite of the contention of Ronald Reagan that it is only the second best.

I, therefore, shall introduce today a resolution to designate room S-230 in the U.S. Capitol as the Howard H. Baker, Jr., room. In accordance with the precedents of the Senate, which HOWARD BAKER, of all people, would not want to violate, I shall not press for action in this session while he is still a Member of the Senate. I shall, however, renew this proposal in January and hope that it will have the unanimous approval of the Senate.

Mr. President, I send a copy of the resolution to the desk on behalf of myself and Mr. MOYNIHAN and I ask unanimous consent that it be held at the desk for the rest of the day so that others may be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution reads as follows:

S. RES. 476

Resolved, That the room S230 in the United States Capitol Building is hereby designated as, and shall hereafter be known as, the "Howard H. Baker, Jr., Room".

WILL THE CONGRESS DISHONOR THE UNITED STATES?

Mr. PROXMIRE. Mr. President, the economy may be about to slide into a period of slow growth and very possible a recession. In the third quarter of 1984 the "flash" estimate reflects an overall economic growth of only 3.8 percent. At that level, revenues will rise much more slowly than they have over the past 2 years since the trough of the recession in November 1982. During that period growth exceeded 8 percent and revenues increased but still fell far behind the increase in Federal spending. If growth stays down below 4 percent, revenues will no longer rise as rapidly. But Federal Government spending will continue on its expansionary path. It will do so regardless of which of the two major Presidential candidates wins election on November 6. In 4 years President Reagan has presided over an increase in Federal spending at about the same rate as President Carter. There is little evidence that he would slow the rate of spending down significantly in a second term. Indeed, he is intent on a substantial increase in military spending, including a brandnew antimissile or "Star Wars" program that will cost just for beginning research $24 billion over the next 5 years and eventually may cost a trillion dollars. Also, since the exuberant recovery has stalled out and unemployment is about the same now as it was in May, it is unlikely the President can make any significant, net economies in spending on such programs as unemployment compensation, food stamps, welfare, and the vast array of other Federal expenditures for the needy. There is also a real likelihood that the economy could suffer a recession in the next year or so.

How would the Congress respond to a recession? Do we then increase taxes to keep the deficit from soaring out of sight? Or do we cut taxes to give hard-pressed businesses and individuals the badly needed respite from falling income. In a recession, even if we increase tax rates we can expect Federal revenues to fall. The more we increase taxes in a recession the fewer people will be working. Those who do work will receive less income. Businesses will suffer diminished profits. So what will the Congress do under such circumstances? It will probably not increase taxes. It is much more likely to cut taxes. If so, then what happens to the Federal deficit which is already close to $200 billion? Would it rise to $300 billion or $400 billion? And what would be the ultimate effect on the economy of such a huge increase in Federal deficits? The answer is not easy because we have never experienced this kind of continually huge and increasing deficit before. The net effect on the economy would not be simple. It would be complex and it would be conflicting. Such a supermonster deficit might increase growth in the economy. It could also wreck the economy. A deficit of that size normally would have a tremendously stimulative effect on the economy. The expansionary effect would work this way: It would tend initially to slow down the rise in unemployment. It would increase consumer demand, retail sales and industrial production. It should also increase after-tax personal income. So it should go a long

way to put the country back on the road to recovery.

All that has been true of big deficits until now. But now with the already colossal overhanging and exploding national debt already in excess of $1½ trillion, deficits of $300 and $400 billion will not only have some stimulative effect on the economy, they will have an immense slowdown effect on the economy. How can this be? How can such a colossal program of leaving more in the economy than it takes out possibly slow the economy down? The answer is that every penny of that deficit has to be borrowed and it has to be borrowed by a Federal Government that is already on its way to being $2 trillion in debt. Borrowing all that credit certainly will drive up the price of credit, which is interest. High interest rates will—as they always have—cripple home building. They will sharply slow auto buying. They will stop farmers from buying tractors and combines and other farm implements. The big interest rate sensitive sector of our economy will slow to a crawl. Employment, wage income, and profits in those industries will all diminish.

Worst of all, the debt will grow like some horror movie monster that swallows up everything in sight. Here's how: The huge deficit will drive up the cost of servicing the national debt in two ways. It will drive up interest rates. It will also shove the debt on which the interest is computed to ever higher levels. Unlike every other kind of expenditure, we cannot cut interest on the national debt no matter how strong our determination. We can cut everything else. We can cut military expenditures. We can cut spending for health and education, for nutrition, for the FBI, for food stamps, and legal services. We can end our environment protection programs, and highway construction. We can stop all Government building. But we cannot cut the cost of interest on the national debt by a single penny. No matter how we cut other spending programs, no matter how much we increase tax rates, that colossal and exploding interest cost will assure us of one massive deficit after another. So we will suffer a continuously and explosively growing national debt. Oh, of course, we can repudiate it. We can declare bankruptcy. We can become a deadbeat nation. We can declare that the full faith and credit of the Government of the United States is of no value. But we will not do that.

All of this means that we are not just in a painful dilemma that will require unusual political courage on the part of elected Federal officials; not just that we have to slash and sacrifice good programs—which most of us favor; not just that we have to increase taxes sharply against the will of the people who elected us. It means we have to act decisively and now. If we fail to act, the problem may literally become insoluble. The United States may be forced to the most ignominious disgrace of all. This great country may have to repudiate its word and its honor.

ARMS CONTROL VERIFICATION DEPENDS ON ANTISATELLITE TREATY—NOW

Mr. PROXMIRE. Mr. President, what is the one arms control agreement that both Americans and Russians should be able to agree is absolutely critical to the prospect of arms control agreements in the future? Answer: An agreement to prohibit testing, production and deployment of antisatellite weapons. Why? Because both the United States and the Soviets Union have progressed dangerously close to a point where either superpower could shoot down the other's high altitude space satellites. Why is an agreement to stop these programs before they proceed further vital to the future of arms control? The answer is that satellites, especially high-altitude satellites, are literally quintessential to arms control verification. Almost all of the most reliable information we have about military developments in the Soviet Union and especially about the testing, production, and deployment of nuclear weapons comes from satellites. Former Central Intelligence Agency Director, William Colby, has testified before the Senate Defense Appropriations Subcommittee that no other intelligence source we have or are likely to have in the foreseeable future is nearly as accurate, as detailed, or as reliable are our satellite reconnaissance. And this opinion comes from a man who headed the agency whose preeminent responsibility was to develop and interpret intelligence about the Soviet Union. Of course, the Soviets also use satellites to acquire intelligence about our military force.

Why is satellite reconnaissance more critical for the United States than for the U.S.S.R. Here is why: Ours is an open society. The Russians can find out a great deal about our military by reading our free press, subscribing to our military and scientific journals, and studying congressional hearings. The United States has no corresponding access to information about the Soviets. And the satellites provide an astonishingly comprehensive and detailed blueprint of Soviet military activity and progress.

Unless the United States and the Soviet Union reach an agreement to stop testing antisatellite weapons and reach it soon, each side will within a short time have the capacity to shoot down the other's satellites and in the process to poke out the eyes and blind the effective intelligence capability of the other side. And, Mr. President, when I say blind, I mean blind. Oh sure, we could secure scattered reports from refugees, from espionage agents, from radio eavesdropping, and from careful scrutiny of the meager and often unreliable data published by the Soviets about their military activity. We could determine what the Soviets want us to determine about their nuclear weapons buildup. But any effective kind of arms control verification would be virtually impossible. And with the loss of verification we can literally kiss arms control goodbye.

As so often happens with the Reagan administration when it comes to arms control, the administration argues that we should not negotiate for an antisatellite treaty with the Russians now. They say that we can consider antisatellite arms control later when we have caught up with the Russians. Mr. President, that argument makes no sense—none. The fact is that we have not only caught up with the Russians in antisatellite technology, we are way ahead of them. In an article in the September 14 New York Times, Tom Wicker points out that:

> In the opinion of qualified non-government authorities, the U.S. is not behind the Soviet Union in ASAT technology. For one thing, the air-launched ASAT scheduled for testing against a target in space would be far superior to the cumbersome, ineffective Soviet ASAT the Pentagon labels "operational."

Both superpowers presently have the power to destroy satellites in space. But, up until now, neither superpower has developed, let alone tested, antisatellite weapons that could find and destroy high-altitude satellites, those operating 22,000 miles from Earth. As Wicker points out in his New York Times article, these high-altitude satellites are essential to nuclear deterrence because they warn of missile launches and give both sides reassurance they are not under attack.

Mr. President, if the purpose of our defense spending is to prevent war and preserve the peace, then we should not spend our resources to develop weapons that endanger the peace, when we can and should negotiate an agreement that neither superpower would test or produce or deploy such weapons. This is particularly true of antisatellite weapons that would destroy the very heart of arms control verification. It is especially true of antisatellite weapons because right now we truly negotiate from strength on these weapons. We are ahead of the Soviet Union. They know it. The fact that they are so ready to negotiate makes it clear that they know that we are ahead.

Mr. President, the Reagan administration has a golden opportunity to prove its genuine interest in arms control by promptly negotiating with the Soviet Union to agree to no further

testing of antisatellite weapons by either side. If the administration fails to do this, and if both sides proceed as they certainly will in the absence of such a treaty, we can expect to hear from now on that we cannot rely on any arms control agreements because the Soviet Union has the capability of destroying verification of whatever agreement we wish to make at will by simply shooting down the satellites on which arms control verification squarely depends.

Mr. President, I ask unanimous consent that the article from the New York Times of September 14, 1984, by Tom Wicker, entitled "Weapons in Space," be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WEAPONS IN SPACE

(By Tom Wicker)

Walter Mondale is ready to enter a moratorium on the testing of new space weapons but the Reagan Administration still refuses to do so. Secretary of State Shultz now says he'd be willing to talk about it, if arms control negotiations were resumed, but that only suggests that the Administration still is determined to test an antisatellite (ASAT) weapon this fall.

Yet, in the opinion of qualified nongovernmental authorities, the U.S. is not behind the Soviet Union in ASAT technology. For one thing, the air-launched ASAT scheduled for testing against a target in space would be far superior to the cumbersome, ineffective Soviet ASAT the Pentagon labels "operational."

More important, a U.S. interceptor fired from Kwajalein Island in the Pacific located and destroyed a Minuteman warhead in space last June 10. That was called a "ballistic missile defense experiment," but it also demonstrated effective ASAT capability, as Richard Garwin and Kurt Gottfried wrote in The New York Times on July 12, 1984, "a projectile that can find a warm warhead against the cold background of space could, more easily, demolish a low-orbit satellite which is a larger and more fragile target."

Mr. Garwin, a physicist at I.B.M., and Mr. Gottfried, a professor of physics at Cornell, are authorities on military space programs. In a letter to me, they emphasized that the Army's June 10 test "demonstrates that the U.S. already has an ASAT capability at least equivalent to the Soviets' . . ." so that no further testing is necessary to redress an imbalance in Moscow's favor.

The same point was made in a Washington Post article (Aug. 28, 1964) by Harold M. Agnew, formerly director of the Los Alamos Scientific Laboratory, now president of GA Technologies Inc. "Any missile," he wrote, "that can carry a ton or so of payload, travel several thousand miles, and land within a few hundred yards of a target can very readily be programmed to detonate at a point in space with the same accuracy." That means that either U.S. or Soviet ICBM's can be used as ASAT's, with nuclear or conventional warheads.

Mr. Agnew argued that since existing ICBM's give both sides ASAT capability, no "additional systems are required," but also that "no treaty against such a capability would be meaningful." Mr. Garwin and Mr. Gottfried, on the other hand, remain strong advocates of a treaty banning all further tests of space weapons, as a means of preventing either superpower from developing an ASAT that could quickly destroy high-altitude satellites (those operating mostly at about 22,000 miles from earth).

The Garwin-Gottfried argument is that high-altitude satellites are essential to nuclear deterrence because they warn of missile launches and give both sides "continuous reassurance" that they are not under attack. If either superpower could successfully attack the other's high-altitude satelities, blinding the victim against nuclear attack, either side might be led to do so out of fear that the other would do it first. Thus, deterrence would be disastrously undermined by high-altitude ASAT weapons.

Lower-orbit satellites are not vital to deterrence; so the fact that both sides now have low-altitude ASAT capability, based on ballistic missiles, does not threaten deterrence, as Mr. Garwin and Mr. Gottfried see it.

But they want to ban further space weapons tests because the laser and particle-beam systems envisioned in President Reagan's "strategic defense initiative"—the so-called "Star Wars" defense—could quickly "destroy a high-altitude satellite by heating it for a new minutes." This could be accomplished more easily, they believe, than the same weapons could destroy Soviet missiles in flight because "the satellite is always there, while missiles are fired without warning and are vulnerable for at most several minutes."

Laser and particle-beam weapons moreover, even if successfully tested only against low-orbit targets, "would provide a high-altitude ASAT capability without further tests." Therefore, Mr. Garwin and Mr. Gottfried argue that a treaty banning further tests of any new space weapons at any altitude is a goal "far more important to U.S. security than the improvement of our low-altitude ASAT's."

A self-enforcing moratorium on weapons tests in space could be an important first step toward such a treaty. And if President Reagan really wants to show Foreign Minister Gromyko "that the United States means no harm," accepting such a moratorium could be just the thing.

VIOLATIONS OF HUMAN RIGHTS IN CHINA: THE NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, Amnesty International has just issued a comprehensive report on abuses of human rights which are now taking place in the People's Republic of China. Their 132-page report cites evidence of mass executions, of political prisoners held for years without trial or convicted after summary proceedings, and of ill treatment of prisoners.

Amnesty International was unable to estimate the number of political prisoners that were being held by Chinese authorities but the litany of abuses reported here will sound familiar to anyone who has followed the mistreatment of Chinese citizens that has accompanied the Communist regime's 35 years of control:

Political trials behind closed doors; in some cases, prisoners' families did not even know trials were taking place;

Prisoners manacled day and night for days and weeks at a time, beaten or made to stand without moving for 24 hours without food; and

A suspect anticrime campaign that looks like a cover for suppression of political dissent that employs summary proceedings leading to the death penalty.

None of these tactics of repression are new, Mr. President, nor completely unexpected by a regime that butchered millions of its own citizens upon seizing power.

But this report by Amnesty International reminds us, Mr. President, that we must not forget the reality that this regime represents as the so-called New China tries to put its best public relations foot forward. Our own fascination with China cannot permit us to ignore or sweep aside such gruesome violations of human rights.

While none of the actions described in Amnesty's report appear to fit the very narrow definition of genocide contained in the Genocide Convention, this Senator believes that the United States should be in the forefront of efforts to end these abuses now underway in China. And the reality is that we cannot successfully protest China's unconscionable actions if our own record of action on international human rights is open to question at all.

Ratification of the Genocide Convention would go a long way toward strengthening our hand in these matters and to enable us to resume our rightful place at the head of the Western nation's human rights movement. Time is growing short in the 98th Congress but I hope my colleagues will join with me in seeing the Genocide Convention ratified before the close of this Congress, and, once the Genocide Convention is ratified, to join me in prompting the administration to take the lead in protesting China's human rights abuses.

Mr. President, I yield the floor.

SENATOR HOWARD BAKER

Mr. DANFORTH. Mr. President, the Senate's work load is infinite, its rules permissive, its Members often difficult. Bringing some order out of what verges on chaos requires the highest form of leadership.

During the past 4 years, the efforts of HOWARD BAKER have made the Senate's many achievements possible. Day after day, he has bridged seemingly irreconcilable differences so that the work of the Senate could move forward. He has an uncanny sense of timing, knowing when pressure can steer legislation in a desirable direction, and knowing when to let events seek their own course. He can diffuse legislative landmines, cool the most heated tempers and create a sense of

common purpose out of previously intractable positions.

HOWARD BAKER's personal qualities are the basis of his leadership skills. He has an exceptional mind, yet his intellect is warm and unassuming, not arrogant or ostentatious. He has a sense of humor which brings light to the Senate's dark moments. He can laugh at himself, but he never belittles others. In this place of immense egos, he conducts himself with modesty. He gives of himself for the good of the country.

Before the 1980 election, I supported HOWARD BAKER for President of the United States. I am proud of that. I do not know that he will ever be President. Perhaps he is not pushy enough to get there. But I do know this. He has been a great leader of the Senate—a great servant of this country. The Senate will suffer for his absence, and I will miss my leader and my friend.

Mr. President, there is but one fitting, parting word for HOWARD BAKER. It is a paraphrase of the immortal statement of his associate and pilot, Lonnie Strunk: "Adios, HOWARD BAKER, adios."

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

TRIBUTE TO SENATOR HOWARD BAKER

Mr. GORTON. Mr. President, at the end of this calendar year, I will have served for 26 consecutive years in elected political office. During that time, I have been singularly blessed with the colleagues I have met and with the people I have come to know. I have worked with a group of intelligent, public spirited, dedicated, and hard-working men and women in the Washington State House of Representatives, among the State Attorneys General of the United States, and here in the U.S. Senate. Yet, I do not believe that anyone of them would feel envy or disagreement with my statement that the most remarkable and most memorable of all of the men and women with whom I have served is the majority leader of the U.S. Senate, HOWARD BAKER.

Sharply contrasting views, strongly held and differing positions, and intense debate are the nature and the purpose of a legislative body, including, perhaps most preeminently, the Senate of the United States. Indeed, if all of the 100 Members of this body agreed with one another on all major issues, there would be no need for a Senate of the United States, nor a purpose for its existence. Yet, HOWARD BAKER has operated to facilitate that exchange of opinion, to diffuse conflict with his wit and his humor, and to see to it that Members of the U.S. Senate debate issues and not personalities. Time after time in our 4 years here together, when debate seems to have left the issue and to be debate for debate's sake, the majority leader has come to the floor and, with a careful comment, a show of patience, a willingness to listen to all sides, has put the Senate of the United States back on course.

Perhaps one of the most remarkable tributes to his qualities as an individual and as a leader is that the love and trust which is directed toward him comes almost equally from members of his own party and from members of the Democratic Party.

During the course of a dispute on the floor, time after time I have observed half a dozen members of both parties surrounding the majority leader asking for his views, asking for his help, with the implicit trust that he would provide it fairly and objectively to all. Courage is sometimes defined as grace under pressure. No person exemplifies courage pursuant to that definition more than HOWARD BAKER, a man constantly under pressure, yet constantly gracious.

Wisdom as well is one of his qualities, both in person relationships and in the way in which policies are made and are chosen. No Member of this body has failed, after asking Senator BAKER for advice on an issue, to come from that conversation with a greater depth of understanding about not only the issue itself but about the tactics which deal with it.

Yet, if I were to attribute any one quality to our retiring majority leader which stands in my mind above all others, it would be the quality of patience. HOWARD BAKER is certainly the most patient individual I have ever met, dealt with, or observed in the political world. At times when I, Mr. President, and you, I am sure, are simply consumed with frustration and sometimes with anger at what we feel to be the unreasonable demands of some of our colleagues, the majority leader has dealt with those problems with that greatest of all qualities, patience. His patience almost without exception ends up providing the solution to the deeply conflicting points of view, which is a quality which in time leads to an answer to all questions.

So, as he leaves here, and as I reflect on his imprint on me, I hope that it will be a greater appreciation for and a greater attempt to show that quality of patience.

The Senate of the United States is, of course, more than any one individual Member. Beginning in January 1985, the Senate will continue as a vital focal point for the American political debate without the presence of HOWARD BAKER of Tennessee.

His absence, nevertheless, will leave each of us the lesser for not having his daily company, his daily advice, his daily counsel. More importantly, however, HOWARD BAKER will leave each of us the greater and the better, as individual Members of this body, for his willingness to share this part of his life with each of us and with the people of the United States.

APPOINTMENTS

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 98-361, appoints the Senator from Washington [Mr. GORTON] and the Senator from Ohio [Mr. GLENN] as advisory members of the National Commission on Space.

HOWARD H. BAKER, JR.

Mr. DOLE. Mr. President, long ago, a very wise man announced that the right of command was no longer an advantage transmitted by nature; like an inheritance, he said, it is the fruit of labors, and the price of courage.

Now as then, anyone who would presume to lead must be willing to assume the responsibility for change. He must take the risk and shoulder the blame. He must be willing to submerge his own preferences while never yielding his basic principles. He must find some way to weld together the fragments of opinion that surround him, without becoming paralyzed by conflicting views and differing priorities. He must speak the language of his colleagues, while simultaneously raising their sights.

For 4 memorable years, HOWARD BAKER has done all this and more. He has introduced bipartisanship where the national good outweighed mere politics as usual. He has served as RONALD REAGAN's indispensable right hand in channeling the impulses of less government and more freedom into the book of law. He has made even this old institution a little more efficient. And he bequeathed to future Members, as well as students of public policy, an example of leadership that belongs in the company of Clay and Webster and Taft and Johnson.

Every leader leaves his mark, and HOWARD BAKER's imprint on the events of our time is impressive indeed. Large as it may be in the headlines, it will loom still large in the history books. For now, let me simply say what a privilege it has been to work with you, HOWARD. Our paths have crossed often—in the committee rooms, here on the floor, in the snows of New Hampshire.

Our paths have crossed—but never our swords. And I am grateful, indeed, to have had such a commander at the head of our troops. I fully expect HOWARD to refute General MacArthur's dictum about old soldiers fading away—on the other hand, I would not mind if he decided to take up the gen-

ral's example and tell us "he shall eturn."

But whatever the future may hold, he past is magnificently clear. And owever much the Senate of the nited States has gained from OWARD BAKER's leadership, the American people have gained still more. I annot imagine a greater contribution, or a more generous verdict on anyone who makes his life public property. We will miss you, HOWARD. I can only ope that we will also emulate you.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

IMPUTED IMPRUDENCE

Mr. MELCHER. Mr. President, imputed interest rates unwisely and unfairly enacted in the 1984 tax bill is unfinished business that demands the attention of Congress before adjournment. Restructuring the recently enacted statute concerning imputed interest rates that the Internal Revenue Service can require in seller-financed property sales has to be corrected. Only a few months ago—June 29 to be exact—we addressed the inequity concerning imputed interest in the 1984 tax bill. The Senate accepted and the House agreed and the President signed into law some partial corrections in the technical amendment of a monumental invasion of seller-financed property sales contained in the 1984 tax bill.

Nevertheless, what remained in the final version of the 1984 bill, including the modifications in the technical amendment, is enough impractical imputed interest law that will automatically handcuff seller-financed property sales to slow down economic recovery. That is why homebuilders, realtors, small business, and developers have been uniting in a coalition strongly urging Congress to correct the law before adjournment. If the law is not corrected a great percentage of seller-financed property sales will be blocked.

How imprudent this imputed interest, to assume that sellers would unwisely accept financing sales that taxes them on interest they do not receive.

There are two approaches for correction. One would repeal the 1984 provisions, leaving everyone where they were prior to the enactment of that tax bill. This approach has the simplicity of everyone involved knowing what the law is because they have lived with it for the past 3 years.

The second approach would be to raise the exemptions where the new law does not apply, change the formula that IRS could use on those amounts above the exemptions with an easily understood and workable imputed interest, leave assumable loans alone by not causing them to be renegotiated and imputed interest applied, and not saddle small business property sales with partial or total strangulation by inflicting them with stringent unrealistic Internal Revenue Service requirements on imputed interest.

The imputed interest means that whether or not the seller finances the sales contract at an interest rate imputed by the law, the seller's income will be computed as if the seller actually received the higher imputed interest rate as income. To the average American not acquainted with the Internal Revenue Service philosophy on this matter, coupled with the mistakes of Congress in allowing it, this sounds so unconstitutional that they only shake their heads in confusion. The clear result will be that there will be very few seller-financed property sales. That means that any estimate of revenue gained by the new 1984 tax law provisions will likely be greatly overestimated by the Treasury Department, which blithely assumes that the same historic level of seller-financed property sales will continue. That will not be the case because it will be a very rare bird indeed that will find it sensible to sell property on a contract that will make liable the seller for more income tax based on interest income that the seller has never received. Sellers simply will not be able to finance sales on that kind of a basis. Buyers will have to find other types of financing that will doubtlessly result in higher interest, and if the buyers cannot afford to pay the higher interest the sale just will not be made.

As surely as night follows day the Treasury Department estimate of revenue loss of $2.2 billion, if the provisions were repealed, is a false estimate, more worthy of fiction than fact. What Congress must do is straighten out this mess, and we cannot adjourn until that is done.

I shall seek to make the proper corrections with proper exemptions on imputed interest rates in the debt ceiling bill, or any other bill that will reach the House and receive consideration in the House before adjournment. The real question is straightening out idiotic proposals on imputed interest rates that the Treasury Department has snookered through Congress. Sellers and home buyers, farmers and ranchers, small business and developers must have the opportunity for seller-financed property sales so that these sales can continue at interest rates that they can live with. This must be done before January 1 or economic recovery in 1985 will be seriously hampered.

Mr. President, it would be imprudent indeed for Congress to adjourn without correcting the mess on imputed interest rates.

S. 3063 PORNOGRAPHY VICTIMS PROTECTION ACT

Mr. SPECTER. Mr. President, last Thursday, October 4, 1984, I had asked that the text of the bill, S 3063, be printed at the conclusion of my remarks on page 29170. This was inadvertently omitted. I ask unanimous consent that the text of my bill on the protection of pornography victims be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 3063

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Pornography Victims Protection Act of 1984".

SEC. 2. Section 2251 of title 18, United States Code, is amended—

(1) in subsection (a), by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)" and by inserting before the period at the end thereof the following: "or if such person knows or has reason to know that the minor was transported in interstate or foreign commerce for the purpose of producing any such visual depiction of such conduct";

(2) in subsection (b), by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)" and by inserting before the period at the end thereof the following: "or if such person knows or has reason to know that the minor was transported in interstate or foreign commerce for the purpose of producing any such visual depiction of such conduct";

(3) by inserting immediately after subsection (b) the following:

"(c)(1) Any person who coerces, intimidates, or fraudulently induces an individual 18 years or older to engage in any sexually explicit conduct for the purpose of producing any visual depiction of such conduct shall be punished as provided under subsection (d), if such person knows or has reason to know that such visual depiction will be transported in interstate or foreign commerce or mailed, if such visual depiction has actually been transported in interstate or foreign commerce or mailed, or if such person knows or has reason to know that the individual 18 years or older was transported in interstate or foreign commerce for the purpose of producing any such visual depiction of such conduct.

"(2) Proof of one or more of the following facts or conditions shall not, without more, negate a finding of coercion under this subsection:

"(A) that the person is or has been a prostitute;

"(B) that the person is connected by blood or marriage to anyone involved in or related to the making of the pornography;

"(C) that the person has previously had, or been thought to have had, sexual relations with anyone, including anyone involved in or related to the making of the pornography;

"(D) that the person has previously posed for sexually explicit pictures for or with anyone, including anyone involved in or related to the making of the pornography at issue;

"(E) that anyone else, including a spouse or other relative, has given permission on the person's behalf;

"(F) that the person actually consented to a use of the performance that is changed into pornography;

"(G) that the person knew that the purpose of the acts or events in question was to make pornography;

"(H) that the person signed a contract to produce pornography; or

"(I) that the person was paid or otherwise compensated.";

(4) in subsection (c), by striking out "(c)" and inserting in lieu thereof "(d)"; and

(5) by amending the heading to read as follows:

"§ 2251. Sexual exploitation".

SEC. 3. (a) Section 2252(a)(1) of title 18, United States Code, is amended by adding at the end thereof the following:

"(C) the producing of such visual depiction involved the use of an adult who was coerced, intimidated, or fraudulently induced to engage in sexually explicit conduct and the person knows or has reason to know that the adult was coerced, intimidated, or fraudulently induced; and

"(D) such visual depiction depicts such conduct; or".

(b) Section 2252(a)(2) is amended by—

(1) striking out "and" and the semicolon in clause (A) and inserting in lieu thereof "or the production of visual depiction involved the use of an adult who was coerced, intimidated, or fraudulently induced to engage in sexually explicit conduct and the person knows or has reason to know that the adult was coerced, intimidated, or fraudulently induced; and".

(c) The heading for section 2252 is amended to read as follows:

"§ 2252. Certain activities relating to material involving sexual exploitation".

SEC. 4. (a) Chapter 110 of part I of title 18, United States Code, is amended by redesignating section 2255 as section 2261.

(b) Chapter 110 of part J of title 18, United States Code, is amended by inserting after section 2254 the following:

"§ 2255. Civil remedies.

"(a) The district courts of the United States shall have jurisdiction to prevent and restrain violations of section 2251 or 2252 by issuing appropriate orders, including—

"(1) ordering any person to divest himself of any interest, direct or indirect, in any legal or business entity;

"(2) imposing reasonable restrictions on the future activities or investments of any person including prohibiting such person from engaging in the same type of legal or business endeavor; or

"(3) ordering dissolution or reorganization of any legal or business entity after making due provision for the rights of innocent persons.

"(b) The Attorney General or any person threatened with loss or damage by reason of a violation of section 2251 or 2252 may institute proceedings under section (a) and, in the event that the party bringing suit prevails, such party shall recover the cost of the suit, including a reasonable attorney's fee. Pending final determination, the court may at any time enter such restraining orders or prohibitions, or take such other actions, including the acceptance of satisfactory performance bonds, as it shall deem proper. For purposes of this section, a violation of section 2251 or 2252 shall be determined by a preponderance of the evidence.

"(c) Any victim of a violation of section 2251 or 2252 who suffers physical injury, emotional distress, or property damage as a result of such violation may sue to recover damages in any appropriate United States district court and shall recover threefold the damages such person sustains as a result of such violation and the cost of the suit, including a reasonable attorney's fee. For purposes of this section, a violation of section 2251 or 2252 shall be determined by a preponderance of the evidence.

"(d) A final judgment or decree rendered in favor of the United States in any criminal proceeding brought by the United States under this chapter shall estop the defendant from denying the essential allegations of the criminal offense in any subsequent civil proceeding.

"§ 2256. Civil penalties.

"(a) Any person found to violate section 2251 or 2252 by a preponderance of the evidence shall be liable to the United States Government for a civil penalty of $100,000 and the foreiture of any interest in property described in section 2254. The Attorney General may bring an action for recovery of any such civil penalty or forfeiture against any such person. If the Attorney General prevails he may also recover the cost of the suit, including a reasonable attorney's fee.

"(b) If the identity of any victim of an offense provided in section 2251 or 2252 is established prior to an award of a civil penalty made to the United States under this section, the victim shall be entitled to the award. If there is more than one victim, the court shall apportion the award among the victims on an equitable basis after considering the harm suffered by each such victim.

"§ 2257. Venue and process.

"(a) Any civil action or proceeding brought under this chapter may be instituted in the district court of the United States for any district in which the defendant resides, is found, has an agent, or transacts his affairs.

"(b) In any action under section 2255 or 2256 of this chapter in any district court of the United States in which it is shown that the ends of justice require that other parties residing in any other district be brought before the court, the court may cause such parties to be summoned, and process for that purpose may be served in any judicial district of the United States by the marshal of such judicial district.

"(c) In any civil or criminal action or proceeding under this chapter in the district court of the United States for any judicial district, a subpoena issued by such court to compel the attendance of witnesses may be served in any other judicial district except that no subpoena shall be issued for service upon any individual who resides in another district at a place more than one hundred miles from the place at which such court is held without approval given by a judge of such court upon a showing of good cause.

"(d) All other process in any action or proceeding under this chapter may be served on any person in any judicial district in which such person resides, is found, has an agent, or transacts his affairs.

"§ 2258. Expedition of actions.

"In any civil action instituted under this chapter by the United States in any district court of the United States, the Attorney General may file with the clerk of such court a certificate stating that in his opinion the case is of general public importance. A copy of that certificate shall be furnished immediately by such clerk to the chief judge or in his absence to the presiding judge of the district in which such action is pending. Upon receipt of such copy, such judge shall designate immediately a judge of that district to hear and determine the action. The judge designated to hear and determine the action shall assign the action for hearing as soon as practicable and hold hearings and make a determination as expeditiously as possible.

"§ 2259. Evidence.

"In any proceeding ancillary to or in any civil action instituted under this chapter the proceedings may be opened or closed to the public at the discretion of the court after consideration of the rights of affected persons.

"§ 2260. Limitations.

"A civil action under section 2255 or 2256 of this chapter must be brought within six years from the date the violation is committed. In any such action brought by or on behalf of a person who was a minor at the date the violation was committed, the running of such six-year period shall be deemed to have been tolled during the period of such person's minority.".

SEC. 5. (a) The section analysis for chapter 110 of part I of title 18, United States Code, is amended to read as follows:

"CHAPTER 110—SEXUAL EXPLOITATION

"Sec.
"2251. Sexual exploitation.
"2252. Certain activities relating to material involving sexual exploitation.
"2253. Criminal forfeiture.
"2254. Civil forfeiture.
"2255. Civil remedies.
"2256. Civil penalties.
"2257. Venue and process.
"2258. Expedition of actions.
"2259. Evidence.
"2260. Limitations.
"2261. Definitions for chapter.
"2262. Severability.".

(b) The chapter analysis for part I of title 18, United States Code, is amended by striking the item relating to chapter 110 and inserting in lieu thereof the following:

"110. Sexual Exploitation ..... 2251".

SEC. 6. Chapter 110 of title 18, United States Code, is amended by inserting after section 2261 the following:

"§ 2262. Severability.

"If the provisions of any part of this Act or the amendments made by this Act, or the application thereof, to any person or circumstances is held invalid, the provisions of the other parts of this Act or the amendments made by this Act and their application to other persons or circumstances shall not be affected.

"(e) Nothing in this section shall be construed to authorize any order restraining the exhibition, distribution or dissemination of any visual material without a full adversary proceeding and a final judicial determination that such material contains a visual depiction of sexually explicit conduct, as defined by section 2261 of this chapter, engaged in by a minor or by a person who was coerced, intimidated, or fraudulently induced to engage in such sexually explicit conduct."

POSTMASTER GENERAL WILLIAM F. BOLGER

Mr. GLENN. Mr. President, before the 98th Congress adjourns, I want to take a short period of the Senate's time to salute a fine civil servant, William F. Bolger, who at the end of this

ear will call a halt to a productive areer in the Postal Service spanning 4 years.

Bill Bolger, the 65th Postmaster eneral of the United States, worked is way up the ladder from the rank-nd-file and successively more signifi-ant management assignments in the ormer Post Office Department. He, hus, was well aware of both the trengths and weaknesses of that orga-ization. He become a forceful and ersuasive advocate of the Postal Re-rganization Act which established he modern Postal Service, over which e assumed chief management respon-ibilities in 1978.

Having served as the chairman of he Governmental Affairs Subcommit-ee with jurisdiction over postal mat-ers, I can attest to how far the Postal Service has come under his leadership. These past several years have vindicat-d his position in support of the reor-ganization, as well as his confidence, not only in himself but also in the ini-iative and dedication of those who worked under him—more than half a million people.

During Bill Bolger's tenure, the Postal Service has had a surplus in 3 of 5 fiscal years, including the last 2 years in a row. And there are indica-tions that a fourth surplus will be banked for fiscal year 1984. Even more significant, perhaps, is the fact that the Postal Service has received no tax-payer subsidies during the last 3 sur-plus years.

Stable postal finances breed stable rates, and under Mr. Bolger's leader-ship at the Postal Service rates have remained stable, compared to most other products and services. When new postal rates go into effect next year, it will have been nearly 4 years since the prior increase. I would sug-gest that very few products or services have enjoyed such stability in this period of time. This favorable develop-ment, I believe, is largely attributable to innovative work sharing and service concepts that have helped engender an increase in mail volume from 99 bil-lion pieces to more than 130 billion pieces a year. That truly is a stagger-ing amount of mail.

I for one will be sorry to see Bill Bolger leave, and I'm sure that many of my Senate colleagues will agree with me that he is deserving of our thanks for long, dedicated, and effec-tive service. I wish him well in what ever endeavors he undertakes.

THE FUTURE OF THE ST. LAWRENCE SEAWAY

Mr. DIXON. Mr. President, I want to thank my colleague from South Dakota, Senator ABDNOR, and the Sen-ator from New York, Mr. MOYNIHAN, for making their strong presentations on the great need for the Senate to pass water resource legislation.

I also want to thank my good friend, Senator ABDNOR, for accepting the St. Lawrence Seaway amendment pro-posed by the Great Lakes Senators.

Mr. President, the St. Lawrence Seaway is vital to the Nation and to shippers from the Midwest and North Central regions who depend upon the Great Lakes and the St. Lawrence Seaway as their outlet to world mar-kets.

The St. Lawrence Seaway, which is celebrating its 25th anniversary, is an important and intergral part of our total national water transportation system. For the past quarter century, farmers and manufacturers through-out the Midwest have depended upon economical water transportation to ship commodities to international markets. This year, the seaway achieved a signficiant milestone, having handled 1 billion tons of car-goes since 1959, with an overall value of over $200 billion.

We must enable the seaway to con-tinue to be an economical avenue of trade, to reduce our balance-of-trade deficit which is contributing to the flow of jobs out of the United States to other countries, and to assist the economic revitalization of the Mid-west/North Central States which, unlike many other parts of the Nation, continue to bear substantial burdens of unemployment and economic dislo-cation due to the recent recession. Specifically, I call upon my colleagues of the Senate to support legislation that would:

First, authorize appropriations of funds to the St. Lawrence Seaway De-velopment Corporation to cover annual costs of operations and mainte-nance, which are only $9.2 million.

Second, authorize negotiations with the Government of Canada for the purpose of reducing or eliminating seaway tolls.

Third, direct that if the National Commission on Harbor Maintenance, created under Senator ABDNOR's amendment, recommends user charges for the Great Lakes for the sharing of costs by non-Federal interests, then the tolls paid by vessels transiting the seaway and calling at U.S. ports on the Great Lakes should be considered credits against any user charges.

Let me briefly discuss why the seaway is so vital to the Nation as a part of the total water transportation system. Congress authorized the con-struction of the St. Lawrence Seaway on May 13, 1954, with the passage of the Wiley-Dondero Act, also known as the Seaway Act. Construction of the seaway began in 1955, and was com-pleted in 1959, at a total cost of about $470 million, of which Canada paid $336.5 million and the U.S. share was $133.8 million.

Cargoes shipped through the Mon-treal-Lake Ontario section of the seaway increased from 20.6 million metric tons in 1959 to 57.4 million metric tons in the peak year of 1977, an increase of 179 percent or about 9.4 percent annual growth. With the downturn in the world economy, seaway traffic decreased to 42.8 mil-lion tons in 1982, a 3.6 percent annual drop in cargoes from 1977. However, with the beginning of the economic re-covery in the United States in 1983, seaway tonnage increased by 5.4 per-cent to 45.1 million tons. Primary com-modities shipped through the Montre-al-Lake Ontario section of the seaway in 1982 included 13.9 million metric tons of wheat—32.4 percent of total traffic, 7.4 million tons of corn—8.8 percent, 3.2 million tons of barley—7.5 percent, and 2.8 million tons of iron and steel products—6.5 percent.

Since its opening in 1959, the seaway has been the only deep-draft water transportation facility constructed by the Federal Government, within the continental United States, that is re-quired to be self-supporting from the standpoint of operations and mainte-nance. From 1959 through 1982, the United States had collected $160 mil-lion in tolls from seaway users. This amount exceeded by $26.2 million the amount that the United States paid to build the seaway.

Through 1981, the St. Lawrence Seaway Development Corporation had paid back a total of $64.4 million to the U.S. Treasury in debt service pay-ments, along with annually covering all operations and maintenance costs of the two U.S. locks on the seaway. In each of these years, under the Depart-ment of Transportation in the Federal budget, there has been a line item for the St. Lawrence Seaway Development Corporations. However, under the column marked "fiscal year appropria-tion" there has appeared, for each of the past 25 years, a hyphen, meaning the seaway would receive no Federal funds for its operations or for mainte-nance of the seaway.

It is ironic, at a time when the United States is facing a record trade imbalance along with a record deficit in our balance of payments, that users of the seaway are burdened by tolls, which in fact discourage some ship-pers from using the seaway because of the price sensitivity of some commod-ities to transportation costs. Just a few weeks ago, the Commerce Department reported that the U.S. balance-of-pay-ments deficit was a record $24.4 billion in the second quarter of this year. On top of the $19.7 billion deficit in our current account for the first quarter, our total balance-of-payments deficit was $44.1 billion for the first 6 months of 1984. This exceeded the $41.56 bil-lion deficit for all of 1983. Commerce Secretary Baldrige now predicts an overall balance-of-payments deficit of over $100 billion for the full year.

The U.S. dominance of world trade in agricultural products has been withering like corn in a summer drought. Since the late 1970's, the U.S. share of the world wheat market has shriveled from 45 percent to 36 percent. Since 1980, the U.S. share of export coarse grains, such as corn, has fallen from 72 percent to 60 percent. Also of concern has been the decline of exports of our capital goods, generally considered the driving force of economic recovery and expansion. Between 1981 and 1983, our exports of construction equipment, much of which is produced in the Midwest, fell by 63 percent while U.S. shipments of machine tools, another industry vital to the Midwest, fell by 60 percent.

Clearly, steps need to be taken now to reverse these trends, and making our exports more competitive is one important way to accomplish this. Congress can now take steps to ensure the competitive position of our grain exports for future years' harvests. We can take steps to make the Midwest producers of farm implements and machinery better able to compete with those foreign companies that are rapidly cutting into our share of the world market.

Were the Federal Government to appropriate funds to the St. Lawrence Seaway Development Corporation to operate and maintain the seaway, the annual impact would be to increase Federal expenditures by only $9 to $10 million. However, this will be far offset by benefits to U.S. shippers in selling their goods in international markets, increased employment throughout the Midwest and greater tax revenues to the Federal Government. According to an analysis prepared by Quantum Research Corp., based here in Washington, DC, a 2.5-percent increase in U.S. shipments via the seaway would have minimum direct and induced economic impacts of $18 million annually, nearly double the tolls collected by the United States from users of the seaway.

Because of the bilateral nature of the seaway, and our close working relationship with Canada over the past 25 years in operating the seaway, we should initiate negotiations with the Government of Canada to discuss ways to reduce and eliminate seaway tolls, consistent with our international responsibilities.

Furthermore, we should specify, in the event the National Commission on Harbor Maintenance recommends user charges for the Great Lakes, that the tolls paid by vessels transiting the seaway and calling at U.S. ports should be considered as credits against any user charges. This provision is important as it would avoid, or at least minimize, the problem of Great Lakes shippers being burdened with double-payments for both user charges and seaway tolls.

Our House Joint Resolution 567 designated 1984 as the "Year of the St. Lawrence Seaway." The resolution acknowledges the importance of the St. Lawrence Seaway to the economic well-being of mid-Continent North America and the significance of the St. Lawrence Seaway-Great Lakes navigation system in the overall transportation network of the United States. My proposals will have a positive impact upon the economy of the Midwest and improve the competitive posture of shippers from the Midwest agricultural and industrial heartland of the Nation in overseas markets.

RETIREMENT OF HON. JENNINGS RANDOLPH

Mr. GLENN. Mr. President, when the 98th Congress adjourns sine die, an era will end because of the retirement of the distinguished Senator from West Virginia, the Honorable JENNINGS RANDOLPH.

My friend from West Virginia—whose State is a good neighbor to Ohio—is the only sitting Member of either the Senate or the House who was in office during those historical first 100 days of the Presidency of Franklin Delano Roosevelt. Thus, his departure, in a sense, marks the end of the New Deal era. It also marks the end of a remarkable political career, though, I am sure, not the end of JENNINGS RANDOLPH'S contribution to the public life of the United States of America or of his beloved and beautiful Mountaineer State.

The Senator from West Virginia leaves behind an extraordinary record of achievement, ranging from the universal 18-year-old voting age to the Interstate Highway System. He has left his mark upon our land, and upon the public policies by which we govern our affairs, through more than a half century of public service. That, Mr. President, is service above and beyond the call of duty. But JENNINGS RANDOLPH has never shirked the call of duty.

Mr. President, I join all those countless people who salute JENNINGS RANDOLPH upon his retirement from the U.S. Senate. Those of us who reside across the Ohio River from West Virginia, especially those from the Appalachian region of southeast Ohio, have reasons, indeed, to express our thanks and appreciation to Senator RANDOLPH. He has truly been a dedicated public servant and, through it all for more than 50 years, a gentleman.

THE HIGHWAY BILL

Mr. RANDOLPH. Mr. President, earlier today there was discussion in the Senate about the prospects for enacting the highway bill before adjournment. Those prospects frankly are not good.

Last Thursday, the Senate completed action on its version of the highway bill. On Friday we requested a conference with the House and appointed conferees on highways and uniform relocation assistance. The House has declined to appoint conferees or even to discuss with us a way out of this impasse.

The problem of the moment, Mr. President, stems not from highway legislation but from the fact that the House bill includes a title increasing authorizations for urban mass transportation. In the Senate the jurisdiction for that subject lies with the Committee on Banking, Housing, and Urban Affairs. That committee has developed no companion legislation on transit during this Congress and is disinclined to address the subject prior to expiration of existing authorizations in fiscal year 1986.

The House Public Works and Transportation Committee, on the other hand, feels very strongly that the transit programs should be expanded and refuses to meet with us on highway matters alone.

Without placing blame on anyone, I consider this to be a deplorable situation. More than $7 billion of highway construction funds will be denied to our States if some type of highway legislation is not enacted. I remind my colleagues that highway funds for the second half of fiscal 1984—a year which ended a week ago—were never released and the 1985 funds are not available to the States. If the Congress adjourns without doing its duty, it could well be next spring at the earliest before the States can obtain these funds. By that time, important construction projects will have been delayed significantly and completion of the Interstate System pushed even further into the future.

There is little time remaining before we adjourn for the year. We do not have the luxury of seeing which party in this dispute can outwait the other. It is imperative that we reach agreement on a way to release the highway money even if it means deferring some other important issues until next year.

For all of my congressional career, I have been deeply involved in legislation to further our highway transportation system. I sincerely hope that I will not be forced to end my career in this body unable to secure passage of this legislation.

I stand ready at a moment's notice to meet with anyone, at any time, at any place, to devise a method for breaking the logjam and releasing the highway construction funds.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate now stands in recess until 2 p.m.

Thereupon, at 11:58 a.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. BOSCHWITZ].

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, will the Chair please state the pending business?

The PRESIDING OFFICER. The time for morning business has expired.

PUBLIC DEBT LIMIT INCREASE

The PRESIDING OFFICER. The Senate will resume the pending business, which the clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 654) increasing the statutory limit on the public debt.

The Senate resumed the consideration of the joint resolution.

The PRESIDING OFFICER. The pending amendment is the amendment by the Senator from Massachusetts [Mr. TSONGAS].

SENATE SCHEDULE

Mr. BAKER. Mr. President, I indicated earlier today that there are two items which we must finish before we adjourn sine die. This is one of them. The other is the continuing resolution. There are other matters we can and no doubt will take up in the time remaining to us, before our long overdue time for adjournment. I urge Senators to consider that this matter is one of prime importance among the two items that must yet be disposed of before that happy moment arrives.

Mr. President, if, for whatever reason, it does not appear that we can finish the debt limit this afternoon, it would be the intention of the leadership on this side to ask the Senate to proceed to the consideration of a privileged matter, temporarily laying aside the pending business, and that privileged matter is the conference report on OCS revenue sharing.

For the benefit of Senators, I remind them of my announcement earlier today that, in addition to that, it is the intention of the leadership to try to reach the Genocide Convention, also, before we adjourn. Other matters can be taken up and perhaps other conference reports will be taken up, and no doubt other routine matters will be taken up.

At the moment, I wish to make that point and to put the Senate on notice of this situation.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. TSONGAS. Does the Senator have any indication as to whether the highway bill is likely to escape its gridlock?

Mr. BAKER. I say to the Senator from Massachusetts that after we pass the highway bill in this body, in the ordinary course of affairs, we ask for a conference with the House on the disagreeing votes of the two Houses. So far, the House has not agreed to the conference. I hope they will. It is a matter of vital importance to the country, and it is a matter we should dispose of. But my information is that the House has not yet agreed to a conference, and anything that any Member can do to try to prevail on them to go to conference would be greatly appreciated.

Mr. TSONGAS. Senator RANDOLPH is here, but my understanding is that the Senate will not appoint conferees to the mass transit portion of the conference, and for that reason, the House will not meet.

I urge the Speaker to be involved, and maybe the Senator from Tennessee could be involved as well. All the work that Senator RANDOLPH and others have put into this matter for 2 years will be down the drain if it is not resolved.

Mr. BAKER. I am told by staff that we have appointed conferees on both parts of the bill—that is, title I and title II—but that the mass transit portion of the bill was not dealt with by the Senate. The bill was adopted without that section. I do not quite understand, then, why we appointed conferees for that section, but we have. In any event, conferees have been appointed on the part of the Senate for title I and title II.

Mr. TSONGAS. I appreciate that information.

Mr. BAKER. Mr. President, I am prepared to yield the floor. The pending question is the Tsongas amendment. I see the distinguished Senator from Kansas, the chairman of the Finance Committee, in the Chamber, and he is the manager on this side.

I yield the floor.

Mr. DOLE. Mr. President, I hope that the distinguished majority leader will move on to other business. I have a meeting with the chairman of the Ways and Means Committee in the next hour or two, to see what his disposition will be with respect to amendments on the debt ceiling—only the amendment pending but also other amendments that may be offered. That is very critical.

It seems to me that it might be in the interest of the Senate and those of us who would like to dispose of our business to determine in advance what the attitude of the other body might be. I have been told, as I indicated last Friday, that if amendments were adopted, there would be no conference; that the chairman of the Ways and Means Committee would simply send us another extension of the debt ceiling, for a much shorter term.

So I urge the majority leader to temporarily set aside the pending business and perhaps move on to other matters that are of some concern.

Mr. BAKER. Mr. President, the chairman of the committee makes a good point. I have no desire to leave this resolution. As I have already indicated, we have to do it before we go out. But if we are not prepared yet to deal with this question or the entire issue, I believe the time of the Senate might be better spent on something else.

I have not yet had an opportunity to consult with the minority leader on this, but I am prepared, if the parties want me to do so, to temporarily take us off the debt limit and put us on the OCS revenue sharing conference report, which is the conference report to accompany S. 2463. I do not now do that, but I will be ready to do that after I consult with the minority leader and other Senators.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, while we complete the clearance with the minority leader on proceeding to the conference report, I am told that there is a need for morning business; and for fear that it may involve this speaker, I assure Members that I will leave the floor instantly.

I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 2:25 p.m., under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

RETIREMENT OF SENATOR HOWARD BAKER

Mr. RUDMAN. Mr. President, I have found a sure way to get the majority leader off the floor of the U.S. Senate. He is departing because I will address a few words to this Chamber this afternoon about him. As we all know, he is nearly at the end of a very distinguished career.

Mr. President, I do not intend to take up much of the Senate's time today. I realize that there is still important business to which we must attend. I also realize that what I am about to say comes as no great revelation to my colleagues and to those who

follow our proceedings closely. However, I cannot permit the 98th Congress to come to a close without taking a few minutes to publicly acknowledge the efforts of an individual whose patient, yet forceful, leadership has guided this institution and served us all well during the past 4 years. Indeed, I know that I speak for many of my colleagues when I suggest that HOWARD BAKER has the respect and admiration of every Member of this body. During his tenure as majority leader he has moved to strengthen the Democratic processes in the Senate, provided for a fair and open exchange of strongly held viewpoints, and ensured that all such opinions are accorded the utmost respect.

He has reaffirmed our belief that men of integrity, simply by setting an example, can influence the resolution of difficult issues in an orderly and honorable manner.

It is not my intention today to launch into a lengthy discussion of HOWARD BAKER's distinguished public career, as we are all well aware of the details. Rather, I would like to take a moment to suggest that as we attempt to take the measure of a public man, we consider not only what that person has accomplished but also how he has done it. Having spent a good part of the past 15 years in public life, I am increasingly concerned over the quality and level of our public debate. Put simply, I do not think we listen to each other enough. Our rhetoric gets too strained, our voices too loud.

In doing so, I think we lose sight of the important qualities of our Democratic process—the right of each to have his or her voice heard, their point of view considered, and the need for diversity and exchange.

It is the great accomplishment of HOWARD BAKER that he is a party leader whose civility and decency make him other than a partisan. His deliberate leadership style ensures that reason will not succumb to the passions of debate. This has been especially true in this body, where leading a diverse, competitive group of disparate souls would strain the patience of even the most gentle of men.

Yet, lead this body is precisely what Senator BAKER has done. As the debate has raged around him, his fairness, his dignity and his intelligence has kept chaos within bounds, temper within limits, and made progress possible. Ideology to one side, HOWARD BAKER's grace and equity and decency has meant much to the Senate he leads and the country it serves.

He has elevated the role of politician and proven that to be effective, you do not have to yell louder or more frequently than the next, but rather that political advancement is possible if one acts also on the basis of reason and compassion.

In closing, I would like to add one personal note. Four years ago I stood on this floor a freshman Member of the Senate undergoing a rite of passage as I prepared to deliver my maiden speech. I will never forget the Senate majority leader's kind remarks. I believe it only proper that as we witness another rite of passage—the departure from this body of a unique and very special leader—that we acknowledge his tremendous contributions to this country. Said simply, there is no man whose counsel and friendship I cherish more. He is, indeed, a very unique person. And, while this historic Chamber will soon be without him, his presence will always be felt. HOWARD BAKER may be succeeded; but he will never be replaced.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NICKLES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO HOWARD BAKER

Mr. NICKLES. Mr. President, it is with great pleasure that I pay my tribute to a good friend and colleague, the majority leader, HOWARD BAKER.

I, as well as all of our colleagues and associates, have a great deal of respect for HOWARD BAKER as a person, as a Senator, and as a leader in this country.

For the last 4 years he served as majority leader in the Senate. He has worked well as a leader in this country, working well with the White House, working well with the leaders in the House of Representatives, and working well to lead a Senate of 100 Senators with egos which are very large and with agenda which are quite divergent.

That is a difficult task and one that I think he has managed quite well.

HOWARD BAKER, these last several years, has treated everyone fairly and I think has earned the respect of all the Members of the Senate. He has shown and exerted a great deal of peace, a great deal of patience, and in a body that sorely lacks both. He has shown a lot of integrity, a lot of ingenuity. His word is as good as gold, and he does get things done.

Generally, he has been kind. Also, the little giant from Tennessee, when he is angry, is 10 feet tall. He stands tall, I think, in the tradition of great Senators.

I am grateful to have had the opportunity of serving with HOWARD BAKER. I think the people of Tennessee are very fortunate indeed to have had him represent them as their Senator for the last 18 years, and I know the people of this country have been fortunate to have as great a statesman as HOWARD BAKER in the U.S. Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, is the Senate still in morning business?

The PRESIDING OFFICER. The Senate is in morning business.

EXPANDING THE AFGHAN WAR: A DANGEROUS DEVELOPMENT

Mr. BYRD. Mr. President, many of my colleagues read the front page story in the Sunday, October 7, Washington Post, describing the attacks on Pakistani villages by the Soviet-backed Afghan Government. These are raids on refugee settlements where perhaps as many as 3 million Afghan men, women, and children have fled following the destruction of their farms and villages during more than 4 years of Soviet occupation and barbarism. These refugee camps are also home to some of the thousands of courageous freedom fighters who battle that Soviet aggression.

In a vain effort to destroy the Afghan's compelling drive for freedom and self-determination, the Soviets and their puppets in Kabul have begun these ruthless attacks on refugee settlements. Since they were unable to kill or maim these people in Afghanistan, they are willing to cross into another country to try and finish the deed. Make no mistake; the Soviets are not only after the Afghan resistance fighters. They are after the civilians as well because the Soviets appreciate that, to control Afghanistan, they must destroy every Afghan they cannot threaten or co-opt into compliance with Soviet goals.

It is a strange and bitter irony that the Soviet Union which sponsors these raids into Pakistan is the same Soviet Government that murdered 269 defenseless men, women, and children just over 1 year ago. My colleagues will recall that the Soviet regime shot down a civilian airliner because a navigational error led it to stray into Soviet airspace. Now, the Soviets are sending their Afghan puppets into Pakistani airspace in military aircraft for the express purpose of killing people inside Pakistan. Several years ago, the United States provided the Government of Pakistan with 40 of the most modern fighter planes in the

U.S. arsenal, along with an integrated air defense system. Thus equipped, the Pakistani Government is in a position to secure its border with occupied Afghanistan. The events of the past several weeks should convince the Government of Pakistan—if it needs such evidence—that the threat to its security comes from the Soviet Union, not from traditional rivalries on the subcontinent. I believe the Pakistani Government understands this reality, and will act accordingly.

I very much hope that the Soviet leaderships will reflect on the consequences of this new and dangerous policy. If the Soviets cannot successfully prosecute a war of occupation inside Afghanistan, they are foolish to imagine that they can end the resistance by reaching into the sovereign territory of a neighboring country. If the Soviets are dissatisfied with the reality of Afghan refugees and the presence of the freedom fighters, then the answer is simple. The Soviet Union should engage in a negotiated withdrawal from Afghanistan. If the objective of the Soviet occupation is to produce stability on the Soviet's southern border, then it must now be apparent that the way to achieve that goal is to leave Afghanistan to the Afghans, and to seek peace with them over the conference table; not at the end of a gun barrel. Otherwise, no amount of repression and no amount of butchery will guarantee stability. And any attacks against Pakistan can do nothing but increase the risk that Soviet adventurism in South Asia will escalate the conflict.

Mr. President, I ask unanimous consent that the Washington Post article of October 7, 1984, entitled "Rebels in Pakistan Fear New Attacks" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REBELS IN PAKISTAN FEAR NEW ATTACKS

(By William Claiborne)

TERI MANGAL, PAKISTAN.—The picturesque Kurram Valley on the tense border with Afghanistan is bracing itself for new Afghan Air Force bombardments nine days after this remote guerrilla staging base was rocked by nighttime explosions that killed 32 insurgents.

Although some questions have been raised about the source of the explosions that destroyed several guerrilla hostels in a crowded bazaar here on Sept. 27, Pakistani officials and guerrilla leaders regard Teri Mangal as a prime target of Afghan Air Force jets, and witnesses say they are sure the blasts occurred during an air raid.

Late last week, Afghan rebels loaded pack horses with artillery shells and other supplies for reprisal raids against Soviet and Afghan troops in adjacent Paktia Province of Afghanistan. They said they expected that their successes against the forces of Afghan President Babrak Karmal would result in a new wave of cross-border air raids into the Pakistani territory that is openly used by the insurgents as a sanctuary.

The bombing and retaliation raids illustrate how Pakistan has been drawn unwillingly into the fighting between Afghan rebels and the armed forces of that country's Soviet-backed government.

The Moslem rebels said they doubted whether the conventional Pakistani air defense guns surrounding this border outpost would be effective against Soviet MiG fighter-bombers. However, they added that they intended to continue their attacks in Paktia, where western diplomatic sources estimate that two regiments totaling 12,000 to 14,000 Soviet troops have been deployed in an effort to stem cross-border guerrilla raids.

This outpost was shelled and bombed at least nine times between Aug. 13 and 24, and there have been frequent air strikes against other villages in this rugged Pathan tribal district that lies only about 50 miles from the Afghan capital of Kabul.

Teri Mangal, about 110 miles west of the Northwest Frontier Province capital of Peshawar, is at the tip of a finger of Pakistani territory that juts deep into Afghanistan near where Paktia and Nangarhar provinces meet. A western diplomat in Islamabad referred to it as the "Parrot's Beak," an allusion to the small salient in Cambodia that was used as a sanctuary by North Vietnamese forces during the Vietnam War.

Pakistani officials say there have been more than 40 shelling and air bombardments of Pakistani territory, resulting in more than 130 deaths. In August alone, they said, 54 persons were killed.

Also citing frequent violations of Pakistani airspace by Afghan Air Force warplanes, Foreign Minister Yaqub Khan told the U.N. General Assembly Monday that "Pakistan has so far acted with restraint, and it hopes that the concern of the international community over the continuation of such attacks and their dangerous consequences would compel those responsible to desist from further aggression."

Because of the remoteness of this border outpost and an absence of effective communications, there were conflicting reports about the Sept. 27 explosions that killed 32 persons and injured 48, while destroying more than 50 horses and mules.

Afghan guerrillas insisted in interviews that they heard the sound of a diving jet moments before the explosions destroyed mud-brick structures. They said the village was brightly lighted by parachute flares.

"We all heard the plane in the darkness. One plane came in three times and dropped two bombs. The bazaar was lighted like daytime," said Ghaffar Khan, 35, a mujaheddin, or guerrilla.

Zain Uddin, 22, of Logar Province of Afghanistan, said he was standing on a hilltop overlooking the bazaar when he heard "the noise of a plane in the darkness, and then some big explosions."

Uddin, who said he was leaving in two hours for a guerrilla raid in Logar Province, said that while a 10-square-mile area was lighted by flares, the bombing appeared to be from a fairly high altitude.

A week after the explosions, there was evidence of heavy damage in the bazaar and there were at least 30 freshly dug graves in a nearby "martyrs' cemetery."

A large crater was all that remained on a mud-brick stucture that guerrillas said was a hotel, and another building nearby had been completely flattened.

However, although spokesmen for the Pakistani government insist that the explosions were caused by aerial bombardment, the circumstances of the reporting of the incident have raised questions that the bombs could have been planted on the ground.

Radio Afghanistan has claimed—somewhat unconvincingly—that the explosions were caused by bombs planted by rival guerrilla faction. One Pakistani official, who asked not to be identified, noted that the initial report of the incident mentioned only "explosions" and that it was not until four hours later that there was a reference to an aircraft. The official suggested that bombs could have been planted by agents of Khad, the secret service of the Babrak government.

However, in nearby Parachinar, Sang-e-Marjan, political agent of the Kurram tribal district, said, "It was a bombardment. We have found nobody who said this was done by Khad agents."

Marjan cited other aid raids in his tribal district, including 22 bombs dropped on the village of Kunjalizai in August, killing one women, and an attack on Zeran, in which 12 planes bombed and strafed the village, killing one person. He said those daylight attacks could be seen from Parachinar.

Although the tribal political agent, the senior Pakistani official in the district, insisted that only "innocent refugees" were killed in the Teri Mangal explosions, guerrillas in the staging camp said otherwise. They said all of the dead were armed fighters.

Ghaffar Khan estimated that 4,000 to 5,000 armed *mujaheddin* were in Teri Mangal that night, and said that the bombing was in retaliation for a guerrilla attack eight days earlier against a Soviet and Afghan army convoy in Chakari Malang, in which he said 300 government and Soviet troops were killed. He said that more than 2,000 guerrillas remain here now, with the rest having left for reprisal attacks across the border.

Although tribal agency police are constantly present in Teri Mangal, the ostensible refugee camp is openly a staging base for guerrilla raids across the porous border, barely a mile away.

Pack horses laden with wooden crates containing mortar shells and ammunition for machine guns and Chinese-made assault rifles could be seen winding their way in broad daylight up the main dire path through the village and toward the Afghan border that is visible just to the east.

Guerrillas armed with Kalashnikov rifles and wearing bandoleers of cartridges readied their gear and talked candidly about the missions they said they were about to embark upon. Most of the rickety shops in the dusty bazaar look like army surplus stores, selling everything from rifles and ammunition to knapsacks, canteens and combat boots.

Sitting on a dirt pile nearby, Azim Gul, 25, patted a heavily bandaged foot that he said was wounded by shrapnel in a raid in Chakaro, near Kabul, three days earlier. He vowed to return to battle as soon as he could walk. Gul, a member of the Hezb-i-Islami guerrilla group, said he was in Teri Mangal the night of the explosions and left the next morning with 65 other fighters for a reprisal raid.

The accounts of battle offered by the guerrillas, while colorfully laced in the traditional Pathan manner with embellishments of valor and daring, dramatically illustrate the shortness of distances in this commuter war that began with December 1979 Soviet invasion of Afghanistan and the subsequent influx of 2 million to 3 million Afghan refugees to Pakistan.

That Gul could leave Teri Mangal on Sept. 28, participate in a guerrilla operation outside Kabul, spend two days riding back on a horse and talk of returning to battle exactly a week after leaving here underscores the dilemma facing the Soviets and the Babrak government as they attempt to cope with their U.S.-backed neighbor to the east.

Pakistan's president, Gen. Mohammed Zia ul-Haq, consistently has refused to acknowledge responsibility for the cross-border raids into Afghanistan, saying that if the Soviets think the winding, rugged border between the two countries can be sealed, then they should do it.

But while looking the other way at the cross-border traffic, the Pakistani government also is faced with a dilemma: If Soviet and Afghan army troops continue to suffer from stepped-up guerrilla activity, Pakistan could become the target of reprisal air raids into its territory.

With an inadequate air defense system in the tribal regions and Pakistani pilots under strict orders not to engage Afghan or Soviet air force planes unless they can be certain of a kill inside their own airspace, the Pakistani military can do little to prevent further air raids on refugee camps that also serve as guerrilla staging bases, western military analysts say.

"For Pakistan, striking back would be contrary to the basic policy of not letting themselves be provoked," a western diplomat said, noting that Afghanistan's Soviet-directed air defense system would, in any case, be too much for the Pakistani Air Force.

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT—CONFERENCE REPORT

Mr. BAKER. Mr. President, as I indicated earlier today, it is the intention of the leadership on this side to go to a privileged matter temporarily laying aside the present pending business and the pending question. Let me hasten to say, however, that even though the OCS revenue-sharing conference report is privileged and is available at this time, if we have not finished that measure by later this afternoon, say 4:30 or 5 o'clock, it would be the intention of the leadership on this side to ask the Senate to return to consideration of the debt limit. That does not mean I am going to abandon OCS conference report. I am not, but it does mean that in the time remaining to us we, I think, need to try to cut and fit our available time to the business that we still have to do.

So with that statement, with the assurance that we are going back to debt limit sometime today, I submit a report of the committee of conference on S. 2463 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2463) to authorize appropriations of funds for certain fisheries programs, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of September 10, 1984.)

Mr. BAKER. Mr. President, the distinguished chairman of the Commerce Committee will manage on this side. He is on his way to the floor. While he arrives, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, what is the pending business?

The PRESIDING OFFICER. The conference report on S. 2463.

Mr. PACKWOOD. I thank the Chair.

Mr. President, I would like to make a few brief remarks to support and explain the conference report on S. 2463.

S. 2463 contains two titles. The first established a program to share Federal Outer Continental Shelf [OCS] leasing receipts with coastal States. The second reauthorizes certain programs of the Department of Commerce regarding fisheries management and makes some clarifying amendments to the Fisheries Conservation and Management Act of 1976. Since only the first title provides for a new program, I will limit my remarks to its provisions.

Title I of this conference report would establish a Federal OCS revenue-sharing program with coastal States. Coastal States and territories would be eligible to receive, subject to appropriations—I emphasize that, subject to appropriations; this is not an entitlement program—block grants to be used for mitigation of the onshore impacts of OCS development, as well as for ocean and coastal management activities. These block grants would be distributed according to a formula which recognizes the special needs of States directly impacted by OCS development as well as the common needs of all coastal States. The source of these funds would be a portion of Federal OCS receipts. Four percent of these receipts would initially establish the fund, which would be limited to $300 million for fiscal year 1985. In subsequent years, funding may increase no more than 5 percent per year. In addition, one-third of the block grant that is passed to the State must be passed through to local governments.

Mr. President, the majority of the energy which this Nation uses—for industry, consumer purposes, and national defense—is derived from oil and gas. The last decade has shown us dramatically how dependent we have become on outside sources for this energy. While we are currently enjoying some respite from the pressures of this dependence, we know that our vulnerability has not disappeared, and unless we face and solve the problem, it will again occur.

We will need as large a domestic supply of energy as technology and sound environmental poilicy can make available. One of those domestic sources exsits offshore, beneath the Outer Continental Shelf. Development of this energy source will create special responsibilities and problems for our coastal States which could adversely impact their long-term economics, employment patterns, and coastal environments. The legislation before us will provide the means by which the States can plan and meet these special responsibilities.

The demands placed on the coastal areas of this Nation increase every day. Population pressures, strain on costal infrastructure such as roads and schools, waste disposal, transportation, recreation, and the development of both living and nonliving resources are problems that must be recognized.

These problems are not solely State problems but a national problem. This legislation acknowledges the scope of these problems, and responds by recognizing that a partnership should be forged in the spirit of federalism between the Federal Government and the States.

Mr. President, the goal of this measure is to provide funding for management and development of our renewable ocean and coastal resources from the revenues derived from the development of nonrenewable resources. This is a wise investment in the future of coastal States, as well as tangible evidence of a true Federal-State partnership in the development of our OCS.

The aggressive leasing schedule initiated by Interior Secretary Watt has met stiff resistance from coastal States who are disappointed about both their exclusion from the decisionmaking process as well as their exclusion from the benefits of lease sales off their shores. Coastal States and localities can be expected to be more supportive of Federal OCS leasing activities if they have a positive financial stake in OCS development and are included in the lease-sale decisionmaking process through the Coastal Zone Management Act. From a coastal State perspective, the national benefits of this program are diffuse and ab-

stract, while the potential environmental risks and onshore impacts are all too real. State resistance to leasing will only abate once the Federal Government begins treating the States as full partners in the OCS leasing process.

The OCS mineral development program is the only exception to a longstanding Federal policy of sharing with affected States a significant portion of receipts from resource development activities on federally-owned property. Some examples of other programs include:

The National Forest Revenue Act, the Mineral Leasing Act, the Taylor Grazing Act, and the Payment in Lieu of Taxes Act. Payments to States for these programs exceeded $1 billion in fiscal year 1983.

Mr. President, I urge my colleagues to support this measure to establish a true Federal-State partnership in developing the OCS in an equitable manner. Without such a partnership, the distrust of the Federal Government will continue to grow, impeding our Nation's progress toward energy independence.

The conference report is supported by both Democrats and Republicans, the environmental community, the oil and gas industry, and State and local governments. It is a fair proposal that deserves the Senate's support.

Mr. President, I yield the floor.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that my comments on S. 2463 not count against the two-speech rule under rule XIX.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I rise in opposition to S. 2463, the so-called Outer Continental Shelf revenue-sharing bill. Before I go into the merits of the proposal itself, let me state the obvious with regard to the budgetary effects of this new entitlement program. We have been struggling around here for almost a year to put in place some kind of downpayment on the deficit. Now, in the week Congress is to adjourn sine die, there is an effort to slip through a brandnew entitlement program that will actually increase the deficit by over $300 million a year in perpetuity. In its first year, this program will cost some $300 million, growing a cumulative 5 percent each year thereafter. This means that over the next 3 years, this program will add almost $1 billion to the Federal deficit.

Now, I know the proponents of this new program are making the argument that it is different from the original Outer Continental Shelf revenue sharing bill, which was introduced as S. 800, which was reported out of the Commerce Committee in May of this year. They tell us the program is no longer an entitlement program; that moneys must be appropriated every year, and thus they hope to convince us that it will not be an uncontrollable drain on the Federal budget. But, we all know, Mr. President, once a program such as this is put in place, the pressure will be irresistable to fund it every year, and there are similar programs in this area. So, if it is not an entitlement with a capital "E," it is certainly one with a small "E" and just as uncontrollable the way things work around here.

Now Mr. President, the vehicle before us is a conference report on S. 2463. S. 2463, Mr. President, is a fisheries bill. Let me remind my colleagues that the OCS revenue sharing part of this conference report has never even been debated on the floor of this body, much less passed by it. The original Senate OCS bill, S. 800, was reported out of the Commerce Committee in May and provoked such opposition that it was never brought to the Senate floor. Instead, the Senate went to conference with the House on S. 2463, the fisheries bill, to which the House has attached the OCS revenue sharing program. We all know why the Senate receded to the House's position in spite of the history of this legislation in the Senate. All one has to do is look at the States represented by the Senate conferees. The fact that the Senate has never had an opportunity to debate this measure is sufficient to warrant our rejecting this conference report.

If the proponents of this program want to debate and vote on the program, let them bring it up in the normal order of things when both sides can be fully prepared to debate its merits. Let us not try to slip it through on a conference report at the 11th hour. This is just another indication that honest and full debate is giving way to special interest pressure and greed.

I admit the opponents of this legislation are in a tough situation. We know the President is committed to vetoing it if it passes and so it is a free vote for all practical purposes. We can all go ahead and vote for the bill with full assurance that the President will shield us and the country from its bad effects by vetoing it. And, even if there were the votes to override a veto, which I am confident there are not, there would not be enough time remaining in this session to bring it to a vote. Yes, we can all have our cake and eat it, too, on this particular legislation. But is this responsible behavior on the part of the U.S. Senate? I think it is not. I urge my colleagues to face this bill squarely for what it is—bad legislation—and to vote it down directly rather than hiding behind a Presidential veto.

Mr. President, there are sound reasons to oppose this legislation on the merits. It is poor policy. What the bill does is create an open-ended revenue sharing program limited to a few coastal States, and just enough other States thrown in to spread the money widely enough to build a majority coalition. We have seen it all before. I call it pork barrel federalism. And, my fellow Senators, political pork by any other name still smells the same. This program may be an entitlement spelled with a small "E," but it is pork barrel politics spelled with a capital "P."

The proponents of the legislation argue that the program is justified on two grounds. First, it is argued this is a matter of "equity." Proponents contend that OCS mineral development is the only exception to a longstanding Federal policy of sharing, with affected States, a significant portion of receipts from resource development activities on federally owned lands. I take exception with this assertion on two counts. First, although funds are not specifically earmarked from OCS receipts, Congress has in fact recognized that off-shore development produces some adverse effects on coastal States and has created specific programs to deal with the problem. The coastal zone management programs were funded at $28 million in fiscal year 1984. And these programs exist exclusively for the benefit of coastal States.

My second exception to the so-called equity argument is that the comparison of off-shore receipts with on-shore receipts is misleading and invalid. The status of on-shore Federal lands was in dispute from the time the States containing this land came into the Union. This dispute was settled, for the most part, with passage of the Mineral Leasing Act of 1921, in which it was agreed that the Federal Government would retain possession of these lands and their minerals. But, in exchange, the Federal Government agreed to share a portion of the receipts from these lands with the State in which the lands lay. The payment-in-lieu-of-taxes programs, which the proponents characterize as "revenue sharing," exist for entirely different reasons. Federal property is tax exempt but States containing this property must provide public services for it. Congress recognized that the local governments providing the public services should be compensated, since they could not levy their property tax. These are not "shared receipts" in the true sense. They represent Congress' best judgment as to the burden these lands place on State and local governments. In this sense, PILT programs resemble more the coastal zone management programs than shared revenues.

The status of off-shore land is quite different. Prior to World War II, most coastal States claimed jurisdiction over submerged lands extending out-

ward from the coast to a 3-mile limit. In 1945, President Truman issued a proclamation asserting Federal jurisdiction over areas beyond the 3-mile limit. This was not disputed by the States. Then, in 1947 the Supreme Court ruled that, contrary to State claims, the Federal Government also had jurisdiction over submerged lands up to the 3-mile limit. Finally, in 1953, Congress rejected this view and passed the Submerged Lands Act to overturn the Supreme Court's decision. In other words, Congress gave coastal States jurisdiction over submerged lands up to the 3-mile limit lock, stock, and barrel. The 1953 act went so far as to give some coastal States jurisdiction extending out to as much as 10.5 nautical miles to reflect prior boundary claims.

So, Mr. President, it is true that the Federal Government does not share revenues from off-shore lands over which there has been an historic dispute, as with on-shore lands. Instead, Congress actually gave these lands outright to the coastal States. If there is a question of "inequity" involved, it is certainly not one of injustice done to the coastal States. What this legislation seeks to do is claim for the States a share of the revenues from OCS lands that coastal States have never laid claim to. The so-called equity argument is weak, if not totally invalid.

The second argument advanced by proponents of this legislation is that the development of Federal off-shore lands produces adverse social and economic effects on the coastal States, and further, that current Federal policy does not address these detrimental impacts. The fact that such developmental impacts exist is not at issue. As I indicated earlier, Congress recognizes that they exist and has made provision for compensating coastal States in the coastal zone management programs.

What is controversial—the reason why this ought to have a debate on its merits at some length, some other time—is precisely how detrimental are the effects of off-shore development? The proponents claim they are substantial and that existing programs do not adequately address them. But, Mr. President, there is ample evidence that these claims are overstated—greatly overstated. For one thing, the Federal Government takes almost total responsibility for the environmental damage that might occur from off-shore development. In addition, the problems we have had in letting off-shore leases demonstrate that the States have powerful tools they can bring to bear in the courts to halt or slow down any development they fear will produce unwanted and adverse effects.

But, let me go back to the original question: How serious are the on-shore social and economic impacts of the off-shore development? A 1982 report by the General Accounting Office sheds considerable light on this question. I ask unanimous consent that the relevant portion of that report be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Amounts are in millions of dollars and may not add due to rounding]

State	Guaranteed grant	Taxpayer burden	Net benefit
Alabama	8.05	5.57	2.48
Alaska	20.64	1.23	19.41

Sea grant funded at 10 percent of total—$40.05—not included in above grants.

Mr. DURENBERGER. Mr. President, this report found that in general, "only (in) rare instances are the public costs of correcting socioeconomic effects not compensated by later increases in public revenue."

Mr. President, I think any prudent observer must conclude that there is a genuine Federal responsibility to help mitigate the impacts of off-shore development. I also believe that any objective observer must conclude, after close study, that current funding of the programs designed to address development costs has not been so low as to create serious problems for coastal States. If there is a problem, I pledge my support to strengthen the appropriate programs to see that the job gets done fully. Finally, I believe it is obvious to anyone who takes the time to study this proposal that the OCS revenue sharing program offered here is by orders of magnitude too large to be justified by any real need for impact assistance.

As I have stated, the smell of pork is in the air, and I must admit, some in my own State have gotten a whiff of it and have encouraged me to support this legislation. But, I cannot in good conscience vote to accept this payoff for my State. How can I? Let me use the case of my State of Minnesota to illustrate how really ridiculous this legislation is. The bill is justified as sharing OCS receipts with States affected by coastal development, and yet there are some 7 noncoastal States guaranteed money—my own State of Minnesota among them. I ask my colleagues if they realize that the furthest point from any coastal shore line in the entire country lies in my State up around Saint Vincent, MN. It is some 1,300 statute miles from a shore line.

It is even worse than this, because the claims made by the proponents of this bill regarding the benefits to recipients, especially Great Lakes recipients, are misleading. Proponents tell us that Great Lakes States will greatly benefit from the program. I suggest, to the contrary, it will cost citizens of the Great Lakes much more in Federal taxes and borrowing costs to support this program than their State governments can ever hope to recover from the program's grants. At this time, I ask unanimous consent to have printed in the RECORD a fact sheet on the proposed benefits of the original S. 800 legislation. It demonstrates clearly that only a very few States will actually benefit—and only one Great Lakes State—at considerable expense to the rest of the Nation. This information was based upon the assumption that the funds to be distributed would amount to over $400 million rather than $300 million. I have not had time to recalculate this fact sheet based upon the figures, but common sense only tells you it will be worse for most States since there is now $100 million less to spread around.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FACTSHEET ON DISTRIBUTION OF FUNDS UNDER S. 800

The purpose of this fact sheet is to evaluate for each State the net value of the Outer Continental Shelf Revenue Sharing Grants under the Ocean and Coastal Development Impact Assistance Block Grant Act, S. 800. Under the allocation formula contained in this bill, 30 States will be eligible for grants. All are Coastal States. 8 of the 30 eligible States are Great Lakes States. These 8 States receive 22 percent of the funds under the formula. The remaining 22 States receive 78 percent of the funds.

Some of the Great Lakes States appear to receive significant amounts of money if one looks only at the size of the grant to which

they are entitled. However, this neglects the cost side of the equation. The important question for the Great Lakes States is how does the size of the grant compare to the burden of the States' taxpayers who must pay Federal taxes to support the program.

Since this program will result in a direct reduction of revenues to the Federal Treasury, the money to support the program will have to come from Federal borrowing. The total cost to Federal taxpayers will amount to the sum of the interest paid to borrow these funds plus the amount of the principal which must be repaid. The following Table compares each State's estimated grant under the program to the cost of citizens of that State. It is assumed for the sake of simplicity, that the Federal government replaces the foregone Outer Continental Shelf revenues by selling the necessary amount of one-year Treasury Notes which currently bear an interest rate of 9.68 percent.

The allocations under the program are Commerce Committee estimates assuming the program were to be funded at $400 million in FY 1984. The Congressional Budget Office has estimated that the cost is likely to reach $440 million in FY 1984. The taxpayer cost in each State is estimated by apportioning the principal and the first year's interest on the basis of each State's relative Federal tax burden.

ENERGY DEVELOPMENT CAUSES VARYING IMPACTS AND RESPONSES

Energy development effects on a community can be tracked in phases. At the beginning of the development phase, public sector costs for facilities and services rise much faster than the revenues generated. This can produce negative socioeconomic effects on the host community. These impacts usually stem from the influx of energy workers and their families which increases an area's population to the point of burdening the existing housing and public facilities and services. Some problems which might occur include a short supply of permanent and rental housing, inadequate solid waste disposal, and overburdened medical facilities, schools, transportation systems, and law enforcement. Also, the ability of communities to handle these impacts vary depending on the size of the existing population, the infrastructure in place at the time of the impacts, and the resources available to the community.

As the development phase ends, revenues generally outrun costs by a wider margin than costs exceeded revenues prior to the development. This is because energy development usually brings significant economic benefits to an area. For example, new population generally brings an increased tax base in the form of property and sales tax. Also, in some cases revenue is generated by severance tax on the minerals produced. Energy development brings employment opportunities to the area not only in the energy industry itself, but also in the services required by the new population.

An August 1980 Department of Commerce study states that for the coastal zone areas there are only rare instances that the public costs of correcting socioeconomic effects are not compensated by later increases in public revenue. While this may be true, there are instances where this and the other conditions described above may not exist.

One is if the deficit is not followed by a revenue surplus as in OCS development where the States and communities are not able to tax the actual energy facility but are limited to taxing onshore support facilities. The same situation could also exist if the revenue generated goes to the State level and is not passed back to the local community being impacted.

There are also cases in the coastal zone where an area has an underutilized infrastructure capacity which may or may not be usable, has significant unemployment, or is a very large community. For example in the Atlantic region, States such as New Jersey and Massachusetts encourage locating facilities in areas with underutilized infrastructure capacity. In this case, unless the infrastructure would require upgrading, the effects of increased energy development could probably be absorbed by the area.

Mr. DURENBERGER. Mr. President, I made reference earlier in my comments to the views of the administration. For the benefit of my colleagues, I will read a letter addressed to the majority leader, dated September 18, 1984, signed by Donald T. Regan, Secretary of the Treasury; William P. Clark, Secretary of the Interior; David A. Stockman, Director of the Office of Management and Budget; and Donald Paul Hodel Secretary of Energy:

DEAR HOWARD: As the Senate prepares to take up the Conference Report on S. 2463, legislation to create a new Federal grant program using revenues derived from Outer Continental Shelf oil and gas leasing, we wish to reiterate the Administration's strong opposition to the bill.

Revenues from OCS leasing in Federal waters are a national resource that should be used for the benefit of the people of every state. That is what happens under existing law. A portion of OCS revenues are used for acquisition of new park and refuge lands, while the remainder go into the Treasury and reduce the need for tax revenues.

As drafted, the Conference Report provides windfall payments to states that are completely unaffected by OCS leasing. In addition, the formula by which grants are determined provides virtually no incentive to state and local governments to encourage their assistance in carrying out the OCS exploration and development program established by the Outer Continental Shelf Lands Act of 1978. Finally, the Conference Report would effectively remove a number of federal programs from the annual appropriations process by earmarking funds, thereby adding further to the deficit.

In total, reflecting the additional debt that the Treasury will incur in order to make up for the new grants authorized in the bill, S. 2463 will add more than $2 billion to the deficit over the next five years. If the nation is serious about controlling spending, the first place to start is avoiding the creation of unnecessary and unjustified new programs.

For the reasons stated above, we will be unanimous in recommending that the President veto this bill if it reaches his desk.

Sincerely yours,

DONALD T. REGAN,
Secretary of the Treasury.
WILLIAM P. CLARK,
Secretary of the Interior.
DAVID A. STOCKMAN,
Director, Office of Management and Budget.
DONALD PAUL HODEL,
Secretary of Energy.

Mr. President, I also have a copy of a letter from the Director of the Office of Management and Budget addressed to the Honorable ROBERT MICHEL, who is the Republican leader of the House of Representatives, dated September 13, 1984, in which Director Stockman says:

DEAR BOB: We have been working together for nearly four years to carry out the President's goal of reducing Federal spending, but it seems that some people have yet to get the message.

Once again, a budget-busting new spending program is coming to the floor of the House. This time, masked as "revenue sharing," the big spenders hope to create a new entitlement program. I am referring of course to S. 2463, the so-called Outer Continental Shelf Revenue Sharing bill.

The argument for this bill—that states adjacent to Federal offshore lands on which oil and gas production takes place have a special claim to the revenues from that production—tends to break down pretty quickly when one realizes that many states will get money that do not even have one mile of coastline.

Others have spelled out for you the numerous technical flaws in S. 2463: it gives no incentive for states to facilitate leasing; it makes states jump through numerous bureaucratic planning hurdles before getting their grants; it turns certain NOAA programs into entitlements removed from the annual appropriations cycle; it distributes money with a keen eye on attracting votes, but with little regard to state's actual offshore oil production; and so on.

But the real issue is pretty simple and straightforward: how can we possibly justify creating a massive new Federal spending program while we have a deficit approaching $200 billion? We hear so much about how this spending cut will harm that interest group and would be "unfair." Well, here is a chance to vote against spending that won't hurt anyone by voting against creating a new program. If this bill is enacted, the Treasury will be $2 billion smaller over the next five years. That means we will need to find another $2 billion worth of programs to cut or face the prospect of another $2 billion in tax increases that could be avoided.

The President's senior advisers will be unanimous in recommending that he veto S. 2463 because we believe that the bill is totally inconsistent with this Administration's pledge to control spending. I urge your colleagues to join you in supporting the motion to recommit the bill.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. President, I also wish to read to my colleagues a letter addressed to the Honorable GENE SNYDER, U.S. House of Representatives, dated September 12, 1984:

DEAR GENE: As the House prepares to take up the Conference Report on S. 2463, legislation to create a new Federal grant program using revenues derived from Outer Continental Shelf oil and gas leasing, we wish to reiterate the Administration's strong opposition to the bill and express our support for your recommittal motion.

Revenues from OCS leasing in Federal waters are a national resource that should be used for the benefit of the people of

every state. That is what happens under existing law. A portion of OCS revenues are used for acquisition of new park and refuge lands, while the remainder go into the Treasury and reduce the need for tax revenues.

As drafted, the Conference Report provides windfall payments to states that are completely unaffected by OCS leasing. In addition, the formula by which grants are determined provides virtually no incentive to state and local governments to encourage their assistance in carrying out the OCS exploration and development program established by the Outer Continental Shelf Lands Act of 1978. Finally, the Conference Report would effectively remove a number of federal programs from the annual appropriations process by earmarking funds, thereby adding further to the deficit.

In total, reflecting to additional debt that the Treasury will incur in order to make up for the new grants authorized in the bill, S. 2463 will add more than $2 billion to the deficit over the next five years. If the nation is serious about controlling spending, the first place to start is avoiding the creation of unnecessary and unjustified new programs.

For the reasons stated above, we will be unanimous in recommending that the President veto this bill if it reaches his desk.

We hope that your colleagues will join you in your motion to recommit. If we can provide any further information, please let us know.

Sincerely yours,

DONALD T. REGAN,
Secretary of the Treasury.
WILLIAM P. CLARK,
Secretary of the Interior.
DAVID A. STOCKMAN,
Director, Office of Management and Budget.
DONALD PAUL HODEL,
Secretary of Energy.

(Mr. TRIBLE assumed the chair.)

Mr. DURENBERGER. Now, Mr. President, let me share with my colleagues a special review of the OCS issues involved by those in the Department of the Interior who have responsibility for, as these letters indicate, the expenditures of a national resource for the benefit of the people of every State of the Union.

FEDERAL OCS REVENUE SHARING: A CRITICAL REVIEW OF ISSUES

Background

Attempts have long been underway to establish a system of sharing with the coastal states revenues that accrue to the Federal government through leasing lands in the Outer Continental Shelf (OCS). Several bills have been introduced in the Congress to implement such a plan; however, no such legislation has been enacted as of this writing. A new bill may soon be introduced which embodies compromises between versions of the legislation that have been debated in the House of Representatives and the United States Senate. Some who have followed this issue believe this compromise has bipartisan support—

And I believe the chairman of the committee indicated that the bill before us today does have that kind of bipartisan support and as he indicated he thought it should be passed for that reason by both Houses of Congress in this session.

—and could be passed by both Houses of Congress in the current session.

Although the compromise legislation may have considerable support in Congress, there is no consensus that the legislation or the concept represents sound public policy. In fact, the arguments against OCS revenue sharing are compelling. Accordingly, the Administration has opposed the concept of revenue sharing and the Congressional bills that have been proposed to date.

This paper presents a critique of the arguments that have been offered in support of an OCS revenue sharing plan. Many of these arguments do not bear close scrutiny. To a major extent, the arguments are those that have been already raised in the Congress during debate on the various pieces of legislation referred to above.

In the earliest phases of the debate over OCS revenue sharing, two arguments were offered as a rationale for its implementation.

(1) Development and production activities associated with Federal OCS leasing impose negative impacts on the coastal areas of affected states;

(2) Many states receive a significant share of the revenue derived from the leasing of Federal mineral lands located within the boundaries of these states.

Thus, both arguments are based on the idea that a fundamental imbalance exists between the ways in which coastal states and inland states benefit from Federal mineral leasing.

Congressional advocates of revenue sharing have recently introduced an additional argument in debate over legislation. It is asserted that a sharing plan aimed at funding state Coastal Zone Management Programs (CZM) will create a "partnership" between the Federal Government and the coastal states. Such a sharing arrangement, it is alleged, will give the states "an incentive" to support the OCS program and thereby reduce the costly delays in leasing activities that have resulted from recent litigation.

Each major point mentioned in support of an OCS revenue sharing plan will be addressed in turn. The paper concludes with additional comments on budgetary and fiscal arguments against the implementation of such a plan.

Impacts of OCS Leasing

Congressional proponents and other advocates of OCS revenue sharing have emphasized the supposedly adverse impact of OCS leasing in attempts to demonstrate a need for a revenue sharing arrangement with the respective coastal states. Two types of impacts are commonly cited: 1) the environmental consequences of OCS activity and 2) the socioeconomic adjustments with which the affected areas must cope. Although it can be established that these types of impacts have occurred, it can also be shown that these impacts do not constitute a particularly persuasive case for the sharing of OCS revenue.

Environmental Impacts

The environmental consequences of OCS leasing can take several forms. However, in the public mind, concern is focused on oil spills. This concern is largely the result of one serious but isolated incident—the 1968 Santa Barbara oil spill. This single oil spill triggered a wave of public alarm which is still felt to the present day. Even though a study by the University of California found that no serious or lasting harm resulted from this spill, the public outcry prompted a move toward greater stringency in the regulation of OCS operations. Also, the Santa Barbara oil spill has induced the petroleum industry to reduce the probability of oil spills and to increase the efficiency with which oil spills can be cleaned up.

What has been the upshot of these developments? Although public concern over the possibility of oil spills has remained great, the following considerations attest to the fact that the environmental record for the OCS has been exemplary:

Since the new regulations were implemented in 1970, of 4 billion barrels of oil produced, only 791 barrels of oil have been lost from blowouts;

There have been no major oil spills since new blowout prevention regulations were implemented in 1970;

Since 1970, the total amount of oil lost from all Federal Offshore facilities has averaged 5,700 barrels a year, or just 0.002 percent of the oil produced;

By contrast, the leakage of oil from natural seeps at the Coal Oil Point area near Santa Barbara alone amounts to between 22,000 and 36,000 barrels per year;

The volume of oil pollution in U.S. waters that results from the movement of oil tankers is twenty-eight times greater than that accounted for by all OCS operations.

In light of the excellent environmental performance of oil and gas operations in the OCS, it is clear that the facts regarding oil spills do not create costs that justify the transfer of OCS revenues to coastal States.

Can a convincing case be made that the esthetic impacts of oil and gas operations on coastal communities are serious enough to justify revenue sharing? Do they create visual "eyesores" near coastal areas that would warrant compensation through a revenue-sharing procedure? Again, it is unlikely that such impacts are of any significant importance. OCS operations can be no closer to the coastline than the outer boundary of a State's coastal waters. State waters extend 3 miles beyond the coastlines of all coastal States.

There are some exceptions there for the western coast of Florida and the Texas coast where State waters extend 3 marine leagues, which is equivalent to 9 miles. At a distance of 3 miles, OCS operations are visible. However, the visual impact of such objects, however ugly they might be, is unlikely to be esthetically onerous to a degree that would warrant financial compensation through the sharing of OCS revenues. In this connection, it should not be overlooked that some coastal areas with OCS operations will also have State offshore oil and gas activity. These latter operations will be close to shore and will therefore impose esthetic burdens much greater than any resulting from OCS activity. In the case of California, approximately 85 percent of the wells drilled offshore have been in State waters.

But let me deal with the opinion of the Department of Interior relative to the issue of marine life and the environmental impact on such industries

as fishing. The question is: Can normal OCS oil and gas activites be linked to any such destruction?

While there may be some risk of harm, the reverse seems to be the case. The rigs used in OCS operations seem to function as artificial reefs in which fish and other forms of marine life thrive. In fact, the presence of OCS operations appears to affect marine life in such a way that positive economic benefits accrue to State fishing industries and coastal communities. It is estimated that from 80 to 90 percent of the fish harvested in the Gulf of Mexico are caught within 150 feet of a drilling or production platform. Consequently, this type of environmental impact offers no justification for the sharing of OCS revenues.

Nothing in the above discussion is intended to suggest that coastal communites have not suffered some environmental costs as a result of OCS activies. Rather, the observations only underscore the unlikely nature of many of the potential forms of environmental impact that have been raised as issues. However, even if one assumes that negative environmental consequences are more common than the above comments would suggest, can a plausible case then be made for OCS revenue sharing?

The 1978 amendments to the Outer Continental Shelf Lands Act were carefully designed to provide adequate protection for, and appropriate compensation to, coastal areas that might be affected adversely by oil pollution and other environmental impact. For example, provisions were designed to compensate coastal areas that have been adversely affected by oil spills. Title III of the OCS Lands Act, as amended, establishes an "Offshore Oil Spill Pollution Fund." Section 303, which covers damages and claimants, contains the following language:

"Claims for economic loss, arising out of or directly resulting from oil pollution may be asserted for—

(1) removal costs; and

(2) damages, including—

(A) injury to, or destruction of, real or personal property;

(B) loss of real or personal property;

(C) injury to, or destruction of, natural resources;

(D) loss of use of natural resources;

(E) loss of profits or impairment of earning capacity due to injury to, or destruction of, real or personal property or natural resources; and

(F) loss of tax revenue for a period of one year due to injury to real or personal property."

Thus, the most serious environmental impacts likely to be felt by coastal communities are already addressed by specific provisions of the OCS Lands Act, as amended. A program of revenue sharing for this purpose would be a duplication of effort and a wasteful use of resources.

SOCIOECONOMIC IMPACTS

Proponents of OCS revenue sharing also point out that coastal communities sustain a negative socioeconomic impact from OCS activity that is not felt beyond the locality or region. Although "affected" communities share the benefits of the OCS discoveries with the rest of the Nation, it is argued that they alone are forced to cope with social and economic burdens and adjustments associated with the OCS activities. This argument has a certain plausibility and has managed to generate some sympathy for the idea of sharing revenues from OCS operations.

However, this argument does not withstand close scrutiny. It is true that new OCS oil and gas operations can impose significant pressure on the fiscal capacities of coastal communities. With increased population and activity attendant to OCS operations, there may be an increased demand for roads, water and sewage systems, and schools, for example. It cannot be denied that the immediate financial burden of providing such services and facilities falls on the affected communities. However, there are three fundamentally important points to bear in mind regarding burdens borne by the affected localities.

First, there are numerous Federal programs that provide assistance to communities bearing such impacts. Prominent examples are the Local Government Fiscal Assistance Trust Fund, General Revenue Sharing, and the Federal Aid Highway Program. Other examples exist. The Land and Water Conservation Fund and the Historic Preservation Fund are supported in large part by offshore leasing revenues. Approximately $950 million is deposited into the latter two funds by the Minerals Management Service each year to augment other revenues committed to the support of Federal, State, and local programs.

A second important point is that OCS activities bring increased employment and income and thus an expanded tax base to the affected communities. In addition, during the entire period that OCS operations are located near particular coastal communities, it is almost always the case that the net economic benefits accruing to the community vastly exceed the costs imposed.

A study done in 1983 at Louisiana State University [LSU] assessed the impact of the offshore oil industry on the Louisiana economy. That study found that "every time a job is created in the petroleum sector by new sales in oil and gas production, two new jobs are also created by a 'ripple effect' in other sectors of the Louisiana economy." The study also shows that "for every job created in the petroleum refining industry through sales, nearly six new jobs are created in Louisiana." The LSU study also found that offshore oil and gas production valued at $19 billion created $1.8 billion in additional household income in the State. It was estimated that 55 percent of this additional income was indirectly generated outside the petroleum industries.

To the extent that the long-term economic net benefits tend to be positive it would appear that some localities will have the resources and financial flexibility necessary to adapt and adjust to any impacts that might be sustained. In these cases, the investments that must be made in roads, sewers, water systems, and schools can be handled through the issuance of bonds or any other credit instruments that provide the community with resources in the present in anticipation of income and tax receipts in the future.

A third point addresses situations in which efforts to raise funds through the issuance of bonds may be difficult because of the uncertainties inherent in the early stages of offshore activities. In such instances, the oil and gas companies have demonstrated a willingness to provide necessary funds. In the early phases of leasing and exploration, a newly affected coastal community will have no assurance that long-term benefits, tax receipts, will be forthcoming. In other words, it is possible that no major discoveries will result from exploratory activity. A bill has been introduced in the Congress designed to provide additional incentives to industry in assisting communities which face the risks and lags which occur between the time of initial economic impacts and any subsequent accrual of revenues.

The Energy Community Self Help Act (S. 1897), has been introduced to deal with the types of situations described above. In brief, this bill is designed to "assist in lessening any impact on communities resulting from rapid growth related to energy or resource development." The bill amends the International Revenue Code of 1954 by essentially granting oil companies and mining companies tax deductions for contributions or advance payments of royalties and taxes to States or local governments with the stipulation that these funds are used by the relevant jurisdictions to deal with the impacts of the types of rapid growth mentioned above. Although this legislation was initially designed to deal with the impacts of onshore energy development, its provisions would apply to any impacts on coastal areas imposed as a result of OCS activities.

In summary, it is unlikely that a credible argument for OCS revenue sharing can be based on economic impacts sustained by coastal localities. There is no evidence that these impacts are negative over the long-term

existence of OCS operations. In addition, to the extent that such legitimate impacts emerge, numerous other Federal programs are available to communities.

INEQUITABLE SHARING OF FEDERAL MINERAL REVENUES

Since the Federal Government returns to the States 50 percent, 90 percent in the case of Alaska, of all mineral leasing revenues collected on Federal lands within a State's boundaries, it is sometimes argued that it is inequitable not to share revenues from the OCS in a similar manner. It is pointed out that States obtain more than $1 billion annually from inland Federal leasing activities. Advocates of OCS revenue sharing assert that this arrangement constitutes an inequity because the inland States receive this share of Federal leasing revenue as a compensation for the negative impact of mineral development. In their view, equity would be restored by a sharing arrangement in which coastal States are compensated for the impacts of OCS activities.

However, those who defend the current system respond by saying that no inequity exists since onshore leasing occurs within the boundaries of a State while OCS leasing takes place entirely outside a State's coastal waters. Those who support OCS revenue sharing are critical of this point of view and assert that Federal lands are held in trust by the Federal Government "as the natural heritage of all Americans." Furthermore, the argument is made that even though a particular tract of land may be "situated within one State does not provide that State with any unique interest in, or claim to, that land except as its use or development bear upon the State."

In sorting out the respective merits of these arguments it is important to note that two issues are really being addressed. First, the allegation is being made that some States are being compensated for the negative impacts of mineral leasing, while others are not receiving compensation. The second issue is raised in the counter argument that the location of Federal minerals within a State boundary establishes a legitimate claim to compensation that does not exist in the case of States with adjacent OCS operations. With respect to the first of these issues, it must be reemphasized that little concrete evidence exists to support the claim that coastal States have suffered negative net impacts as a result of OCS leasing activities. It has also been shown that in the event that such impacts occur, numerous Federal assistance programs are available to these coastal States.

While little credence can be attached to the argument that inland States merit compensation solely because leased Federal minerals are located within the boundaries of the respective States, there are at least two considerations that may justify the existing onshore sharing arrangement. First, the Federal Government has retained title to much of the land and mineral interests within these States. The sharing of leasing revenues can be seen, in part, as a compensation to the States for the retention of these property rights on the part of the Federal Government. Second, the surface of Federal lands enclosed within a State's boundary can yield important economic benefits to the economy of the affected State. Agricultural use would be one of the most obvious examples of such benefit. However, the leasing of these lands by the Federal Government for mineral development nearly always restricts the access to and use of the land for productive alternative purposes. Consequently, the affected inland State bears a cost as a result of Federal leasing activity. The coastal States, on the other hand, bear a much lower opportunity cost as a result of OCS activity.

Thus, it appears there is no major inequity to redress in the sharing of Federal revenues from mineral leasing. The inland States appear to bear costs as a result of Federal mineral leasing that do not have any counterpart in the case of coastal States with adjacent OCS activity.

PARTNERSHIP BETWEEN THE COASTAL STATES AND THE FEDERAL GOVERNMENT

In defense of recent legislation aimed at the implementation of OCS revenue sharing, the case has been made that there is a need to establish a partnership between the Federal Government and the coastal States.

The following comments were made during floor debates by sponsors of H.R. 5 in support of the partnership rationale:

> One of the primary financial justifications for approving H.R. 5 is that revenue sharing would help establish a working partnership between State governments and the Federal Government with regard to OCS development. The clear failure to establish such a relationship in the past has delayed the development of vital domestic oil and gas supplies, caused a significant loss of revenues to the Federal Treasury, and hampered effective coastal zone management.
>
> There is good reason to believe that these problems could get worse . . . the current administration has repeatedly targeted State coastal management programs for elimination. Without alternative funding schemes, like revenue sharing, the coastal States . . . will resort to whatever tactics are at their disposal until they can adequately assess the impacts of OCS exploration, development and production plans.

This legislation would establish the Ocean and Coastal Resources Management and Development Fund with OCS revenues. Block grants would be distributed to all coastal States including the Great Lakes States. To qualify for block grants under the program, States must have implemented a CZM program as defined under the Coastal Zone Management Act. Most of the funds distributed to the States would be committed to the support of CZM programs. A relatively small percentage would be designated for the alleged problems related to the impact of OCS activities.

The partnership is established essentially by funding State CZM programs with OCS revenues. There are several legitimate criticisms must be offered regarding this means of creating a partnership between the Federal Government and the coastal States. First, the legislation does not create an incentive for the States to support the OCS program. There are no provisions in the so-called compromise bill that offer an advantage to States in having OCS activities offshore. Furthermore, the amount of money that each coastal State would receive would not be large enough to induce a State to change its political position with respect to OCS leasing. It would instead only create an incentive to lobby for increases in the percentage of OCS receipts allocated to the fund. Thus, once the proposed revenue sharing plans were in effect, individual States could continue to resist OCS leasing without suffering any adverse consequences.

One approach to OCS revenue sharing that has been suggested would probably create some incentive for the affected States to support the OCS program. That plan would not involve the sharing of revenue on the basis of participation in programs such as those related to coastal zone management. Rather, a State's share of OCS revenues would be determined on the basis of the value of OCS oil production accounted for by operations off the State's coast. Although, this alternative would represent a dramatic improvement over that which is contained in proposed legislation, it would not in itself make OCS revenue sharing a sound public policy.

Second, coastal zone management problems faced by coastal States are not related in any important way to OCS leasing. There is no obvious rationale for the funding of CZM programs with OCS revenues. The coastal zone problems faced by the respective States are largely the result of onshore activity and the regulatory mismanagement of the States. For example, in coastal Louisiana, marine life has been adversely affected in areas near the mouth of the Mississippi. This situation may well represent a serious coastal zone management problem. However, it is a problem that has arisen because of numerous activities along the entire length of the river. These include:

Industrial and municipal dumping; dredging and channeling; agricultural erosion and overfertilization; overfishing; and flood control efforts which

affect erosion rates, shapes of shorelines and nutrient levels.

To a major extent, the resulting situation has emerged because of regulatory neglect at the State level. Although the construction of OCS related facilities has resulted in some disruption in coastal zones, the major problems in coastal zone management are not connected with OCS activity in any predominant way. Thus, if OCS revenues are to be channeled into block grants at the State level, use of the funds should be limited to alleviation of only legitimate problems that arise directly from OCS activities.

Third, although the announced rationale for tying block grants to CZM programs was that of establishing the partnership, the actual intent in the Congress was apparently quite different. By using CZM programs as a qualifying criterion for block grants, the sponsors of the legislation have been able to expand the number of States that would be beneficiaries under the bill and thus to broaden congressional support for the proposed legislation. This approach would provide a means of continuing Federal funding of a program that has been given much lower budget priority by both the Congress and the administration.

Fourth, with respect to a need for a partnership between the Federal Government and the coastal States, it should be pointed out that a type of partnership has always existed. A partnership is created by the fact that all of the States in the Union benefit from the OCS program. These benefits take the form of more secure energy supplies and tax displacing revenues which flow into the U.S. Treasury. These are benefits which accrue directly or indirectly to every American and give citizens of coastal States a vested interest in an expedited, efficient, and well managed OCS program.

BUGETARY AND FISCAL ARGUMENTS AGAINST THE SHARING OF OCS REVENUES

There are three additional arguments that should be made against the implementation of a revenue sharing plan:

First, the Federal Government is currently operating with very high deficits; the implementation of a revenue sharing program would only aggravate an already serious problem.

Second, the system of block grants provided for in existing legislation would reduce Federal budgetary flexibility.

Third, a program of sharing OCS revenues through block grants would necessarily require an administrative and regulatory mechanism at both the Federal and State level.

The first point raised above does not require much elaboration. Although the legislation currently being considered would provide for a fund of an amount up to $300 million, it can readily be seen that once the fund is in existence, pressure would be applied in the Congress to increase its size. In other words, once the door is opened it is reasonable to expect that the fund would receive even larger shares of total tax receipts.

Second, budgetary flexibility would be reduced by any OCS revenue sharing program even though funding would be established through an appropriation process on an annual basis. The statutory existence of a fund would add institutionalizing rigidity to the appropriation process; the States would have an established forum in which to lobby for expanded funding for block grants. This process would almost certainly result in a commitment of OCS revenues to programs the merit of which has already been challenged at the Federal level.

The third point focuses on the administrative burden that would be imposed by the proposed OCS revenue sharing procedure. This burden would be borne at both the Federal and State level; it would be made costly by the regulatory procedures that would be required to implement such a plan. In light of the points rasied in the preceding discussion, it is doubtful that the benefits would justify the costs that would be involved.

CONCLUSIONS

The arguments in favor of OCS revenue sharing have rested on the following considerations;

The need to compensate States for environmental and socioeconomic impacts of OCS leasing;

The need to redress inequity in the ways in which States benefit from the revenues generated from Federal mineral leasing; and

The need to form a partnership between the Federal Government and the States in the management of coastal resources.

In the first instance it was pointed out that negative net impacts of OCS leasing on coastal communities are not readily apparent. To the extent that legitimate impacts occur, Federal programs are already available to deal with problems arising from OCS activity.

The inequity issue raised by the Federal mineral revenue sharing arrangement with the inland States also fails to provide a convincing rationale for OCS revenue sharing. It was pointed out that inland States may sustain legitimate burdens as a result of the leasing of Federal minerals lands within State boundaries. These burdens have no obvious counterpart in the manner in which coastal States may be affected by OCS leasing.

The most flawed of the three arguments for OCS revenue sharing is that based on the need for a partnership between Federal, State, and local governments. OCS revenue sharing has been offered as a means of generating support for the OCS program at the State level. However, it is clear that it will do no such thing. No incentive would be created for any State to support the program since the proposed sharing formulas largely ignore central issues such as OCS impacts and the extent of OCS activity off the coast of States. The proposed sharing formulas are determined on the basis of a State's implementation of a Coastal Zone Management Program as defined under Federal law. Such an arrangement has several unfortunate implications:

First, many States without offshore leasing would be beneficiaries;

Second, States such as Texas without a CZM program would receive nothing even though Texas has extensive offshore leasing;

Third, coastal zone problems addressed by these programs are largely unrelated to OCS activity;

Fourth, States benefiting from the proposed sharing arrangement could continue to resist additional leasing without affecting their respective shares of revenues;

Fifth, the Federal Government would loose much needed revenue to support CZM entitlements even though these programs, CZM, have been given dramatically reduced priority in the Federal budget; and

Sixth, the proposed sharing arrangement would require a costly regulatory and administrative mechanism; this consequence would run counter to this administration's efforts to reduce the administrative and regulatory burdens imposed on the American public.

Mr. President, I could go on for much longer but I will stop for now. I cannot in good conscience support this measure. I am prepared to debate it at some length. Indeed, I have an additional comprehensive critical review of the issue. At this point, however, I will relinquish the floor for now so that other Senators may have an opportunity to speak.

Mr. TOWER. Mr. President, this so-called Outer Continental Shelf revenue-sharing legislation has reached the Senate in a form that is vastly different from the original bill. It does not, in my estimation, achieve its stated objective of sharing OCS revenues with States participating in OCS development. Instead it operates under a thinly veiled disguise to disburse Federal funds to States that may or may not be participating in OCS development, even to States that may or may not have coastal waters. In fact, under the allocation formula in this legislation, a State could oppose OCS leasing, exploration, and development, yet still receive substantial grants from the OCS revenue-sharing fund.

This measure creates a new entitlement program that will add $3 billion

to the deficit in the next 10 years. The administration has made no secret of its intention to veto the bill. I submit that the Senate should follow the lead and think twice before passing this ill-conceived piece of legislation.

In addition, the bill would earmark one-quarter of the OCS receipts for coastal zone management programs. Yet, funding for these programs has been reduced by Congress during the last few years. This legislation is attempting to fund a program that, although possibly related, is not directly tied to OCS development. Under the same allocation formula, States would be penalized for choosing not to establish a coastal zone management plan. Incentives for establishing such operations have been enacted. While I recognize the importance of balancing environmental concerns with energy development, I oppose this end-run attempt to earmark funds for coastal zone management programs.

In short, Mr. President, this bill is not a revenue-sharing bill for States involved in OCS activity. Instead it adds to the deficit by rewarding some non-OCS States and penalizing other States with a significant role in OCS development.

For these reasons, I urge my colleagues to oppose this bill.

Mr. GORTON. Mr. President, I support passage of the conference report on S. 2463, the NMFS authorization. This legislation establishes the ocean and coastal resources management and development fund from which block grants will be made to coastal States and territories, and which authorizes appropriations for several National Marine Fisheries Service (NMFS) programs and deep seabed mining.

I would particularly like to focus on the provisions contained in section 205 of this bill relating to the Magnuson Fishery Conservation and Management Act (MFCMA). The amendments to the MFCMA are intended to expand foreign trade opportunities for our American fishing industry and to ensure that our own fishing industry receives the maximum obtainable benefits whenever the Federal Government allocates surplus fish in our 200-mile zone to foreign nations.

The "fish and chips" policy embodied in the MFCMA is a sound, fundamental premise of our fishery management process, and it has provided substantial benefits to many sectors of our fishing industry. Strengthening of the act's provisions governing allocations, however, should bring those practices more into line with the act's purpose.

Allocations of fish from our fishery conservation zone (FCZ) to foreign nations is not a right on which foreign nations should rely. It is a privilege—a privilege that is only conferred in return for cooperation on their part. To date, that cooperation has not been fully satisfactory.

The provisions in this bill would accomplish three principal objectives. First, it would more sharply define our "fish and chips" policy by explicitly stating that purchases of processed fishery products, particularly bottomfish, and not just purchases of unprocessed fish, are expected in return for allocations. This does not mean that joint venture over-the-side purchases from U.S. fishermen are not desirable or beneficial to our industry. They are. It simply means that purchases of fish by themselves are not all we're trying to accomplish—that by themselves, they are not enough. The purpose of the allocation criteria is to stimulate purchase of American processed fish. The benefits to our fish-processing industry are to be given importance, equivalent to that of the fish-harvesting industry.

Second, the conference report clarifies the Magnuson Act so that there is no doubt that allocations to a foreign nation occur when we are satisfied with that foreign nation's arrangements to purchase U.S. fish and fish products—and clarifies that full allocation of the total allowable level of foreign fishing, or TALFF, is not required by law.

Third, S. 2463 sharpens the focus of "fish and chips" to require an evaluation of what the foreign nation seeking an allocation is doing for our domestic industry in the fishery for which an allocation of pollock must show what it is doing to open its market to American exports for pollock and cannot merely gain an allocation credit by purchasing other species of fish.

These reforms to the allocation provisions of the Magnuson Fishery Conservation and Management Act should provide a significant boost to our fishing industry's efforts to expand and improve its utilization of our FCZ's fishery resources. These reforms should also make it clearer to foreign nations wishing to fish in our FCZ that the privilege of access carries the responsibility of cooperation and reciprocal market access.

I would now like to focus on title I of S. 2463. The development of this title was guided by several principles.

First, a portion of Federal revenues from the extraction of nonrenewable OCS mineral resources should be applied toward continued management and development of renewable ocean and coastal resources;

Second, in accordance with current initiatives to expand OCS mineral leasing, emphasis should be placed on providing funds for State management efforts, block grants, and State decision flexibility. This facilitates the development of a partnership on OCS development versus the traditional adversary roles between the State and Federal Governments; and

Support of certain ocean and coastal programs should be maintained in the block grant concept, including coastal zone managmeent, long-range scientific research, as well as living and nonliving marine research programs.

The State of Washington, the first State with an approved coastal zone management program, has a deep and longstanding interest in programs which would receive funding under this bill. The Coastal Zone Management Program, as well as other living and nonliving resource development programs, are activities which significantly contribute to the quality of life and to the economy of Washington State.

In conclusion, I would like to point out that the amount paid into the fund is tied to expanded offshore development. As OCS activity increases, Federal revenues increase, and the size of the fund grows. Furthermore, mitigation of coastal energy impacts is a major goal of S. 2463. The allocation formula reflects this goal. Sixty percent of the formula is tied to energy activity, with 40 percent of the portion emphasizing OCS activity exclusively. Therefore, State next to producing and frontier regions of the OCS will receive the largest grants. Last, this program will be entirely subject to the control of Congress through the normal authorization and appropriations process.

Mr. DURENBERGER. Mr. President, while I disagree with the conclusion, I compliment the Senator from Washington on the articulate statement. He did talk in much of his statement about an industry that is important to the State of Washington. He did point out, as I did in my opening statement, that the Congress a number of years ago in the coastal zone managmeent legislation provided for appropriate measures of protection.

Mr. HATFIELD. Mr. President, I do not need to repeat the comments which have already been made regarding the need for Outer Continental Shelf oil and gas revenue sharing with States and local communities. However, I would like to associate myself with those remarks. This program will provide a timely and important "shot in the arm" for economically depressed coastal communities and will put them in parity with inland States which, for years, have received a portion of Federal oil, gas, and mineral reserves.

More importantly, Mr. President, for many areas of the country where new development is taking place, this action by the Senate is taken in advance of actual oil and gas leasing in order that coastal communities may receive "up front" funding to mitigate

the socioeconomic impacts associated with accelerated oil and gas leasing in the Outer Continental Shelf. As you can imagine, it is unique for the Congress to act in anticipation of such a problem.

I want to express my strong personal support and interest in the Ocean and Coastal Resource Institute which will be funded with shared OCS receipts made available by this legislation. While the immediate relationship of such an institution to oil and gas leasing may be lost on many, I must say that institutes like this are fundamental to assuring that coastal States and communities are not used and left as "ghost towns" once oil and gas development is completed. Using money now available from OCS oil and gas revenues, coastal communities will be allowed to plan for future diversified economic development once oil and gas leasing has concluded.

Finally, Mr. President, contrary to some comments made regarding the funding of this bill, the revenue sharing provision will be subject to the appropriation process and will not be an entitlement program. As such, this funding will be fully considered through the congressional budget and appropriation process in addition to the State process which is contained in the legislation. As a Member interested in coastal issues and as chairman of the Senate Appropriations Committee, I applaud the Commerce Committee's consideration and resolution of this funding issue.

Mr. President, I thank you and the sponsors of this legislation for your thoughtful and timely action.

Mr. LONG. Mr. President, I wish to offer my strong support for adoption of the conference report on S. 2463. This measure provides for the establishment of an Outer Continental Shelf revenue-sharing program. Similar to the program I cosponsored in S. 800, the Ocean and Coastal Resources Management and Development Block Grant Act. Enactment of this legislation is critical to ensure development of offshore energy sources and to enable States to effectively manage their coastal zones.

The compromise language in this report provides for the sharing of 4 percent of the revenue from OCS oil and gas development. All coastal States and territories will be assisted in fulfilling their obligations to protect and manage their coastal zones. This is particularly important in a State such as Louisiana which is losing approximately 50 square miles of coastal lands each year.

OCS revenue sharing funds will be allocated to State and local governments in the form of block grants. A similar approach has gained wide favor under the general revenue sharing program. The flexibility and local discretion the OCS plan affords will allow State and local governments to respond to their most pressing coastal needs.

This revenue sharing proposal will also give coastal States a real interest in OCS development. Enactment of this program will give many coastal States, for the first time, an incentive to work with the Federal Government to ensure prudent development of the Outer Continental Shelf.

Mr. President, the sharing of revenues from mineral production on Federal lands is not a new concept. Interior States already receive 50 percent of the revenues from production on Federal lands within their boundaries. It is only fair that coastal States be afforded an opportunity to share in the proceeds from Federal offshore development, so that important coastal responsibilities may be met.

I strongly urge my colleagues to support the adoption of this conference report.

Mr. HOLLINGS. Mr. President, during the last few sessions of Congress, we have seen a great deal of legislative activity concerning the Outer Continental Shelf [OCS], and particularly offshore oil and gas exploration. This has long been a highly controversial issue area because the Outer Continental Shelf is an invaluable storehouse of both nonrenewable resources, such as oil and gas, and renewable resources, such as fish. And the perception is that from time to time our legislative goals for stewardship of the nonrenewable resources conflict with our goals for the renewable resources.

This perception is not entirely unfounded. Issues surrounding both the conservation and development of these precious resources have been difficult to resolve. That is why I am so pleased that at long last we finally have a legislative measure which recognizes the legitimacy of both these interests and provides incentives for OCS oil and gas exploration and development. This legislation is a bipartisan effort and is consistent with the administration's position to strengthen State and local governments.

I am speaking, of course, of the conference report on S. 2463 which carries the House-Senate compromise bill on OCS revenue sharing. And I join our chairman of the Committee on Commerce, Science, and Transportation, Senator PACKWOOD, as a sponsor of this legislation.

S. 2463 establishes a program to share receipts from the Federal OCS leasing program with 30 coastal States and 5 territories through a block grant program. The grants, to be used for ocean and coastal management, would be distributed under a formula which considers both energy and coastal-related factors.

Mr. President, there is no question that opposition from State and local governments is having an adverse impact on the Federal OCS leasing program. It now appears that the OCS leasing progam will generate less than half of the $15.8 billion in Federal revenue that the administration had predicted for fiscal year 1985. This bill will not solve all of our problems with the OCS leasing program, but it will demonstrate our concern for the needs of State and local governments and provide them with a strong incentive to cooperate with our national goals.

We have witnessed almost a decade of lawsuits brought by coastal States against the Federal Government over when, how, and how much OCS oil and gas leasing would occur off their shores. And how, to further intensify matters, the Federal OCS oil and gas leasing program has been accelerated tremendously, thereby putting even greater pressure on the coastal States to respond to commensurate onshore energy needs. Continued litigation will potentially cost the U.S. Treasury hundreds of millions to billions of dollars in revenues.

I do not believe that the Supreme Court's decision this past January affecting the Federal consistency provision of the Coastal Zone Management Act will settle the controversy. The litigation will continue. The States have a legitimate stake in Federal decisions affecting their shores, and particularly their coastal zones. It is only equitable to enable them to mitigate the impacts of these Federal activities with balanced resource management programs.

Opposition to this measure is based largely on economic grounds—that it will bust the budget.

Everyone in this Chamber is aware of my efforts to reduce deficit spending. They know I would not support legislation that would sharply increase the deficit. But they are also aware that I know a good investment when I see one. And that is precisely what this compromise legislation is—a modest investment that will soon pay off with substantial savings.

And it is indeed a modest investment. The funding that would be provided through the block grants represents only 4 percent of Federal OCS revenues over the last 3 years—with a cap of $300 million.

This money will act as a disincentive to court action—that is, the funding will provide States with options other than suing the Federal Government to achieve a balance in offshore resource use. Thus, we will be preventing needless litigation and delays in OCS development that could cost our Federal Treasury well into the hundreds of millions of dollars. I'm sure we will recover our investment within a short period of time. Meanwhile, we will be doing much to increase total Federal revenues from OCS leasing, as well as providing our Nation with increased

energy security and environmental protection.

So in the long run, S. 2463 is good economic and public policy.

More importantly, this measure provides States with coastal zone management plans with the funds they need to ensure an uninterrupted permit process. For this reason, I cannot for the life of me understand why the administration is so opposed to funding for State CZM programs. Apparently, they fail to realize that these programs control the permit process. Without funding, the process will slow down—or more likely grind to a halt. These delays will increase costs for the private sector, and ultimately they will translate into a substantial loss of Federal revenues.

There are other reasons why the block grants are necessary, of course. Benefits from offshore oil and gas development are national in scope, yet coastal States, and their local governments and communities, bear a disproportionate burden of the costs. Inland States are compensated by the Federal Government for mineral development within State boundaries. But coastal States receive no such help in conjunction with OCS oil and gas development. It is only equitable that our coastal States share directly in Federal revenues from the Outer Continental Shelf since they bear the burden of that development.

The conference report on S. 2463 does cover more than OCS revenue sharing, and I would like to briefly describe some of its other components.

This compromise legislation reauthorizes, without reduction, the ongoing programs of the National Marine Fisheries Service in the National Oceanic and Atmospheric Administration [NOAA] for fiscal year 1985. These programs include fisheries information collection and analysis activities, fishery conservation and management activities, and State and industry assistance programs. In addition, the bill contains a 2-year reauthorization of the Deep Seabed Hard Minerals Resources Act. Finally, we have included an amendment to the Magnuson Fishery Conservation and Management Act which would provide additional flexibility for the U.S. Government to permit foreign vessels in U.S. waters and increase our foreign trade leverage for U.S. fishery products. None of these matters is controversial.

S. 2463 has 33 other cosponsors in the Senate, and when looking at the list I believe my colleagues will find that the measure is more than bipartisan. It also represents a wide range of philosophies: Senators STEVENS, JOHNSTON, INOUYE, MURKOWSKI, RUDMAN, PELL, TSONGAS, COHEN, MITCHELL, RIEGLE, CHILES, DODD, LONG, THURMOND, CHAFEE, MATSUNAGA, HAWKINS, MOYNIHAN, TRIBLE, BRADLEY, QUAYLE, PERCY, SARBANES, MATHIAS, LEVIN, KENNEDY, LAUTENBERG, GLENN, WILSON, D'AMATO, HUMPHREY, SPECTER, and GORTON. In addition, I understand that Senator LOWELL WEICKER also supports this bill, although he is not a cosponsor.

On March 11 of last year, Senator STEVENS and Chairman PACKWOOD introduced S. 800, the first version of Senate OCS revenue sharing. Shortly thereafter, on March 21, 1983, Senator JOHNSTON and I introduced a second version of the OCS revenue sharing concept. On April 5, after 2 weeks of intense negotiations between our four offices plus those of Senators INOUYE and WEICKER, the Commerce Committee favorably reported the compromise bill, S. 800.

Meanwhile, the House was working on its own version of OCS revenue sharing, H.R. 5. It is important to note that the House actually has a much longer record of interest and action in this area than we do. Under the leadership of the able chairman of the Merchant Marine and Fisheries Committee, Representative WALTER JONES, the House has passed OCS revenue sharing bills in each of the last several years.

This year, the House added H.R. 5 as an amendment to S. 2463, which was originally a fisheries bill. S. 2463, in turn, was passed by the House and became the primary subject of the conference committee. I consider the committee's compromise bill a good and fair one, reflecting the major facets of both the House and Senate bills.

It is important that all my colleagues know that the conference committee—consisting of Senators STEVENS, PACKWOOD, GORTON, INOUYE, and myself on the Senate side, and Congressmen JONES, BREAUX, STUDDS, D'AMOURS, PRITCHARD, YOUNG, and CARNEY from the House—Republican, Democrat, conservative, and liberal alike, voted unanimously for this compromise bill in conference, and every single member of the conference signed the statement of managers. In addition, the House passed the conference report last Thursday by a vote of 312 to 94.

A look at some of the outside supporters of this measure is revealing: The National Governors' Association plus four other Governors' organizations—the New England Governors' Conference, the Western Governors' Association, the Southern Governors' Association, and the Coastal States' Organization. In addition, 28 Governors have issued OCS statements supporting this effort. The U.S. Conference of Mayors supports revenue sharing, as does the National Association of Counties and the Coalition of Coastal Counties. Other organizations include the National Conference of State Legislatures, the National Association of Attorneys General, the National Association of Conservation Districts, the National Association of State Universities and Land Grant Colleges, the American Society of Landscape Architects, the American Planning Association, the American Institute of Certified Public Accountants, the Western Interestate Energy Board, the Western States Land Commissioners Association, the International Association of Fish and Wildlife Agencies, the Interstate Oil Compact Commission, as well as the Atlantic, Gulf, and Pacific Fisheries Commissions, several energy companies, and the environmental community.

Mr. President, I could go on and on, but the point is obvious: The support for this bill is overwhelming. And if you have any doubt, take a look again at the vote in the House last Thursday—312 Members in favor of the bill—over two-thirds of that body.

It is important that we address the questions of Federal-State relations, OCS activities and protection of our ocean and coastal resources. Clearly, S. 2463 is a viable mechanism to address these concerns. The bill will help promote balanced leasing and development of the OCS by providing coastal States with a more direct financial interest in Federal OCS activities. The bill will also provide a long term, predictable source of funds to States to apply to offset the effects of OCS and other energy-related activities, and maintain effective and efficient management of our coastal areas.

I urge my colleagues to support the conference report on S. 2463.

Mr. INOUYE. Mr. President, I wish to express my support for this legislation establishing an Ocean and Coastal Resource Management and Development Fund. This legislation is the result of long hours of negotiations and represents a bipartisan as well as bicameral compromise.

The time for this action is now. The present administration has embarked on an accelerated leasing schedule for the Outer Continental Shelf for oil and gas exploration. Such development may cause adverse impacts throughout the Nation's coastal areas and require States to assume additional responsibilities at a time when their financial resources are inadequate to respond to these economic and natural resource management dislocations.

Since the revenues of the Outer Continental Shelf are obtained through the development of this Nation's nonrenewable offshore resources, some of these revenues would be invested in this Nation's ocean and coastal resource management and efforts to enhance the use, conservation, and understanding of our ocean and coastal resources.

The establishment of this Ocean and Coastal Resource Management and Development Fund, as proposed in

this legislation would provide all coastal States and territories enhanced financial resources to manage and protect this Nation's vital natural resources. The approach taken by the bill is, I feel, both efficient and equitable. It recognizes that those States with the greatest need for funds to offset OCS development should receive the largest grants. The amendment also recognizes that all coastal States and territories have resource management and development needs and thus provides each with an adequate minimum grant. Taken as a package, this legislation offers a balanced approach to the inevitable impacts of accelerated Outer Continental Shelf leasing.

Mr. RIEGLE. Mr. President, I rise in strong support for this legislation which will finally bring a measure of parity to the Great Lakes in the Coastal Zone Management Program. By acknowledging the Great Lakes as the fourth seacoast, we are making an affirmative statement that the benefits of the National Coastal Zone Management Program should be distributed in an equitable fashion to all coastal States, be they freshwater or saltwater.

The Coastal Zone Program provides block grants to States which have enacted approved coastal zone programs. The funds are generated by revenues from the Outer Continental Shelf leasing program. These moneys are designed to provide States with the means to offset the impacts of energy development and energy-related activities, including energy transportation effects.

Mr. President, the Great Lakes contain 95 percent of the surface freshwater in the United States, enough to fill the Grand Canyon 179 times. They provide drinking water for more than 23 million people, and are of tremendous commercial, industrial, and recreational importance to the entire Nation. I am grateful that the Senate has moved to approve this legislation. It is necessary, it is balanced, and will be of great assistance to the States in my region to maintain the vitality of the Great Lakes.

● Mr. JOHNSTON. Mr. President, few realize how important the Outer Continental Shelf is to the future of the United States. Roughly half of the oil and gas we will need by the year 2000 has not yet been discovered. But we do know that 65 percent of our future domestic crude oil discoveries and 35 percent of our future domestic gas discoveries will be made offshore. Currently, 12 percent of our domestic crude and 27 percent of our gas production comes from the OCS. So the OCS has a very important role to play in the energy future of the United States.

At the same time it is essential that we protect and properly manage the natural resorces of our coastal areas. My State of Louisiana has proven over many years that production of OCS oil and gas and protection of coastal resources are mutually consistent goals. As of the beginning of 1981, over half of all OCS acreage leased for the entire Nation was leased in waters off my State. I am convinced that as OCS actively spreads to other areas and increases in intensity that achieving OCS oil and gas development as well as protecting and nurturing OCS resources will require a cooperative effort between Federal, State, and local government.

I am particularly pleased to rise in support of the conference report on S. 2163, the Ocean and Coastal Resources Management and Development Block Grant Act. I was an original cosponsor of the measure (S. 800) which was reported from the Committee on Commerce, Science, and Transportation. I endorse this bill as reported by the conferees because it will provide the necessary framework for the intergovernmental cooperation that is essential for future OCS development and protection. The bill provides Federal block grants to States for coastal zone management programs, coastal energy impact programs, and activities relating to living marine resources and natural resources in coastal areas. The amount of block grants allocated to States is tied to: First, OCS acreage leased, and oil and gas produced; second, planned OCS lease sales; third, coastal-related energy facilities; fourth, shoreline mileage; and fifth, coastal population.

This bill involves local government in coastal areas in particular. S. 2163 requires that each State pass through at least one-third of their block grants to local government to be expended for eligible uses.

Mr. President, I think that it is important to note that this bill does not create an entirely new program. Most of us are concerned about the creation of new programs, given our deficit situation. Instead, S. 2163 consolidates current coastal zone management programs and coastal energy impact programs into a block grant program that properly gives States more flexibility to fashion the programs to fit their own situations.

Another concern that has been raised is whether this bill is an entitlements program. In fact S. 2163 is simply an authorization bill that moves existing coastal programs into a block grant program. The whole bill is subject to appropriations, so there is no entitlements aspect to this bill at all.

Moreover, the authorization level in this bill is a function of Federal OCS revenues. The estimates of the Department of the Interior are that OCS revenues will actually decline this year and next as compared to last year. By tying the authorization ceiling to the amount of Federal OCS revenues collected and by tying a States respective allocation to oil and gas production and lease sales off its shores, the bill gives States a greater stake in the development of OCS oil and gas resources. Hopefully, enactment of this bill will reverse the immediate trend of declining OCS Federal revenues.

Finally, I want to congratulate Senator STEVENS, Senator PACKWOOD, Senator HOLLINGS, and other members of the Commerce Committee for the hard work they put into this legislation. I urge all my colleagues to support the adoption of this conference report.●

THE "SATISFACTORY PROGRESS" DETERMINATION FOR A COASTAL STATE WITHOUT AN APPROVED CZM PROGRAM

● Mr. PERCY. Mr. President, I would like to engage the distinguished Senator from Oregon [Mr. PACKWOOD] in a colloquy regarding the conference report to S. 2463, the Ocean and Coastal Resources Management and Development Block Grant Act.

From 1974-78, Illinois participated in the Federal Coastal Zone Management Program and developed a program that would have established a State/local partnership designed to address the significant coastal issues of the Illinois coastal area. Unfortunately, enabling legislation did not pass the general assembly and Illinois was unable to obtain final program approval.

Since that time, Illinois has utilized the blueprint designed during that period to ensure the wise management of coastal resources within the State. The State's activities include the development of a comprehensive shore protection plan, strict enforcement of construction activities in coastal waters, the development and expansion of recreational activities and facilities and public access in the coastal zone, to name but a few.

Mr. President, the goals of the CZM program are worthwhile, and it is my understanding that the government of the State of Illinois will continue its good faith efforts to come within the umbrella of the Federal Coastal Zone Management Program.

My question to the Senator is, am I correct in understanding that these ongoing coastal resource management activities will enable Illinois to receive a satisfactory progress determination from the Secretary as outlined in section 5(e)1?●

● Mr. PACKWOOD. Mr. President, let me say to my good friend from Illinois that he is absolutely correct in his understanding. The purpose of that provision in the legislation is to allow States, like Illinois, that are establishing the programs and policies necessary for program approval under section 306 of the Coastal Zone Management Act to receive a finding of satis-

factory progress for up to 2 years and qualify to receive full funding under this revenue sharing program.●

● Mr. PERCY. I thank my colleague for his clarification on this vital matter.●

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I would ask the distinguished Senator from Minnesota if he would clarify a point that I may have missed. It was with reference to an amendment to the Tax Code. Did I understand the Senator to say that this conference report would amend the Tax Code?

Mr. DURENBERGER. No; I did not say that.

Mr. LAUTENBERG. Then I misunderstood the Senator. I will not pursue the question.

Mr. President, I rise in support of the conference report on S. 2463. The report provides that the Federal Government begin to share with States, some small portion of the revenues it receives from energy development in the Outer Continental Shelf, just off the shores of our coastal States.

Mr. President, I was pleased to be an early cosponsor of S. 872, Senator HOLLINGS' OCS revenue sharing bill, and a cosponsor of S. 800, Senator STEVENS' OCS revenue sharing bill, which was ultimately reported with amendments by the Commerce Committee. The effort to provide OCS revenue sharing has been a long one.

OCS revenue sharing serves three goals, Mr. President.

First, it provides coastal States like New Jersey with a source of funding for State programs that manage and protect our coastal resources—our fragile and valuable coastal resources. This administration has sought, time after time, to gut our Nation's coastal programs. Creating a dedicated fund, to support State efforts, would provide a measure of stability that has been sorely lacking.

Second, it recognizes the Federal Government's obligation to compensate coastal States for bearing the brunt of the impact of OCS energy development, energy development that benefits the Nation as a whole. This is in keeping, Mr. President, with a longstanding national policy, embodied in the Federal Mineral Leasing Act. Under that law, mostly Western States enjoy a share of Federal revenues, gained from oil, gas, coal, and other mineral leases on Federal lands. It is argued, these States must bear the burdens of the development. By the same principle, Mr. President, coastal States should receive some compensation for the burdens they bear.

Third, Mr. President, this bill would link the Federal Government and the States in a stronger partnership to develop our energy resources. It is unfortunate that this administration has done so much to drive a wedge between States and the Federal Government, in the area of OCS development. The Governor of my own State, a member of the President's party, was compelled to take Secretary Watt to court, over his refusal to heed limited objections to wholesale leasing off New Jersey. At stake was the health of New Jersey's commercial fishing industry and the delicate habitat of ocean life. Creation of the fund for sharing OCS revenues would give States a stake in energy development—responsible energy development—environmentally sound energy development.

Mr. President, there is some discussion about a veto of if this report is adopted, and the bill sent to the President. I have a copy of a letter signed by the Secretary of the Treasury, the Secretary of the Interior, the Secretary of Energy, and the Director of the Office of Management and Budget. Mr. President, I invite any of the authors of this letter to come to New Jersey, to speak to the people in the towns and counties along the coast, and explain to them why the Federal Government will share, for example, $145 million with the State of Wyoming, for oil and gas leases in that State, but it would be "unnecessary and unjustified" to share a portion of OCS revenues with New Jersey.

Mr. President, OCS revenue sharing is fair; it is important to the coast; and its time has come. I urge my colleagues to support the adopting of the conference report.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH Mr. President, the Congress is now past due its adjournment date. We hope that we would have adjourned sometime last week. The date has been put off longer and longer because of the problem with the continuing resolution.

Mr. President, I think it is fair to say that the conference report on Outer Continental Shelf revenue sharing is an afterthought. This is what could be called a filler, to fill time at the end of the session. There was no intention, as far as I know, on the part of the leadership to bring up OCS revenue sharing during the regular session of the Congress until our time had to be extended because of the difficulties of the conferees.

Mr. PACKWOOD. Will my colleague yield just to set the record straight on this?

I have offered to bring up any number of things. I told the leader I was ready to bring it up at least for the last 3 weeks. It only passed the House about 3 weeks ago in terms of a conference report. This was not brought up just for the sake of bringing it up today. If my good friend thinks that this is just a filler, I would be glad to yield a time limit of another hour on a side and we can vote on it tonight and eliminate it as a filler.

Mr. DANFORTH. I certainly consider it as a filler and as an afterthought. I have been one Senator and I know Senator GORTON, Senator NICKLES, and other Senators have been making speeches about the great job that the majority leader has done in managing affairs of the Senate, and I really believe that. I think that he is a great majority leader and that he has a marvelous sense of timing and a sense of when to bring up important legislation and what sort of legislation really deserves the hearing. I just have too high a regard for the majority leader to believe that he would have brought up this piece of legislation in a serious vein. It is considered seriously by Senators from those States which happen to be blessed by the largess which is included in this legislation, and I understand that.

If there was a bill floating around somewhere which would heap enormous benefits on the State of Missouri, I, too, would be favorably disposed—in fact, I would feel compelled to be favorably disposed—to such regional legislation at this. So I can understand the enthusiasm of some, but as a matter of national policy I do not think many of us would view this as being a serious effort to put forth national policy, and therefore it should be viewed in the context in which it is offered. We have reached the end of the line as far as the 98th Congress is concerned. We are all about to go out and campaign, and we are waiting to get out. And so the OCS revenue-sharing bill——

Mr. STEVENS. Will the Senator yield to me just a moment?

Mr. DANFORTH. Of course.

Mr. STEVENS. I ask unanimous consent that the Senator not lose the floor by doing so.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I am a conferee on the continuing resolution and unable to be here during the whole debate. The State that the Senator just spoke of I am certain had to be my State, with half the coastline of the United States and probably 40 to 50 percent of the potential oil and gas that is affected by the bill that is now before the Senate.

I have been involved with it for a long time and hoped that we would find the time when a conference report on the OCS revenue sharing bill would be on the floor of the Senate. I hoped that it might be under more favorable circumstances but in view of the adamant position taken by the Office of Management and Budget

those favorable circumstances have not developed.

It is not new by the way, Mr. President. From the days of the tidelands cases involving Louisiana, Texas, and California, the old Bureau of the Budget and now the OMB has maintained this position on behalf of the Federal Government and we have seen the OCS program continue to slide along and never really materialize as it could. But I say to my good friend, I hope we could see this bill come to a vote. It is a conference report that represents a great deal by work of the people of this Congress. Many people including my good friend, the chairman on the other side, Congressman WALTER JONES, have called me repeatedly to try and see if we could not hasten the day when there would be a vote on the conference report. So I hope there will be a conference report vote. I do intend to support it. I congratulate the chairman for bringing it up. Again, I wish it could be under more favorable circumstances, but I am sure the Senator from Missouri realizes that we anticipate that this bill would not find easy sailing once it left the Hill. Unfortunately, that is my projection, but I hope that he will allow the bill to come to a final vote so that we may get that test and find out what really its future will be. I do thank the Senator for yielding to me.

Mr. DANFORTH. Mr. President, Alaska is certainly one of the States which would benefit greatly by this legislation, but it is not the only State. There are a few others. Alaska between 1974 and 1983 had average receipts from the coastal zone management bill and the coastal energy impact program of $2.58 million, and under this program it would get an estimated $36.2 million, for an increase of 1,170 percent. So Alaska would certainly be one of the big winners, but it would not be the biggest winner. There are some that would even do better, and I would point that out to the Senate and I will point that out as we proceed with this debate.

But let me say now, Mr. President, we do bring this up in the late days of this Congress as a conference report. That is the subject before us, a conference report on the Outer Continental Shelf revenue sharing bill. We have not had a chance to vote on this on the floor of the Senate. This issue was not raised on the floor of the Senate until it came to us in the form of a conference report. As I understand the situation, a totally nongermane, irrelevant bill was passed by the Senate, and the House struck everything after the enacting clause and inserted this.

It was not passed in the Senate. It did not come to the floor of the Senate, and I would suggest the reason it did not come to the floor of the Senate is that it would be viewed by most Senators—well, maybe not most, but a good number of Senators—as being so clearly unfair, such clearly regional legislation that it would have very heavy going if it came to the floor of the Senate in the form of a bill.

Mr. President, I ask unanimous consent that my remarks so far not be counted as a speech under rule XIX which restricts the number of speeches to two on one subject in a legislative day.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. LAUTENBERG. If I might just respond briefly to my colleague from Missouri to put a question to him about the timing of this filler bill, as he describes it. I remind him with all due respect that this bill was reported by the committee in April of 1983. Still, no opportunity was made available to fully debate it on the floor of the Senate, to consider the issues, to see whether the bill was purely regional or was, in fact, a bill of national interest. I agree with him that the timing is not very good; but that does not, in my view—and I would guess in the view of supporters of the conference report—negate the fact that this is an important piece of legislation. It does address a situation that is terribly inequitable, because there is hardly any difference, in my view, between sharing the revenues derived from property wholly within the State borders and that which is along the coast.

So, with all due respect to my esteemed colleague from Missouri, the time was there; unfortunately, the willingness to have this full debate was not.

Mr. DANFORTH. Mr. President, in my view, this bill is so raw and so contrary to the general interests of the country as a whole that it would have been very tough sledding had it been brought to the Senate in the usual form, and we would have been able to debate it and amend it. Instead, it comes to us as a conference report.

I look forward to having the opportunity to continue the debate. I have a few notes to sustain me in that effort. But I understand that the Senator from Idaho has something on his mind. Therefore, I am happy to yield the floor now, with the understanding—which I believe has been reached by unanimous consent—that my remarks so far will not be construed as a speech for the purpose of rule XIX, which limits the number of speeches on one subject in 1 day.

Mr. MELCHER. Mr. President——

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Montana.

Mr. MELCHER. Mr. President, I call for the regular order.

PUBLIC DEBT LIMIT INCREASE

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 654) increasing the statutory limit of the public debt.

The Senate resumed the consideration of the joint resolution.

AMENDMENT NO. 7080

(Purpose: To amend the Internal Revenue Code of 1954 to clarify the application of the imputed interest and interest accrual rules in the case of sales of residences, farms, and real property used in a trade or business)

Mr. MELCHER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes an amendment numbered 7080 to amendment numbered 7072.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection?

Mr. DANFORTH. Mr. President, I suggest the absence of a quorum.

SEVERAL SENATORS addressed the Chair.

The PRESIDING OFFICER. Is there objection to reading of the amendment?

Mr. SYMMS. Mr. President, I seek recognition.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. What did the Chair rule on?

Mr. MELCHER. This amendment is on imputed interest, and I think it is time to get back to that.

Mr. SYMMS. Mr. President, I was seeking recognition at the time.

The PRESIDING OFFICER. No one was eligible to be recognized.

Mr. SYMMS. Mr. President——

The PRESIDING OFFICER. It was a determination as to whether or not the clerk should read the amendment proposed by the Senator from Montana.

At the end of the pending amendment, insert the following new section:

SEC. . (a) Subsection (e) of section 483 of the Internal Revenue Code of 1954 (relating to reduced rate of interest in case of sales of principal residences or farms) is amended to read as follows:

"(e) REDUCED RATE OF INTEREST IN CASE OF SALES OF RESIDENCES, ARMS, OR REAL PROPERTY USED IN A TRADE OR BUSINESS.—

"(1) IN GENERAL.—in the case of any debt instrument arising from a sale or exchange

to which this subsection applies, the discount rate under subsections (b) and (c)(1)(B) shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any sale or exchange—

"(A) of property for use as a residence by an individual,

"(B) of a farm (within the meaning of section 6420(c)(2))—

"(i) by an individual, estate, or testamentary trust,

"(ii) by a corporation which as of the date of the sale or exchange is a small business corporation (as defined in section 1244(c)(3)), or

"(iii) by a partnership which as of the date of the sale or exchange meets requirements similar to those of section 1244(c)(3), or

"(C) of real property by any person (whether or not described in subparagraph (A)) used in a trade or business of such person or held by such person for the production of income.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall not apply to the portion of the stated principal amount of the debt instrument arising from the transaction which exceeds the applicable limit.

"(B) APPLICABLE LIMIT.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2)(A)	$250,000
Paragraph (2)(B)	2,000,000
Paragraph (2)(C)	1,000,000

"(C) REDUCTION IN APPLICABLE LIMIT WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any transaction with respect to which the sales price exceeds the applicable limit, the applicable limit shall be the amount which bears the same ratio to the applicable limit as—

"(i) as the applicable limit, bears to

"(ii) the sales price.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) 15-year or 18-year real property (within the meaning of section 168), disregarding de minimis amounts of personality associated with such real property.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years, or

"(ii) in the case of a debt instrument involving recovery property, ⅔ of the recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(1) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued,

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of the total interest accruing thereunder, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATIONS OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274(d) for any period (other than the Federal short-term rate) exceeds by more than 2 percent such rate for the preceding period, such applicable Federal rule for purposes of applying this section to any debt instrument to which this subsection applies shall be equal to the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) the greater of 1 percent or one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1–June 30, 1985	10.5
July 1–Dec. 31, 1985	11
Jan. 1–June 30, 1986	11.5
July 1–Dec. 31, 1986	12

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection—

"(i) all debt instruments arising from any transaction (or any series of related transactions) shall be treated as 1 sale or exchange.

"( ) SALES PRICE.—For purposes of this paragraph, the sales price shall be determined as of the time of the sale or exchange.

"(7) APPLICATION WITH SUBSECTION (f).—In those cases of any qualified sale (as defined in subsection (f)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (f)(1) applies."

(b) Special rule for determination of Applicable Federal Rate for 1984.

In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of Section 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(c) Subparagraphs (A) and (B) of Section 1274(c)(2) (relating to exceptions from the determination of the issue price in the case of certain debt instruments issued for property) are amended to read as follows:

"(A) SALES OF FARMS AND REAL PROPERTY USED IN A TRADE OR BUSINESS.—Any debt instrument arising from a sale or exchange described in subparagraph (B) or (C) of section 483 (e) (2) but only to the extent of that portion of the stated principal amount to which Section 483(e) applies."

"(B) RESIDENCES.—Any debt instrument arising from the sale or exchange of any property for use as the residence of the obligor under such instrument."

(d)(1) Section 483 (d) of the Internal Revenue Code of 1954 (relating to exception and limitations) is amended by adding at the end thereof the following new paragraph:

"(5) ASSUMPTIONS.—This section shall not apply to any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion or any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

(2) Section 1274 (c)(4) of such Code (relating to exceptions) is amended by adding at the end thereof the following new subparagraph:

"(G) ASSUMPTIONS.—Any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion or any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

(e) Subparagraph (F) of section 1274(c) (relating to exceptions for sales or exchanges to which section 483(e) applies) is amended by striking out "section 483(e)" in the text and heading thereof and inserting in lieu thereof "section 483(f)."

(f) The amendments made by this section shall take effect as if included in the amendments made by the Tax Reform Act of 1984.

The PRESIDING OFFICER. The floor is now available.

Mr. DANFORTH. Mr. President——

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DANFORTH. I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk continued the call of the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I had not meant that there would be a call for the regular order which would bring this back, and I did not ask unanimous consent to proceed to this matter.

I now move that the Senate proceed to consideration of the conference report on OCS revenue sharing.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion is agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT—CONFERENCE REPORT

The PRESIDING OFFICER. The conference report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2463) to authorize appropriations of funds for certain fisheries programs, having met, have agreed that the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment.

The Senate continued with the consideration of the conference report.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. DANFORTH. Mr. President, I had thought that perhaps we would be moving on to other matters and that perhaps the Outer Continental Shelf revenue sharing bill would be dropped at this point, but it is not. Therefore, I want to resume where I was a few minutes ago in discussing the thrust of this bill.

As I said earlier, this bill has never really been on the floor of the Senate before. It comes to us for the first time in the form of a conference report. We do not have the option, therefore, of going into it in any detail for the purpose of amending it, determining what the pluses or minuses are. When this was in the Commerce Committee, I was the member of the Commerce Committee who opposed the bill, and it occurred to me, after we reported that bill, that it ever reached the floor of the Senate, I would have some amendments to offer which I think would make the bill somewhat more acceptable. I am denied that possibility because it was never brought to the floor. It is here, instead, in the form of a conference report, and not subject to any input that I or any other Senator would care to bring to it.

Let me say at the outset, Mr. President, that this bill, to say the least, is very controversial. It is a bill which is not only not supported by the administration, but also, it is vigorously opposed by the administration—opposed by the administration to the point of various Cabinet members suggesting that should this be enacted, the result would be a Presidential veto.

In this day and age, when everybody is talking about the deficit and the problem of the deficit, when we are in an election year, just weeks before the election, and both candidates for the Presidency are positioning themselves on the question of the budget and what to do about the deficit, maybe it would be a good thing politically for a Republican Senator to let this go to the President. Maybe we should adopt the conference report and send this to the President and allow him to veto it, because this would give the President an opportunity to take a very strong position to the American people that he is a President who is serious about cutting our ridiculous programs, or at least preventing the enactment of new programs which would simply cost money to the Federal Treasury.

Mr. President, I should like to read to the Senate a letter, or two, or three, which I think do a pretty good job of setting out the position of the administration on this bill.

Here is a letter dated September 18, 1984, from the Office of Management and Budget—at least, on its stationery—addressed to the Honorable HOWARD H. BAKER, Jr., Senate majority leader. The letter is as follows:

DEAR HOWARD: As the Senate prepares to take up the Conference Report on S. 2463, legislation to create a new Federal grant program using revenues derived from Outer Continental Shelf oil and gas leasing, we wish to reiterate the Administration's strong opposition to the bill.

Revenues from OCS leasing in Federal waters are a national resource that should be used for the benefit of the people of every State. That is what happens under existing law. A portion of OCS revenues are used for acquisition of new part and refuge lands, while the remainder go into the Treasury and reduce the need for tax revenues.

As drafted, the Conference Report provides windfall payments to States that are completely unaffected by OCS leasing. In addition, the formula by which grants are determined provides virtually no incentive to State and local governments to encourage their assistance in carrying out the OCS exploration and development program established by the Outer Continental Shelf Lands Act of 1978. Finally, the Conference Report would effectively remove a number of Federal programs from the annual appropriations process by earmarking funds, thereby adding further to the deficit.

In total, reflecting the additonal debt that the Treasury will incur in order to make up for the new grants authorized in the bill, S. 2463 will add more than $2 billion to the deficit over the next 5 years. If the Nation is serious about controlling spending, the first place to start is avoiding the creation of unnecessary and unjustified new programs.

For the reasons stated above, we will be unanimous in recommending that the President veto this bill if it reaches his desk.

This letter is signed by Donald T. Regan, Secretary of the Treasury; David A. Stockman, Director of the Office of Management and Budget; William Clark, Secretary of the Interior; and Don Hodel, Secretary of Energy.

So, Mr. President, the situation is as follows: We have here a letter dated last month signed by not one member of the President's Cabinet but by four members of the President's Cabinet stating the very clear position that if Congress were to enact this law, these four members of the Cabinet would unite in asking the President to veto the bill. If this is not a tribute, I do not know what is.

Here we are in the last days of the Congress trying to get some work done on the continuing resolution, pass the increase in the debt ceiling, and we are in effect killing time with a bill which if passed would simply put the administration in the position of having to recommend a Presidential veto. So really, I think we are accomplishing nothing at all by having this bill before us at this time.

I think that the letter of these four members of the Cabinet makes a number of points which are worth the consideration of the Senate.

First, the letter says that—

In total, reflecting the additional debt that the Treasury will incur in order to make up the new grants authorized in the bill, S. 2463 will add more than $2 billion to the deficit over the next 5 years.

Mr. President, that is a reason for caution lights to flash on any piece of legislation—$2 billion added to the Federal deficit by this bill. Is this really what we want to do when the deficit is one of the No. 1 issues before the country? All of talk about it all of the time. We make speeches about the deficit. We send out newsletters about the deficit. We answer constitutents' letters about the deficit. In the Presidential debate a couple nights ago, the deficit was one of the key questions raised by Vice President Mondale, anyhow.

Now we are told that by a single stroke we are going to be adding $2 billion over 5 years to the Federal deficit.

Those who support this would want us to vote on that. Do we want to increase the deficit by $2 billion over 5 years?

I submit that the answer to that question is no, we do not.

I think deficits are bad. i think we better watch the size of the deficit. Some people say, "Well, don't worry about spending. We can always raise taxes. Let's have a tax increase." And that is a position that many people in politics take. What is the difference? People are not being taxed enough. They say we should not have had a 25-percent tax reduction a few years ago. We should increase taxes. So let us increase spending.

I do not think the American people want tax increases. I do not think that they want bigger deficits. I think they want Government to get its spending in hand. They want Government to bring spending under control.

Every time we in Congress have to cut an existing program, we go through torture. Our constituents write in and say, "Don't cut our favorite program."

What is involved in this matter before us now is not whether or not we are going to have a cut in any existing program. That is not at stake here. What is at stake now before the Senate is whether we are going to have new legislation and start a brand-new program, mint a new program which will spend more money.

Mr. LAUTENBERG. Mr. President, will the Senator yield for a question?

Mr. DANFORTH. I yield.

Mr. LAUTENBERG. In pursuit of the interest of reducing the budget deficit, would the Senator recommend that we repeal the law governing the sharing of onshore leasing revenues? That could save more than $450 million each and every year. Maybe that is one way to equalize the situation and reduce the deficit substantially.

Mr. DANFORTH. I am sure there are a number of programs that deserve review. I have not given any particular thought to that one. The Senator from New Jersey is making the suggestion. I would be happy to review his suggestion with great care because I have the greatest respect for him. But I think that what is involved here has nothing to do with repealing an existing program. At the very least, we should not enact new programs and particularly programs such as this.

I think that there is a difference between minerals which are located within the boundaries of the State and the desirability of sharing revenues from those minerals located within a State's boundaries with the State government. I think there is a difference between that, on one hand, and, on the other hand, what is proposed by this legislation which is sharing revenues from oil and gas production which is not located within the boundardies of any State.

The very nature of Outer Continental Shelf oil and gas production is that it does not take place within the jurisdiction of any State. It takes place 3 miles beyond any State. So this would be similar, for example, to paying the people of the State of Missouri or the State of Missouri revenues gained from coal mining in Illinois, and I think that if I were to propose such a thing people would say, Why do that? I mean, why set out a special program for Missouri because of coal that is located beyond the jurisdiction of Missouri?

Mr. PACKWOOD. Mr. President, will my colleague yield for a question?

Mr. DANFORTH. I yield.

Mr. PACKWOOD. Is my distinguished colleague saying that the State of Alaska is totally unaffected by the mining that goes on off its shore by the Federal Government and, therefore, should get nothing for those offshore revenues because they belong to the local government, and they do not affect Alaska?

Mr. DANFORTH. Right; as far as this Outer Continental Shelf, yes, I do.

Mr. PACKWOOD. They clearly affect Alaska.

Mr. DANFORTH. Positively or negatively?

Mr. PACKWOOD. Both; a little of both. The economy that comes in, just as with coal mining in Wyoming, just as with oil in Texas that happens to be on Federal lands, there is a positive and a negative effect. By and large, the reason we share revenues, whether they come from the sale of timber in Oregon or coal from Wyoming, all of which are Federal public lands, is we feel that the activity has some negative effect on the State.

I am separating this from the so-called payment in lieu of taxes. That is an issue that has come to the floor only in the last 10 years.

We passed that act in 1976. The sole purpose of that act is to say to the State, "This is money you otherwise get if this land were private property and we pay you payments in lieu of taxes." But we have shared receipts with State governments and local government for the sale of timber and minerals off the Federal lands for years.

For the life of me, I fail to see any difference between oil that is located 5 or 10 or 15 miles offshore and oil that may be located 2 or 3 miles underground. You are saying in one case the State can share in the receipts and in the other it cannot, and I do not see the logic.

Mr. DANFORTH. Well, if the purpose of the legislation is to compensate States for some loss or for some sacrifice which the States are making, then should not the program be targeted to that purpose? This program is not targeted to any such purpose at all.

Mr. PACKWOOD. Let us go back then to the general mineral lease, timber leasing that exists now. Take Wyoming—it is how much? A total of $145 million for mineral leasing. That is not targeted. It just goes to the State of Wyoming to use for what purpose it wants because the coal was dug off the Federal land in Wyoming.

Mr. DANFORTH. Tell me, then: Why should the State of Michigan get $11.2 million for oil and gas that is produced on the Outer Continental Shelf? Would the Senator say that that situation is analogous to the mining of coal in Wyoming? I would say not at all. I think it has no relationship at all to the State of Michigan.

Mr. PACKWOOD. The Great Lakes States are covered because of the mineral development, mainly coal, that happens around the Great Lakes States.

Mr. DANFORTH. This is Outer Continental Shelf exploration.

Mr. PACKWOOD. That is the name of the bill. But we intended to apply to all riparian States recompense for any damage done to the States because of minerals taken from Federal lands around the State.

Mr. DANFORTH. What is riparian about the State of Michigan with respect to the oil and gas produced a minimum of 3 miles off the coast of our oceans?

Mr. PACKWOOD. It is riparian to coal produced around the Great Lakes area.

Mr. DANFORTH. Then can Missouri get a little something because we produce coal?

Mr. PACKWOOD. If you want to amend this bill to say States adjacent to the Mississippi River are entitled to something—the Senator could have made that offer in the Commerce Committee, as I recall.

Mr. DANFORTH. I could not have made it on the floor.

Mr. PACKWOOD. No; but you could have made it in committee. I think the Senator is a little piqued because this bill was reported out of committee 14 to 1 and he was the only Senator who voted against it at the time and realized if he offered that amendment—he talks about this bill would be killed on the floor without a doubt—he realized if he offered that amendment it would have failed miserably in the committee and so chose not to offer it.

Mr. DANFORTH. No; it is silly. The problem with almost any amendment to correct this is that if you go that route, if you say, "Well, let's extend it to everything," it just gets sillier and sillier, and that is the case here.

Honestly, there is only one reason that I can see to include Michigan and

Ohio in the largess of this bill, and that is because if you include Michigan maybe you will pick up the Michigan congressional delegation to support it. If you include Ohio, you might pick up the Ohio congressional delegation to support it. Otherwise, you would have a sure loser.

But I think the Senator would have to realize that there is no logical connection between anything that goes on in the State of Michigan and the exploration for oil and gas and the production of oil and gas in the Outer Continental Shelf. This is not 3 miles or 5 miles away from the State border. This is 1,000 miles from the State border.

Mr. PACKWOOD. The Great Lakes States will receive about 6.7 percent of the total amount of money distributed under this formula.

Mr. DANFORTH. Let us take Michigan as an example. The State of Michigan, located, I would guess, 1,000 miles from the closest Outer Continental Shelf oil and gas production which is contemplated, now receives, has been receiving an average of $1,230,000 from the coastal zone management and the coastal energy impact program. Under this bill, that would increase from $1.2 million to $11.2 million. That is almost a tenfold increase; actually, the way it turns out it is about an 811-percent increase for Michigan. And that is wonderful for Michigan; wonderful. But I would submit that there is no logical basis for having this kind of windfall for the State of Michigan for oil and gas produced offshore.

Now, my point, Mr. President, is not to pick on Michigan or any other State. My point is to simply say this: Heretofore, oil and gas produced on the Outer Continental Shelf was to produce revenue which was to be available for the country as a whole. This bill alters that. This bill sets out a fund of that money, a portion of that money to create a new special program not for the country as a whole but for certain designated States.

And I would submit that there is no rational basis for the selection of those States. Some of the States are inland States. The Great Lakes States have been included. Why have the Great Lakes States been included? I would say the reason is politics, to get the votes of the congressional delegation of those States.

How about the inclusion of other States? Is it a reward for their cooperation in their exploration of oil and gas? No. Massachusetts is a State which has done everything it can to oppose the production of oil and gas on the Outer Continental Shelf mainly by the filing, I am told, of various strike suits to prevent the production of oil and gas. That is why the administration takes the position that the effect of this bill would be, instead of to encourage the carrying out of the program, to discourage it by rewarding certain States for trying to throw monkey wrenches into the program of developing the Outer Continental Shelf.

To go back to the letter that was signed by the Secretary of the Treasury, the Director of OMB, the Secretary of the Interior, and the Secretary of Energy, this letter says, first, that the conference report provides windfall payments to States that are completely unaffected by OCS leasing. I have made that point. Windfall payments to States which have no connection with the Outer Continental Shelf; windfall payments to States which are located maybe 1,000 miles away from the Outer Continental Shelf. Those are windfalls.

Then the letter goes on to say:

> In addition, the formula by which grants are determined provides virtually no incentives to State and local governments to encourage their insistence in carrying out the OCS exploration and development program established by the Outer Continental Shelf Land Act of 1978.

The meaning of that is that if a State is recalcitrant, if a State is doing everything it can to oppose Outer Continental Shelf development, it still gets the payment. Why does it get the payment? Again, because the votes of its delegation are needed.

Then the letter goes on to say?

> Finally, the conference report would effectively remove a number of Federal programs from the annual appropriations process by earmarking funds, thereby adding further to the deficit.

Mr. President, I would think that those who say that this is not an entitlement program, not a new entitlement program, are really relying on a very legalistic analysis of what is an entitlement progam.

Referring to the language in the bill, this is in section 104, it says:

> Beginning in fiscal year 1985, and in each fiscal year thereafter, the Secretary of the Treasury shall deposit into the fund, not later than 60 days after the end of the previous fiscal year, an amount equal to 4 per centum of the average amount of all sums deposited in the Treasury of the United States pursuant to section 9 of the Outer Continental Shelf Lands Act.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DANFORTH. Mr. President, I am happy to yield to the majority leader.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I have consulted with the minority leader on this matter. There is a stack of routine matters to be dealt with now. If he is ready, I would like to go ahead and do those.

I ask unanimous consent that there now be a period for the transaction of routine morning business until not past the hour of 4:45 p.m. under the same terms and conditions.

Mr. LAUTENBERG. Mr. President, will we return to the discussion at hand?

Mr. BAKER. That will automatically happen.

Mr. DANFORTH. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator for Missouri.

Mr. DANFORTH. I wonder if the majority leader would include in his unanimous-consent request a request that my remarks not be counted as a speech for the purposes of rule XIX.

Mr. BAKER. Yes, Mr. President; I make that request.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Mr. President, reserving the right to object, and I shall not object, I want to use this opportunity to say that whatever procedure is used to get back on the debt ceiling bill that my amendment would be pending. And, of course, it would be one of the opportunities for the chairman of the Finance Committee to immediately move to table the amendment. I want to make sure that all Senators know that this is the imputed interest amendment and we should debate it as quickly as possible because it is one of the must pieces of legislation that must be cleared up before adjournment.

The PRESIDING OFFICER. Without objection, the request of the majority leader is so ordered.

Mr. BAKER. I thank the Chair.

THE CALENDAR

Mr. BAKER. Mr. President, there are a number of matters that appear to be cleared for action by unanimous consent on this side.

I will identify them as I ask the Chair to proceed to them. The minority leader is on the floor. We have consulted through staff on, I believe, all of these items. So I hope, and believe, that they can all be handled routinely.

HEALTH RESEARCH EXTENSION ACT—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 540 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

> The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 540) to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective

Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. HATCH. Mr. President, I urge my colleagues to expeditiously consider S. 540, the Health Research Extension Amendments of 1984. This is a landmark in public health legislation representing a complete recodification of title IV of the Public Health Service Act which authorizes the National Institutes of Health. It also established a new National Institute of Arthritis and Musculoskeletal and Skin Diseases, an Ethics Advisory Board, and extends the authorization of appropriations for various research boards and clearinghouses.

The conference agreement extends for 2 fiscal years the authorization of appropriations for expiring authorities of the National Institutes of Health [NIH]. These authorities include the National Cancer Institute, the National Heart, Lung and Blood Institute, the National Library of Medicine's Library Assistance Act, and the National Research Service Awards Program. Funding is also authorized for research in spinal cord injury and regeneration, Alzheimer's disease, bioengineering to overcome paralysis and mental retardation.

In addition, the legislation updates the statutory authority for the NIH, strengthens procedures for the investigation of scientific misconduct, provides for issuance of guidelines to assure the proper care and treatment of animals used in research, and increases the emphasis on research related to the prevention of disease.

This legislation is essential to maintain our world leadership in basic biomedical research. It provides authority for funding at a level sufficient to improve our research effort in all areas, and provides a much needed and overdue emphasis on research related to arthritis, musculoskeletal and skin diseases. And it provides enough support for more than 10,000 science trainees per year, which will encourage our talented young men and women to persue careers in biomedical research.

Mr. President, I urge my colleagues to approve this legislation and send it to our colleagues in the House for expeditious consideration. All of our citizens will enjoy the benefits of this investment for many years to come.

Mr. KENNEDY. Mr. President, I rise in support of the Health Resources Extension Act of 1984. This act amends the Public Health Service Act by revising and extending the authorities under which the National Institutes of Health operates.

The measures in this act will enable more people than ever to benefit from the work of this great institution. Health care quality and disease prevention, two areas which I have struggled for improvement, are strengthened significantly.

In addition to revisions in the NIH authorities, the bill includes a measure in which I take particular pride: The establishment of a Congressional Commission on Biomedical Ethics Analysis. The ethical questions that pervade the practice of medicine and biomedical research have become increasingly important topics of public policy discussion every day. It is vital that practitioners, the public, and the policymakers have an authoritative body for guidance and advice on these sensitive, complex, and critical questions.

A key change in the NIH authority is the establishment of the musculoskeletal and skin diseases and revises and extends programs in biomedical research at the National Institutes of Health.

Arthritis is a disease that our society suffers from at great cost. Arthritis and related musculoskeletal disease afflicts 35 million Americans, or 15 percent of the population. Over 250,000 of these are children. Research on arthritis is currently conducted under the National Institute of Arthritis, diabetes and digestive and kidney diseases. This act divides NIADDK into a new National Institute of Arthritis, Musculoskeletal and Skin Diseases, and renames the balance of the Institute as the National Institute of Diabetes and Digestive and Kidney Diseases. Creation of the new Institute will allow us to appropriately focus our national research effort on the prevention, diagnosis, treatment, and eventual cure of arthritis and related debilitating diseases.

The two largest research Institutes at NIH are the National Cancer Institute and the National Heart, Lung, and Blood Institute. Under this legislation, funding for these Institutes is extended through fiscal year 1986. In addition, we have expanded cancer research and cancer control programs to support research projects improving long-term care of the cancer patient and his or her family. Better methods are needed to optimize care for the cancer patient during the different stages of the disease process, as well as for the psychosocial support of families, medical staff, and patients. We have provided for the continued operation of the International Cancer Research Data Bank, an invaluable tool for both cancer patients and physicians throughout the Nation.

The problems of the mentally retarded are of special concern to me; I have continually supported efforts to better the lives of those who suffer this disease. Outstanding centers around the country have engaged in research on the causes, prevention, and treatment of mental retardation. These centers have been highly successful in improving our knowledge of the condition. This act directs the National Institute of Child Health and Human Development to make grants to the centers, and also adds research on mental retardation to the statement of purpose of the institute.

As our Nation continues to advance the science of new energy technologies, more and more questions will arise regarding the health effects of these technologies, particularly as they relate to nuclear energy. People who develop these technologies, and the communities surrounding such facilities must be informed of the risks therein and of the precautions necessary to prevent potential health problems. This act authorizes the Secretary of the Department of Health and Human Services to establish an independent research center on the health effects of nuclear and other new energy technologies.

Public health emergencies have regularly recurred over the past decade, and given that history, we must improve our ability to quickly understand and manage the resulting crises. The Health Resources Extension Act authorizes the Secretary, in consultation with the heads of the NIH, FDA, and CDC, to designate public health emergencies and to expedite the review process for research applications designed to ultimately contain and to eliminate the threat to public welfare.

Alzheimer's disease, a progressive disorder of the brain affecting memory, thought, and language, has become of increasing concern to the Nation. Our elderly, a growing population, and the largest user group of health care services, suffer terribly from this disease, as do their families and loved ones. This act allows continued funding for centers whose goals are to understand and conquer this disease.

In this act we have required the Secretary to prepare for Senate and House committees an annual report on NIH procedures involving grants, contracting, accountability, and peer review. In addition, the Institute Directors must notify their advisory boards of any investigation of a grant or grant recipient. These requirements are important to insure the high quality of research at NIH and the continued good faith the American public has in its findings.

We have for the first time created within the NIH an Institute of Nursing to engage in the research germane to that profession. It has become increasingly clear that we must look to all members of the health care team for solutions to modern day problems of prevention, access and delivery.

Many of these problems are best addressed by better understanding of the dynamics of the health care process, dynamics to be addressed in the Institute of Nursing.

The reestablishment of a permanent, independent, and nonpartisan body to examine issues of biomedical ethics is a cause for which I have worked long and hard. Every day, citizens, physicians, researchers, and policymakers face ethical questions which are vitally important and extremely difficult. In this session of Congress alone, questions of appropriate treatment for severely disabled infants with life threatening conditions, and the conditions under which fetal research should be conducted have been hotly debated.

Questions of biomedical ethics often have no obvious answers. Decisionmaking in these areas is often difficult for policymakers, organizations of health professionals, and for citizens.

No commission can produce answers to these questions that will always satisfy the conscience of every citizen and policymaker. Nor will the recommendations of such a commission induce either legislative action or individual decisionmaking.

Despite these limitations, however, the old President's Commission on Biomedical Ethics demonstrated that a process of careful examination of the issues by experts and citizens of good will could provide consensus where none previously existed. Moreover, even where consensus cannot be achieved, a thinking-through of the issues by a competent body and a comprehensive review of the relevant factual material can assist all those concerned in making their own decisions as to the most ethical course of action.

The importance of having a permanent qualified body available to perform this function was dramatically illustrated.

Yesterday, the NIH reauthorization conference was deadlocked over the issue of the appropriateness of fetal research and conditions for fetal research waivers. The resolution of the issue was to institute a temporary moratorium on such waivers and to request the new Commission created by this bill to study the issue. Without the creation of this new Commission, there might have been no acceptable place to locate the study, and this important legislation would have been unable to go forward.

The Commission this bill creates is patterned after the successful structure of OTA. There is a bipartisan board of congressional managers. This board will exercise general supervision over a broad-based advisory committee consisting of distinguished scientists, physicians, ethnicists, and experts in such fields as law, the humanities, health administration, and government, as well as public members. This committee will hire the staff and conduct the studies that will be the principle activity of the Commission.

I urge my colleagues to support the Health Resources Extension Act of 1984. The act facilitates the activities of the NIH by broadening programs and by increasing funding. The direct effect will be improved health care and decreased suffering for thousands of Americans.

Mr. RANDOLPH. Mr. President, today I join the Senator from Utah, Mr. HATCH, and the Senator from Massachusetts, Mr. KENNEDY, in expressing my strong support for S. 540, the Health Research Extension Act of 1984. I commend my two distinguished colleagues for their diligent and cooperative efforts as they led our committee in the development of this legislation and I commend all members of the Senate-House conference committee on their efforts in developing this compromise measure.

S. 540 revises and extends a number of programs under the Public Health Services Act, primarily those relating to the National Institute of Health (NIH)—the principal medical research arm of the Federal Government. The National Institutes of Health are among the Nation's most valuable assets, leading the world in biomedical research. By increasing our understanding of the processes underlying human health, and by acquiring new knowledge for prevention, detection, diagnosis, and treatment of disease, the NIH has served all Americans in our attainment of more healthful lifestyles. This legislation will enable NIH to continue its current work, as well as establish a number of important new activities, including the establishment of the National Institute of Arthritis and Musculoskeletal and Skin Diseases, whose development will allow us to focus a national effort on research for the prevention, diagnosis, treatment, and eventual cure of arthritis and related debilitating diseases that afflict over 35 million Americans, or 15 percent of our population.

S. 540 reauthorizes the National Heart, Lung and Blood Institute (NHLBI) and the National Cancer Institute (NCI), the two largest Institutes at NIH, and the only ones requiring periodic reauthorization. The size of these two entities reflect the impact that the diseases they study have on the well-being of the American people.

In 1971, Congress legislated the National Cancer Act which provided the necessary resources for our scientific community to significantly wage its "War on Cancer." Although the National Cancer Institute was established in 1937 by the National Cancer Institute Act, it was not until 1971, that the Institute was provided with the adequate authority, responsibility, and resources with which to effectively fight the disease.

The National Cancer Institute has established the most effective apparatus for cancer care and research ever developed. Its efforts extend to every major university, medical school, and research institute in the United States in its search for the prevention, cure, and management of malignant disease. One particularly effective program that is carried out by NCI, and which was given prominent emphasis in the National Cancer Act in 1971, is the Cancer Center Program. These centers were expected to, and have in fact, become important reservoirs of competence in basic biomedical research related to cancer, and equally important, they conduct clinical investigation of high quality in a coordinated fashion.

To date, 59 new cancer centers have been developed, including 20 broadly based comprehensive centers. Many of these centers receive core grants from NCI which enable them to pay for research resources which are shared by investigators whose individual research grants would otherwise be unable to cover the cost of their work. Further, as explained by Dr. John E. Ultmann, of the Association of American Cancer Institutes, in past testimony before the House of Representatives' Subcommittee on Labor-HHS-Education Appropriations.

> Core grants enhance collegiality and cement staff together in a common purpose. Cancer Centers optimize communication between disciplines, encouraging creative and rapid exploitation of new leads in the fight against cancer. Core grants are often described as "the glue that holds the centers together." Core grants provide an essential infrastructure, cohesiveness and purpose without which the quality of research would certainly suffer.

Therefore, I feel that it is imperative we continue to provide these centers with strong core grant support. A collection of individual R-01 and P-01 grants simply cannot, alone, establish or maintain a center with optimum productivity.

In our conference report on S. 540, we strongly support the Cancer Center Program. Although conferees agreed not to mandate a minimum level of support for the Cancer Center Program, it was stated that there is strong bipartisan support and encouragement for the Director of the National Cancer Institute to maintain current programs and expand this effort as resources permit.

Also in our conference report, the conferees recognized the current efforts of those at West Virginia University for the establishment of a regional cancer center in West Virginia, which would serve the Appalachian Plateau. I thank Senators HATCH and KENNEDY, and other members of the conference committee for their recognition of the need for a cancer center in this region of the Nation. As stated in the report, "Development of this

Center at the West Virginia University will accomplish a great deal to serve the citizens of this area."

Over the past 2 years, West Virginia University has been working closely with NCI to establish a cancer program which would serve as a model in establishing a regionalized, rural-based National Cancer Center, stressing strong integration with existing community hospitals. By the coordination of programs throughout the Appalachian Plateau aimed at cancer prevention and education and through the development of affiliated programs in the major population areas of West Virginia, the Center will provide an organized approach to cancer prevention, early detection, and availability of specialized care to all of West Virginia.

Currently of the 59 cancer centers in the United States, none are within a 100-mile radius of the Appalachian Plateau. As a result, 30 percent of West Virginia's cancer patients are forced to leave the State for all or part of their care. Further it is estimated that one-third of those dying from cancer in West Virginia might have been saved by earlier diagnosis and treatment. The magnitude of cancer problems facing the State today primarily relate to that lack of an organized statewide approach to cancer prevention, detection, and treatment. This is most important when justifying the need for a cohesive, academically based cancer program at West Virginia University.

Through the interconnecting network of the Cancer Centers Program, the Cooperative Cancer Clinical Investigative Groups, and the Cancer Control Program, the NCI has insured that new and successful treatments for cancer have rapid and widespread application as community standards of treatment.

Now more than ever, when we are seeing the results of our efforts, we must keep up the fight against cancer until we eliminate the costly disease. Furthermore, we must assure all Americans, whether they live in the rural mountains of Appalachia, or in our heavily populated inner cities, of access to the most progressive forms of cancer prevention, diagnosis, and specialized treatment available.

S. 540 is a good bill, that should provide the National Institutes of Health with the resources to maintain a firm base of support for their ongoing activities. Thus I strongly support and encourage its passage. Again, I commend Senators, HATCH and KENNEDY, as well as my other able colleagues on the Committee on Labor and Human Resources, for the development of a fine legislative initiative. I am gratified to be a part of these cooperative efforts.

Mr. BAKER. Mr. President, I move the adoption of the conference report.

There being no objection, the motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADOLESCENT FAMILY LIFE DEMONSTRATION PROGRAM EXTENSION—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 2616 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

> The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2616) to extend the adolescent family life demonstration program, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. HATCH. Mr. President, as chairman of the Senate Labor and Human Resources Committee, I ask that the Senate adopt the conference agreement accompanying S. 2616, the Adolescent Family Life Act. The conference agreement contains the legislative language in S. 2616 which unanimously passed the Senate on June 29, 1984. However, the agreement only extends this program for 1 year. The conference agreement further contains a 1-year reauthorization of the Federal family planning programs authorized under title X of the Public Health Service Act.

The conferees were in disagreement on proposed changes in the Federal family planning programs. However, we were able to agree that no previous legislative reports accompanying H.R. 5600 and S. 2616 would be considered as legislative history for the purpose of interpreting either this conference agreement or the intention of Congress with regard to these programs. But our agreement to continue these programs for 1 year is complicated. I will describe in detail the extent of our commitment that both bodies will fully examine all the sensitive health, moral, and statutory issues in Federal funding of family planning.

First, I would like to reinterate my pleasure to be a part of the effort to develop and now reauthorize the Adolescent Family Life Act. Senator DENTON has educated this body on the importance of this legislation. There still exists extensive national concern over the numbers of teenage pregnancies. While the Federal Government continues to spend millions of dollars providing contraceptives to teens without their parents' knowledge or consent, the problems related to adolescent sexual activity continue to worsen. In 1981, I was pleased to join a bipartisan effort to develop an alternative program to the existing ineffective Federal policies for preventing teenage pregnancy. The result was the Adolescent Family Life Act with goals directed toward providing services to pregnant teens to help them avoid abortion and to help them deal with other serious problems confronting them. In addition to providing coordinating services to adolescents, the law promotes increased parental involvement, encourages adoption as an alternative for unmarried adolescents who do not want to keep their babies, and provides for expanded research into the issues of adolescent pregnancy and the problems which both precede and follow in its wake.

Our distinguished colleague, Senator DENTON, deserves principal credit for authorizing what many of us believe is the only solution in sight to a serious national problem. Senator DENTON and I and the other Senators who have cosponsored this program in the Labor and Human Resources Committee believe that this approach will help solve the problems associated with teenage pregnancy.

The Adolescent Family Life Act was developed as an alternative to, but not a replacement for, the Federal family planning program authorized under title X. The Adolescent Family Life Act was not enacted to appease my concerns with title X—Federal family planning programs. I still contend that the title X programs are in need of modification and clarification, that they are in need of change. I intend to describe those necessary changes at this time.

First and foremost, the preamble to the Constitution of this great Nation recognizes and records the origin of all governments. It specifies that governments receive their authority and power to govern from the people whom they govern. To fulfill, therefore, the intent of our Founding Fathers the Federal Government when formulating legislation for the benefit of citizens should be guided by that principle and respond to the needs, desires, moral values, and opinions of those citizens from whom it derives its power. Because values vary from region to region and from State to State, Federal policy should be sufficiently flexible to adjust to those variances.

As many in this body are fully aware, I support parental involvement in the delivery of family planning services to teenagers. It is my firm belief that the physical and emotional health of teenagers is best achieved when parents are involved in the counseling and decisionmaking process. One of the primary functions of the family organization is the socializing and directing of children. It is parents who must accept the primary responsibility for educating their children about morality, about values, and about religious belief. Nowhere is their guidance and direction more needed and more valuable than when dealing with issues of sexuality. On one hand society insists that parents accept responsibility for the actions of their children, but on the other hand it turns around and in the form of Federal family planning regulations, denys those same parents the right to participate in the decisionmaking, counseling process.

Too frequently our Federal programs have intervened between parents and children. Former Secretary of Health and Human Services and a former Senate colleague, Richard Schweicker, stated that we have allowed government "to build a 'Berlin wall' between parents and children." One of the reasons I worked with Senators DENTON and KENNEDY in developing the Adolesent Family Life Act was my desire to develop approaches to deal with the problems of adolescent sexual activity which would maximize the input and involvement of parents. Now, I am urging that we allow States, as our Founding Fathers intended, to determine whether or not parents shall be involved in the family planning services provided to their teenage children.

It is interesting to note that the overwhelming majority of parents are not even aware that their children—even children as young as 11 or 12—can obtain prescription birth control devices or birth control pills, paid out of the taxpayer's deep pocket, without their knowledge or consent. All other prescription drugs require parental consent. Perhaps this fact does not adversely impress the citizens of many States. However the majority of Utah citizens are angered that the Federal Government would fund organizations which provide such sensitive services to their children without their knowledge. They are appalled that the Federal Government which they empowered and fund would support such activities that are adverse to the moral climate in their communities. Utah citizens initiated debate and decided that when their Federal dollars are involved, they do not approve of this secretive program. As a consequence, the Utah Legislature initiated and passed a law which requires parental knowledge and consent prior to dispersal of birth control prescriptive pills or devices.

This legislative decision is in harmony with the opinions of the majority of Utah citizens. Senator Bryce Flamm, a Utah State senator, expressed this consensus when he testified before the Senate Subcommittee on Family and Human Services hearings on the reauthorization of title X programs. I ask unanimous consent that his remarks be printed in the official RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

UTAH STATE SENATOR BRYCE FLAMM—TESTIMONY BEFORE THE SENATE LABOR AND HUMAN RESOURCES COMMITTEE, SUBCOMMITTEE ON FAMILY AND HUMAN SERVICES ON THE REAUTHORIZATION OF TITLE X PROGRAMS

Chairman DENTON and honorable Senate committee members; I would like to read aloud the letter I gave to each of you. Does it shock you?

You have received copies of Utah's intent language and Senate Bill 3-1981.

Section 2 of SB3 addresses our concern directly. It states that "no public funds shall be used to provide contraceptive or abortion services to an unmarried minor without the prior written consent of the minor's parent or guardian.

We feel that any state should be allowed to use this or similar legislation for several reasons, namely:

1. The constitution guarantees parents this right. They have the right to teach their children religious values without interference from government. I have a copy for each of you of United States Supreme Court decisions which clearly state this.

2. We believe that all major churches promote sexual purity. When the government not only condones, but finances immorality, they encourage it. The government could be viewed to be in opposition to church teachings for our youth.

We feel as does the Supreme Court that parents have the right and responsibility to teach their children moral and religious values.

3. If government should intervene, it should be the state and not the federal government. In all other matters concerning youth, the state rules, not the Federal Government. The state decides when youth are emancipated, their degree of educational requirements and the age they can marry without parental consent.

4. We feel it is unconscionable to tax parents and then use this money to go behind their backs, without their knowledge or consent, to finance immoral acts referred to by every church as unrighteous.

We request a waiver for Utah and any other state that desires to try their own program. How else can we compare whether our program is the best or even good. The present program for Title X has been forced now on every state. Its whole premise was a theory that has failed miserably.

I would like now to give you Utah's figures before SB3 and after. We have something to compare. I combined all teens for the figures for all years because they had been arbitrarily separated. The figures are dramatic.

They point out why states should be allowed to run their own programs. There may be even better programs than ours waiting to happen.

I estimate that our rates of teen age pregnancy, abortion, and live births would not have increased from 22 percent to 50 percent from 1975 to 1980 had we had the programs during these years, but may have even decreased.

We believe that parents would wake up and teach their children in many homes if they received the letter that each of you received today. I also have copies of bar graphs on abortions in various states. You can see where states have fought back.

Thank you.

STATEMENT OF INTENT

It is the intent of the legislature that all title X family planning funds coming into the State of Utah be administered through the State department of health, and the State department of health subcontract with units of State government and with local governments of State, allowing local governments the freedom to design, establish, and maintain family planning programs which meet the standards, needs, and interests of the communities making application and the minimum Federal requirements of the title X program.

CHAPTER 123.—CONTRACEPTION OR ABORTION SERVICES OR DEVICES

(Passed March 4, 1981. In effect May 12, 1981.)

An act relating to contraception and abortion; providing that no public funds shall be used to provide contraceptive or abortion services to an unmarried minor without parental or custodial consent; and providing that no public agency shall approve any application for public funds from an organization that provides contraceptive or abortion services to an unmarried minor without parental or custodial consent.

Be it enacted by the Legislature of the State of Utah:

Section 1. Contraceptive and abortion services—Definitions.

As used in this act:

(1) "Contraceptive services" means any material, program, plan, or undertaking which provides instruction on the use of birth control devices and substances, encourages individuals to use birth control methods, or provides birth control devices.

(2) "Abortion services" means any material, program, plan, or undertaking which seeks to promote abortion, encourages individuals to obtain an abortion, or provides abortions.

Section 2. Public funds for provision of contraceptive or abortion services restricted.

No public funds shall be used to provide contraceptive or abortion services to an unmarried minor without the prior written consent of the minor's parent or guardian.

Section 3. Public funds for support entities providing contraceptive or abortion services restricted.

No public agency shall approve any application for public funds to support, directly or indirectly, any organization or health care provider that provides contraceptive or abortion services to an unmarried minor without the prior written consent of the minor's parent or guardian. No institution shall be denied state or federal funds under relevant provisions of law on the ground that a person on its staff provides contra-

ceptive or abortion services in that person's private practice outside of such institution.

Section 4. Violation of restrictions on public funds for contraceptive or abortion services as misdemeanor.

Any agent of a state agency acting alone or in concert with others who violates section 2 or 3 is guilty of a class B misdemeanor.

Approved March 26, 1981.

SENATOR AND MRS. ————, your daughter has come to us to learn of and possibly receive contraceptive and abortion services. Would you please sign and give your consent to this educational and possibly medical arrangement? This could include arranging for birth control pills or the use of an I.U.D. She could possibly receive an abortion, without your knowledge, if she should get pregnant. This is of course to guarantee her rights of privacy.

The Kanter-Zelnik study indicates that about 40 percent of the teens using contraceptives do get pregnant.

• Please sign your name giving permission for these arrangements.

I/We consent.....

Date.....

P.S.—We did perform abortions on approximately 4 percent of the white teenage girls, ages 15-19 in our State last year. At the present rate, we will perform abortions on over 20 percent of our teenage girls during their teens. This rate has nearly doubled the past 10 years. The rate of abortions to nonwhite girls in Washington, Florida, Massachusetts, California, and Rhode Island is over 10 percent per year and over 50 percent of these girls will have abortions before the age of 20.

Mr. HATCH. Senator Flamm's testimony reinforced my concerns with the current provision of title X family planning programs, concerns which are serious and need to be addressed by both the House and the Senate. They are not limited to issues of notification and consent of parents. The need for modification in Federal policy encompasses a wide range of issues. The need for parental involvement in the delivery of family planning services to unmarried minors, the need for more specificity in abortion restrictions, the need to assure priority of family values in sex educational materials, and the need for adoption and infertility services to be provided under title X funding are all vitally important. Title X federally authorized programs must be addressed and restructured. As always, I am willing and, in fact, desirous of participating in a legislative conference for as long as it takes to come to a firm resolution on these sensitive issues.

Many circumstances have heightened my concern over the regulations and provisions of our current family planning programs. I have in my possession two letters provided by the American Life Lobby, Inc., an organization whose purpose is self-explanatory. Each letter relates the personal experience of an individual who is concerned over Federal policy relating to abortion. I ask unanimous consent that the full text of each of those letters be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AMERICAN LIFE LOBBY, INC.,
Washington, DC, September 18, 1984.
Hon. ORRIN G. HATCH,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, DC.

DEAR SENATOR HATCH: I enclose two affidavits that prove that grantees of the title X Public Health Service Act Program are arranging abortions for 13 year olds without parental involvement and that employees of Title X grantees are assisting in the operation of abortion clinics.

It will be a major anti-life act if any action is taken on any bill that contains a reauthorization of the Title X program in advance of consideration by your Committee on Labor and Human Resources of reforms requested by numerous witnesses at the April 5, 1984 hearings on Title X and the reforms that are suggested by the highly critical Government Accounting Office reports HRD 81-68 and HRD 82-106.

I also remind you that no action has been taken by your Committee or any other Committee to eliminate the Federal Regulations that have been found to invalidate the Utah Law (SB 3, I believe) that requires parental consent prior to providing family planning services.

At this late date in the 98th Congress, a full scale reform of the Title X Program is not possible, therefore no action on Title X reauthorization is the only pro-life position. Full scale reform can be the first item of business in the 99th Congress.

With God for Life,
JUDIE BROWN, *President.*

JULY 10, 1984.

Mr. JOHN STOOS,
American Life Lobby, Inc.,
Sacramento, CA.

DEAR MR. STOOS: I was employed as a Community Health Worker for San Vicente Hospital Family Planning Clinic, located at 6000 San Vicente Blvd., Los Angeles, from 1976 thru 1978. The Family Planning Clinic was a community outreach clinic sustained by a LARF (Los Angeles Regional Family Planning Council) grant, working in co-operation with San Vicente Hospital and operating on the hospital premise, and I worked as an assistant to the Family Planning Director.

My primary responsibilities as the only full-time Family Planning Staff Worker (apart from the Director) included family planning counselling (explaining contraception methods and use), assisting the physician in pelvic exams and IUD insertions during clinic hours, processing and reviewing LARF patient forms and chart upkeep, and maintaining supplies for clinic use. We had clinic one-two days each week, so the above tasks probably required about 50-60% of my time.

In addition to these responsibilities, I was required to work with the San Vicente Hospital Staff, doing abortion counseling (explaining whichever abortion procedure each woman would undergo, whether an A&C (local anesthesia aspiration and curatage), a D&C (general anesthesia dialation and curatage), or a saline induced abortion), assisting the physician whenever needed during A&C abortion procedures and saline injections, and offering support to women who were experiencing saline induced labor to expel their fetus. San Vicente Hospital probably performed 15-40 or more abortions each day, the majority of which occurred in the morning, so I was expected to assist hospital counselors, nurses, and physicians on a daily basis. Because I was usually the only counselor available in the later afternoons, I also needed to be available to counsel, assist, and offer support to women who were having abortions during that time. I probably spent 40-50% of my working hours as an "abortion counselor" and assisting in abortion procedures during my employment at San Vicente Hospital.

I hope that this information will be helpful to you in your efforts in Sacramento. Feel free to contact me for any further information relating to my prior role and function while working for LARF at San Vicente.

Sincerely,
(Mrs.) CINDY S. FRITSCH.

ROSEVILLE, CA,
June 8, 1984.

Congressman WILLIAM DANNEMEYER,
Longworth Building,
Washington, DC.

DEAR CONGRESSMAN DANNEMEYER: As a concerned Pro-Lifer I called PLANNED PARENTHOOD of Sacramento on March 30, 1984. They are located at 2507 21st Street and they are listed under "Surgical Suite—Abortion Info" (916) 446-6921.

I obtained the telephone number from the White Pages Directory of Pacific Telephone, January, 1983, Sacramento, page 416. The same information is available in the January, 1984 white pages of Pacific Bell, Sacramento, page 420, listed simply as Abortion, with the same telephone number.

I posed as a concerned benefactress to an imaginary 13 year old girl, explaining to the secretary that this 13 year old had confided in me that she was pregnant and did NOT wish her parents to ever have that knowledge, I asked if an abortion could be arranged so that the girl need not be away from home overnight. The secretary asked me what trimester my so-called young friend was in, and I replied the first trimester. The secretary very positively stated that it could easily be so arranged. I ended the conversation by telling the secretary that I would pass on the information to the 13 year old and get back to PLANNED PARENTHOOD.

Congressman Dannemeyer, I hope my letter and my having related my own personal experience with PLANNED PARENTHOOD will prove to be of some help to you.

Respectfully yours,
JOAN E. CONROY,
Vice-President,
Sacramento/Placer Pro-Life Coalition.

Mr. HATCH. Repeated comments and complaints similar to those detailed in these letters have heightened my determination to seek more specific guidelines for appropriate uses of Federal family planning funds and to monitor more stringently conformance by participating organizations to those guidelines.

In conclusion, I would like to reiterate my discomfort and disappointment that full consideration of these sensitive issues has been incomplete. However, I am comforted somewhat by the bipartisan commitment of both the House and the Senate conferees who have promised thorough investigation and review of present planning legislative policies. With that commitment in mind, I urge your final approval of the conference agreement on S. 2616.

Mr. President, I ask unanimous consent to have printed in the RECORD the final draft of the conference substitute.

There being no objection, the draft was ordered to be printed in the RECORD, as follows:

FINAL DRAFT OF CONFERENCE SUBSTITUTE ADOLESCENT FAMILY LIFE; FAMILY PLANNING

October 4, 1984

That whenever in this Act an amendment of repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 2010(a) (42 U.S.C. 300z-9(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and "and $30,000,000 for the fiscal year ending September 30, 1985".

(b) Section 2001(a)(5) (42 U.S.C. 300z(a)(5)) is amended to read as follows:

"(5) pregnancy and childbirth among unmarried adolescents, particularly young adolescents, often results in severe adverse health, social, and economic consequences including: a higher percentage of pregnancy and childbirth complications; a higher incidence of low birth weight babies; a higher infant mortality and morbidity; a greater likelihood that an adolescent marriage will end in divorce; a decreased likelihood of completing schooling; and higher risks of unemployment and welfare dependency; and therefore, education, training, and job research services are important for adolescent parents;".

(c) Section 2001(b)(3) (42 U.S.C. 300z(b)(3)) is amended by inserting "both" before "for pregnant adolescents" in the matter preceding subparagraph (A).

(d) Section 2002(a)(4)(H) (42 U.S.C. 300z-1(a)(4)(H)) is amended by striking out "and referral to such services".

(e) Section 2008(g) (42 U.S.C. 300z-(g)) is repealed.

SEC. 3. (a) Section 1001(c) (42 U.S.C. 300(c)) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "and $158,400,000 for the fiscal year ending September 30, 1985".

(b) Section 1003(b) (42 U.S.C. 300a-1(b)) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "and $3,500,000 for the fiscal year ending September 30, 1985".

(c) Section 1005(b) (42 U.S.C. 300a-3(b)) is amended by striking out "and" after "1983;" and by inserting before the period a semicolon and "and $700,000 for the fiscal year ending September 30, 1985".

Amend the title so as to read: "An Act to extend for one year titles X and XX of the Public Health Service Act".

Mr. KENNEDY. Mr. President, I urge the Senate to act favorably on the reauthorization of the adolescent family life and family planning programs. These programs both serve vital needs. Without the family planning program, our current problems of unwanted teenage pregnancies, with all their associated problems of poverty, child abuse, and disruption of normal life plans, would be far worse. The right of each child to be a wanted

child would be in far greater jeopardy. The ability to each family to plan pregnancies that maximize the opportunities for that family to provide a stable and healthly child-rearing environment would be diminished. And the opportunities of every infant—wanted or unwanted—to receive the appropriate prenatal care so vital to good health in later life would be reduced.

The Adolescent Family Life Demonstration Program also makes a valuable contribution to the national well-being. While aspects of the program need further evaluation, the need for care and support for pregnant teenagers and involvement of families, where possible, in providing that support is unquestionable. Amendments incorporated in this authorization suggested by Senator DODD will make a significant contribution to improving the life chances of persons participating in the AFL Program.

While I applaud the reauthorization of these programs, I must express my disappointment that the authorizations are only for 1 additional year. These programs need stability if they are to carry out their important work, and they deserve at least a 3-year reauthorization.

Mr. BAKER. Mr. President, I move the adoption of the conference report.

There being no objection, the motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PREVENTIVE HEALTH AMENDMENTS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2301.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2301) entitled "An Act to revise and extend programs for the provision of health services and preventive health services, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

SECTION 1. (a) This Act may be cited as the "Preventive Health Amendments of 1984".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 317(j)(1) (42 U.S.C. 247b(j)(1)) is amended—

(1) by striking out "immunize children against immunizable diseases" and inserting in lieu thereof "immunize against vaccine-preventable diseases", and

(2) by striking out "and" after "1983," and by inserting before the period a comma and the following:, "$52,000,000 for the fiscal year ending September 30, 1985, $59,000,000 for the fiscal year ending September 30, 1986, and $65,000,000 for the fiscal year ending September 30, 1987".

(b) Section 317(j)(2) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$8,000,000 for the fiscal year ending September 30, 1985, $9,000,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987".

SEC. 3. (a) The first sentence of section 318(d)(1) (42 U.S.C. 247c(d)(1)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$60,000,000 for the fiscal year ending September 30, 1985, $67,500,000 for fiscal year ending September 30, 1986, and $75,000,000 for the fiscal year ending September 30, 1987".

(b)(1) Subsection (a) of section 318 is amended by striking out "research" and all that follows in such section and inserting in lieu therof the following: "research in, and training and public health programs for, the prevention and control of sexually transmitted diseases.".

(2) Subsection (b) of section 318 is amended to read as follows:

"(b) The Secretary may make grants to States, political subdivisions of States, and any other public and nonprofit private entity for—

"(1) research into the prevention and control of sexually transmitted diseases;

"(2) demonstration projects for the prevention and control of sexually transmitted diseases;

"(3) public information and education programs for the prevention and control of such diseases, and

"(4) professional (including appropriate allied health personnel) education, training, and clinical skills improvement activities in the prevention and control of such diseases.".

(3) Subsection (c) of section 318 is amended by inserting "and" at the end of paragraph (3), by striking out paragraph (4), and by redesignating paragraph (5) as paragraph (4).

(4) Subsection (d)(1) of section 318 is amended by striking out "5 per centum" and inserting in lieu thereof "10 per centum".

(5)(A) Section 318 is amended by redesignating subsections (d) through (f) as subsections (e) through (g) and by adding after subsection (c) the following new subsection:

"(d) The Secretary, acting through the Director of the Centers for Disease Control, may make grants to public and nonprofit private entities for information and education programs on, and for the diagnosis, prevention, and control of, acquired immune deficiency syndrome. The authority to make grants under this section for acquired immune deficiency syndrome is not the exclusive authority to make grants under this Act for acquired immune deficiency syndrome.".

(B) Subsection (e)(1) of section 318 (as so redesignated) is amended—

(i) by striking out "(b) and (c)" and inserting in lieu thereof "(b), (c), and (d)",

(ii) by striking out "(b) or (c)" and inserting in lieu thereof "(b), (c), or (d)", and

(iii) by adding at the end the following: "If the appropriations under the first sentence for fiscal year 1985 exceed $50,000,000, one-half of the amount in excess of $50,000,000 shall be made available for grants under subsection (d); if the appropriations under the first sentence for fiscal year 1986 exceed $52,500,000, one-half of the amount in excess of $52,500,000 shall be made available for such grants; and if the appropriations under the first sentence for fiscal year 1985 exceed $55,000,000, one-half of the amount in excess of $55,000,000 shall be made available for such grants.".

(6)(A) Section 318 is amended by striking out "venereal disease" each place it occurs and inserting in lieu thereof "sexually transmitted diseases".

(B) The heading for such section 318 is amended by striking out "VENEREAL DISEASE" and inserting in lieu thereof "SEXUALLY TRANSMITTED DISEASES AND ACQUIRED IMMUNE DEFICIENCY SYNDROME".

(C) Section 318 is amended by striking out the subsection (g) which was in effect on the day before the date of enactment of this Act.

SEC. 4. (a) Section 1901(a) (42 U.S.C. 300w(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$98,500,000 for the fiscal year ending September 30, 1985, $98,500,000 for the fiscal year ending September 30, 1986, and $98,500,000 for the fiscal year ending September 30, 1987".

(b) Section 1901(b) is amended by striking out "$3,000,000" and inserting in lieu thereof "$3,500,000".

(c) Section 1905(c)(4) (42 U.S.C. 300w-4(c)(4)) is amended to read as follows:

"(4) agrees to make grants for preventive health service programs for hypertension in amounts equal to 65 percent of the total amount provided by the Secretary in fiscal year 1981 to the State and entities in the State under section 317 for such programs;".

SEC. 5. (a) Section 1905(c) is amended by striking out "and" at the end of paragraph (7), by striking out the period at the end of paragraph (8) and inserting in lieu thereof "; and", and by inserting after paragraph (8) the following:

"(9) will, not later than October 1, 1984, as prescribed by the Secretary by regulation collect data, using a uniform system prescribed in such regulation, on preventive health and preventive health services programs in the State assisted by funds from allotments under this part, including a summary of the services which were provided, the providers of such services, and the individuals who received such services.".

(b) The last sentence of section 1905(c) is amended by inserting before the period the following: "(other than the requirements of paragraph (9))".

(c) Section 1906(a)(2) (42 U.S.C. 300w-5(a)(2)) is amended by striking out "burdensome" and inserting in lieu thereof "unnecessarily burdensome".

AMENDMENT NO. 7081

Mr. BAKER. Mr. President, I now move that the Senate concur with the House amendment, with a further Senate amendment which I send to the desk on behalf of Senator HATCH.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. HATCH, proposes an amendment numbered 7081.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

That this Act may be cited as the "Preventive Health Amendments of 1984".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 317(j)(1) (42 U.S.C. 247b(j)(1)) is amended—

(1) by striking out "immunize children against immunizable diseases" and inserting in lieu thereof "immunize individuals against vaccine-preventable diseases", and

(2) by striking out "and" after "1983," and by inserting before the period a comma and the following: "$52,000,000 for the fiscal year ending September 30, 1985, $59,000,000 for the fiscal year ending September 30, 1986, and $65,000,000 for the fiscal year ending September 30, 1987".

(b) Section 317(j)(2) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$8,000,000 for the fiscal year ending September 30, 1985, $9,000,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987".

SEC. 3. (a) The first sentence of section 318(d)(1) (42 U.S.C. 247c(d)(1)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$57,000,000 for the fiscal year ending September 30, 1985, $62,500,000 for the fiscal year ending September 30, 1986, and $68,000,000 for the fiscal year ending September 30, 1987".

(b)(1) Subsection (a) of section 318 is amended by striking out "research" and all that follows in such section and inserting in lieu thereof the following: "research in, and training and public health programs for, the prevention and control of sexually transmitted diseases.".

(2) Subsection (b) of section 318 is amended to read as follows:

"(b) The Secretary may make grants to States, political subdivisions of States, and any other public and nonprofit private entity for—

"(1) research into the prevention and control of sexually transmitted diseases;

"(2) demonstration projects for the prevention and control of sexually transmitted diseases;

"(3) public information and education programs for the prevention and control of such diseases; and

"(4) education, training, and clinical skills improvement activities in the prevention and control of such diseases for health professionals (including allied health personnel).".

(3) Subsection (c) of section 318 is amended by inserting "and" at the end of paragraph (3), by striking out paragraph (4), and by redesignating paragraph (5) as paragraph (4).

(4) The second sentence of section 318(d)(1) is amended by striking out "5 per centum" and inserting in lieu thereof "10 per centum".

(5)(A) Section 318 is amended by redesignating subsections (d) through (f) as subsections (e) through (g) and by adding after subsection (c) the following new subsection:

"(d) The Secretary, acting through the Director of the Centers for Disease Control, may make grants to public and nonprofit private entities for information and education programs on, and for the diagnosis, prevention, and control of, acquired immune deficiency syndrome. The authority to make grants under this section for acquired immune deficiency syndrome is not the exclusive authority to make grants under this Act for acquired immune deficiency syndrome.".

(B) Subsection (e)(1) of section 318 (as so redesignated) is amended—

(i) by striking out "(b) and (c)" in the first sentence and inserting in lieu thereof "(b), (c), and (d)",

(ii) by striking out "(b) or (c)" in the second sentence and inserting in lieu thereof "(b), (c), or (d)", and

(iii) by adding at the end the following: "If the appropriations under the first sentence for fiscal year 1985 exceed $50,000,000, one-half of the amount in excess of $50,000,000 shall be made available for grants under subsection (d); if the appropriations under the first sentence for fiscal year 1986 exceed $52,500,000, one-half of the amount in excess of $52,500,000 shall be made available for such grants; and if the appropriations under the first sentence for fiscal year 1987 exceed $55,000,000, one-half of the amount in excess of $55,000,000 shall be made available for such grants.".

(6)(A) Section 318 is amended by striking out "venereal disease" each place it occurs and inserting in lieu thereof "sexually transmitted diseases".

(B) The heading for such section 318 is amended by striking out "venereal disease" and inserting in lieu thereof "sexually transmitted diseases and acquired immune deficience syndrome".

(C) Section 318 is amended by striking out the subsection (g) which was in effect on the day before the date of enactment of this Act.

SEC. 4. (a) Section 1901(a) (42 U.S.C. 300w(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$98,500,000 for the fiscal year ending September 30, 1985, $98,500,000 for the fiscal year ending September 30, 1986, and $98,500,000 for the fiscal year ending September 30, 1987".

(b) Section 1901(b) is amended by striking out "$3,000,000" and inserting in lieu thereof "$3,500,000".

SEC. 5. (a) Section 1905(c) (42 U.S.C. 300w-4) is amended by striking out paragraphs (2) and (4) and redesignating paragraphs (3) and (5) through (8) as paragraphs (2) through (6), respectively.

(b) Section 1906(a)(1)(B) (42 U.S.C. 300w-5) is amended by striking out "activities of the State under this part" and inserting in lieu thereof "preventive health and preventive health services programs in the State assisted by funds from allotments under this part, including a summary of the services which were provided, the providers of such services, and the individuals who received such services".

(c) Section 1906 is amended by adding at the end the following:

"(d) The Secretary, in consultation with appropriate national organizations, shall develop model criteria and forms for the collection of data and information with respect to services provided under this part to enable States to share uniform data and information with respect to the provision of such services.".

(d) Subsection (e) of section 1905 is repealed.

SEC. 6. (a) Section 339(a)(5) (42 U.S.C. 255(a)(5)) is amended by striking out "and" after "1983," and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

(b) Section 339(b)(5) is amended by striking out "and" after "1983," and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

SEC. 7. Part A of title XIX is amended by inserting after section 1909 (42 U.S.C. 300w-8) the following new section:

"EMERGENCY MEDICAL SERVICES FOR CHILDREN

"SEC. 1910. (a) For activities in addition to the activities which may be carried out by States under section 1904(a)(1)(F), the Secretary may make grants to not more than four States in any fiscal year to support a program of demonstration projects in such States for the expansion and improvement of emergency medical services for children who need treatment for trauma or critical care. Any grant made under this subsection shall be for a one-year period.

"(b) The Secretary may renew a grant made under subsection (a) for one additional one-year period only if the Secretary determines that renewal of such grant will provide significant benefits through the collection, analysis, and dissemination of information or data which will be useful to other States.

"(c) To carry out this section, there are authorized to be appropriated $2,000,000 for fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 8. Part A of title XIX (as amended by section 7 of this Act) is amended by adding at the end the following new section:

"STATE PLANNING GRANTS"

"SEC. 1910A. (a) The Secretary may make grants to assist States to—

"(1) develop long range plans to achieve the goals, objectives, and priorities established by the Secretary pursuant to title XVII;

"(2) identify particular needs within States for services and activities that may be conducted with payments made under allotments under section 1902; and

"(3) determine the progress of States in achieving the goals, objectives, and priorities described in paragraph (1) and, to the extent feasible, use scientifically valid measures to make such determinations.

"(b) To carry out this section, there are authorized to be appropriated $5,000,000 for fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 9. 1001 (42 U.S.C. 300) is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) The Secretary, at the request of a recipient of a grant under subsection (a), may reduce the amount of such grant by the fair market value of any supplies or equipment furnished the grant recipient by the Secretary. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment on which the reduction of such grant is based. Such amount shall be deemed as part of the grant and shall be deemed to have been paid to the grant recipient.".

Mr. HATCH. Mr. President, I am pleased to bring up for consideration today S. 2301, The Preventive Health Amendments of 1984. S. 2301 was passed by the Senate in late September, and was amended by the House and sent back to this body. After careful consideration and intensive negotiations with the House sponsors, the Senate sponsors have arrived at a compromise which we can accept and which I expect to be adopted without amendment by the House.

The centerpiece of the bill, the Preventive Health and Health Services [PHHS] Block Grant, has succeeded in providing a push to State and local efforts in addressing preventive and abuse-related health objectives while preserving to the State and local authorities the flexibility to address local and State priorities within a streamlined administrative framework.

It has proven to be the effective mechanism my committee expected it would when it authorized the program in 1981. The compromise bill reauthorizes this program at $98,500,000 per year for fiscal years 1985, 1986, and 1987. It slightly increases the rape-crisis program set-aside, while making no continuation of the hypertension set-aside.

The vital immunization portion of this bill raises the authorization level for this critically important health program to $52,000,000 for fiscal year 1985, $59,000,000 for fiscal year 1986, and $65,000,000 for fiscal year 1987.

There are compelling reasons for such an increase. That is, the recent dramatic rise in the cost of diptheria, pertussis and tetanus [DPT] vaccine. I have just learned that during the past year, the cost of vaccines for the Utah State Department of Health has increased 433 percent.

As I have stated earlier, only one pharmaceutical company is left to supply this vaccine, and their prices have recently risen to accommodate for increased investments in research for safer vaccines and expenditures for liability. Regardless of the reasons, some States are faced with dramatic shortfalls in funding to maintain their childhood vaccination programs.

Significant changes are made to the venereal disease prevention and control program. Projects for professional education, training and clinical skill improvement activities in the prevention and control of sexually transmitted diseases may be carried out not only by State agencies, but by other public and private nonprofit organizations. The minimum amount of the discretionary funds the Secretary must expend is increased from 5 to 10 percent, and new authority is given to the Secretary through the Centers of Disease Control to make grants for education, research, prevention, and treatment of acquired immune deficiency syndrome. Authority is given to the Secretary to make these grants out of the regular appropriation when the appropriation exceeds certain levels. The term "venereal disease" is replaced with the term "sexually transmitted disease" and includes acquired immune deficiency, and the title of the program is changed accordingly. The sexually transmitted disease program is reauthorized at $57,500,000 for fiscal year 1985, $62,500,000 for fiscal year 1986, and $68 million for fiscal year 1987.

This bill would amend title XIX of the Public Health Service Act by providing a demonstration program relating to emergency health care for children who need treatment for trauma or critical care. Under the program, $2 million would be authorized for fiscal year 1985 through 1987, for 1-year grants to no more than four States in any fiscal year. Presumptively this will allow 12 States to participate over the 3 years although the Secretary may renew a demonstration project for 1 additional fiscal year if it is determined that the extension of the project will provide a significant benefit which will be useful to other States.

Of all the patients receiving care in hospital emergency departments, approximately 20 to 35 percent are children. Yet various statistics suggest that insufficient attention has been placed on the needs of children. Although our emergency medical services programs have demonstrated their extraordinary ability to save lives, special priority needs to be given to upgrading their capacity to provide emergency care for children who are critically ill.

Finally, new authority is provided to States to undertake planning and coordination of their prevention activities.

I urge my colleagues to expeditiously approve this legislation.

Mr. KENNEDY. Mr. President, I am pleased to support the enactment of S. 2301, the Health Services and Preventive Health Programs Act of 1984. This legislation reauthorizes a number of programs vital to the health of the American people, including the preventive health block grant and grant programs supporting childhood immunizations, tuberculosis control and venereal disease control. It also establishes several important new authorities, including a demonstration program for emergency medical services for children, a program to fund AIDS, prevention and treatment services, and a new program of preventive health planning and measurement grants to States. For the first time, funds are made available to assist States in providing DPT vaccine in their childhood immunization programs.

I commend all those involved in working out this bill, including Senator HATCH, Senator BUMPERS—who was particularly helpful in securing higher authorization levels for the block grant and childhood immunizations—Congressman WAXMAN, Congressman MADIGAN, and others. Senators RANDOLPH, INOUYE, and MATSUNAGA took the initiative in securing enactment of the important emergency medical services demonstration program for children.

The preventive planning grant authority is, in my view, a particularly important step forward in our national effort to develop an efffective program of preventive health.

A new planning grant authority for prevention was included in the omnibus health services and health services research reauthorization bill that I introduced on March 20 and that was cosponsored by all the Democratic members of the Labor and Human Resources Committee. A systematic planning and reporting effort is essential to an effective prevention effort.

Since the days when I first attempted to place health promotion and disease prevention at the center of our national health agenda, there has been a growing recognition that a comprehensive, aggressive prevention strategy can be our most effective weapon in the struggle to secure health and well-being for the American people. As Assistant Secretary Brandt recently stated, "The time has come for us to turn our attention as a Nation to the preservation of good health, the promotion and enhancement of healthful lifestyles, and the prevention of disease and disability."

The knowledge base for rapid improvements in the health of the American people through an effective prevention strategy is now in place. The 1979 Surgeon General's report, "Healthy People," identified major health problems for each of five broad age groups and 15 priority areas for further action. The Surgeon General's 1980 followup report, "promoting health/preventing disease," established 226 measurable prevention objectives for these 15 priority areas. The Center of Disease Control has developed model prevention standards for community health services. The prevention-oriented activities of the public health service have been inventoried and given renewed emphasis.

Implementation of the goals outlined in this series of reports will result in dramatic improvements in the health and well-being of the American people. By the end of this decade, we can anticipate: A 35 percent reduction in infant mortality; a 20 percent drop in deaths among children; a 25 percent death rate among adults; and 20 percent less disability for older Americans.

But these lower death and disability rates and all they imply for healthier, happier, more active and productive

lives will not occur simply because we have a roadmap showing how to get from here to there. An aggressive national policy can help us not only achieve but surpass these goals.

The major missing ingredient in our national prevention strategy has been the lack of an effective Federal-State partnership to assure comprehensive prevention planning and service delivery at the State and community level where people can be reached most effectively.

The preventive health block grant should be the key vehicle for development of an effective Federal-State partnership. Instead, this block grant is an example of the Reagan so-called New Federalism at its worst. Essentially a thinly disguised attempt to eliminate the Federal responsibility for a grab bag of categorical programs, this block was established without standards, priorities, accountability, measurement, or a clear relationship to either national or local objectives.

I believe this block grant should be restructured into an effective vehicle for achieving the goals and objectives established in the Surgeon General's report. As a condition for receiving block grant funds, States should be required to go through a conscious prevention-planning process to establish goals and objectives in each of the Surgeon General's 15 preventive areas, to establish at least one high priority prevention objective for each of the five age groups identified in healthy people, and to develop a plan for meeting the priority objectives selected by the State itself utilizing not only PHS funds, but other appropriate public and private resources, and to measure progress toward fulfillment of the State plan and national prevention goals. As the witness from the Association of State and Territorial Health Officers stated in testifying before our committee, "We want to be held accountable."

A number of States, including my own State of Massachusetts, Utah, and Texas have already gone through this process of establishing comprehensive State prevention plans and developing a measurement and reporting system to ensure the plan objectives are achieved.

S. 2301, with its new planning grant authority, is a step in the right direction, but does not, in any judgment, go far enough. The key lack is a comprehensive planning and reporting requirement as opposed to the planning and reporting assistance included in the bill.

In addition, despite modest increases placed in the bill as it worked its way from the committee through the Senate floor to this final agreement, the funding levels in the bill are not high enough.

All the witnesses before the Labor Committee who dealt with the question of funding indicated Federal support was inadequate. Prevention is our most cost-effective health investment; it does not make good sense to spend over $100 billion on Federal service and financing programs and less than $100 million on the prevention block grant.

I urge my colleagues to pass S. 2301 today, so that these programs that are so vital to the health of the American people can be continued without interruption and so that the improvements included in this bill can be implemented without delay.

Mr. MATHIAS. Mr. President, I am pleased to see the continuation of a program of services to victims of rape and their families in this reauthorization of the Preventive Health and Health Services Block Grant.

This small, but important program continues an annual State grant program through fiscal year 1987 for community-based rape crisis centers at a $3.5 million level. As the sponsor of this program, I have been pleased with reports I have received on the range and level of services provided as a result of this funding. Types of direct services eligible for funding under this section include: Accompaniment of the victim to medical, social, and legal services; counseling and referral services for the victim and her immediate family; operation of telephone hotlines; consultation with and training of crisis center staff by allied professionals; public education materials and programs, such as speaker programs, films, and pamphlets geared to specific audiences such as school children and senior citizens; emergency shelter programs; and offender rehabilitation and counseling.

As a result of this grant program thousands of victims of sexual assault and their families have been assisted by approximately 525 of the estimated 700 public and private rape crisis centers. Most of these crisis centers rely heavily on volunteers to provide most of these services. The grants have helped defray part of the expenses of volunteers, office space, utilities and equipment, and part salary expenses of staff.

Nonetheless, the funds provided for this program are insufficient to support comprehensive victim services throughout the Nation. In fact, it doesn't even fund all of the existing crisis centers. And those that it does fund receive grants ranging from $5,000 to $15,000—a pittance when one is trying to operate a 24-hour hotline and comprehensive services. At present, there is no other Federal assistance provided to these crisis intervention programs for victims. So rape crisis centers remain staffed mostly by volunteers and continue to rely on private donations and fundraisers to remain open.

Mr. President, national FBI crime statistics tell us a rape is committed in the United States once every 7 minutes; 85,000 rapes are reported to the police every year. Because of underreporting of this crime, the Department of Justice estimates that an average of 190,000 rapes actually occur each year. The underreporting of child and adolescent victims is even greater. The probability is that 1 woman out of every 15 and 1 child out of every 15 will be raped in their lifetime. Our wives, mothers, children, other relatives, and friends are at risk.

Although statistics give us some sense of the magnitude of the problem, they do not convey the guilt, fear, and anguish experienced by those victimized. The trauma of rape for the victim and her family is a profound, long-term one which changes the way they behave toward one another and others and alters their perspective on life. Their sense of freedom and of privacy are shattered.

Rape crisis centers and their dedicated volunteers perform an invaluable service to the victim during her most traumatic time of need. They counsel the victim; accompany her to the hospital, police, and court; and provide short-term therapy to the victim and her family, including play therapy for child victims of sexual assault. They also provide a community service by speaking to school groups, church groups, senior citizens, and others about rape prevention measures.

Only recently has society recognized and begun to address the needs of victims of crime. Our criminal justice system has been preoccupied with the offender, his rights, punishment, and rehabilitation, and with prison capacities. We are now beginning to view the causes of crime and the restoration of victims as part and parcel of a comprehensive system.

I am pleased to support this reauthorization of the Preventive Health and Health Services Block Grant Program.

The PRESIDING OFFICER. Without objection, the motion of the majority leader is agreed to.

BILL PLACED ON CALENDAR—H.R. 5496

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be discharged from further consideration of H.R. 5496, and that that item be placed on the calendar.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

VIETNAM VETERANS NATIONAL MEDAL ACT

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 525.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 1870) to require the Secretary of the Treasury to coin and sell a national medal in honor of the members and former members of the Armed Forces of the United States who served in the Vietnam conflict.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The bill (H.R. 1870) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OSAGE INDIAN EXEMPTION FROM ESTATE OR INHERITANCE TAX

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 3971 which is being held at the desk.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill, to provide that any Osage headright or restricted real estate or funds which is part of the estate of a deceased Osage Indian who did not possess a certificate of competency at the time of death shall be exempt from any estate or inheritance tax imposed by the State of Oklahoma.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 3971) was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OSAGE TRIBE OF INDIANS

Mr. BAKER. Mr. President, I now ask the Chair to lay before the Senate a bill at the desk, H.R. 6303.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 6303) to make certain technical corrections in various acts relating to the Osage Tribe of Indians of Oklahoma.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read the first and second times by title and the Senate will proceed to its immediate consideration.

The bill (H.R. 6303) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL HELD AT DESK—H.R. 6342

Mr. BAKER. Mr. President, I ask unanimous consent that once the Senate receives from the House H.R. 6342, a bill approving the governing international fishery agreements with Iceland and the European Economic Community, that that bill be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURES PLACED ON CALENDAR

HOUSE JOINT RESOLUTION 594

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Joint Resolution 594 and that that matter be placed on the Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION 196

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of House Concurrent Resolution 196 and that that measure be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 386

Mr. BAKER. Mr. President, I further ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of Senate Resolution 386 and that that resolution be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 3034

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of S. 3034 and that that bill be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

H.R. 4401

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 4401 and that that measure be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

H. R. 2087

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 2087 and that that measure be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

H. R. 1095

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 1095 and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

H. R. 2823

Mr. BAKER. Mr. President, I ask unanimous consent that the Environment and Public Works Committee be discharged from further consideration of H.R. 2823 and that that measure be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETERANS COMPENSATION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5688.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate to the bill (H.R. 5688) entitled "An Act to amend title 38, United States Code, to provide a cost-of-living increase for fiscal year 1985, in the rates of compensation paid to veterans with service-connected disabilities and the rates of dependency and indemnity compensation paid to survivors of such veterans, and for other purposes", with the following amendments: In lieu of the matter inserted by the amendment of the Senate to the text of the bill, insert:

SHORT TITLE; REFERENCES TO TITLE 38, UNITED STATES CODE

SECTION 1. (a) This Act may be cited as the "Veterans' Benefits Improvement Act of 1984".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION

PART A.—RATE INCREASES

DISABILITY COMPENSATION

SEC. 101. (a) Section 314 is amended—

(1) by striking out "$64" in subsection (a) and inserting in lieu thereof "$66";

(2) by striking out "$118" in subsection (b) and inserting in lieu thereof "$122";

(3) by striking out "$179" in subsection (c) and inserting in lieu thereof "$185";

(4) by striking out "$258" in subsection (d) and inserting in lieu thereof "$266";

(5) by striking out "$364" in subsection (e) and inserting in lieu thereof "$376";

(6) by striking out "$459" in subsection (f) and inserting in lieu thereof "$474";

(7) by striking out "$579" in subsection (g) and inserting in lieu thereof "$598";

(8) by striking out "$671" in subsection (h) and inserting in lieu thereof "$692";

(9) by striking out "$755" in subsection (i) and inserting in lieu thereof "$779";

(10) by striking out "$1,255" in subsection (j) and inserting in lieu thereof "$1,295";

(11) by striking out "$1,559" and "$2,185" in subsection (k) and inserting in lieu thereof "$1,609" and "$2,225", respectively;

(12) by striking out "$1,559" in subsection (l) and inserting in lieu thereof "$1,609";

(13) by striking out "$1,719" in subsection (m) and inserting in lieu thereof "$1,774";

(14) by striking out "$1,954" in subsection (n) and inserting in lieu thereof "$2,017";

(15) by striking out "$2,185" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$2,255";

(16) by striking out "$938" and "1,397" in subsection (r) and inserting in lieu thereof "$968" and "$1,442", respectively;

(17) by striking out "$1,404" in subsection (s) and inserting in lieu thereof "$1,449"; and

(18) by striking out "$271" in subsection (t) and inserting in lieu thereof "$280";

(b) The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

ADDITIONAL COMPENSATION FOR DEPENDENTS

SEC. 102. Section 315(1) is amended—

(1) by striking out "$77" in clause (A) and inserting in lieu thereof "$79";

(2) by striking out "$128" and "$41" in clause (B) and inserting in lieu thereof "$132" and "$42", respectively;

(3) by striking out "$52" and "$41" in clause (C) and inserting in lieu thereof "$54" and "42", respectively;

(4) by striking out "$62" in clause (D) and inserting in lieu thereof "$64";

(5) by striking out "$139" in clause (E) and inserting in lieu thereof "$143"; and

(6) by striking out "$116" in clause (F) and inserting in lieu thereof "$120".

CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS

SEC. 103. Section 362 is amended by striking out "$338" and inserting in lieu thereof "$349".

DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES

SEC. 104. (a) Subsection (a) of section 411 is amended to read as follows:

"(a) Dependency and indemnity compensation shall be paid to a surviving spouse, based on the pay grade of the person upon whose death entitlement is predicated, at monthly rates set forth in the following table:

"Pay grade	Monthly rate	Pay grade	Monthly rate
E-1	$476	W-4	$682
E-2	490	O-1	602
E-3	502	O-2	621
E-4	535	O-3	665
E-5	549	O-4	703
E-6	561	O-5	775
E-7	589	O-6	873
E-8	621	O-7	944
E-9	[1] 649	O-8	1.035
W-1	602	O-9	1.111
W-2	626	O-10	[2] 1.217
W-3	644		

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $700.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, or Commandant of the Marine Corps, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,305.".

(b) Subsection (b) of such section is amended by striking out "$53" and inserting in lieu thereof "$55".

(c) Subsection (c) of such section is amended by striking out "$139" and inserting in lieu thereof "$143".

(d) Subsection (d) of such section is amended by striking out "$68" and inserting in lieu thereof "$70".

DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 105. Section 413 is amended—

(1) by striking out "$233" in clause (1) and inserting in lieu thereof "$240";

(2) by striking out "$334" in clause (2) and inserting in lieu thereof "$345";

(3) by striking out "$446"; and

(4) by striking out "$432" and "$87" in clause (4) and inserting in lieu thereof "$446" and "$90", respectively.

SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN

SEC. 106. Section 414 is amended—

(1) by striking out "$139" in subsection (a) and inserting in lieu thereof "$143";

(2) by striking out "$233" in subsection (b) and inserting in lieu thereof "$240"; and

(3) by striking out "$118" in subsection (c) and inserting in lieu thereof "$122".

EFFECTIVE DATE

SEC. 107. Sections 101 through 106 shall take effect on December 1, 1984.

PART B—COMPENSATION PROGRAM AMENDMENTS

TRIAL WORK PERIOD AND VOCATIONAL REHABILITATION PILOT PROJECT

SEC. 111. (a)(1) Subchapter VI of chapter 11 is amended by adding at the end the following new section:

"§ 363. Temporary program for trial work periods and vocational rehabilitation for certain veterans with total disability ratings

"(a)(1) The disability rating of a qualified veteran who begins to engage in a substantially gainful occupation during the program period may not be reduced on the basis of the veteran having secured and followed a substantially gainful occupation unless the veteran maintains such an occupation for a period of 12 consecutive months.

"(2) For purposes of this section:

"(A) The term 'qualified veteran' means a veteran who has a service-connected disability, or service-connected disabilities, not rated as total but who has been awarded a rating of total disability by reason of inability to secure of follow a substantially gainful occupation as a result of such disability or disabilities.

"(B) The term 'program period' means the period beginning on February 1, 1985, and ending on January 31, 1989.

"(b) During the program period, the Administrator shall make counseling services described in section 1504(a)(2) of this title and placement and postplacement services described in section 1504(a)(5) of this title available to each qualified veteran (whether or not the veteran is participating in a vocational rehabilitation program under chapter 31 of this title).

"(c)(1)(A) Except as provided in paragraph (4) of this subsection, in the case of each award during the program period of a rating of total disability described in subsection (a)(2)(A) of this section to a veteran, the Administrator shall provide to the veteran, at the time that notice of the award is provided to the veteran, a statement providing—

"(i) notice of the provisions of this section;

"(ii) information explaining the purposes and availability of and eligibility for, and the procedures for pursuing, a vocational rehabilitation program under chapter 31 of this title; and

"(iii) a summary description of the scope of services and assistance available under that chapter.

"(B) After providing the notice required under subparagraph (A) of this paragraph to a veteran, the Administrator shall arrange as promptly as is practical for the veteran to be provided an evaluation in order to make a determination as to whether the achievement of a vocational goal by the veteran is reasonably feasible. Such evaluation shall include a personal interview of the veteran by a Veterans' Administration employee who is trained in vocational counseling. The Administrator shall provide the veteran with reasonable notice of the schedule for the evaluation.

"(2) If the veteran fails, for reasons other than those beyond the veteran's control, to participate in an evaluation under paragraph (1)(B) of this subsection in the manner required by the Administrator in order to make the determination described in that paragraph, the Administrator shall reduce the veteran's disability rating to the rating that would be applicable to the veteran but for the determination of the veteran's inability to secure or follow a substantially gainful occupation. Any such reduction shall remain in effect for the duration of such failure.

"(3)(A) If, after completion of an evaluation under paragraph (1)(B) of this subsection, the Administrator determines that achievement of a vocational goal by the veteran is reasonably feasible, the Administrator shall formulate an individualized written plan of vocational rehabilitation for the veteran under chapter 31 of this title.

"(B) If the Administrator determines that the veteran has failed to pursue (or to continue to pursue) the vocational rehabilitation program described in such plan, the Administrator shall provide the veteran with notice that, if the veteran fails, for reasons other than those beyond the veterans' control, to initiate or resume pursuit of such program within 60 days the Administrator provided such notice (or such longer period as the Administrator determines is the shortest period within which it is reason-

ably feasible for the veteran to initiate or resume pursuit), the Administrator will provide for the results of the evaluation to be considered in the next scheduled review of the veteran's eligibility for a rating of total disability based on inability to secure or follow a substantially gainful occupation. Unless the veteran initiates or resumes such pursuit within such 60 days (or such longer period, if applicable), the Administrator shall provide for such results to be so considered.

"(4) This subsection does not apply with respect to a veteran as to whom the Administrator determines that an evaluation of vocational rehabilition potential or achievement of a vocational goal is not reasonably feasible.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"363. Temporary program for trail work periods and vocational rehabilitation for certain veterans with total disability ratings.".

(b)(1) Not later than April 1, 1985, the Administrator of Veterans' Affairs shall provide to each veteran described in paragraph (2) a statement providing—

(A) information explaining the provisions of section 363(b) of title 38, United States Code (as added by subsection (a)(1);

(B) information explaining the purposes and availability of and eligibility for, and the procedures for pursuing, a vocational rehabilitation program under chapter 31 of such title; and

(C) a summary description of the scope of services and assistance available under that chapter.

(2)(A) A veteran to whom a statement is to be provided under paragraph (1) is a veteran who has a service-connected disability, or service-connected disabilities, not rated as total but who, as of January 31, 1985, has been awarded a rating of total disability by reason of a determination of inability to secure or follow a substantially gainful occupation as a result of such disability or disabilities.

(B) Notice under paragraph (1) need not be provided to a veteran who has a rating of total disability described in subparagraph (A) which is protected by the first sentence of section 110 of title 38, United States Code.

(C) Not later than April 15, 1988, the Administrator of Veterans' Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the results of the implementation of section 363 of title 38, United States Code (as added by subsection (a)(1)), during the three-year period beginning on February 1, 1985. The report shall include—

(1) information regarding—

(A) the number of veterans with a disability rating of total based on inability to secure or follow a substantially gainful occupation who during such period followed a substantially gainful occupation for a period of 12 consecutive months and the work experience of those veterans and their disability ratings after completing such 12-month period and (if known) the number of veterans with such a rating who during the period covered by the report followed a substantially gainful occupation but did not maintain employment in it for a period of 12 consecutive months,

(B) the number of veterans who during the period covered by the report were provided with evaluations under subsection (b) of such section,

(C) the number of veterans provided such evaluations for whom a plan of vocational rehabilitation was formulated pursuant to such subsection,

(D) the number of veterans for whom such a plan was formulated who elected, and who did not elect, to pursue a vocational rehabilitation program,

(E) the extent to which those veterans who elected to pursue such a program completed the program, and

(F) the subsequent work experience and disability ratings of the veterans who were provided such evaluations;

(2) a tabulation of the reasons given by such veterans for not electing to pursue such a program by those who did not elect to pursue such a program; and

(3) the Administrator's assessment of the value (including the cost-effectiveness) and effect of such implementation and any recommendations of the Administrator for administrative and legislative action based on such results and assessment.

TECHNICAL AMENDMENT

SEC. 112. (a) Section 335 is amended by striking out "50 per centum" and inserting in lieu thereof "30 percent".

(b) The amendment made by subsection (a) shall take effect as of October 1, 1978.

TITLE II—VETERANS' REHABILITATION, EDUCATION, AND EMPLOYMENT PROGRAMS

PART A—RATE INCREASES

RATES OF REHABILITATION SUBSISTENCE ALLOWANCES FOR VETERANS WITH SERVICE-CONNECTED DISABILITIES

SEC. 201. The table contained in section 1508(b) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two:
Institutional training:				
Full-time.	$310	$384	$452	$33
Three-quarter time.	233	288	339	25
Half-time.	155	193	227	17
Farm cooperative, apprentice, or other on-job training:				
Full-time.	271	327	377	24
Extended evaluation:				
Full-time.	310	384	452	33
Independent living training:				
Full-time.	310	384	452	33
Three-quarter.	233	288	339	25
Half-time.	155	193	227	17".

RATES OF GI BILL EDUCATIONAL ASSISTANCE FOR VIETNAM-ERA VETERANS

SEC. 202. Chapter 34 is amended as follows:

(1) The table contained in paragraph (1) of section 1682(a) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Type of program	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two:
Institutional training:				
Full-time.	$376	$448	$510	$32
Three-quarter time.	283	336	383	24
Half-time.	188	224	255	17
Cooperative.	304	355	404	23";

(2) Section 1682(b) is amended by striking out "$342" and inserting in lieu thereof "$376".

(3) The table contained in section 1682(c) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Basis	No dependents	One dependent	Two dependents	More than two dependents
				The amount in column IV, plus the following for each dependent in excess of two:
Full-time.	$304	$355	$404	$23
Three-quarter time.	228	266	303	18

"Column I	Column II	Column III	Column IV	Column V
Basis	No dependents	One dependent	Two dependents	More than two dependents
Half-time.	152	178	202	12"; and

(4) Section 1692(b) is amended by striking out "$76" and "$911" and inserting in lieu thereof "$84" and "$1,008", respectively.

RATES OF EDUCATIONAL ASSISTANCE FOR SURVIVORS AND DEPENDENTS

SEC. 203. Chapter 35 is amended—

(1) by striking out "$276" in section 1732(b) and inserting in lieu thereof "$304"; and

(2) by striking out "$342", "$108", "$108", and "$11.44" in section 1742(a) and inserting in lieu thereof "$376", "$119", "$119", and "$12.58", respectively.

RATES OF TRAINING ALLOWANCES FOR APPRENTICESHIP OR OTHER ON-JOB TRAINING

SEC. 204. Chapter 36 is amended as follows:

(1) Section 1786(a)(2) is amended by striking out "$342" and inserting in lieu thereof "$376".

(2) The table contained in section 1787(b)(1) is amended to read as follows:

"Column I	Column II	Column III	Column IV	Column V
Periods of training	No dependents	One dependent	Two dependents	More than two dependents
First 6 months.	$274	$307	$336	$14
Second 6 months.	205	239	267	14
Third 6 months.	136	171	198	14
Fourth and any succeeding 6-month periods.	68.	101	131	14"; and

(3) Section 1798(b)(3) is amended by striking out "$342" and inserting in lieu thereof "$376".

EFFECTIVE DATE

SEC. 205. The amendments made by this part shall take effect as of October 1, 1984.

PART B—VETERANS' EMPLOYMENT PROGRAMS

EXTENSION AND REVISION OF VETERANS READJUSTMENT APPOINTMENT PROGRAM

SEC. 211. (a) Subsection (a) of section 2014 is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by adding at the end the following new paragraph:

"(2) For the purposes of this section, the term 'agency' means a department, agency, or instrumentality in the executive branch.".

(b) Subsection (b) of such section is amended—

(1) in paragraph (1)—

(A) by striking out "GS-7" in clause (A) and inserting in lieu thereof "GS-9".

(B) by striking out "and" at the end of clause (B);

(C) by striking out the period at the of clause (C) and inserting in lieu thereof a semicolon and "and"; and

(D) by adding at the end the following new clause:

"(D) a veteran given an appointment under the authority of this subsection whose employment under the appointment is terminated within one year after the date of such appointment shall have the same right to appeal that termination to the Merit Systems Protection Board as a career or career-conditional employee has during the first year of employment."; and

(2) in paragraph (2), by striking out "September 30, 1984" and inserting in lieu thereof "September 30, 1986".

(c) Subsection (c) of such section is amended—

(1) by striking out "department, agency, and instrumentality in the executive branch" and inserting in lieu thereof "agency"; and

(2) by striking out "such department, agency, or instrumentality" and inserting in lieu thereof "such agency".

(d) Subsections (d) and (e) of such section are amended to read as follows:

"(d) The Office of Presonnel Management shall be responsible for the review and evaluation of the implementation of this section and the activities of each agency to carry out the purpose and provisions of this section. The Office shall periodically obtain (on at least an annual basis) information on the implementation of this section by each agency and on the activities of each agency to carry out the purpose and provisions of this section. The information obtained shall include specification of the use and extent of appointments made by each agency under subsection (b) of this section and the results of the plans required under subsection (c) of this section.

"(e)(1) The Office of Personnel Management shall submit to the Congress annually a report on activities carried out under this section. Each such report shall include the following information with respect to each agency:

"(A) The number of appointments made under subsection (b) of this section since the last such report and the grade levels in which such appointments were made.

"(B) The number of individuals receiving appointments under such subsection whose appointments were converted to career or career conditional appointments, or whose employment under such an appointment has terminated, since the last such report, together with a complete listing of categories of causes of appointment terminations and the number of such individuals whose employment has terminated falling into each such category.

"(C) The number of such terminations since the last such report that were initiated by the agency involved and the number of such terminations since the last such report that were initiated by the individual involved.

"(D) A description of the education and training programs in which individuals appointed under such subsection are participating at the time of such report.

"(2) Information shown for an agency under clauses (A) through (D) of paragraph (1) of this subsection—

"(A) shall be shown for all veterans; and

"(B) shall be shown separately (i) for veterans of the Vietnam era who are entitled to disability compensation under the laws administered by the Veterans' Administration or whose discharge or release from active duty was for a disability incurred or aggravated in line of duty, and (ii) for other veterans.".

EXTENSION OF EMERGENCY VETERANS' JOB TRAINING ACT PROGRAM

SEC. 212. (a) Section 5(b)(3)(A) of the Emergency Veterans' Job Training Act of 1983 (Public Law 98-77; 97 Stat. 445) is amended by striking out "60 days" and inserting in lieu thereof "90 days".

(b) Section 16 of such Act is amended by striking out "September 30, 1986" and inserting in lieu thereof "September 30, 1987".

(c) The text of section 17 of such Act is amended to read as follows:

"SEC. 17. Assistance may not be paid to an employer under this Act—

"(1) on behalf of a veteran who initially applies for a program of job training under this Act after February 28, 1985; or

"(2) for any such program which begins after September 1, 1985.".

TITLE III—OTHER BENEFIT RATE INCREASES AND PROGRAM IMPROVEMENTS

VOCATIONAL TRAINING AND HEALTH-CARE ELIGIBILITY PROTECTION FOR PENSION RECIPIENTS

SEC. 301. (a)(1) Subchapter II of chapter 15 is amended by adding at the end the following new sections:

"§ 524. Temporary program of vocational training for certain new pension recipients

"(a)(1) Subject to paragraph (3) of this subsection, in the case of a veteran under the age of 50 who is awarded pension during the program period, the Administrator shall determine whether the achievement of a vocational goal by the veteran is reasonably feasible. Any such determination shall be made only after evaluation of the veteran's potential for rehabilitation, and any such evaluation shall include a personal interview of the veteran by a Veterans' Administration employee who is trained in vocational counseling. If the veteran fails, for reasons other than those beyond the veteran's control, to participate in the evaluation in the manner required by the Administrator in order to make such determination, the Administrator shall suspend the veteran's pension for the duration of such failure.

"(2) Subject to paragraph (3) of this subsection, if a veteran who is 50 years of age or older and who is awarded pension during the program period applies for vocational training under this section and the Administrator makes a preliminary finding on the basis of information in the application that, with the assistance of a vocational training program under subsection (d) of this section, the veteran has a good potential for achieving employment, the Administrator shall provide the veteran with an evaluation in order to determine whether the achievement of a vocational goal by the veteran is reasonably feasible. Any such evaluation shall include a personal interview by a Veterans' Administration employee trained in vocational counseling.

"(3) Not more than 2,500 veterans may be given evaluations under this subsection during any 12-month period beginning on February 1 of a year.

"(4) For the purposes of this section, the term 'program period' means the period beginning on February 1, 1985, and ending on January 31, 1989.

"(b)(1) If the Administrator, based upon an evaluation under subsection (a) of this section, determines that the achievement of a vocational goal by a veteran is reasonably feasible, the veteran shall be offered and may elect to pursue a vocational training program under this subsection. If the veteran elects to pursue such a program, the pro-

gram shall be designed in consultation with the veteran in order to meet the veteran's individual needs and shall be set forth in an individualized written plan of vocational rehabilitation of the kind described in section 1507 of this title.

"(2)(A) Subject to subparagraph (B) of this paragraph, a vocational training program under this subsection shall consist of vocationally oriented services and assistance of the kind provided under chapter 31 of this title and such other services and assistance of the kind provided under that chapter as are necessary to enable the veteran to prepare for and participate in vocational training or employment.

"(B) A vocational training program under this subsection—

"(i) may not exceed 24 months unless, based on a determination by the Administrator that an extension is necessary in order for the veteran to achieve a vocational goal identified (before the end of the first 24 months of such program) in the written plan formulated for the veteran, the Administrator grants an extension for a period not to exceed 24 months;

"(ii) may not include the provision of any loan or subsistence allowance or any automobile adaptive equipment of the kind provided under chapter 39 of this title; and

"(iii) may include a program of education at an institution of higher learning (as defined in sections 1652(b) and 1652(f), respectively, of this title) only in a case in which the Administrator determines that the program involved is predominantly vocational in content.

"(3) When a veteran completes a vocational training program under this subsection, the Administrator may provide the veteran with counseling of the kind described in sections 1504(a)(2) of this title, placement and postplacement services of the kind described in section 1504(a)(5) of this title, and training of the kind described in section 1504(a)(6) of this title during a period not to exceed 18 months beginning on the date of such completion.

"(4) A veteran may not begin pursuit of a vocational training program under this subsection after the later of (A) January 31, 1989, or (B) the end of a reasonable period of time, as determined by the Administrator, following either the evaluation of the veteran under subsection (a)(1) of this section or the award of pension to the veteran as described in subsection (a)(2) of this section. Any determination by the Administrator of such a reasonable period of time shall be made pursuant to regulations which the Administrator shall prescribe.

"(c) Notwithstanding subsection (c) of section 525 of this title, a veteran who pursues a vocational training program under subsection (b) of this section shall have the benefit of the provisions of subsection (a) of section 525 of this title beginning at such time as the veteran's entitlement to pension is terminated by reason of income from work or training (as defined in subsection (b) of that section).

"(d) Payments by the Administrator for education, training, and other services and assistance under subsection (b) of this section (other than the services of Veterans' Administration employees) shall be made from the Veterans' Administration appropriations account from which payments for pension are made.

"§ 525. Temporary protection of health-care eligibility

"(a) In the case of a veteran whose entitlement to pension under section 521 of this title is terminated during the program period by reason of income from work or training, the veteran shall retain for a period of three years beginning on the date of such termination all eligibility for care and services under such chapter that the veteran would have had if the veteran's entitlement to pension had not been terminated. Care and services for which such a veteran retains eligibility include, when applicable, drugs and medicines under section 612(h) of this title and special priority with respect to such care and services under section 612(i)(5) of this title.

"(b) For the purposes of this section:

"(1) The term 'terminated by reason of income from work or training' means terminated as a result of the veteran's receipt of earnings from activity performed for remuneration or gain, but only if the veteran's annual income from sources other than such earnings would, taken alone, not result in the termination of the veteran's pension.

"(2) The term 'program period' means the period beginning on February 1, 1985, and ending on January 31, 1989.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 523 the following new items:

"524. Temporary vocational training for certain new pension recipients.
"525. Temporary protection of health-care eligibility.".

(b) Not later than April 15, 1988, the Administrator of Veterans' Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the results of the implementation of sections 524 and 525 of title 38, United States Code (as added by subsection (a)(1)), during the period beginning on February 1, 1985, and ending on January 31, 1988. The report shall include—

(1) information regarding—

(A) the number of veterans who during the period covered by the report were provided with evaluations under paragraphs (1) and (2) of subsection (a) of such section 524,

(B) the number of such veterans for whom a vocational goal was determined to be feasible,

(C) the number of such veterans who elected, and who did not elect, to pursue a vocational training program under subsection (b) of that section,

(D) the extent to which those veterans who elected to pursue such a program completed the program,

(E) the subsequent work and pension-eligibility experience of the veterans who were provided with such evaluations, shown according to their participation in and completion of vocational training programs, and

(F) the number of veterans who received the benefit of such section 525;

(2) a tabulation of the reasons given by such veterans for not electing to pursue such a program by those for whom a vocational goal was determined to be reasonably feasible but who did not elect to pursue such program; and

(3) the Administrator's assessment of the value (including the cost-effectiveness) and effect of such implementation and any recommendations of the Administrator for administrative and legislative action based on such results and assessment.

REPORT ON MEDICAL EXAMINATIONS OF CERTAIN PENSION RECIPIENTS

SEC. 302. (a) Not later than 28 months after the date of the enactment of this Act, the Administrator of Veterans' Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report containing a statistical tabulation of the results of the medical examinations conducted under subsection (b)(1)(A) and the determinations made under subsection (b)(1)(B).

(b)(1) The Administrator—

(A) shall provide for the selection of a sampling of the class of pension recipients described in paragraph (3) to undergo, and each recipient in such sampling shall undergo, a medical examination of the kind provided a veteran under 65 years of age who is applying for pension under section 521 of title 38, United States Code; and

(B) shall determine what, if any, percentage rating would be applicable to the recipient under the schedule of ratings adopted pursuant to section 355 of such title.

(2) The sampling of pension recipients selected under paragraph (1)(A) shall be selected in a manner that is statistically valid for the purpose of estimating the disability ratings of all recipients in the class described in paragraph (3).

(3) The class of pension recipients referred to in paragraphs (1) and (2) are those individuals who, during the two-year period beginning on the date of the enactment of this Act, are awarded pension under section 521 of title 38, United States Code, by reason of being considered, under section 502(a) of such title, to be permanently and totally disabled by reason of being 65 years of age or older or becoming unemployable after age 65.

PARTICIPATION IN THERAPEUTIC OR REHABILITATIVE ACTIVITIES

SEC. 303. Section 618 is amended by adding at the end the following new subsection:

"(f) Neither a veteran's participation in an activity carried out under this section nor a veteran's receipt of remuneration as a result of such participation may be considered as a basis for the denial or discontinuance of a rating of total disability for purposes of compensation or pension based on the veteran's inability to secure or follow a substantially gainful occupation as a result of disability.".

SPECIALLY ADAPTED HOUSING ASSISTANCE

SEC. 304. (a) Section 802 is amended—

(1) in subsection (a), by striking out "$32,500" and inserting in lieu thereof "$35,500"; and

(2) in subsection (b), by striking out "$5,000" and inserting in lieu thereof "$6,000".

(b) The amendments made by subsection (a) shall take effect on January 1, 1985.

AUTOMOBILE AND ADAPTIVE EQUIPMENT ASSISTANCE

SEC. 305. (a) Section 1902(a) is amended by striking out "$4,400" and inserting in lieu thereof "$5,000".

(b) Subsection (c) of section 1903 is amended to read as follows:

"(c)(1) An eligible person shall not be entitled to adaptive equipment under this chapter for more than two automobiles or other conveyances at any one time or (except as provided in paragraph (2) of this subsection) during any four-year period.

"(2) In a case in which the four-year limitation in paragraph (1) of this subsection precludes an eligible person from being entitled to adaptive equipment under this chapter, if the Administrator determines that, due to circumstances beyond the control of such person, one of the automobiles or other conveyances for which adaptive equip-

ment was provided to such person during the applicable four-year period is no longer available for the use of such person, the Administrator may provide adaptive equipment to such person for an additional automobile or other conveyance during such period. Provision of adaptive equipment under this paragraph is within the discretion of the Administrator. Any action to provide adaptive equipment under this paragraph shall be made pursuant to regulations which the Administrator shall prescribe.".

(c)(1) The amendments made by this section shall take effect on January 1, 1985.

(2) In the case of a person who during the four-year period ending on December 31, 1984, was provided adaptive equipment under chapter 39 of title 38, United States Code, for an automobile or other conveyance and who has such automobile or other conveyance available for use on the date of the enactment of this Act, the first four-year period applicable to such person under subsection (c) of section 1903 of such title (as amended by subsection (a)) shall begin on the most recent date before January 1, 1985, on which such person was provided such equipment.

TITLE IV—MISCELLANEOUS PROVISIONS

REPEAL OF ANNUAL REPORTING REQUIREMENT

SEC. 401. Section 1796 is amended by striking out subsection (d).

SUSPENSION OF COMPENSATION AND PENSION PAYMENTS TO CERTAIN INSTITUTIONALIZED VETERANS; WAIVER

SEC. 402. (a) Section 3203(b)(1) is amended—

(1) by designating the first and second sentences as subparagraphs (A) and (B), respectively;

(2) in subparagraph (A), as so designated—

(A) by striking out the comma after "treatment" in the first sentence and inserting in lieu thereof "or";

(B) by striking out "by reason of mental illness"; and

(C) by inserting "(excluding the value of the veteran's home unless there is no reasonable likelihood that the veteran will again reside in such home)," after "the veteran's estate"; and

(3) by adding at the end the following new subparagraph:

"(C) The Administrator may waive the discontinuance under this paragraph of payments to a veteran with respect to not more than 60 days of care of the veteran during any calendar year if the Administrator determines that the waiver is necessary in order to avoid a hardship for the veteran. Any such waiver shall be made pursuant to regulations which the Administrator shall prescribe.".

(b) The Administrator shall prescribe regulations under subparagraph (C) of section 3203(b)(1) of title 38, United States Code (as added by subsection (a)), not later than 60 days after the date of the enactment of this Act.

In lieu of matter inserted by the amendment of the Senate to the title of the bill, insert: "An Act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans and of dependency and indemnity compensation for surviving spouses and children of veterans, to increase the rates of subsistence and educational assistance allowances for veterans pursuing vocational rehabilitation programs under chapter 31 of such title and for veterans and eligible persons pursuing programs of education or training under chapter 34, 35, or 36 of such title, to increase the opportunities for vocational rehabilitiation of certain veterans receiving disability compensation, and to provide vocational training opportunities for certain veterans receiving pension; and for other purposes.".

Mr. SIMPSON. Mr. President, it gives me great pleasure to speak today, in strong support of the final passage of H.R. 5688, the proposed "Veterans' Benefits Improvement Act of 1984." This bill was passed by the Senate by unanimous consent along with a title amendment and two amendments to the committee bill on October 2, 1984. S. 2736 was passed by the Senate as an amendment in the nature of a substitute to the House of Representatives companion measure, H.R. 5688, the proposed "Veterans' Compensation Amendments for Fiscal Year 1985" which was passed by the House on June 18, 1984. The pending measure, embodies a compromise agreement between the Veterans' Affairs Committees of the Senate and the House. I believe we have reached a reasonable compromise agreement through the full cooperation of both committees to insure that we pass a fair, equitable, and comprehensive compensation bill to benefit our Nation's veterans.

The most important provision of the compromise bill is the 3.2-percent across-the-board cost-of-living increase in the rates of disability compensation and dependency and indemnity compensation, effective Demember 1, 1984. This rate increase is based on the most recent estimate by the Congressional Budget Office of the projected Consumer Price Index as of December 1, 1984. I am pleased that a change in economic conditions has resulted in a significantly lower projected inflation rate that had been estimated previously. Although the compromise provision does not include the alternative rate adjustment provision included in the original Senate bill, it reflects the intent behind that provision, which would have required the Administrator of Veterans' Affairs to compute and pay alternative rate increases based on the actual Consumer Price Index as of December 1, 1984. I strongly endorse the compromise provision since it reflects the truest estimate available at this time of the inflation rate as of December 1. Thus, the compromise COLA increase reflects the intent of the original Senate provision, that the COLA increase keep pace with the actual rate of inflation.

Mr. President, the compromise bill would also provide for other reasonable rate increases, including the provision contained in the Senate bill, S. 2736, which would provide a 10-percent rate increase, effective October 1, 1984, for all VA education programs. Also, the maximum amount of the one-time automobile assistance allowance paid to certain severely service-connected disabled veterans would be increased to $5,000, effective January 1, 1985, and the maximum amount of the specially service-connected disabled veterans and the adapted housing assistance allowance for veterans with service-connected total blindness or the loss or loss of use of both upper extremities would be increased to $35,500 and $6,000, respectively effective January 1, 1985.

The compromise agreement would provide for a 2-year extension of the Veterans' Readjustment Appointment [VRA] Program, an increase in the maximum grade level at which appointments may be made to GS-9, and limited appeal rights for certain appointees under the program. The compromise would also enhance the Emergency Veterans' Job Training Act Program by extending the eligiblity periods for certificates and the availability of funds, as well as the time in which to apply and to commence training under the programs.

Through extensive negotiations, the committees have agreed to several other important provisions contained in the compromise bill which are designed to provide employment incentives for certain severely disabled and certain disadvantaged veterans who are unemployed, to assist them as much as possible to rejoin the work force and to become productive members of society once again, despite their disabilities. The compromise bill incorporates many of the facets of the two trial work pilot projects which were originally contained in the Senate-passed bill plus an additional pilot vocational training program for pensioners derived from a provision in the original House bill. These pilot programs would be in effect for 4 years and would require the Administrator to report back to the Congress after the end of the first 3 years on the results of these employment incentive programs. This information will help to enable the Congress to determine whether it is feasible for these categories of disabled veterans to regain and maintain substantial gainful employment if they are provided sufficient vocational training and rehabilitation assistance, health benefits, and a degree of financial security while making the transition back into the work force. Mr. President, my floor statement on October 2, 1984, the date of Senate passage of S. 2736 contains a full discussion of the two trial work pilot programs which are substantially the same as the provisions contained in the compromise bill. I had some significant objections to the original House-passed version of the vocational training provisions for pension recipients; however, the modifications which have been incorporated in the compromise have alleviated my concerns and I trust will provide a

very unique opportunity to study the possibilities of training or retraining these severely disabled veterans so that they might live more useful and productive lives, especially when coupled with the trial work period. The benefits of accomplishing this goal would be varied and most worthwhile to the veteran, his or her family, and to the country.

The compromise would place this vocational training program in chapter 15, title 38, of the United States Code rather than in chapter 31 as in the House-passed bill. It was important to me however to separate the two programs by placing this pilot effort in chapter 15 with other pension matters. This new program for nonservice-connected veterans is intended to be more limited and focused but similar to those contained under the chapter 31 program of vocational rehabilitation and counseling for service-connected veterans. I also expect that the program will be administered under the auspices of the existing vocational rehabilitation program.

Another important difference of the compromise from the House-passed measure is the intent to focus specifically on job placement and to provide workplace training and work adjustment training and counseling necessary to provide seriously disabled veterans with all the ammunition they need to succeed in a new field. The intent of this training is not to provide higher education and nonfocused learning experiences, but to provide immediate placement when possible and training in the workplace or, if not possible, vocational training that would lead to placement of such veterans in jobs that would be appropriate considering their disabilities. The counseling services provided under the compromise are not intended to be merely analytical or therapeutic in nature but to relate directly to job-adjustment concerns that a severely disabled veteran might encounter.

I anticipate that this program would provide a useful opportunity to see how many new pensioners, for whom it is determined that the pursuit of a vocational goal would be reasonably feasible, would take that opportunity to pursue a training program and obtain substantial gainful employment. The bill limits the number of evaluations in any year of the program to 2,500. I intend to monitor that limitation very closely in order to ensure that this number would not result in a significant number of veterans being excluded from the possibility of training which might lead to employment during the life of this project.

I strongly support the passage of these pilot programs which are not only designed to benefit those veterans who will achieve the personal satisfaction of demonstrating their ability to maintain gainful employment, but in the process will also benefit the VA compensation and pension program as these veterans return to work and will no longer be totally dependent on their VA payments.

Finally, I wish to note a technical change made to section 335 of title 38, which would reduce the percentage of peacetime service-connected disability required for additional compensation for dependents, to conform with VA practice which is based on a provision found in section 334. I agree to this technical amendment. However, I wish to emphasize that, in my view, this change does not indicate my support, or lack of support, for the current practice of providing the same level of benefits to peacetime and wartime veterans.

Mr. President, this bill as amended once again has provided an excellent opportunity for us to join in bipartisan support of a fair and reasonable compromise which incorporates many important provisions of both the Senate and the House versions of the bill.

Mr. President, in conclusion, I wish to express my sincere appreciation to Senator CRANSTON, the distinguished ranking minority member of the committee for his dedicated assistance throughout the entire process of the development of this bill; each of my colleagues who serve as committee members; G.V. "SONNY" MONTGOMERY, the effective and distinguished Chairman of the House Veterans' Affairs Committee, as well as JOHN PAUL HAMMERSCHMIDT, the respected ranking minority member of the House committee.

I also wish to thank the committee staff members for their superb efforts on this bill, particularly my most dependable and extraordinary chief counsel and staff director, Anthony Principi, his deputy and legislative director, Julie Susman, Kathleen McTighe, Jody Sanders, Becky Hucks, Kay Eckhardt, James McRae, and Brenda Meyer. I also wish to express my appreciation for the outstanding work of the members of the minority staff, particularly, Johnathan Steinberg, chief counsel and staff director; Ed Scott, Babette Polzer, and Ingrid Post. I also thank the staff of the House Veterans' Affairs Committee, especially Mack Fleming, the fine chief counsel and staff director; Arnold Moon and Charles Peckarsky, and Rufus Wilson, the most capable minority chief counsel, who were instrumental in achieving this equitable compromise.

Mr. President, I am most pleased to have the opportunity to urge that my colleagues in the Senate ratify this measure on behalf of the entire committee, all Members of which are cosponsors of this measure. I urge the Senate's favorable consideration of this bill. I ask unanimous consent that the joint explanatory statement be printed in the RECORD in lieu of a conference report.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

EXPLANATORY STATEMENT OF HOUSE BILL (H.R. 5688), SENATE AMENDMENT (S. 2736), AND COMPROMISE AGREEMENT ON H.R. 5688, THE VETERANS' BENEFITS IMPROVEMENT ACT OF 1984

This document explains the provisions of H.R. 5688 as passed by the House of Representatives (hereinafter referred to as the "House bill"), the provisions of the Senate amendment in the nature of a substitute to the House bill as passed by the Senate (hereinafter referred to as the "Senate amendment"), and the provisions of a compromise on H.R. 5688 as agreed to by the Veterans' Affairs Committees of the House and Senate. The differences between the House bill, the Senate amendment, and the compromise agreement are noted below, except for clerical corrections, conforming changes made necessary by agreements reached between the Committees, and minor drafting, technical, and clarifying changes.

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION

PART A—RATE INCREASES

DISABILITY COMPENSATION

Both the House bill (sections 101 through 103) and the Senate amendment (sections 101 through 103) would amend chapter 11 of title 38, United States Code, relating to compensation for service-connected disability or death, to increase, effective December 1, 1984, the basic rates of service-connected disability compensation for veterans, the rates payable for certain severe disabilities, the dependents' allowances payable to veterans rated 30-percent or more disabled, and the annual clothing allowance for certain disabled veterans. The House bill would increase such rates and allowances by 4.3 percent and the Senate amendment (subject to the alternative-rate-increase provision set forth in section 108 of the Senate amendment discussed below), by 4.7 percent, with increases rounded to the nearest dollar.

The compromise agreement (sections 101 through 103) would amend chapter 11 to increase, effective December 1, 1984, such rates and allowances by 3.2 percent, with increases rounded to the nearest dollar.

The Committees note that this increase is in accordance with the Congressional Budget Office's most recent (August 1984) economic assumption relating to the anticipated increase in the Consumer Price Index from the third quarter of fiscal year 1985 through the third quarter of fiscal year 1984 and the assumptions underlying the First Concurrent Budget Resolution for FY 1985, as approved by the Congress on October 1, 1984.

DEPENDENCY AND INDEMNITY COMPENSATION

Both the House bill (sections 104 and 105) and the Senate amendment (sections 104 through 106) would amend chapter 13 of title 38, relating to dependency and indemnity compensation for service-connected deaths, to increase, effective December 1, 1984, rates of dependency and indemnity compensation (DIC) payable to the surviving spouses and children of veterans whose deaths were service connected. The House bill would increse such rates by 4.3 percent

and the Senate amendment (subject to the alternative-rate-increase provision set forth in section 108 of the Senate amendment, discussed below), by 4.7 percent, with increase rounded to the nearest dollar.

The compromise agreement (sections 104 through 106) would amend chapter 13 to increase, effective December 1, 1984, such rates by 3.2 percent, with increases rounded to the nearest dollar.

The justification for this percentage increase is discussed above in connection with the increase provided in disability compensation.

ALTERNATIVE RATE INCREASES

The Senate amendment (section 108), but not the House bill, would provide that, if the December 1984 increase under the Social Security Act is not 4.7 percent, the Administrator of Veterans' Affairs would compute and pay effective December 1, 1984, in lieu of the 4.7-percent rate increases, alternative increases at the same percentage as rates increased under the Social Security Act.

The compromise agreement does not contain this provision.

PART B—COMPENSATION PROGRAM AMENDMENTS

The House bill (section 111(a)), but not the Senate amendment would amend section 301(3) of title 38, relating to the definition of "chronic diseases" for purposes of service-connected disability compensation, to include in the definition of that term lupus erythematosus, systemic (SLE).

The compromise agreement does not contain this provison.

The Committees note that the absence of the provision in the compromise agreement in no way indicates any intent that the VA alter the manner in which SLE is currently evaluated and adjudicated for purposes of compensation.

MANIFESTATION OF DISEASES

The House bill (section 111(b)), but not the Senate amendment, would amend section 312 of title 38, relating to presumptions with respect to certain diseases and disabilities, to remove the references "to a degree of 10 per centum or more" and "or aggravated by". The removal of the phrase "to a degree of 10 per centum or more" would remove the requirement that the diseases be manifested to a specific minimum measurable degree of disability during the prescribed post-service period and would require only that the disease be shown to exist during those periods. A technical change would eliminate the phrase "or aggravated by" from section 312.

The compromise agreement does not contain these provisions.

TRIAL WORK PERIOD AND VOCATIONAL REHABILITATION PILOT PROJECT

The Senate amendment (section 110), but not the House bill, would further amend chapter 11 of title 38 to establish a 3-year trial work pilot program (which the Administrator could extend to 4 years) for veterans whose service-connected disabilities are rated less than totally disabling but who are assigned service-connected total disability ratings by reason of individual determinations of unemployability ("IU ratings") during the program. Under the pilot program, a veteran with an IU rating would have the opportunity to participate in one 12-month trial work period and would be eligible for certain counseling and placement services. Also, if the veteran were to work after completion of a trial work period and lose the IU rating, the rating would be automatically restored—subject to immediate review—if, in any month during the 12-month period following the veteran's trial work period, the veteran's employment earnings fell below $300. In addition, all veterans with IU ratings would be provided with eligibility for certain counseling, placement, and post-placement services under chapter 31 regardless of whether they are pursuing a chapter 31 program. Not later than 39 months after the pilot program went into effect, the Administrator would be required to report on the results of the first 3 years' experience under the pilot program.

In a free-standing provision of law, the Administrator would be required to provide all IU-rated veterans with information regarding the trial work period and chapter 31.

The Senate amendment would further amend chapter 11 of title 38 to provide that each veteran receiving an IU rating after the fourth full month following the date of enactment undergo a vocational rehabilitation evaluation under chapter 31 of title 38, if eligible therefor, and pursue a VA vocational rehabilitation program if one is developed. In the case of a veteran with such a new IU rating who failed to comply with the requirement to participate in the evaluation or the rehabilitation program, the Administrator would be required to provide for a review of the veteran's eligibility for that rating and for the veteran's noncompliance to be considered as part of the review.

The compromise agreement (section 111) contains provisions, derived from these provisions, to add a new section 363, "Temporary program for trial work periods and vocational rehabilitation for certain veterans with total disability ratings", to title 38, to establish a 4-year program—from February 1, 1985, through January 31, 1989—providing certain protection for the IU ratings of veterans who wish to try to return to work. Under the compromise agreement, a veteran with an IU rating who regains employment during that 4-year period would not, as a result of doing so, be determined to have regained the ability to follow "a substantially gainful occupation" (the standard used in VA regulations, 38 C.F.R. § 4.16, for deciding whether the veteran is or is not entitled to an IU rating) unless the veteran has maintained that employment for at least 12 consecutive months.

The compromise agreement contains the provisions making counseling, placement, and post-placement services available to all IU-rated veterans and notification provisions requiring that IU-rated veterans be advised about the provisions of the compromise agreement affecting them and about the chapter 31 vocational rehabilitation program.

Regarding new recipients of IU ratings undergoing vocational rehabilitation evaluations, the compromise agreement would establish a program applicable to veterans who receive such ratings during the 4-year period beginning February 1, 1985, and ending January 31, 1989. Under this program, after the Administrator provides the veteran with notice of the IU-rating award and the requirement that the veteran undergo a vocational rehabilitation evaluation, the Administrator, in order to determine whether achievement of a vocational goal is reasonably feasible, would be required to arrange promptly for a chapter 31 evaluation (to be conducted by a VA employee trained in vocational counseling) and notify the veteran of the schedule for it. Failure of the veteran, for reasons other than those beyond the veteran's control, to participate in evaluation would result in suspension of the veteran's IU rating for the duration of the failure. If a chapter 31 vocational rehabilitation program is developed for the veteran and the veteran fails to pursue it, the Administrator would notify the veteran that, if for reasons other than those beyond the veteran's control, the veteran were to fail to begin or resume pursuit of the program within 60 days (or within any longer period the Administrator determines is the shortest period within which it would be reasonably feasible for the veteran to begin or resume pursuit), the Administrator would provide for the veteran's evaluation results to be considered in the next scheduled review of the veteran's IU-rating eligibility. If the veteran failed to begin or resume pursuit, the Administrator would be required to provide for the results to be so considered. These provisions would not apply to veterans for whom the Administrator determines that participation in evaluation or achievement of a vocational goal is not feasible.

Not later than April 15, 1988, the Administrator would be required to submit to the Committees a report on the first 3 years' experience under this new section of title 38 with particular reference to the program's cost-effectiveness and the extent to which the new provisions contribute to veterans becoming employable and employed.

The Committees anticipate that the Administrator, in order to meet the April 15 reporting deadline, will begin preparation of the report well in advance of the end of the first three years of the program.

The Committees also note that, under current VA procedures, set forth in the Department of Veterans' Benefits Adjudication Procedure Manual (M 21-1, paragraph 55.08), veterans with IU ratings are required to provide annually information regarding their employment. The Committees approve of this procedure and note that the compromise agreement provisions relating to veterans with these ratings are designed to fit in with this procedure. Thus, if the Administrator ever intends to eliminate or modifly this procedure, the Committee direct the Administrator to provide them with reasonable notice of the intention to do so.

TECHNICAL AMENDMENT

The House bill (section 112), but not the Senate amendment, would amend section 335 of title 38, relating to dependents allowances for veterans receiving compensation as a result of a disability incurred or aggravated during peacetime service, to make a technical, conforming change to clarify the VA's authority to continue to pay such allowances to such veterans in the same manner that they are paid to veterans with disabilities incurred or aggravated during wartime service.

The compromise agreement (section 112) contains this provision.

TITLE II—VETERANS' REHABILITATION, EDUCATION, AND EMPLOYMENT PROGRAMS

PART A—RATE INCREASES

The Senate amendment (sections 201 through 205) and sections 101 through 103 of H.R. 5398 as passed by the House on August 6, 1984 (hereinafter referred to as H.R. 5398), would amend chapters 31, 34, 35, and 36 of title 38, United States Code, relating to certain rehabilitation and education programs, to increase rates of all VA educa-

tion programs, including rehabilitation subsistence allowances for veterans with service-connected disabilities; educational assistance allowances and special supplementary (tutorial) assistance for eligible veterans; training assistance allowances for apprenticeship and other on-job training; and educational assistance and special training allowances for eligible survivors and dependents. The House bill would increase such rates and allowances by 15 percent, effective January 1, 1985, and the Senate amendment by 10 percent, effective October 1, 1984.

The compromise agreement contains the Senate provision.

The Senate amendment, but not the House bill nor H.R. 5398, would amend section 1784(c) of title 38, relating to reporting fees paid to educational institutions to defray the costs to them of reports and certifications required by the VA, to increase the amounts of such fees from $7 to $9 annually for each eligible veteran or eligible person enrolled at an educational institution under chapter 34 or 35 or from $11 to $13 annually for each enrollee receiving advance payment of educational assistance allowances.

The compromise agreement does not contain this provision.

H.R. 5398 (section 101(c)(1)), but not the Senate amendment, would amend section 1774(b) of title 38, relating to reimbursement of expenses to State approving agencies, to increase the allowances for administrative expenses by 15 percent, effective January 1, 1985.

The compromise agreement does not contain this provision.

PART B—VETERANS' EMPLOYMENT PROGRAMS

EXTENSION AND REVISION OF VETERANS' READJUSTMENT APPOINTMENTS

Both the Senate amendment (section 301) and H.R. 5398 (section 201) would amend section 2014(b) of title 38, relating to the authority for veterans readjustment appointments, to extend the authority. H.R. 5398 would extend the authority for three years, until September 30, 1987, and the Senate amendment for one year, until September 30, 1985. Further, H.R. 5398, but not the Senate amendment, would raise the maximum grade level at which appointments may be made from GS-7 to GS-11 and remove the requirement that non-service-connected disabled Vietnam-era veterans be educationally disadvantaged in order to be eligible for a veterans readjustment appointment. Finally, both the Senate amendment and H.R. 5398 would provide limited appeal rights during the first year of an appointment and provide for annual, instead of semi-annual, reports on the program. H.R. 5398 would, in addition, make technical changes in the reporting requirement in order to reflect more accurately how the system of obtaining the information for the report operates in practice.

The compromise agreement (section 211) would extend the veterans readjustment appointment authority for two years, until September 30, 1986; raise to GS-9 the maximum grade level at which appointments may be made; provide limited appeal rights; and require an annual, rather than semi-annual, report (incorporating the technical changes proposed in H.R. 5398).

EXTENSION OF EMERGENCY VETERANS' JOB TRAINING ACT

Both the Senate amendment (section 302) and H.R. 5398 (section 301) would amend the Emergency Veterans' Job Training Act of 1983, Public Law 98-77, to extend by 6 months, until September 1, 1985, the date by which veterans previously certified must commence a training program under that Act and to extend to 90 days the lifetime of certifications of eligibility furnished to veterans under the Act. In addition, H.R. 5398, but not the Senate amendment, would extend by 6 months, until May 29, 1985, the date by which veterans may apply to participate in the program. Finally, the Senate amendment, but not H.R. 5398, would extend the availability of appropriated funds under the program for one year.

The compromise agreement (section 212) incorporates both the House and Senate provisions except that the application date deadline is extended for three months, through February 28, 1985.

OTHER EDUCATION PROVISIONS

The Senate amendment (section 210), but neither the House bill nor H.R. 5398, would amend certain provisions of chapters 31, 34, and 35 of title 38, relating to time limits for completion of programs of education or training, to toll the eligibility period for GI Bill and certain other educational benefits and vocational rehabilitation programs for certain veterans and eligible persons who have been prevented from participating in such programs because of alcohol or drug dependence or abuse. In the case of a veteran with a general discharge, an individual determination that the discharge was under conditions other than dishonorable would be required.

The compromise agreement does not contain this provision.

The Senate amendment (section 211), but neither the House bill nor H.R. 5398, would amend section 1796 of title 38, relating to limitations on certain advertising, sales, and enrollment practices, to repeal a Veterans' Administration reporting requirement pertaining to deceptive advertising practices by educational institutions.

The compromise agreement (section 401) contains this provision.

The Committees expect the Administrator to continue to monitor closely advertisement practices by educational institutions enrolling GI Bill trainees and to keep the Committees fully informed about any significant developments relating to deceptive advertising practices by such institutions.

The Senate amendment (section 212), but neither the House bill nor H.R. 5398, would require the Administrator to consult with the VA's educational advisory committee (establishment pursuant to section 1792 of title 38) prior to changing any requirements for educational institutions to report enrollments of GI Bill trainees.

The compromise agreement does not contain this provision.

The Committees note that they do not believe that a statutory requirement is needed to bring about the consultation sought by the Senate amendment, since this is the purpose for which Congress established the advisory committee.

TITLE III—OTHER BENEFIT RATE INCREASES AND PROGRAM IMPROVEMENTS

VOCATIONAL TRAINING AND HEALTH-CARE-ELIGIBILITY PROTECTION FOR PENSION RECIPIENTS

Both the House bill (section 202) and the Senate amendment (section 401) contain provisions that would amend chapter 15 of title 38, relating to VA need-based pension programs for permanently and totally disabled elderly wartime veterans and for survivors of wartime veterans, to establish temporary programs designed to help enable certain disabled veteran-pensioners to return to work.

The House bill would establish a 5-year program of vocational training for disabled veterans under age 50 who are newly found to be entitled to pension. Under the House bill, the Administrator would be required to determine, after a personal interview of the veteran by a VA employee trained in vocational counseling, whether the achievement of a vocational goal by the veteran is reasonably feasible. Failure of the veteran to participate as required by the Administrator in order to make the determination would result in suspension of the veteran's pension until the required participation was completed. If achievement of a vocational goal were determined to be reasonably feasible, the veteran could elect to undertake a program of vocational training that would be carried out as a vocational rehabilitation program under chapter 31 of title 38 but would not include any chapter 31 loans or subsistence allowances. Such a program could not exceed 48 months, and following completion of the program the veteran would be eligible for certain chapter 31 counseling, placement, and post-placement services for up to 18 months. Also, in the case of a veteran who is permanently housebound or in need of regular aid and attendance, who has completed a vocational training program under these provisions, and whose pension was thereafter terminated solely because the veteran's annual income exceeded the applicable maximum limitation, the veteran's eligibility for drugs and medicine under section 612(h) of title 38 would be continued for one year after pension termination.

The Senate amendment would establish a 3-year pilot program (which the Administrator could extend to 4 years) to allow any permanently and totally disabled veteran pension recipient to participate in a 36-month period of trial work. Any work performed by the veteran during that period could not be taken into account in any review of the veteran's ability to secure and follow a substantially gainful occupation. Veterans participating in the program would retain their pension-based VA health-care eligibility during their trial work periods even if their pensions were terminated as a result of their work income. Also, a veteran whose pension was terminated due to income derived from participation in a VA or State vocational rehabilitation program would have an additional 12-month eligibility period for VA health-care services. All income received from employment during the trial work period, with the exception of certain subsistence allowances associated with vocational rehabilitation programs, would be counted in determining the veteran's income for pension purposes. The Administrator would be required to report on the results of the pilot program's first 3 years of implementation not later than 39 months after its effective date.

The compromise agreement (section 301) contains provisions derived from these provisions to add new sections 524, "Temporary program of vocational training for certain new pension recipients", and 525, "Temporary protection of certain health-care eligibility", establishing a 4-year—February 1, 1985, through January 31, 1989—program providing for vocational training and VA health-care eligibility protection for permanently and totally disabled veterans receiving awards of VA pension during that period. Under the compromise agreement, a veteran under age 50 who is found to be en-

titled to pension would be required to undergo evaluation, as under the House bill, to determine whether a vocational goal is reasonably feasible. Failure to participate in the evaluation as required would result in suspension of the veterans' pension if the failure were for reasons other than those beyond the veterans' control. If a vocational goal were determined to be reasonably feasible, the veteran would be eligible for vocational training. New recipients of pension who are 50 years of age or older would be permittted to apply for vocational training under this program. If the Administrator finds that information on the veteran's application shows a good potential for achieving a vocational goal, the age 50-and-over veteran would be given an evaluation and would be eligible for vocational training under this program if the evaluation indicates that achievement of a vocational goal is reasonably feasible.

For a veteran who elects to pursue vocational training under this program, the training would consist of vocationally-oriented rehabilitation services and assistance of the kind provided under chapter 31 and only such other services and assistance of the kind provided under that chapter as are necessary for the veteran to prepare for and pursue vocational training or employment. The compromise agreement would provide that vocational training programs under the program are to be designed to emphasize, whenever appropriate, work-place training and work-place-adjustment counseling during such training. However, no loans or allowances and no automobile adaptive equipment could be provided, and a program of education at an institution of higher learning could be provided only if the program were predominantly vocational in content. A vocational training program for a veteran would be limited to 24 months unless the Administrator were to grant an extension of up to 24 months based on a determination that the extension was necessary in order for the veteran to achieve a vocational goal that was identified during the first 24 months in the veteran's written plan of vocational rehabilitation. The deadline for initiating pursuit of vocational training under this program would be the later of January 31, 1989, or the expiration of a reasonable time (to be determined under regulations to be prescribed by the Administrator) after the evaluation of a veteran under age 50 or the award of pension to a veteran age 50 or over, as the case may be. The compromise agreement would limit to 2,500 the number of veterans who could participate in evaluation under the temporary program during each 12-month period.

Following the veteran's completion of a vocational training program, the veteran would be eligible for certain follow-up services for a period not to exceed 18 months. Payments for all services and assistance under this program (other than the services of VA employees) would be made from the VA appropriations account from which pensions are paid. Also, in the case of a veteran who enters vocational training under the new program and who thereafter loses entitlement to pension because his or her work income causes the annual income limitation applicable to him or her to be exceeded, the veteran's VA health-care eligibility (including any applicable priority) would be preserved for the 3-year period following the date on which his or her pension it terminated.

In addition, under the Senate amendment, the same health-care protection for the same duration would be provided for any veteran whose pension is terminated, during the period of February 1, 1985, through January 31, 1989, because the veteran's work income caused the applicable income limitation to be exceeded. The provision in the Senate amendment that training allowances received by a veteran during the trial work period not be counted for pension purposes is not included in the compromise agreement.

Not later than April 15, 1988, the Administrator would be required to submit to the Committees a report with particular reference to the program's cost-effectiveness and the extent to which the new provisions contribute to veterans becoming employable and employed.

The Committees anticipate that the Administrator, in order to meet the April 15 reporting deadline, will begin preparation of the report well in advance of the end of the first three years of the program.

The Committees note that this new temporary vocational training program is intended to have a vocational and employment focus. In that regard, only where necessary to enable a catastrophically-disabled veteran to participate in training or employment, services and assistance under this program should be provided to the veteran in order to help the veteran overcome problems in daily living. It is the Committees' intention that vocational training programs under this program be designed to emphasize, whenever appropriate, work-place training, personnel-adjustment counseling, and work-adjustment training.

The Committees also not that, since rehabilitation services and assistance would be provided under subsection (b) of the new section 525 of title 38—and not under chapter 31 of title 38—an injury suffered by a veteran as a result of pursuit of vocational training under this program would not be a basis—as it would if it were suffered under chapter 31—for an award of compensation under section 351 of title 38 or for health-care eligibility under section 610(a)(3) of title 38.

REPORT ON MEDICAL EXAMINATIONS OF CERTAIN PENSION RECIPIENTS

The Senate amendment (section 402), but not the House bill, for the purpose of determining the actual percentage disability ratings of certain VA pension recipients, would require the Administrator to prepare and submit a report on the results of conducting, during the 2-year period following the enactment date, medical examinations of veterans awarded VA pension based on their being age 65 or older.

The compromise agreement (section 302) would require that the Administrator, not later than 28 months following the date of enactment, submit to the Committees a report on the results of medical examinations given to a statistically valid sampling of these veterans.

PARTICIPATION IN THERAPEUTIC OR REHABILITATIVE ACTIVITIES

The Senate amendment (sections 602(a), (b), and (c)), but not the House bill, would require the VA to conduct a 39-month demonstration project (and submit by February 1, 1987, a report on the first 2 years' experience) under which the income received by veterans for their participation in VA incentive-therapy and compensated-work-therapy programs would not be counted as income for the purpose of VA pension programs.

The compromise agreement does not contain this provision.

The Senate amendment (section 602(d)), but not the House bill, would amend section 618 of title 38, relating to therapeutic and rehabilitation activities, to specify that a veteran's participation in a VA incentive-therapy or compensated-work-therapy program will not be considered a basis for denying or discontinuing a total disability rating for VA compensation or pension purposes.

The compromise agreement (section 303) contains this provision.

INCREASES IN MAXIMUM AMOUNTS OF SERVICEMEN'S GROUP LIFE INSURANCE

Both the House bill (section 203) and the Senate amendment (section 504) would amend section 767 of title 38, relating to persons insured and maximum amounts of life insurance coverage available under the Servicemen's Group Life Insurance (SGLI) program. The House bill would, effective October 1, 1984, increase the maximum amount of coverage from $35,000 to $50,000. The Senate amendment would, effective January 1, 1985, permit individuals insured under SGLI and who have served on active duty (or in a reserve component) for a minimum of five years to elect an additional amount of coverage (in multiples of $5,000) up to a maximum of $50,000 in total coverage.

The compromise agreement contains neither provision.

SPECIALLY ADAPTED HOUSING ASSISTANCE

The Senate amendment (section 501) and section 1(a) of H.R. 5617 as passed by the House on May 21, 1984 (hereinafter referred to as "H.R. 5617"), would amend chapter 21 of title 38, to increase maximum amounts of assistance available under that program. The Senate amendment would increase from $32,500 to $35,750, effective July 1, 1985, the maximum amount of the specially adapted housing assistance grant for certain severely service-connected disabled veterans with mobility impairments, and from $5,000 to $5,500, effective July 1, 1985, the maximum amount of special housing assistance for service-connected veterans who are blind or have lost, or lost the use of, both upper extremities. H.R. 5617 would increase those amounts to $35,000 and $6,000, respectively, effective October 1, 1984.

The compromise agreement (section 304), effective January 1, 1985, would increase to $35,500 the maximum amount of the specially adapted housing assistance grant and to $6,000 the maximum amount of special housing assistance.

VA HOME-LOAN GRANT MAXIMUMS

H.R. 5617 (sections 1(b) and (c)), but not the Senate amendment, would amend chapter 37 of title 38, relating to the VA's home-loan guaranty program, to increase effective, October 1, 1984, the maximum amount of the VA home-loan guaranty from $27,500 to $30,000 in the case of conventional housing and from $20,000 to $22,000 in the case of manufactured housing.

The compromise agreement does not contain this provision.

AUTOMOBILE ADAPTIVE ASSISTANCE

Both the House bill (section 204(a)) and the Senate amendment (section 502) would amend section 1902 of title 38, relating to the automobile adaptive assistance program, to increase the automobile assistance grant for certain severely disabled service-connected veterans. The House bill would increase the maximum grant from $4,400 to $5,000, effective October 1, 1984, and the Senate amendment to $4,840, effective July 1, 1985.

The compromise agreement (section 305(a)) would increase the maximum amount of the automobile assistance grant to $5,000, effective January 1, 1985.

The House bill (section 204(b) and the Senate amendment, incorporating the provisions of S. 2514, to H.R. 5618 (section 7), as passed by the Senate on August 9, 1984 (hereinafter referred to as "the Senate amendment to H.R. 5618"), would amend section 1903(c) of title 38, relating to the furnishing of automobile adaptive equipment, to modify the manner in which reimbursement for adaptive equipment is made to certain severely service-connected disabled veterans. The House bill would provide that a veteran may transfer title of a previously-adapted vehicle to any person and retain entitlement to reimbursement for adaptive equipment within the limit, currently prescribed by VA regulation, of 3 adaptations within a 2-year period with ownership limited to no more than one vehicle at any one time. The Senate amendment to H.R. 5618 would provide that a veteran is not entitled to reimbursement for more than 2 vehicles at any one time or for more than 2 vehicles in a 4-year period (with a waiver of the 2-in-4 limitation if the adapted vehicle is no longer available to the veteran due to circumstances beyond the control of the veteran).

The compromise agreement (section 305(b)) contains the Senate provisions.

TITLE IV—MISCELLANEOUS AMENDMENTS

DEFINITION OF VIETNAM ERA

The Senate amendment (section 601), but not the House bill, would amend section 101 of title 38, United States Code, relating to definitions for purposes of title 38, to expand the definition of the Vietnam era (August 5, 1964, through May 7, 1975) for the purposes of title 38, United States Code, to include the period beginning on February 21, 1961, and ending on August 5, 1964, in the case of those who served in Vietnam during that time.

The compromise agreement does not contain this provision.

ADVISORY COMMITTEE ON VETERANS EXPOSED TO IONIZING RADIATION

The House bill (section 201), but not the Senate amendment, would amend chapter 3, relating to the organization of the Veterans' Administration, to establish an Advisory Committee on Veterans Exposed to Ionizing Radiation to review and advise the Administrator with respect to the special problems and needs of veterans exposed to ionizing radiation.

The compromise agreement does not contain this provision.

The Committees note that the compromise agreement on H.R. 1961/S. 1651 as passed by the House of Representatives on October 3, 1984, would establish a Veterans' Advisory Committee on Environmental Hazards, including a Scientific Council thereof. The Council would be composed of two panels, one of which would focus on the health effects on certain veterans of those veterans' exposure to ionizing radiation during service. The Committees believe that this Scientific Council will address a number of the objectives of section 201 of the House bill.

HEADSTONES OR GRAVEMARKERS

H.R. 5617 (section 2), but not the Senate amendment, would amend section 1004(c) of title 38, relating to the administration of national cemeteries and the marking of gravesites therein, to require, effective October 1, 1984, that with respect to persons who die after September 30, 1984, markers provided to mark graves in such cemeteries be upright unless the person to be buried previously requested (or the survivor or legal representative of the person buried requests) that the grave be marked with a flat marker, and that, if the grave is marked with a flat marker, the grave be in a portion of the cemetery set aside from graves with flat markers. H.R. 5617 further provides that the administrator may waive the requirement and deny a request for an upright marker with respect to persons who die on or after October 1, 1984, and before January 1, 1985, if the national cemetery in which the burial will take place does not have a section reserved for graves with upright markers. Finally, H.R. 5617, would require the Administrator, prior to January 1, 1985, to designate a section of each cemetery in the National Cemetery System in which graves will be marked with upright markers and a section in which graves will be marked with flat markers.

The compromise agreement does not contain this provision.

The Committees are not satisfied with the cost data submitted by the Veterans' Administration in justifying the Administration's opposition to the House provision requiring the use of upright markers in national cemeteries. It is the Committee's intent that the Veterans' Administration reconsider this cost estimate in preparation for further Committee hearings on this issue next year.

EFFECTIVE DATE OF REDUCTIONS

The Senate amendment (section 603), but not the House bill, would amend section 3012(b) of title 38, relating to the effective date of reductions in compensation, disability, disability and indemnity compensation, and pension, to establish the last date of school attendance as the termination date for certain veterans' dependents' allowances paid on behalf of children between the ages of 18 and 23 who are attending school.

The compromise agreement does not contain this provision.

SUSPENSION OF COMPENSATION AND PENSION PAYMENTS TO CERTAIN INSTITUTIONALIZED VETERANS; WAIVER

The Senate amendment (section 604), but not the House bill, would amend section 3203(b)(1) of title 38, relating to limitations on the size of certain single, institutionalized, incompetent veterans' estates which, when exceeded, result in the suspension of benefit payments by the VA, to remove a reference to mental illness as the cause of the incompetence; to permit the VA to exclude the value of the veteran's home from the estate unless there is no reasonable likelihood that the veteran will again reside in the home; and to permit the Administrator, where necessary in order to avoid a hardship for the veteran, to waive the suspension of benefits requirement in the case of a veteran who is institutionalized for a total of not more than 60 days during any calendar year.

The compromise agreement (section 402) contains this provision.

The Committees intend that the Administrator use this discretionary authority only in those cases where it is established that without the waiver the veteran will suffer significant financial hardship. The waiver is not to be used as an administrative expediency nor where liquid assets are readily available to meet current expenses.

GENDER REFERENCES

The Senate amendment (section 605), but not the House bill, would amend section 103 of title 38, relating to special provisions relating to marriages, to remove various gender references.

The compromise agreement does not contain this provision.

The Committees note their intention to develop a measure that will remove all gender references throughtout title 38 and to pursue enactment of that measure in the next Congress.

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs, I am delighted to join with my good friend, the committee chairman [Mr SIMPSON], in urging the Senate to concur in the House amendments to the Senate amendments to H.R. 5688, the proposed "Veterans' Benefits Improvement Act of 1984." The House substitute amendment reflects a compromise agreed to between the two Veterans' Affairs Committees after extensive discussions and negotiations. This is a vitally important measure that provides for a VA compensation cost-of-living adjustment—COLA—and GI bill rate increase, together affecting over 3½ million persons, along with a wide range of other provisions to improve benefits programs for our Nation's veterans—especially those with service-connected and other serious disabilites.

BACKGROUND

Mr. President, H.R. 5688 was first passed by the House on June 18, 1984. On October 2, 1984, the Senate took up S. 2736 as reported by the Committee on Veterans' Affairs. The Senate substituted the provisions of S. 2736, with two floor amendments, as an amendment to the text of H.R. 5688 as passed by the House and then passed H.R. 5688, returning it to the House. Earlier today, the House of Representatives amended the Senate amendment with a substitute which, as I just noted, represents a compromise agreement reached by the Veterans' Affairs Committees. Hence, this legislation before the Senate today is in the nature, although not the form technically, of a conference report.

Mr. President, the compromise agreement represents a most equitable resolution of the differences between the two bodies on this legislation. The Senate's position on the matters addressed in the compromise—including a number of key provisions derived from provisions I authored—are well represented in the final agreement. The committees, both majority and minority members, have worked closely together in achieving this compromise. The end result is an excellent demonstration of our committee's bipartisan, continuing concern for our Nation's veterans.

PROVISIONS OF THE COMPROMISE AGREEMENT

Mr. President, each of the provisions of the compromise agreement is described authoritatively in the explanatory statement developed by the two Committees on Veterans' Affairs that the chairman of the Senate committee has inserted in the RECORD as part of his remarks and which was inserted in identical form by the chairman of the House committee when this measure was considered in the other body. I wish to highlight certain elements of the compromise agreement.

COMPENSATION RATE INCREASE

I firmly believe that the needs of the 2.3 million veterans with service-connected disabilities and the 300,000 survivors of those who died from service-connected causes must be our committees' No. 1 priority. The continuing fulfillment of the commitment we've established for our highest priority veterans to grant compensation benefit increases at least equal to increases in Social Security and VA pension benefits is, therefore, a matter of great importance to me.

Thus, I want to stress my strong support for the 3.2-percent increase that this compromise agreement would provide, effective December 1, 1984, in the rates of compensation for service-connected disabled veterans and of dependency and indemnity compensation—DIC—for survivors.

Mr. President, I was delighted to join on June 7 with the distinguished chairman of the committee [Mr. SIMPSON] in introducing S. 2736 to propose this increase and am especially delighted that the increase will be effective on December 1 of this year—rather than on April 1, 1985, as the administration had proposed. This policy on the effective date was established by section 108 of Public Law 98-223, which I authored last year, expressing the sense of the Congress that the effective date for compensation COLA's in fiscal year 1985 and beyond should be December 1—the same as the effective date for Social Security and VA pension COLA's.

Mr. President, S. 2736 as passed by the Senate provided that if the Social Security/VA pension COLA that will take effect this year on December 1 by operation of law is not 4.7 percent, the COLA rate provisionally provided for in the committee bill on the basis of the Congressional Budget Office's projection of the increase in the Consumer Price Index—CPI—from the third quarter of fiscal year 1983 to the third quarter of fiscal year 1984, the VA compensation COLA would be adjusted to correspond to the actual Social Security/VA pension COLA.

However, during negotiations with the House Veterans' Affairs Committee, we agreed on an increase of 3.2 percent rather than including this administrative-adjustment provision in the compromise agreement. That percentage is what the informal CBO estimate is at present for the Social Security CPI increase, and the budget resolution for fiscal year 1985, House Concurrent Resolution 280, adopted on October 1, allows room in function 700, veterans' benefits and services, for a compensation COLA in that amount.

GI BILL RATE INCREASE

Mr. President, I also fully support the provisions of the compromise agreement that would increase the rates of GI bill and vocational rehabilitation training, education, and subsistence allowances. The increases to be provided by this measure—which are the same as those proposed in a measure I also joined the distinguished chairman in introducing on June 7, and which are consistent with the budget recommendations this committee made in March—would be 10 percent, effective October 1, 1984, and would benefit more than half a million GI bill trainees in fiscal year 1985. Although this percentage is less than I proposed when I introduced S. 9 a year and a half ago, and less than the administration finally got around to agreeing to propose a year later, which was the increase approved by the House, it would take effect 3 months sooner than the administration or the House had proposed. Our October 1 effective date would mean that more assistance will be available to the individual veteran throughout the upcoming fiscal year than would be the case under the administration's approach and that the assistance would be available near the beginning of the school year when the costs of education are greatest.

TRIAL WORK AND VOCATIONAL REHABILITATION

Mr. President, as a principal author both of the Rehabilitation Act of 1973, the basic law providing for the Federal-State Vocational Rehabilitation Program and a wide range of other programs, and establishing certain civil rights, for disabled persons, and of the 1980 legislation, title I of Public Law 96-466, that comprehensively restructured the VA's Rehabilitation Program for service-connected-disabled veterans—and because of my deep personal commitment to helping make it possible for individuals with disabilities to participate fully in all aspects of our society—I am particularly enthusiastic about sections 111 and 301 of the compromise agreement. These sections would establish two 4-year pilot programs designed to help identify and overcome work disincentives under current law—one program for certain service-connected-disabled veterans and the other for disabled wartime veterans receiving need-based VA pension—and to assist veterans in both categories in returning to work.

I am particularly pleased that we have been able to reach agreement with the House committee—and are at the point of enacting—these provisions giving tangible recognition to the proposition that a return to employment is a real possibility for those who are permanently and totally disabled and that national policy should be to remove disincentives to their working as well as to provide them with specific assistance and encouragement in their efforts to rejoin the work force.

In the 1978 conference with the House on legislation enacted in the Veterans' and Survivors' Pension Improvement Act of 1978, we on the Senate side fought long and hard to retain Senate provisions to avoid—by providing for a partial disregard of the work earnings of low-income veterans—the creation of work disincentives in the new VA pension program that was to be created by that measure. Because our House counterparts at that time were adamantly opposed to our approach, we were totally unsuccessful at that time in our efforts to gain acceptance of the Senate provisions—or any compromise on them. The essence of the House position at that time was that the Senate provisions were entirely inappropriate in a needs-based income-maintenance program for permanently and totally disabled veterans and veterans over 65 years of age.

Thus, I am delighted that the House committee this year proposed, in section 202 of H.R. 5688, a vocational rehabilitation pilot project for certain disabled veteran-pensioners, and I am deeply grateful that the House committee leadership worked so helpfully and cooperatively with us on the Senate side to blend together, in section 301 of the compromise agreement, the House provisions and the Senate-passed trial-work provisions that I authored relating to the pension program. I am likewise grateful that our House counterparts worked with us so constructively regarding our proposal for a new pilot program, now embodied in section 111 of the agreement to provide trial-work and increased vocational rehabilitation opportunities for service-connected disabled veterans who have total disability ratings by reason of individual determinations of unemployability—so-called IU ratings.

I believe strongly that the compromise agreement provisions regarding training and rehabilitation for disabled veterans are significant improvements on the provisions in these areas that each House initially developed.

Mr. President, on June 13, 1974, I introduced S. 2759, a bill to provide for periods of trial work—comparable to periods of trial work for Social Security Act disability recipients—for veterans with IU ratings. Also, in connection with our committee's June 27 hearing, I put forward, and sought the comments of the witnesses on, draft proposals to refine the provisions of S. 2759 and to provide for a trial-work period, including VA health-care eligi-

bility provisions, for veteran-pensioners. These provisions—with certain enhancements and limitations on the duration of these programs worked out with our distinguished committee chairman [Mr. SIMPSON]—were included in S. 2736 as reported in the Senate amendment. Those provisions, together with the compromise agreement provisions are, as I have noted, described in the explanatory statement that Senator SIMPSON has inserted at the conclusion of his remarks on this measure.

With respect to the provisions in section 301 of the compromise agreement, combining, with modifications, the House's vocational rehabilitation services provisions with the provisions I proposed to protect the VA healthcare eligibility of veteran-pensioners who lose their pension eligibility by virtue of their work income, I note that I was initially reluctant to accept the House provisions. My reluctance was based on the fact that the House bill would have given non-service-connected-disabled veterans eligibility for services under the VA's vocational rehabilitation program for service-connected disabled veterans, which is conducted under chapter 31 of title 38. I do not believe that a special program such as this for service-connected disabled veterans should be opened up to other veterans and thereby possibly lose its identity and have its resources diluted. However, our colleagues on the House committee were most flexible in working out a reshaping of their provisions. Thus, the compromise agreement reflects changes under which the services involved would be provided outside of chapter 31—and not necessarily through the VA personnel who provide chapter 31 evaluation and counseling services, although that would be permitted and would probably be desirable—and would be clearly focused on vocationally oriented objectives; funding for training and any services purchased would be funded out of the pension account not the readjustment benefits account, out of which chapter 31 benefits are paid; persons over age 50 could also participate—something I felt strongly about; and the number of veterans covered by the House bill being evaluated in each year would be limited to 2,500.

Thus, I am truly delighted now to be able to give my full support to these provisions and am most grateful to my friend, Chairman SIMPSON, for his openmindedness in agreeing to them as well as for his many contributions in helping reshape them. Again, I congratulate the House committee for initiating the efforts which I believe are about to lead to some very innovative and highly creative new programs.

Mr. President, I would note that these are pilot programs, with reports to be submitted by the Administrator on the first 3 years' experience under them. As our committee report noted, the programs were specifically designed in light of their time-limited nature. Thus, the committees have made no decisions on what modifications might be needed if the programs were to be made permanent at some later date.

Another provision related to helping disabled veterans in returning to work, section 301 of the compromise agreement, would specify that a veteran's participation in a VA incentive-therapy [IT] or compensated-work-therapy [CWT] program will not be considered a basis for denying or discontinuing a total disability rating for VA compensation or pension purposes. This provision was a part of a provision I authored, originally included in section 8 of S. 2514 as reported by our committee in May but later deleted from that bill and included as section 602 in S. 2736 in response to procedural Budget Act considerations. The provisions would have required the VA to conduct a 3-year demonstration project, ending on December 31, 1987, during which income earned by participants for their participation in IT and CWT Programs would not be counted in determining annual income for VA pension purposes. I believe such a demonstration project is necessary so as to determine the nature and size of the impact of a recent change made by the VA to count such income for pension purposes, thereby resulting in a reduction in pension payments for many participants in the two programs. The anecdotal information available to our committee was that the change has resulted in a significant drop in the number of individuals willing to participate in what are generally regarded as successful therapy programs.

I regret that our colleagues in the House were unwilling to accept this demonstration project. Since the General Accounting Office is already looking into the issue as part of an ongoing GAO study of VA psychiatric programs, I am confident that we will gain information on the impact of the VA's policy change. However, I deeply regret the significant disruption and hardship that will be occurring to seriously disabled, impoverished veterans while that information is being gathered.

OTHER PROVISIONS

I'm delighted that provisions derived from a number of other measures I have introduced or proposed as amendments in committee are included in the compromise agreement.

EMPLOYMENT PROGRAMS

Section 211 would extend the authority for veterans readjustment appointments—VRA's—by 2 years, until September 30, 1986. On February 7, 1984, I introduced S. 2268 with committee members RANDOLPH, MATSUNAGA, and DECONCINI, as well as Senator BYRD. That bill proposed a 3-year extension. However, in committee, a 1-year extension was all we could achieve agreement on for this program, which has provided employment opportunities in the Federal Government to hundreds of thousands of Vietnam-era veterans. I am delighted that the compromise agreement will extend the program for 2 years. The compromise agreement also incorporates, as I proposed, an administration-requested provision to provide first-year VRA appointees with certain limited appeal rights.

Section 212 would extend by 6 months—through September 1, 1985—the period that veterans have to apply for participation in the program established by the Emergency Veterans' Job Training Act of 1983—EVJTA—and by 3 months—to February 28, 1985—the date by which a veteran must enter a program of training under EVJTA. This section would also extend from 60 to 90 days the lifetime of the certificate of eligibility furnished veterans under that program. On June 13, 1984, I introduced, with Senator DECONCINI, S. 2760, which would have extended both deadlines by 6 months in addition to extending the lifetime of the certificate. These provisions of the compromise agreement will go a long way toward helping veterans who have been determined to need job training assistance.

EVJTA, enacted on August 15, 1983, was designed to provide employers with incentives, in the form of payments to defray training costs, to hire and train long-term unemployed Korean-conflict and Vietnam-era veterans. Section 17(a) of EVJTA provided that, if funding for the program had been appropriated and made available to the VA by October 1, 1983, a veteran desiring to participate would be required to apply by September 30, 1984, and to enter a program of training by December 31, 1984. However, because of the possibility that appropriations might not become available by that date, I proposed and the law incorporated a tolling period. Under this mechanism, in section 17(b) of the law, the veteran has until 1 year after the date on which appropriations are made available for the program to apply and until 15 months after that to enter training.

The first $75 million in funds for the program were appropriated on November 14, 1983, as part of a continuing appropriations resolution for fiscal year 1984, Public Law 98-151. Since these funds were not released by the Office of Management and Budget to the VA until November 29, 1983, eligible veterans have until November 29, 1984, to apply, and until March 1, 1985, to enter training. The remainder of the full amount, $150 million, authorized by section 16 of EVJTA to be

appropriated for fiscal year 1984 for payments to employers under this program was provided when a second $75 million appropriation was included in the fiscal year 1984 supplemental appropriations measure, Public Law 98-161, enacted on November 30, 1983.

Despite the very high degree of interest that veterans have shown in the program, it got off to a very slow start in terms of the placement of eligible veterans in approved jobs. As of September 4—according to the VA—246,547 veterans had applied for the program and 201,655 had been certified as eligible. Also as of that date, 27,111 employers had been approved to offer training for 60,379 job slots. This means that jobs are available or could be made available for nearly 30 percent of those eligible for the program. However, as of that date, only 13,717 veterans had been placed in jobs under EVJTA—less than 25 percent of the number of approved job slots.

Mr. President, I have been dissatisfied with the performance under the program thus far and continue to believe strongly that the program can be of much greater assistance in meeting the needs of long-term unemployed veterans of the Vietnam era and the Korean conflict. A partial cause for the disappointing performance may have been that the program became effective at the beginning of the holiday season, which may have slowed the rate at which employers began to participate in the program at the outset.

However, Mr. President, I'm concerned that at the root of the failure of the program to be as successful as it could be is the failure on the part of the Department of Labor and the VA—the agencies jointly responsible for implementation of the program—to be sufficiently aggressive in carrying out their responsibilities, particularly their placement responsibilities—that is, their responsibilities for matching eligible veterans with available job slots.

Thus, I'm pleased that both committees have agreed that the program should be given additional time in order to achieve its potential.

ADAPTIVE HOUSING AND AUTOMOBILE ASSISTANCE

Section 304 of the compromise agreement would grant an increase, effective January 1, 1985, in the rates of maximum assistance available for adapted housing for certain service-connected, severely disabled veterans. In the case of veterans receiving assistance under the major program—the so-called "wheelchair home" program—the maximum level of assistance would be increased from $32,500 to $35,500. In the case of veterans receiving assistance for home adaptations necessitated by the loss, or loss of use, of both upper extremities, or by blindness, the level of assistance would be increased from $5,000 to $6,000. On February 7 and March 20, I introduced S. 2264 and S. 2451, respectively, the latter of which is cosponsored by Senators RANDOLPH, MATSUNAGA, DECONCINI, and SARBANES. These measures proposed increases in the levels of assistance under these two programs from $32,500 and $5,000, respectively, to $38,800 and $6,000. Although the rates for the specially adapted housing grant are lower than we had proposed, I am gratified that the committees have agreed to increases in these allowances that will help ameliorate the erosion in the value of these benefits made by increases in housing costs.

Section 305 would grant an increase, effective January 1, 1985, in the automobile assistance allowance. On February 7, I introduced S. 2267, which is cosponsored by Senators RANDOLPH, MATSUNAGA, and DECONCINI. This measure proposed an increase in the automobile assistance allowance to $4,840 and that was the level subsequently approved by the Senate in S. 2736. The increase in the compromise agreement—from $4,400 to $5,000—would help ameliorate the erosion in the value of this benefit for certain service-connected, severely disabled veterans made by increases in automobile costs.

MISCELLANEOUS AMENDMENTS

Other provisions in the compromise agreement, Mr. President, would make a technical, conforming change relating to the manner in which dependents' allowances are paid to veterans with service-connected disabilities incurred during peacetime; would repeal a VA reporting requirement relating to deceptive advertising by educational institutions; and would modify provisions specifying what is considered to be part of the veteran's estate for purposes of payment of benefits to certain institutionalized, incompetent veterans and provide the Administrator with authority to waive, under certain circumstances, the suspension of benefits for such institutionalized veterans.

ITEMS NOT CONTAINED IN COMPROMISE AGREEMENT

Mr. President, as I noted, this measure is a compromise and, as with all compromises, it does not contain all of the provisions each of the parties would like to have included. Some provisions—a number of which I had great interest in and supported strongly—were dropped in reaching the final agreement.

Section 210 of the Senate-passed legislation contained provisions, similar to ones I proposed and the committee and the Senate have now approved four times, to toll a veteran's or eligible person's delimiting period when the individual has been prevented from using his or her GI bill benefits on account of a drug or alcohol dependence or abuse condition from which he or she has recovered. These provisions, which I have been pursuing since 1979 and are strongly supported by the distinguished Senator from Minnesota [Mr. BOSCHWITZ], were incorporated into the Senate measure at our request. I deeply regret that once again, for the fourth time, the House has refused to accept these provisions.

Section 212 of the Senate amendment would have required the Administrator, prior to making any changes in the enrollment certifications required to be submitted by educational institutions on behalf of their GI bill students, to consult with and obtain the recommendations of the VA's Advisory Committee on Education. This provision, which I authored, was designed to ensure that, before the VA proceeds with any proposal such as the one now pending—published in the Federal Register on June 30, 1983—to require schools to certify attendance on a term-by-term basis, the advisory committee would first make recommendations on the proposal and on possible alternatives to accomplish the goal of reducing overpayments. This process would help ensure that any changes that are implemented are carefully reviewed and considered by the education experts on the advisory committee who can evaluate fully the effect and workability of any such proposal. However, since a subcommittee of the advisory committee is already reviewing the new proposal, it was decided that it was not necessary to include this provision in the compromise agreement. It would be my expectation that the Administrator will not proceed to implement any proposals prior to receiving the recommendations of that committee. In that regard, I point out that the committees' explanatory statement, printed in the RECORD by our committee chairman, states:

> The Committees note that they do not believe that a statutory requirement is needed to bring about the consultation sought by the Senate amendment, since this is the purpose for which Congress established the advisory committee.

Section 601 of the Senate-passed bill—derived from section 2 of S. 2269 as introduced—would have modified the definition of the Vietnam era for title 38 purposes to include, in the case of those who served in the Republic of Vietnam, the period beginning on February 28, 1961, the date established in Public Law 89-257 for acceptance of foreign awards for service in Vietnam, and ending on May 7, 1975, the current law ending date for the Vietnam era. I continue to believe that it makes little sense to tell veterans who served in Vietnam prior to August 5, 1964—the starting date of the "Vietnam era" for title 38 purposes—particularly those who faced combat conditions

during their service, that they are not Vietnam veterans. Thus, I am disappointed that our colleagues in the House were unwilling to accept the Senate-passed change.

Finally, in connection with items not contained in the compromise agreement that were in the Senate amendment, I am deeply disappointed that, in conjunction with the increases in GI bill benefits, the committees were not able to agree on the issue of increases in reporting fees and increases in State approving agency allowances. Thus, the compromise agreement does not contain increases in either amount. I strongly believe that an increase in the amount of the reporting fee—last increased in 1977—is merited, and I think it is noteworthy that the administration concurs in that belief. I will, therefore, be pursuing this issue as well as others deleted from the Senate measure, in an appropriate fashion next Congress.

Other provisions not included in the compromise agreement that were contained in the Senate-passed bill are provisions to increase maximum amounts of Servicemen's Group Life Insurance, to establish a termination date for certain compensation and pension benefits paid on behalf of dependents enrolled in higher education, to delete various gender references in title 38, United States Code, and to provide for a demonstration project under which income received by participation in an IT or CWT program would not be counted for VA pension purposes, which I discussed earlier.

HOME LOAN GUARANTY INCREASE NOT INCLUDED

Finally, Mr. President, I must mention the adverse resolution of one matter that is a particular disappointment to me, the noninclusion in this compromise agreement of an increase in the maximum amounts of VA home loan guaranties. Earlier this year, in S. 2451, I had proposed that the maximum amount of the guaranty for conventional housing be increased from $27,000 to $35,000, and for manufactured housing from $20,000 to $22,000. Unfortunately, this proposal was not incorporated in the Senate bill.

However, in connection with H.R. 5617, the House approved increases in these amounts to $30,000 and $22,000, respectively. Therefore, I was hopeful that action on this matter could occur in the compromise agreement.

Regrettably, Mr. President, despite my strong support for these increases in the deliberations on the compromise agreement, it does not contain them. Nevertheless, my support for appropriate increases continues, and I assure my colleagues that I will be pursuing this issue vigorously in the next Congress.

CONCLUSION

Mr. President, before concluding my remarks, I want to take a moment to express my thanks to those who worked so diligently on this measure, both for their outstanding efforts and for the cooperation and courtesy that was extended to me and the members of the committee's minority staff. I would first thank the distinguished chairmen of each committee, Senator SIMPSON and Congressman MONTGOMERY, and the ranking minority member [Mr. HAMMERSCHMIDT] of the House Committee, for their many contributions to the development of this measure.

In addition, the excellent work on this measure by staff members of the House Committee—Mack Fleming, Frank Stover, Arnold Moon, Charlie Peckarsky, Jill Cochran, Rufus Wilson, Gloria Royce, and Pat Ryan—as well as the technical assistance of Robert Cover, assistant counsel, Office of the House Legislative Counsel, was invaluable and is deeply appreciated. I also want to make special note of the fine work done on this measure by the Senate Committee's majority staff members, Anthony Principi and Julie Susman.

Further, I want to take this opportunity to welcome aboard the committee's newest staff member on the majority, Kathleen McTighe, the committee counsel. Cathy joined the staff only recently, and despite the fact that during the height of work on the pending measure she suffered a deep, personal tragedy, she contributed significantly to the development of the measure. Thus, I want to express to her my particular appreciation for work as well as my sincere sympathies on her loss.

Finally, I also express my deepest appreciation to the members of the minority staff for their usual excellent work on my behalf—Babette Polzer, Bill Brew, Ed Scott, Ingrid Post, Charlotte Hughes, Jennifer McCarthy, and Jon Steinberg.

With final passage of this compromise agreement at hand, Mr. President, the Congress is once again reaffirming its commitment to those who, as a result of so serving, now bear the scars of battle. It is also initiating some truly creative pilot programs to assist disabled veterans in becoming employable and employed.

Mr. President, the compromise agreement now before the Senate is a truly excellent one. I urge my colleagues to approve it unanimously.

Mr. BAKER. Mr. President, I move that the Senator concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I may say to the minority leader I will next propose to take up the budget waiver with respect to H.R. 3942 and then to proceed to the bill itself if the waiver is granted, if the minority leader has no objection.

Mr. BYRD. I have no objection.

Mr. BAKER. I thank the minority leader.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 1325.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 464) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 3942.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The resolution (S. Res. 464) was considered and agreed to as follows:

S. RES. 464

Resolved, That, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 3942. Such waiver is necessary because H.R. 3942 authorizes the enactment of new budget authority which would first become available in fiscal year 1985 and such Act was not reported on or before May 25, 1984, pursuant to section 402(a) of the Congressional Budget Act of 1974 for such authorizations. H.R. 3942 would authorize not to exceed $4,000,000 for fiscal year 1985 for activities of the Department of Transportation.

It was not possible for the Committee of Commerce, Science, and Transportation to have reported H.R. 3942 before the statutory deadline, as it was not received in the Senate until June 7, 1984. In addition, the commercial space launch and launch operation activities authorized in H.R. 3942 were not established within the Department of Transportation until February 1984, pursuant to Executive Order Numbered 12465.

H.R. 3942 will enhance the ability of the Federal Government to establish a licensing scheme to assist the private sector in expanding the potential for growth in the commercial applications of space technology that have been developed over the past twenty-five years. Facilitation of the commercial development of expendable launch vehicles is an important component of the Nation's space transportation program. The authorization of appropriations in H.R. 3942 will permit activities which will produce a stronger, more efficient launch capability for the United States that will contribute to the Nation's continued leadership in space.

The Department of Transportation has advised the Committee on Commerce, Science, and Transportation that current funding levels within the account of the Office of the Secretary for fiscal year 1985 are adequate for implementation of this legislation. Thus, congressional consideration of this authorization will neither interfere with nor delay the appropriations process, nor increase outlays in fiscal year 1985.

COMMERCIAL SPACE LAUNCH ACT

Mr. BAKER. Mr. President, I now ask the Chair to lay before the Senate H.R. 3942.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3942) to facilitate commercial space launches, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Commercial Space Launch Act".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) the peaceful uses of outer space continue to be of great value and to offer benefits to all mankind;

(2) private applications of space technology have achieved a significant level of commercial and economic activity, and offer the potential for growth in the future, particularly in the United States;

(3) new and innovative equipment and services are being sought, created, and offered by entrepreneurs in telecommunications, information services, and remote sensing technology;

(4) the private sector in the United States has the capability of developing and providing private satellite launching and associated services that would complement the launching and associated services now available from the United States Government;

(5) the development of commercial launch vehicles and associated services would enable the United States to retain its competitive position internationally, thereby contributing to the national interest and economic well-being of the United States;

(6) provision of launch services by the private sector is consistent with the national security interest and foreign policy interests of the United States and would be facilitated by stable, minimal, and appropriate regulatory guidelines that are fairly and expeditiously applied; and

(7) the United States should encourage private sector launches and associated services and, only to the extent necessary, regulate such launches and services in order to ensure compliance with international obligations of the United States and to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

PURPOSES

SEC. 3. It is therefore the purpose of this Act—

(1) to promote economic growth and entrepreneurial activity through utilization of the space environment for peaceful purposes;

(2) to encourage the United States private sector to provide launch vehicles and associated launch services by simplifying and expediting the issuance and transfer of commercial launch licenses and by facilitating and encouraging the utilization of Government-developed space technology; and

(3) to designate an executive department to oversee and coordinate the conduct of commercial launch operations, to issue and transfer commercial launch licenses authorizing such activities, and to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

DEFINITIONS

SEC. 4. For purposes of this Act—

(1) "agency" means an executive agency as defined by section 105 of title 5, United States Code;

(2) "launch" means to place, or attempt to place, a launch vehicle and payload, if any, in a suborbital trajectory, in Earth orbit in outer space or otherwise in outer space;

(3) "launch property" means propellants, launch vehicles and components thereof, and other physical items constructed for or used in the launch preparation or launch of a launch vehicle;

(4) "launch services" means those activities involved in the preparation of a launch vehicle and its payload for launch and the conduct of a launch;

(5) "launch site" means the location on Earth from which a launch takes place, as defined in any license issued or transferred by the Secretary under this Act, and includes all facilities located on a launch site which are necessary to conduct a launch;

(6) "launch vehicle" means any vehicle constructed for the purpose of operating in, or placing a payload in, outer space and any suborbital rocket;

(7) "payload" means an object which a person undertakes to place in outer space by means of a launch vehicle, and includes subcomponents of the launch vehicle specifically designed or adapted for that object;

(8) "person" means any individual and any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of any State or any nation;

(9) "Secretary" means the Secretary of Transportation;

(10) "State", and "United States" when used in a geographical sense, mean the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the United States Virgin Islands, Guam, and any other commonwealth, territory, or possession of the United States; and

(11) "United States citizen" means—

(A) any individual who is a citizen of the United States;

(B) any corporation, partnership, joint venture, association, or other entity organized or existing under the laws of the United States or any State; and

(C) any corporation, partnership, joint venture, association, or other entity which is organized or exists under the laws of a foreign nation, if the controlling interest (as defined by the Secretary in regulations) in such entity is held by an individual or entity described in subparagraph (A) or (B).

GENERAL RESPONSIBILITIES OF THE SECRETARY AND OTHER AGENCIES

SEC. 5. (a) The Secretary shall be responsible for carrying out this Act, and in doing so shall—

(1) encourage, facilitate, and promote commercial space launches by the private sector; and

(2) consult with other agencies to provide consistent application of licensing requirements under this Act and to ensure fair and equitable treatment for all license applicants.

(b) To the extent permitted by law, Federal agencies shall assist the Secretary, as necessary, in carrying out this Act.

REQUIREMENT OF LICENSE FOR PRIVATE SPACE LAUNCH OPERATIONS

SEC. 6. (a)(1) No person shall launch a launch vehicle or operate a launch site within the United States, unless authorized by a license issued or transferred under this Act.

(2) No United States citizen described in subparagraph (A) or (B) of section 4(11) shall launch a launch vehicle or operate a launch site outside the United States, unless authorized by a license issued or transferred under this Act.

(3)(A) No United States citizen described in subparagraph (C) of section 4(11) shall launch a launch vehicle or operate a launch site at any place which is both outside the United States and outside the territory of any foreign nation, unless authorized by a license issued or transferred under this Act. The preceding sentence shall not apply with respect to a launch or operation of a launch site if there is an agreement in force between the United States and a foreign nation which provides that such foreign nation shall exercise jurisdiction over such launch or operation.

(B)(i) Except as provided in clause (ii) of this subparagraph, this Act shall not apply to the launch of a launch vehicle or the operation of a launch site in the territory of a foreign nation by a United States citizen described in subparagraph (C) of section 4(11).

(ii) If there is an agreement in force between the United States and a foreign nation which provides that the United States shall exercise jurisdiction over the launch of a launch vehicle or operation of a launch site in the territory of such nation by a United States citizen described in subparagraph (C) of section 4(11), no such United States citizen shall launch a launch vehicle or operate a launch site in the territory of such nation, unless authorized by a license issued or transferred under this Act.

(b)(1) The holder of a launch license under this Act shall not launch a payload unless that payload complies with all requirements of Federal law that relate to the launch of a payload. The Secretary shall ascertain whether any license, authorization, or other permit required by Federal law for a payload which is to be launched has been obtained.

(2) If no payload license, authorization, or permit is required by any Federal law, the Secretary may take such action under this Act as the Secretary deems necessary to prevent the launch of a payload by a holder of a launch license under this Act if the Secretary determines that the launch of such payload would jeopardize the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(c)(1) Except as provided in this Act, no person shall be required to obtain from any agency a license, approval, waiver, or exemption for the launch of a launch vehicle or the operation of a launch site.

(2) Nothing in this Act shall affect the authority of the Federal Communications Commission under the Communications Act of 1934 (47 U.S.C. 151 et seq.) or the authority of the Secretary of Commerce under the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4201 et seq.).

AUTHORITY TO ISSUE AND TRANSFER LICENSES

SEC. 7. The Secretary may, consistent with the public health and safety, safety of prop-

erty, and national security interests and foreign policy interests of the United States, issue or transfer a license for launching one or more launch vehicles or for operating one or more launch sites, or both, to an applicant who meets the requirements for a license under section 8 of this Act. Any license issued or transferred under this section shall be in effect for such period of time as the Secretary may specify, in accordance with regulations issued under this Act.

LICENSING REQUIREMENTS

SEC. 8. (a)(1) All requirements of Federal law which apply to the launch of a launch vehicle or the operation of a launch site shall be requirements for a license under this Act for the launch of a launch vehicle or the operation of a launch site, respectively, except to the extent provided in paragraph (2).

(2) If the Secretary determines, in consultation with appropriate agencies, that any requirement of Federal law that would otherwise apply to the launch of a launch vehicle or the operation of a launch site is not necessary to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States, the Secretary may by regulation provide that such requirement shall not be a requirement for a license under this Act.

(b) The Secretary may, with respect to launches and the operation of launch sites, prescribe such additional requirements as are necessary to protect the public health and safety, safety of property, and national security interests and foreign policy interests of the United States.

(c) The Secretary may, in individual cases, waive the application of any requirement for a license under this section if the Secretary determines that such waiver is in the public interest and will not jeopardize the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

LICENSE APPLICATION AND APPROVAL

SEC. 9. (a) Any person may apply to the Secretary for issuance or transfer of a license under this Act, in such form and manner as the Secretary may prescribe. The Secretary shall establish procedures and timetables to expedite review of applications under this section and to reduce regulatory burdens for applicants.

(b) The Secretary shall issue or transfer a license to an applicant if the Secretary determines in writing that the applicant complies and will continue to comply with the requirements of this Act and any regulation issued under this Act. The Secretary shall include in such license such conditions as may be necessary to ensure compliance with this Act, including an effective means of on-site verification that a launch or operation of a launch site conforms to representations made in the application for a license or transfer of a license. The Secretary shall make a determination on any application not later than 180 days after receipt of such application. If the Secretary has not made a determination within 120 days after receipt of such application, the Secretary shall inform the applicant of any pending issues and of actions required to resolve such issues.

(c) The Secretary, any officer or employee of the United States, or any person with whom the Secretary has entered into a contract under section 14(b) of this Act may not disclose any data or information under this Act which qualifies for exemption under section 552(b)(4) of title 5, United States Code, or is designated as confidential by the person or agency furnishing such data or information, unless the Secretary determines that the withholding of such data or information is contrary to the public or national interest.

SUSPENSION, REVOCATION, AND MODIFICATION OF LICENSES

SEC. 10. (a) The Secretary may suspend or revoke any license issued or transferred under this Act if the Secretary finds that the licensee has substantially failed to comply with any requirement of this Act, the license, or any regulation issued under this Act, or that the suspension or revocation is necessary to protect the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(b) Upon application by the licensee or upon the Secretary's own initiative, the Secretary may modify a license issued or transferred under this Act, if the Secretary finds that the modification will comply with the requirements of this Act.

(c) Unless otherwise specified by the Secretary, any suspension, revocation, or modification by the Secretary under this section—

(1) shall take effect immediately; and

(2) shall continue in effect during any review of such action under section 12 of this Act.

(d) Whenever the Secretary takes any action under this section, the Secretary shall notify the licensee in writing of the Secretary's finding and the action which the Secretary has taken or proposes to take regarding such finding.

EMERGENCY ORDERS

SEC. 11. (a) The Secretary may terminate, prohibit, or suspend immediately the launch of a launch vehicle or the operation of a launch site which is licensed under this Act if the Secretary determines that such launch or operation is detrimental to the public health and safety, safety of property, or any national security interest or foreign policy interest of the United States.

(b) An order terminating, prohibiting, or suspending any launch or operation of a launch site licensed by the Secretary under this Act shall take effect immediately and shall continue in effect during any review of such order under section 12.

ADMINISTRATIVE AND JUDICIAL REVIEW

SEC. 12. (a)(1) An applicant for a license and a proposed transferee of a license under this Act shall be entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code, of any decision of the Secretary under section 9(b) to issue or transfer a license with conditions or to deny the issuance or transfer of such license.

(2) A licensee under this Act shall be entitled to a determination on the record after an opportunity for a hearing in accordance with section 554 of title 5, United States Code, of any decision of the Secretary—

(A) under section 10 to suspend, revoke, or modify a license; or

(B) under section 11 to terminate, prohibit, or suspend any launch or operation of a launch site licensed by the Secretary.

(b) Any final action of the Secretary under this Act to issue, transfer, deny the issuance or transfer of, suspend, revoke, or modify a license or to terminate, prohibit, or suspend any launch or operation of a launch site licensed by the Secretary shall be subject to judicial review as provided in chapter 7 of title 5, United States Code.

REGULATIONS

SEC. 13. The Secretary may issue such regulations, after notice and comment in accordance with section 553 of title 5, United States Code, as may be necessary to carry out this Act.

MONITORING OF ACTIVITIES OF LICENSEES

SEC. 14. (a) Each license issued or transferred under this Act shall require the licensee—

(1) to allow the Secretary to place Federal officers or employees or other individuals as observers at any launch site used by the licensee, at any production facility or assembly site used by a contractor of the licensee in the production or assembly of a launch vehicle, or at any site where a payload is integrated with a launch vehicle, in order to monitor the activities of the licensee or contractor at such time and to such extent as the Secretary considers reasonable and necessary to determine compliance with the license or to carry out the responsibilities of the Secretary under section 6(b) of this Act; and

(2) to cooperate with such observers in the performance of monitoring functions.

(b) The Secretary may, to the extent provided in advance by appropriation Acts, enter into a contract with any person to carry out subsection (a)(1) of this section.

USE OF GOVERNMENT PROPERTY

SEC. 15. (a) The Secretary shall take such actions as may be necessary to facilitate and encourage the acquisition (by lease, sale, transaction in lieu of sale, or otherwise) by the private sector of launch property of the United States which is excess or is otherwise not needed for public use and of launch services, including utilities, of the United States which are otherwise not needed for public use.

(b)(1) The amount to be paid to the United States by any person who acquires launch property or launch services, including utilities, shall be established by the agency providing the property or service, in consultation with the Secretary. In the case of acquisition of launch property by sale or transaction in lieu of sale, the amount of such payment shall be the fair market value. In the case of any other type of acquisition of launch property, the amount of such payment shall be an amount equal to the direct costs (including any specific wear and tear and damage to the property) incurred by the United States as a result of the acquisition of such launch property. In the case of any acquisition of launch services, including utilities, the amount of such payment shall be an amount equal to the direct costs (including salaries by the United States civilian and contractor personnel incurred by the United States as a result of the acquisition of such launch services.

(2) The Secretary may collect any payment for launch property or launch services, with the consent of the agency establishing such payment under paragraph (1).

(3) The amount of any payment received by the United States for launch property or launch services, including utilities, under this subsection shall be deposited in the general fund of the Treasury, and the amount of a payment for launch property (other than launch property which is excess) and launch services (including utilities) shall be credited to the appropriation from which the cost of providing such property or services was paid.

(c) The Secretary may establish requirements for liability insurance, hold harmless agreements, proof of financial responsibil-

ity, and such other assurances as may be needed to protect the United States and its agencies and personnel from liability, loss, or injury as a result of a launch or operation of a launch site involving Government facilities or personnel.

LIABILITY INSURANCE

SEC. 16. Each person who launches a launch vehicle or operates a launch site under a license issued or transferred under this Act shall have in effect liability insurance at least in such amount as is considered by the Secretary to be necessary for such launch or operation, considering the international obligations of the United States. The Secretary shall prescribe such amount after consultation with the Attorney General and other appropriate agencies.

ENFORCEMENT AUTHORITY

SEC. 17. (a) The Secretary shall enforce this Act. The Secretary may delegate the exercise of any enforcement authority under this Act to any officer or employee of the Department of Transportation or, with the approval of the head of another agency, any officer or employee of such agency.

(b) In carrying out this section, the Secretary may—

(1) make investigations and inquiries, and administer to or take from any person an oath, affirmation, or affidavit, concerning any matter relating to enforcement of this Act; and

(2) pursuant to any lawful process—

(A) enter at any reasonable time any launch site, production facility, or assembly site of a launch vehicle, or any site where a payload is integrated with a launch vehicle, for the purpose of inspecting any object which is subject to this Act and any records or reports required by the Secretary to be made or kept under this Act; and

(B) seize any such object, record, or report where there is probable cause to believe that such object, record, or report was used, is being used, or is likely to be used in violation of this Act.

PROHIBITED ACTS

SEC. 18. It is unlawful for any person to violate a requirement of this Act, a regulation issued under this Act, or any team, condition, or restriction of any license issued or transferred by the Secretary under this Act.

CIVIL PENALTIES

SEC. 19. (a) Any person who is found by the Secretary, after notice and opportunity to be heard on the record in accordance with section 554 of title 5, United States Code, to have committed any act prohibited by section 18 shall be liable to the United States for a civil penalty of not more than $100,000 for each violation. Each day of a continuing violation shall constitute a separate violation. The amount of such civil penalty shall be assessed by the Secretary by written notice. The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

(b) If any person fails to pay a civil penalty assessed against such person after the penalty has become final or if such person appeals an order of the Secretary and the appropriate court has entered final judgment in favor of the Secretary, the Secretary shall recover the civil penalty assessed in any appropriate district court of the United States.

(c) For purposes of conducting any hearing under this section, the Secretary may (1) issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, documents, and other records, (2) seek enforcement of such subpoenas in the appropriate district court of the United States, and (3) administer oaths and affirmations.

CONSULTATION

SEC. 20. (a) The Secretary shall consult with the Secretary of Defense on all matters, including the issuance or transfer of each license, under this Act affecting national security. The Secretary of Defense shall be responsible for identifying and notifying the Secretary of those national security interests of the United States which are relevant to activities under this Act.

(b) The Secretary shall consult with the Secretary of State on all matters, including the issuance or transfer of each license, under this Act affecting foreign policy. The Secretary of State shall be responsible for identifying and notifying the Secretary of those foreign policy interests or obligations of the United States which are relevant to activities under this Act.

(c) The Secretary shall consult with other agencies, as appropriate, in order to carry out the provisions of this Act.

RELATIONSHIP TO OTHER LAWS AND INTERNATIONAL OBLIGATIONS

SEC. 21. (a) No State or political subdivision of a State may adopt or have in effect any law, rule, regulation, standard, or order which is inconsistent with the provisions of this Act. Nothing in this Act shall preclude a State or a political subdivision of a State from adopting or putting into effect any law, rule, regulation, standard, or order which is consistent with this Act and is in addition to or more stringent than any requirement of or regulation issued under this Act. The Secretary may, and is encouraged to, consult with the States to simplify and expedite the approval of space launch activities.

(b) A launch vehicle or payload shall not, by reason of the launching of such vehicle or payload, be considered an export for purposes of any law controlling exports.

(c) Nothing in this Act shall apply to—

(1) any—

(A) launch or operation of a launch vehicle,

(B) operation of a launch site, or

(C) other space activity,

carried out by the United States on behalf of the United States; or

(2) any planning or policies relating to any such launch, operation, or activity.

(d) The Secretary shall carry out this Act consistent with any obligation assumed by the United States in any treaty, convention, or agreement that may be in force between the United States and any foreign nation. In carrying out this Act, the Secretary shall consider applicable laws and requirements of any foreign nation.

REPORT ON LEGISLATION

SEC. 22. (a) Not later than the last day of each fiscal year ending after the date of enactment of this Act and before October 1, 1989, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report describing all activities undertaken under this Act, including a description of the process for the application for and approval of licenses under this Act and recommendations for legislation that may further commercial launches.

(b) Not later than July 1, 1985, the Secretary shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report which identifies Federal statutes, treaties, regulations, and policies which may have an adverse effect on commercial launches and include recommendations on appropriate changes thereto.

SEVERABILITY

SEC. 23. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act and the application of such provision to any other person or circumstance shall not be affected by such invalidation.

AUTHORIZED APPROPRIATIONS

SEC. 24. There are authorized to be appropriated to the Secretary $4,000,000 for fiscal year 1985.

EFFECTIVE DATE

SEC. 25. (a) Except for section 15 and the authority to issue regulations, this Act shall take effect 180 days after the date of enactment of this Act.

(b) Section 15 shall take effect on the date of enactment of this Act, except that nothing in this Act shall affect any agreement, including negotiations which are substantially completed, relating to the acquisition of launch property or launch services of the United States entered into on or before the date of enactment of this Act between the United States and any private party.

(c) Regulations to implement this Act shall be promulgated not later than 180 days after the date of enactment of this Act.

Mr. TRIBLE. Mr. President, the passage of H.R. 3942, the Commercial Space Launch Act, is an important step for the American commercial space industry.

This measure represents a balanced compromise between the bill passed by the House and S. 2931, the legislation that I introduced with Senators GORTON and HEFLIN and 10 cosponsors.

The central purpose of this legislation is to encourage the growth of a commercial space launch capability which will complement NASA's successful space transportation system.

The current Government approval process for private space launch operations is a regulatory minefield involving as many as 18 Federal agencies and 22 different statutes—statutes which were never intended to apply to commercial space launch activities. This bill replaces this burdensome, patchwork approach with a regulatory framework which promotes private launch activities, protects public health and safety, and preserves foreign policy and national security concerns.

This bill designates the Department of Transportation as the lead Government agency for encouraging and facilitating the commercialization of expendable launch vehicles. In providing a one-stop-shopping service to space entrepreneurs, DOT will be required to consult with the Department of State in matters affecting foreign policy, and the Department of Defense in matters affecting national security.

Also, the Secretary, in consultation with officials of other appropriate Federal agencies, shall determine which existing Federal statutes may apply to space launch activities and shall determine what steps are necessary for the applicant to comply with those statutes. It is the intent of the bill's sponsors that applicants should not have to contact any other Federal department or agency other than the Transportation Department; any necessary contacts or communications with other agencies or departments should be carried out by the Secretary on behalf of the applicant. Furthermore, the launch licenses issued by the Transportation Department are to be exclusive, with the exception of those licenses issued under the Communications Act of 1934 and the Land Remote-Sensing Commercialization Act of 1984.

The Transportation Department is also authorized to facilitate commercial use of excess Government launch property and to establish, after consultation with appropriate agencies, the terms and conditions of such use.

Our Nation no longer holds a monopoly in the space-launch business. By encouraging a commerical ELV capability, this legislation will enhance our international competitiveness in the space-launch marketplace and promote economic growth. This fledging industry can provide jobs and other benefits for our people as we approach the 21st century.

Exploiting the vast economic potential of space requires the Federal Government to be a partner, rather than obstacle. The Commercial Space Launch Act, is an important step in opening the final frontier of space to private enterprise.

The committee amendment in the natue of a substitute was agreed to.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill was read the third time and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 6100

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Armed Services be discharged from consideration of H.R. 6100 and that that bill be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESOLUTION PLACED ON CALENDAR—H.J. RES. 332

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from consideration of House Joint Resolution 332 and that the resolution be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, may I inquire, at the conclusion of the time for the transaction of routine morning business which we have just provided, what will be the pending business and the pending question when the Senate returns to regular business?

The PRESIDING OFFICER. The pending business will be the conference report on the OCS.

Mr. BAKER. I thank the Chair.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I ask the Chair to inquire if there is further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ORDER OF PROCEDURE

Mr. PACKWOOD. Mr. President, will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. PACKWOOD. I have no objection to the conference report being used as a filler for a reasonable period of time. I understand the problem. I understand my good friend from Missouri is going to speak at some length. Could the leader advise us to what his plans are?

Mr. BAKER. Yes, Mr. President; I thank the Senator from Oregon.

The situation that has developed here is not altogether unexpected. We all hoped that this conference report, which is privileged, might be disposed of. It appears, to say the least, unlikely. I note the nod of assent from the Senator from Missouri.

In view of that, it would be the intention of the leadership on this side to ask the Senate to return to the consideration of the debt-limit resolution.

Mr. President, since we found that the call for regular order has been made which displaced the conference report, it was necessary to make a motion to proceed to the consideration of the conference report, which was done.

May I inquire of the Chair, did that return the debt limit resolution to the calendar?

The PRESIDING OFFICER. No; it did not. A conference report is privileged.

Mr. BAKER. I thank the Chair. The call for regular order, however, would not bring back that resolution?

The PRESIDING OFFICER. The majority leader is correct. It would not.

Mr. BAKER. It would require unanimous consent or a motion to proceed to that measure in order to once again reach the debt-limit resolution.

The PRESIDING OFFICER. Once, again, the majority leader is correct.

Mr. BAKER. The majority leader is gratified.

PUBLIC DEBT LIMIT INCREASE

Mr. BAKER. Mr. President, I expect this may be objected to, but I ask unanimous consent that the Senate return to the consideration of the debt limit resolution.

The PRESIDING OFFICER. Is there objection?

Mr. MELCHER. Reserving the right to object, and I only do so in order to express a desire to have some time for debate of this imputed interest before a tabling motion would be in order.

Mr. BAKER. Mr. President, would the Senator be willing to accept, say, a 30-minute time limitation and then to permit me or the manager of the bill to be recognized for the purpose of making a tabling motion?

Mr. MELCHER. Yes; it would be agreeable.

Mr. BAKER. I assure the Senator I shall do that, so let me do it this way: I ask unanimous consent that the Senate now return to the consideration of the debt limit resolution. I further ask unanimous consent that upon the resumption of consideration of that measure, there be 30 minutes of debate on the Melcher amendment, which is the pending question, the time to be equally divided in the usual form.

At the end of that time, I ask unanimous consent that I may be recognized for the purpose of making a tabling motion against the Melcher second-degree amendment.

The PRESIDING OFFICER. Is there objection?

Mr. SYMMS. Reserving the right to object, I just want to ask the Parliamentarian if that unanimous-consent agreement would rule out the Senator from Idaho making an amendment to the Melcher amendment.

Mr. BAKER. I inquire in turn, is the Melcher agreement a second-degree amendment?

The PRESIDING OFFICER. The Melcher amendment is a first-degree amendment. It would rule out the amendment of the Senator from Idaho.

Mr. BAKER. Mr. President, I have no problem with that. If I could consult with the chairman of the Committee on Finance, I am prepared to pro-

vide an additional time for debate on a second-degree amendment——

Mr. SYMMS. I would still have my right. We would not have disposed of the debt limit after this.

Mr. BAKER. That is correct.

Mr. SYMMS. In the event that the Melcher amendment is not tabled, then it would be in order for me to offer an amendment?

The PRESIDING OFFICER. That is correct.

Mr. SYMMS. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? Without objection, it is so ordered.

The clerk will state the pending business.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 654), increasing the statutory limit on the public debt.

The Senate continued with the consideration of the joint resolution.

IMPUTED INTEREST

Mr. MELCHER. Mr. President, there is not any question that we must resolve the situation involving imputed interest rates before we adjourn. The question is just how we do that. There may have been some remarks by the chairman of the Committee on Finance that an imputed interest rate amendment on the debt ceiling would not be acceptable because the House would not like to have it there, Mr. President, there are 300 Members of the House that are either cosponsors of the proposal that I have or a proposal that the Senator from Idaho has.

My proposal refines, extends the exemption where imputed interest rates could be charged by IRS on a self-financed sale of property. The junior Senator from Idaho [Mr. SYMMS] has an amendment which would repeal those provisions in the 1984 tax bill that dealth with imputed interest. His amendment would simply put us back in the same position of law on imputed interest rates that were in on June 28, prior to the passage of the 1984 Tax Act. I made no secret about it, I shall vote for that amendment and 300 Members of the House have indicated by their cosponsorship that they would either vote for outright repeal similar to the repeal contained in the amendment of the Senator from Idaho or for my proposal.

The chairman of the Finance Committee says that a proper vehicle on imputed interest rates will be offered and the Senate can vote on it. Well, the problem we have with a proper vehicle, Mr. President, is this: If there is any way that a minor bill with an imputed interest amendment on it, passed by the Senate, sent over to the House, would fall between the cracks, then we have lost the ball game and the 1984 Tax Act requirements on imputed interest will go into effect on January 1.

Let me give you some background, Mr. President. We have had these types of provisions in the Tax Code since 1964. In 1979, when Treasury said they were going to raise the imputed rate from 6 to 9 percent, myself and others had a great deal of misgiving. Nevertheless, it was not until 1981 and the tax bill that we were able to address this situation, and we passed then an amendment, adopted by the Senate 100 to nothing, to place some restrictions on the IRS as to when they could impose imputed interest rates. And so we come to 1984, when this tax bill was passed this last June, and the restrictions and provisions calling for imputed interest were so drastic that we had almost an open rebellion throughout the country by those involved in seller-financed sales.

For those who might think this is a very peculiar term and a term that is not well understood, imputed interest is the rate that is set by Treasury, under the laws that we pass on seller-financed property sales, which affects the seller in such a way that if the property that the seller is financing does not carry with it a rate set by Treasury, then the Treasury will impute that rate and charge the seller taxes on income as if the seller actually received that higher rate. To many Americans it sounds so unconstitutional they cannot believe it. Nevertheless, it is the law. What we are seeking to do is increase the exemption for those who are selling property and financing that sale on a basis with which they can live.

Now, there has been a lot of talk, and I am sure there will be a lot more, about how realtors want this change. Well, of course, they want a change. Realtors are not the sellers in hardly any instance. They are the ones who broker the sales. Realtors want it changed and want to be able to have seller-financed sales because they know it is extremely important in the property sales transactions among Americans.

When a seller offers financing as a means of disposing of a house or an apartment or a farmer selling some land or a small businessman selling either all of his property or only a portion of his property and knows that in order to make the sale he is going to have to carry that financing at a lower rate of interest than is available at commercial rates, that is a fact of life. The seller simply will not enter into that type of agreement if the IRS is going to impute a rate higher for purposes of that seller's income, and therefore the seller would have to pay taxes on income he did not receive, and the sale is off. So the question goes much deeper than who wants it. Realtors and homebuilders and farmers and ranchers and small business people understand this issue and they want corrections. You cannot have corrections without having a bill passed because it now is law; it goes into effect January 1, unless we modify or repeal those provisions included in the 1984 tax bill. So it is very desperate that we attend to this situation at this time.

Mr. President, I now reserve the remainder of my time.

The PRESIDING OFFICER. Who seeks recognition?

Mr. DOLE. Mr. President, it was my hope that we might all agree on some amendment, we would offer it and work it out. But while we were trying to work it out, while the Senator from Kansas was over on the House side meeting with the chairman of the Ways and Means Committee, the Senator from Montana offered an amendment, so I do really know how we can work it out on that basis, since there is going to be some difficulty, whatever happens, with the chairman of the Ways and Means Committee, who will resist very strongly any effort to amend the debt ceiling.

Now, we have a compromise amendment that is supported by a number of organizations.

The compromise, which I understand Senator JEPSEN will offer—which we hope will carry—is supported by the American Land Development Association, the National Apartment Association, the National Association of Homebuilders, the National Association of Realtors, the National Federation of Independent Businesses, the National Multihousing Council, and the National Small Business Association.

It is something that we have been working on with Treasury, with Secretary Regan, with the Joint Committee on Taxation plus our own staff, with the industry, with those I have listed, and others.

Mr. SYMMS. Will the distinguished chairman yield for a question?

Mr. DOLE. I am happy to yield.

Mr. SYMMS. I thank the distinguished chairman.

I realize some of the national associations that he has named have signed on to this 19-page compromise, but is he aware that some of the State associations have not signed on to this compromise? Most of the State associations have not—they have not in my State. I say to the distinguished chairman I very much fear that this is an inside-the-beltway compromise; that outside the beltway this compromise is little understood and not agreed to.

I hope, rather than be concerned about what the chairman of the Ways and Means Committee is going to do, the Senate will simply not table the Melcher amendment and then amend it to repeal the law and send it back over to the other body.

What would be the course of action if that happened?

Mr. DOLE. My answer would be that I am trying to get some relief for the realtors and the homebuilders this year. I do not know what I need to say to convince people. But I have been speaking to the chairman of the Ways and Means Committee. I went on the House floor less than an hour ago. I talked to the chairman on the telephone today. I think he feels very strongly this is something we ought to do next year. I do not want to characterize the chairman in any critical way; he has a responsibility, too—but I am still hopeful that we can persuade Chairman ROSTENKOWSKI to accept the compromise, and do it this year, because this bill takes effect January 1. Then we would provide some relief.

We can talk about repeal, and I assume at some time the Senator is going to have a chance to offer his amendment to repeal what happened, but I hope that we would set aside the Melcher amendment and then adopt an amendment on which we have all worked, that is supported by a number of organizations, that is reasonable, that has an estimated revenue loss of about $400 million instead of $2.2 billion. And, I might also say, there is no assurance that the Senator from Ohio and others are going to sign off on the compromise. I do not want to leave the impression that it is all greased and ready to go; that if we take the compromise, everybody is going to be on board.

The Senator from Ohio [Mr. METZENBAUM] has raised some questions. He thinks it should be tightened up in certain areas.

I do not mean any criticism of the efforts by the Senator from Idaho. I only say that Mr. Treadwell, who is a bona fide realtor, sat in on all the discussions. He is trying to make a living in Michigan and does pretty well. He is president of the National Association of Realtors. I believe that my State of Kansas, for one, supports the efforts we are making, and I think other States do. I cannot speak for Idaho or other States that may be involved.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. RANDOLPH. Mr. President, I will not speak to the substance of one of the several approaches by which we are attempting to rectify the imputed interest dilema that we have been confronted with since the enactment of the tax bill earlier this year. I am concerned of the effect the changes in imputed interest have had on the housing industry.

This weekend, I counseled with the realtors of the State of West Virginia at a meeting in Huntington. There is some confusion that realtors are not united in one approach or another. I did find this underlying comment. Realtors feel—and I ask the chairman if he agrees—that now, not later they need the passage, before the 98th Congress adjourns, of a measure which would be a fair and practical solution to their current problem.

The real estate industry contributes in a positive degree to the provision of useful structures of all kinds for the small businessman, the farmer, and home owner. They deserve our assistance.

Mr. DOLE. There is no doubt about it. I think the Senator makes a very good point. That is why I hope we will be realistic, pragmatic, objective, and fair.

Repeal might make a lot of sense to a lot of people, but it will not happen. I think the realtors, homebuilders, and most developers understand that.

They also understand that they need some action this year. They need action on farms and principal residences and even vacation homes, and they cannot wait until next year.

It will not have a direct impact this year, but come January, it will have an impact. It may even have an impact starting now.

Everybody knows what will happen, and it will happen next year. The Senator from West Virginia will not be here next year. We do not hit the ground running. We do not start early enough, and it may be February, March, or April before we work out a compromise.

I suggest to the Senator from Idaho that we take the compromise. That does not foreclose changing it next year. But let us at least have some relief on the table come January 1. That will not prejudice the efforts of the Senator from Idaho or the efforts of anyone else who wants to broaden the so-called compromise.

It is my hope that we will table the Melcher amendment—when the motion is made by the majority leader—and get down to the serious business of a compromise. I pledge to my colleagues that which I have been trying to do all day, to get something done that we can do, not something we cannot do. I say that with all sincerity.

I hope that when Senator JEPSEN arrives, we can work out an agreement with the chairman of the Ways and Means Committee not to attach it to the debt ceiling but to put it on another revenue bill, and we have a number of them on this side. If they are willing to accept it on the House side, I hope we will not amend the debt limit at all. We already have one amendment pending on the debt ceiling. That causes difficulty in the House.

I am not here to defend the House. They do not need it. But, under the rules of the House, they can instruct the conferees, and they are not certain that they can pass the debt ceiling. The only way to pass the debt ceiling in the House is when it comes to us automatically, when they pass the budget resolution.

It seems that a lot of House Members vote for all the spending and against the debt ceiling, and then they can use that in their reelection kits.

In any event, I hope we are not going to foreclose anyone's efforts about some additional approach. I just hope we do not do it on the debt ceiling.

The problem with the Melcher amendment is that it would allow tax shelter syndicators to obtain the benefits of below-market seller financing to bloat the basis of depreciable real estate above its fair market value. A 30-year note bearing 9 percent deferred interest can allow a buyer of a $1 million property to claim a tax basis of over $3.2 million.

The Melcher amendment would also allow for transactions that mismatch interest income and interest deductions in syndicated tax shelters.

The Melcher amendment also drops the safeguards against sale-leasebacks contained in the compromise bill.

In short, although the Melcher amendment is not any simpler than our compromise, it does not even have the virtues of the compromise bill. It does not close down the abuse of tax shelter transactions that the compromise restricts.

I recall that when we were here, I think, in June, the Senator from Idaho was willing to settle for much less.

I see that the distinguished Senator from Iowa has been able to get out of the bad weather in the Midwest and has arrived in Washington, DC.

I say to my colleague that I was just indicating that I hoped we could table the Melcher amendment and work out some procedure on some piece of legislation to consider the Jepsen amendment, which is a compromise in which we have the support of the following organizations: American Land Development Association, National Apartment Association, National Association of Home Builders, National Association of Realtors, National Federation of Independent Businesses, National Multihousing Council, National Small Business Association.

As I understand it, the Senator from Iowa is prepared to offer that amendment. We can discuss that amendment with him during the rollcall vote.

Again, I hope we can find some way not to put it on the debt ceiling, get some agreement with the chairman of the Ways and Means Committee to accept it on another revenue bill. We have four or five floating around. We can put it on another revenue bill and send it to the House with the understanding that they will accept it. We can even hold back final action on the

debt ceiling until we have more assurance on the House side.

If we really want to help, as the Senator from West Virginia has just indicated, we should do something we can do—maybe not what we would like to do, but something we can sell to the Treasury, which we have, and sell to the Members, which we have, and get done. If any Senators have influence on the House side, we would appreciate any assistance.

Mr. President, how much time remains on this side?

The PRESIDING OFFICER. Two minutes remain.

Mr. DOLE. How much on the other side?

The PRESIDING OFFICER. Seven minutes.

Mr. MELCHER. Mr. President, I yield 3 minutes to the Senator from Idaho.

Mr. SYMMS. Mr. President, I think the situation we are in here is simply this: The Senator from Montana has an amendment pending which is better than the present law which was passed last July. The Senator from Kansas and the Senator from Iowa have a compromise that they wish to get before the Senate, which is a 19-page piece of legislation that was hastily thrown together here, which the Washington establishment lobbyists have signed onto; but outside the beltway, nobody has signed onto this.

I hold it up. Nineteen pages of tax policy which is just like explaining TEFRA or the tax bill of last summer, or something else. I you want to go home and explain that, fine.

The Senator from Minnesota [Mr. DURENBERGER] has a much simpler compromise than the one proposed by the so-called Washington compromise, the inside-the-beltway compromise which was worked out here hastily last week. It says that every taxpayer is entitled to a $1.5 million seller-financed transaction, one per taxpayer per year, which would solve a big share of the problem. So in many ways it would be more liberal from the taxpayers' point of view than compromise by the distinguished Senator from Kansas.

My amendment, which I hope to get before the Senate before we get off this measure, simply repeals the present law that was passed in July of this summer and goes back so we will just be under current law. I think that would be the simplest place for us to be and simply repeal this law and then start next year and try to work out a compromise.

So what is happening here is we are being told by the chairman of the Ways and Means Committee of the other body that if we put any amendments on the debt increase then he will send back over a debt increase that simply is a clean debt increase that goes to January 30. That might not be the worst of all solutions to end up with, and we could adjourn this place and get out of here, and candidates for Congress could get home to campaign and shut this place, which would probably be a blessing to the country.

All I suggest to my colleagues is I am going to vote against tabling the motion of the distinguished Senator from Montana because I think if we table the Melcher motion we are only putting ourselves in a situation where then the choice will be the next one which will be the one offered by the Senator from Iowa, and I still think what we need to do is take a clean vote here and find out how many people in this Congress would just like to back up to where we were the 1st of July 1984—that is what may amendment does—and allow us to address this issue.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. SYMMS. I thank the Chair.

Mr. MELCHER. Mr. President, the real issue here is, Are we going to get a vote on imputed interest? If we want to repeal, and that is my first choice, the proper method to do that is to beat back the tabling motion and allow the repealer to be offered and then it pass.

What the Senator from Kansas, the very able and very gracious chairman of the Finance Committee, a man who I fondly admire, states and what he is proposing, however, does not get us to the point where we can tell our small business people, our farmers and ranchers or homeowners that we have done the right kind of job on imputed interest. I vigorously disagree with his 19-page proposal. If it is ever offered by him or by some other Senator, it will take an exceedingly great amount of work to modify it because here is what it does: The chairman of the Finance Committee, whether he offers it or someone else offers it, that 19 pages of very complicated tax legislation would limit the exemption for residential property so that no property for which a seller has claimed depreciation during the 2 years immediately before may be exempt for the 90-percent rate.

In other words, it would have to have the higher rate. For example, if a seller is temporarily assigned overseas or somewhere away from home and rented his residence during his absence that seller would not be eligible for the lower rate of the proposal that I am making or the proposal that the Senator from Idaho is making. In other words, we let the seller sell his property and finance the sale if he wants to without getting tangled up with IRS. I am afraid my friend from Kansas would continue the entanglement.

The farm and ranchland must have been used actively in farming for the previous 3 years under the proposal submitted by the Senator from Kansas and the land must be intended for further farming, and such provisions in existing tax law have always been very difficult to prove and the burden is always on the taxpayer. So that is not much help to farmers or ranchers.

What about small business people? Under the chairman's proposal, the Senator from Kansas, the business must have been active for the previous 5 years. And why should there be an arbitrary deadline? What is better about 5 than 4, or 3 than 2, or 2 than 1? And why not stay out of the IRS? Why not keep them out of it? What people are so tired about in paying taxes is IRS dictating any means that they have of selling property and what the tax is going to be on it and how many other things IRS sticks its nose into.

What we are trying to do is get back some of the integrity for the tax law and keep people and IRS from taking so much power from the laws we pass so that they can really stop seller-financed property sales.

Last, let me mention one other point: What the chairman recommended in 19 pages of amendment is that assumables, that is where a willing buyer assumes a loan that a seller is willing to give up as part of the terms for the sale lower than the current interest rates of the banking institution or the loan institution, the assumables, would not be available. They would be outlawed. They would be subject to these higher interest rates. There is no reason for allowing that. True, the Senator would grandfather old ones but would not allow new ones.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Kansas.

Mr. DOLE. Mr. President, I will take a minute and suggest a quorum for the leader to come and move to table.

We think we addressed a number of the concerns raised by the distinguished Senator from Montana. I do not want to discredit the Senator from Montana. He has been a leading force in this effort. But I do believe that his amendment has some flaws plus I think if we really want to do something—again you know the Senate is going to speak in a moment—it is up to the Senate. If they want to say OK, we are not going to take anything but repeal, we can stay here and we can vote on repeal and if repeal passes the Senate I am willing to predict that is as far as it is going to go. But I do not think repeal will pass the Senate. I think there are some Senators who will not let repeal come to a vote. I would guess from all these people we have been hearing from in our States——

31-059 O-87-18 (Pt. 22)

Mr. SYMMS. Will the distinguished chairman yield for a question?

Mr. DOLE. No; I only have about 2 minutes.

If we really want to do something, I think this is an opportunity. It does not foreclose anyone next year from doing anything they want. But my realtors are telling me they believe in a compromise that we have worked out.

We have also addressed the concerns Senator MELCHER expressed on assumptions, and it is a very, very complicated piece of legislation. But we have tried to take care of a lot of complicated transactions.

I would hope that we would table the amendment, then move on to the amendment of the distinguished Senator from Iowa, Senator JEPSEN; but not today. Give us an opportunity to find a vehicle other than the debt ceiling, and if we cannot find anything and everything else fails, then the Senator from Kansas will join anyone in offering whatever we need to offer to the debt ceiling. But if we really want to do something, I just suggest that if we want to help the realtors, the homebuilders, the farmers, and the others, then we ought to adopt the compromise. If we do not, we do not.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM. Mr. President, before the Senator suggests the absence of a quorum, may I be heard?

Mr. DOLE. I do not have time.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent, since the majority leader is not on the floor, that the Senator from Ohio be allocated 3 minutes to express his views.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, this is a matter that concerns me. I have heard talk about the Association of Realtors, various other groups that are interested in the amendment. I think we have another interest we should concern ourselves about as well and that is the question of how do we balance the budget.

Let us not kid ourselves. The issue of imputed interest has to do with some of the tax gimmicks that have been used by the tax shelter sales people around the country, not that they have not used imputed interest for that purpose but the whole issue comes up because there have been deals structured so that the interest rate was lowered, the price of the deal was raised in order to provide greater depreciation and greater tax shelter.

I respect the chairman of the Finance Committee who is about, I gather, to make a motion to table. I respect him for the fact that he understands the problem, and I think there is somewhat of a problem not nearly as much as the lobbyist groups would claim. I think there is somewhat of a problem, but I think the chairman of the Finance Committee has been sufficiently aware that, as you move on this issue, you also impact the revenues into the Federal Treasury.

I am concerned, and I am frank to say that the amendment of the Senator from Montana whom I am going to join in supporting to table I will do so because I do not think it provides the necessary protection against some of the tax shelters that will still be permitted under his amendment. And if there is an effort made to repeal it entirely I have no hesitancy in saying that I am free all of next week, and I will be happy to explain that amendment to the people of this country.

Mr. MELCHER. Will the Senator yield?

Mr. METZENBAUM. No; I cannot at this moment.

So I would just urge that although I am not certain that the Senator from Kansas is prepared to go as far as I think he should with respect to his so-called compromise amendment, I do believe very strongly that the Symms amendment to repeal and the Melcher amendment, too, in this respect does not provide adequate protection for the Treasury against those who would use our tax laws in order to create tax shelters and further more tax loopholes thus impacting the Federal Treasury.

I am happy to yield to the Senator from Montana if I have any time remaining.

Mr. MELCHER. I thank the Senator from Ohio for yielding. I do not think he is aware that the proposal I make, while better for small business people, does not change the Treasury's position on revenue one iota compared with the proposal of the Senator from Kansas. My proposal just happens to be simpler, happens to be liked better by small business people and does not change the revenue picture, as far as Treasury is concerned, any dollar amount over the amount of the proposal by the Senator from Kansas.

Mr. METZENBAUM. Does the Senator from Montana indicate that Treasury has represented that? Have they so stated?

Mr. MELCHER. The Joint Tax Committee has represented that to me.

Mr. METZENBAUM. I thank the Senator.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. BAKER. Mr. President, pursuant to the order previously entered, I seek recognition and move to table the Melcher amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee [Mr. BAKER] to table the amendment of the Senator from Montana [Mr. MELCHER]. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi [Mr. COCHRAN], the Senator from Illinois [Mr. PERCY], and the Senator from Delaware [Mr. ROTH], are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from Florida [Mr. CHILES], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Vermont [Mr. LEAHY], the Senator from Michigan [Mr. LEVIN], the Senator from Louisiana [Mr. LONG], the Senator from Maine [Mr. MITCHELL], the Senator from New York [Mr. MOYNIHAN], the Senator from Georgia [Mr. NUNN], the Senator from Tennessee [Mr. SASSER], and the Senator from Mississippi [Mr. STENNIS], are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan [Mr. LEVIN] would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 23, nays 59, as follows:

[Rollcall Vote No. 285 Leg.]

YEAS—23

Baker	Heflin	Rudman
Chafee	Humphrey	Simpson
Danforth	Lautenberg	Stafford
Denton	Laxalt	Thurmond
Dole	Lugar	Tower
Evans	Mathias	Trible
Goldwater	Packwood	Wallop
Gorton	Proxmire	

NAYS—59

Abdnor	Dixon	Hawkins
Andrews	Dodd	Hecht
Armstrong	Domenici	Heinz
Baucus	Durenberger	Helms
Biden	Eagleton	Huddleston

Quayle	Symms	

NOT VOTING—18

Bentsen	Johnston	Moynihan
Bradley	Kennedy	Nunn
Bumpers	Leahy	Percy
Chiles	Levin	Roth
Cochran	Long	Sasser
Hollings	Mitchell	Stennis

So the motion to lay on the table amendment (No. 7080) was rejected.

AMENDMENT NO. 7082

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 7082.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

SEVERAL SENATORS. Objection.

The bill clerk resumed reading the amendment as follows:

On line 6 of the resolution, strike out "$1,823,800,000,000" and insert in lieu thereof "$1,823,800,000,001 on and after October 2, 1984."

AMENDMENT NO. 7083

Mr. JEPSEN. Mr. President, I send an amendment to the Dole amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Iowa [Mr. JEPSEN] proposes an amendment numbered 7083 to the Dole amendment, numbered 7082.

Mr. DOLE. Mr. President, I suggest that further reading of the amendment be dispensed with.

SEVERAL SENATORS. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, may we have order so we can hear the reading of the amendment?

The PRESIDING OFFICER. The Senate will be in order.

The bill clerk resumed reading the amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Without objection, it is so ordered.

The amendment is as follows:

AMENDMENT No. 7083

In lieu of the matter proposed to be inserted, insert the following: "$1,823,800,000,002 on and after October 1, 1984."

SEC. . TAX TREATMENT OF CERTAIN DEFERRED PAYMENTS.

(a) REDUCTION IN INTEREST RATES UNDER SECTION 483.—Section 483 of the Internal Revenue Code of 1954 (relating to interest on certain deferred payments) is amended—

(1) by redesingnating subsections (f), (g), and (h) has subsection (h), (i), and (j) and

(2) by striking out subsection (2) and inserting in lieu thereof the following new subsections:

"(e) REDUCED RATE OF INTEREST IN CASE OF CERTAIN SALES OF RESIDENCES, FARMS, OR TRADES OR BUSINESSES.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsection (b) or (c) (1)(B) shall be the rate prescribed by the Secretary in regulations but shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALE OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any of the following sales or exchanges:

"(A) RESIDENCES.—Any sale or exchange of a residence by an individual, an estate, or a testamentary trust, but only if—

"(i) either—

"(I) such residence on the date of such sale or exchange (or in the case of an estate or testamentary trust, on the date of death of the decedent) was the principal residence (within the meaning of section 1034) of the individual or decedent, or

"(II) during the 2-year period ending in such date, no substantial portion of such residence was of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of such individual or decedent, and

"(ii) such residence was not at any time, in the hands of such individual, estate, testamentary trust, or decedent, described in section 1221(1) (relating to inventory, etc.).

"(B) FARMS.—Any sale or exchange by a qualified person of—

"(i) real property which was used as a farm (within the meaning of section 6420(c)(2)) at all times during the 3-year period ending on the date of such sale or exchange, or

"(ii) tangible personal property which was used in the active conduct of the trade or business of farming on such farm and is sold in connection with the sale of such farm,

but only if such property is sold or exchanged for use in the active conduct of the trade or business of farming by the transferee of such property.

"(C) TRADES OR BUSINESSES.—

"(i) IN GENERAL.—Any sale or exchange by a qualified person of any trade or business.

"(ii) APPLICATION WITH SUBPARAGRAPH (B).—This subparagraph shall not apply to any sale or exchange of any property described in paragraph (B).

"(iii) NEW SECTION 38 PROPERTY.—This subparagraph shall not apply to the sale or exchange of any property which, in the hands of the transferee, is new section 38 property.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall apply to any debt instrument to the extent that the sales price does not exceed the applicable limit with respect to such sale or exchange.

"(B) APPLICABLE LIMIT DEFINED.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in: The limit is:

Paragraph (2)(A)	$250,000
Paragraph (2)(B)	2,000,000
Paragraph (2)(C)	1,000,000

"(4) BLENDED RATE WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any sale or exchange to which this subsection applies with respect to which the sales price exceeds the applicable limit—

"(A) TEST RATE.—The discount rate under subsection (c)(1)(B) shall, in lieu of the rate under paragraph (1), be equal to the sum of—

"(1) 9 percent, multiplied by a fraction the numerator of which is the applicable limit and the denominator of which is the sales price, and

"(ii) 110 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus the applicable limit, and

"(II) the denominator of which is the sales price.

In the case of a transaction described in paragraph (2)(A), clause (ii) shall be applied by substituting '100 percent' for '110 percent'.

"(B) IMPUTED RATE.—The discount rate under subsection (b) shall, in lieu of the rate under paragraph (1), be equal to the rate determined under subparagraph (A) by substituting '10 percent' for '9 percent' and, except in the case of any transaction described in paragraph (2)(A), '120 percent' for '110 percent' each place it appears.

"(C) RATES AS ADJUSTED.—For purposes of this paragraph, if the Secretary prescribes, pursuant to paragraph (1), a lower discount rate under subsection (c)(1)(B) or (b) than the maximum rate allowed under paragraph (1), such lower rate shall apply in lieu of '9 percent' or '10 percent' in subparagraphs (A)(i) or (B), respectively.

"(5) AGGREGATION AND ALLOCATION RULES.—For purposes of this subsection, except as provided in regulations—

"(A) DEBT INSTRUMENTS.—All debt instruments arising from a transaction (or any series of related transactions) shall be treated as 1 debt instrument.

"(B) SALES AND EXCHANGES.—All sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(C) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property (or a trade or business) described in paragraph (2) with respect to which there is more than 1 owner, the applicable limit under paragraph (3) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(6) APPLICATION WITH SUBSECTION (h).—In the case of any qualified sale (as defined in subsection (h)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (h)(1) applies.

"(7) DEFINITIONS.—For purposes of this subsection—

"(A) QUALIFIED PERSON DEFINED.—The term 'qualified person' means—

"(i) a person who—

"(I) is an individual, estate, or testamentary trust,

"(II) is a corporation which immediately prior to the date of the sale or exchange has 35 or fewer shareholders, or

"(III) is a partnership which immediately prior to the date of the sale or exchange has 35 or fewer partners,

"(ii) is a 10-percent owner of a farm or a trade or business,

"(iii) pursuant to a plan, disposes of—"(I) an interest in a farm or farm property, or

"(II) his entire interest in a trade or business and all substantially similar trades or businesses, and

"(iv) the ownership interest of whom may be readily established by reason of qualified allocations (of the type described in section 168(j)(9)(B), one class of stock, or the like.)

"(B) 10-PERCENT OWNER DEFINED.—The term '10-percent owner' means a person having at least a 10-percent ownership interest, applying the attribution rules of section 318 (other than subsection (a)(4)).

"(C) SALES PRICE DEFINED.—The term 'sales price' means the sum of—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(D) TRADE OR BUSINESS DEFINED.—

"(i) IN GENERAL.—The term 'trade or business' means any trade or business, including any line of business qualifying as an active trade or business, qualifying as an active trade or business within the meaning of section 355.

"(ii) RENTAL OR REAL PROPERTY.—For purposes of this subparagraph, the holding of real property for rental shall not be treated as an active trade or business.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) real property described in subparagraph (D) or (F) of subsection (c)(2) of section 168 (whether or not such property is of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of the purchaser),

including de minimis amounts of tangible personal property associated with such real property.

"(B) CERTAIN PROPERTY NOT INCLUDED.—This subsection shall not apply to any sale or exchange—

"(i) of new section 38 property, or

"(ii) with respect to which the transferor and transferee are related persons.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lessor of—

"(i) 12 years, or

"(ii) in the case of a debt instrument issued in exchange for recovery property, ⅔ of the shortest recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(i) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued,

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of all interest accruing thereunder for that year, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274(d) for any period after June 30, 1985 (other than the Federal short-term rate) exceeds by more than 2 percentage points such rate for the preceding period as limited by this paragraph, such applicable Federal rate shall not exceed the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1–June 30, 1985	10.5
July 1–Dec. 31, 1985	11.0
Jan. 1–June 30, 1986	11.5
July 1–Dec. 31, 1986	12.0

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection, all sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(7) RELATED PERSON DEFINED.—For purposes of this subsection and subsection (g), the term 'related person' means a person who is related (within the meaning of section 267(b) or section 707(b)(1)) to another person other than a qualified 5-percent or less partner (within the meaning of section 267(e)(5)(B)).

"(g) SPECIAL RULES FOR APPLICATION OF THIS SECTION.—For purposes of this section—

"(1) APPLICATION OF SUBSECTIONS (e) AND (f).—In the case of any sale of exchange, either subsection (e) or subsection (f) may be applied, but not both.

"(2) TREATMENT OF ASSUMPTIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if, after December 31, 1984, any person—

"(i) assumes any debt obligation issued after October 15, 1984, or described in subparagraph (C), in connection with the sale or exchange of any property, or

"(ii) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(b) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(C) OBLIGATIONS DESCRIBED IN THIS SUBPARAGRAPH.—A debt obligation is described in this subparagraph if such obligation—

"(i) was issued on or before October 15, 1984, and

"(ii) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(D) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments.

"(E) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction shall be exempt from the application of this paragraph if such exemption is not likely to significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(3) FAIR MARKET VALUE RULE IN POTENTIALLY ABUSIVE CASES.—In the case of any potentially abusive situation (within the meaning of section 1274(b)(3)(B)), the principal amount of any debt instrument received in any sale or exchange of property to which this section applies shall be the fair market value of such property adjusted to take into account other consideration involved in the transaction.

"(4) SALE-LEASEBACKS.—Subsections (e) and (f) shall not apply to any sale or exchange if, pursuant to a plan, the transferor or any related person leases such property.

"(5) RULES NOT TO APPLY WHERE PREPAYMENT PROHIBITED.—Subparagraph (A) of paragraph (1) shall not apply to any obligation arising from a loan from a third-party creditor, pursuant to which the obligor is not permitted to pay the instrument prior to maturity.

"(6) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stat-

ing interest sufficient to satisfy the applicable rate under subsection (c)(1)(B), the rate under subsection (b) shall be considered equal to the rate so applicable udner subsection (c)(1)(B).".

(b) INTEREST INCOME AND DEDUCTIONS COMPUTED ON CASH BASIS IN CERTAIN CASES.—

(1) IN GENERAL.—Section 1274 of such Code (relating to determination of issue price in the case of certain debt instruments issued for property) is amended by adding at the end thereof the following new subsection:

"(e) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES TO WHICH INTEREST RULES OF SECTION 483 APPLY.—Notwithstanding any other provision of this subpart—

"(1) TRANSACTIONS TO WHICH SECTION 483 (E) APPLIES.—In the case of any sale or exchange to which section 483(e) applies—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any inclusion in income or deduction under this title with respect to interest on any debt instrument issued in connection with such sale or exchange shall be computed on the cash receipts and disbursements method of accounting.

"(B) SALES PRICE EXCEEDS APPLICABLE LIMIT.—In any case in which the sales price exceeds the applicable limit under section 483(e)(3)—

"(i) except in the case of any transaction to which section 483(e)(2)(A) applies, subparagraph (A) shall not apply, and

"(ii) the discount rates under subsections (c)(3) and (b)(2)(B) shall be equal to the rates determined under subparagraphs (A) and (B) of section 483(e)(4).

"(2) TRANSACTIONS TO WHICH SECTION 443(F) APPLIES.—In the case of any sale or exchange to which section 483(f) applies—

"(A) TRANSACTIONS WITH 80 PERCENT TEST RATE.—

"(i) IN GENERAL.—Except as provided in clause (ii), any inclusion in income or deduction under this title with respect to interest on any debt instrument described in section 483(f)(3) shall be computed on the cash receipts and disbursements method of accounting.

"(ii) SPECIAL RULE FOR TRANSACTIONS NOT QUALIFYING FOR 80 PERCENT TEST RATE.—Clause (i) shall not apply to any debt instrument issued in such sale or exchange if, in addition to such instrument, a debt instrument not described in section 483(f)(3) is issued in such sale or exchange.

"(B) TRANSACTIONS TO WHICH SUBPARAGRAPH (A) DOES NOT APPLY.—

"(i) IN GENERAL.—If subparagraph (A) does not apply to any debt instrument issued in such sale or exchange, subsection (c)(3) shall be applied—

(I) in the case of any debt instrument described in section 483(f)(4), by substituting '100 percent' for '110 percent', and

"(II) in the case of any debt instrument described in section 483(f)(3), by substituting '80 percent' for '110 percent'.

"(ii) SPECIAL RULES FOR 1985 AND 1986.—In the case of any debt instrument to which clause (i) applies issued during 1985 or 1986, the discount rate under subsection (c)(3) shall not be greater than the rate determined under section 483(f)(5).

"(3) SPECIAL RULE FOR HOLDING AND TRANSFER OF DEBT OBLIGATION.—

"(A) Paragraphs (1)(A) and (2)(A) shall apply to the holder of a debt obligation only if such obligation is—

"(i) held by the first obligee of such obligation or such obligee's spouse or estate, and

"(ii) secured by the property sold or exchanged in the transaction in which such obligation is issued.

"(B) Except as otherwise provided in regulations, in the case of a transfer of property by the obligor in which the obligation is not satisfied and the transferee does not become liable to pay such obligation to the first obligee, any deduction for interest on any indebtedness paid or incurred by the transferee to the immediate transferor attributable to such obligation shall be deferred until such time as such deduction would have been allowed if such obligation had been assumed by the transferee.

"(C) In any case in which the transferee assumes or takes property subject to any obligation under subparagraph (A) or is considered to do so under subparagraph (B), the transferee shall compute the amount of the deduction for any interest on such obligation on the cash receipts and disbursement method of accounting.

"(4) SUBSECTION ALSO TO APPLY TO DEBT USED TO CARRY OBLIGATIONS.—In any case in which an obligor of a debt obligation to which paragraph (1)(A) or (2)(A) applies pays or incurs interest on indebtedness to carry such debt obligation, any deduction for such interest shall be deferred to the extent necessary to achieve a proper matching of interest income and expense.

"(5) REGULATIONS TO PREVENT ABUSE OF REQUIRED CASH ACCOUNTING.—The Secretary may by regulation prescribe rules to prevent the mismatching of interest income and interest deductions in connection with obligations on which interest is computed on the cash receipts and disbursements method of accounting.

"(6) OTHER RULES APPLY.—For purposes of this subsection, rules similar to the rules under subparagraphs (B) and (D) of section 483(g)(2) shall apply.".

(2) SPECIAL RULE FOR ASSUMPTIONS.—Paragraph (4) of section 1274(c) of such code (relating to debt obligations to which section applies) is amended by adding at the end thereof the following new subparagraph:

"(G) TREATMENT OF ASSUMPTIONS.—

"(I) IN GENERAL.—Except in the property described in subsection (e)(2)(A) of section 483, if, after December 31, 1984, any person—

"(I) assumes any debt obligation issued after October 15, 1984, or described in clause (II) in connection with the sale or exchange of any property, or

"(II) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(ii) OBLIGATION DESCRIBED IN THIS CLAUSE.—A debt obligation is described in this clause if such obligation—

"(I) was issued on or before October 15, 1984, and

"(II) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(III) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction would be exempt from the application of this subparagraph if such exemption would not significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(iii) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(iv) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments."

(c) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—

(1) IN GENERAL.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—Notwithstanding any other provision of this subpart—

"(1) IN GENERAL.—In the case of any debt instrument described in paragraph (4) arising from a sale or exchange to which this subsection applies—

"(A) subsection (c)(3) shall be applied by substituting '80 percent' for '110 percent', and

"(B) subsection (b)(2)(B) shall be applied by substituting '110 percent' for '120 percent'.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—This subsection applies to any sale or exchange of any residence by a dealer who holds such residence as section 1221(1) property to a person who intends to occupy such residence if the sales price of such residence does not exceed $250,000.

"(B) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property described in subparagraph (A) with respect to which there is more than 1 owner, the applicable limit under subparagraph (A) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(3) BLENDED RATE WHERE SALES PRICE EXCEEDS $250,000.—In the case of any sale or exchange to which this subsection would otherwise apply with respect to which the sales price exceeds $250,000—

"(A) TEST RATE.—The discount rate under subsection (c)(3) shall, in lieu of the rate under paragraph (1)(A), be equal to the sum of—

"(i) 80 percent, multiplied by a fraction the numerator of which is $250,000 and the denominator of which is the sales price, and

"(ii) 100 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus $250,000, and

"(II) the denominator of which is the sales price.

"(B) IMPUTED RATE.—The discount rate under subsection (5)(2)(B) shall be the rate under paragraph (1)(B).

"(4) DEBT INSTRUMENT.—A debt instrument is described in this paragraph if it provides conspicuous notice to the obligor in a manner prescribed by regulations that if the obligor of such instrument places the residence in service in a trade or business the depreciation rules under section 168(f)(16) shall apply.

"(5) SALES PRICE DEFINED.—For purposes of this subsection, the term 'sales price' means—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(6) RULES RELATING TO INTEREST TO CARRY DEALER OBLIGATIONS ARISING UNDER THIS SUBSECTION.—

"(A) EXCESS DEDUCTIONS DISALLOWED.—For each year the interest expense paid or incurred on any debt incurred or continued to carry any dealer obligation shall be disallowed to the extent such expense exceeds interest income includable with respect to such dealer obligation for such year.

"(B) DISALLOWED INTEREST EXPENSE ALLOWED IN SUBSEQUENT YEARS.—For any year the amount of disallowed interest expense shall be allowed as a deduction with respect to any dealer obligation in an amount equal to the disallowed interest expense as of the close of such year (not including any amount previously allowed under this subparagraph) multiplied by a fraction—

"(i) the numerator of which is the sum of the principal payments on such dealer obligation made in such year, and

"(ii) the denominator of which is the total amount of principal outstanding on such dealer obligation at the beginning of such year.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) DEALER OBLIGATION DEFINED.—The term 'dealer obligation' means on obligation arising pursuant to a transaction to which paragraph (1) of this subsection applies.

"(ii) DISALLOWED INTEREST EXPENSE DEFINED.—The term 'disallowed interest expense' means the aggregate amount of interest expense disallowed under subparagraph (A) with respect to any dealer obligation.

"(D) NO INFERENCE.—Nothing in this paragraph shall be construed to imply that any transaction described in this paragraph is or is not subject to the rules of section 453B, and any determination of such issue shall be made as if this paragraph had not been enacted.".

(d) RULE WHERE SPECIAL STATE LAW APPLIES.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(g) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to result in an adequate stated interest in the transaction, a rule similar to the rule of section 483(g)(6) shall apply.".

(e) CONFORMING AMENDMENTS.—Paragraph (4) of section 1274(c) of such Code (relating to certain excepted debt instruments) is amended—

(1) by striking out subparagraphs (A) and (B),

(2) by striking out "section 483(e)" and "SECTION 483(e)" in subparagraph (F) and the heading to subparagraph (F), respectively, and inserting in lieu thereof "section 483(i)" and "SECTION 483(1)", respectively, and

(3) by redesignating subparagraphs (C), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(f) DEPRECIATION.—Subsection (f) of section 168 of such Code (relating to accelerated cost recovery system) is amended by adding at the end thereof the following new paragraph—

"(16) SPECIAL RULES FOR CERTAIN RESIDENCES.—In the case of any debt instrument described in section 1274(f)(1), the original principal amount of the debt instrument shall be deemed to be the lesser of—

"(A) the stated principal amount, or

"(B) the imputed principal amount determined by applying section 1274(f) using a discount rate of 110 percent of the applicable Federal rate at the time the debt was issued.".

(g) FAIR MARKET VALUE IN POTENTIALLY ABUSIVE SITUATIONS.—Subparagraph (B) of section 1274(b)(3) of such Code (relating to fair market value rule in potentially abusive situations) is amended in clause (ii), by striking out "or" at the end of subclause (III), by redesignating subclause (IV) as subclause (V), and by adding after subclause (III) the following new subclause: "(IV) deferred interest, or".

(h) DETERMINATION OF APPLICABLE FEDERAL RATE.—

(1) IN GENERAL.—Paragraph (1) of section 1274(d) of such Code (relating to determination of applicable Federal rate) is amended by adding at the end thereof the following new subparagraph:

"(E) AUTHORITY FOR SECRETARY TO DETERMINE RATE MORE FREQUENTLY.—If there is a significant decrease in any applicable Federal rate following any 6-month test period referred to in subparagraph (B), the Secretary may determine the applicable Federal rate on the basis of a more recent period (not less than 30 days) as he determines appropriate to reflect such decrease.".

(2) SPECIAL RULE FOR 1984.—

(A) IN GENERAL.—In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of sections 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(B) PARAGRAPH NOT TO APPLY.—Subparagraph (A) shall not apply to any debt instrument to which section 483 (e) or (f) of the Internal Revenue Code of 1954, as amended by this section, applies.

(i) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 41 of the Deficit Reduction Act of 1984.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order, please.

Mr. JEPSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Mr. President, I have been closely following the problems associated with imputed interest rates for several months now.

During debate on the Deficit Reduction Act, I was a cosponsor of the Melcher amendment which attempted to change the tax bill provisions. When that effort failed, I became a chief cosponsor of the next Melcher bill, S. 2894. In August I submitted a statement to the Senate Finance Committee when they held a hearing on imputed interest rates. I then cosponsored the Symms bill to repeal the changes made in the tax bill. I tell you this to demonstrate my conviction that we cannot adjourn until the imputed interest rate problem is solved.

I am now pleased to offer an amendment which is a good, workable compromise. This compromise will help alleviate the devastating effect that imputed interest rates have on American families, farms, and small businesses.

For the record I would like to illustrate how seriously the changes in the imputed rules would have affected Iowa. According to figures provided by the National Association of Realtors, Iowa would have lost 1,200 jobs, 200 farm sales, 225 home sales, $315 million in commercial sales, and $47 million in overall economic activity. Clearly, imputed interest rates affect our lives more seriously than some people might imagine. The changes we are making now will help alleviate some of the burden but not all of it. Personally, I won't be satisfied until we have done away with imputed rates completely. As far as I'm concerned, imputed interest rates are unconstitutional. Someone wants to sell his property should be able to so without the Government sticking its nose in the deal.

As I have said before, imputed interest rates are devastating to our families, farms, and businesses. Rather than providing incentives for keeping property in the family, imputed interest rates force owners to bypass youngsters and sell to outsiders.

Imputed interest rates also affect a person's ability to retire. If a parent, for instance, wants to sell the family home and only has offers that involve sell financing, he may be reluctant or unable to sell the home if he will have a large tax bill for doing so.

In addition, a farmer suffers double anguish because of the imputed interest rate. On one hand, if he weren't subject to the rate, he would have a better chance of keeping the farm in the family or selling it to someone dependable who wants a start in life. Nothing tears up a farmer more than the thought of selling his farm to someone who will let it run down.

On the other hand, a farmer or any person ready to retire wants to know that the money he has is sufficient to support him for the rest of life. He really doesn't care if he has $10,000 or $1,000,000, just so he can live out his life in peace. With imputed interest rates, however, a farmer may be forced to sell outside the family because someone can offer a higher price and not require seller financing.

So it is evident, Mr. President, that we have some distance to go before we have solved all the problems associatied with imputed interest rates. The amendment before us is a good start, however, and I urge my colleagues to support it.

Mr. DOLE. Mr. President, this summer we enacted the imputed inter-

est and original issue discount provisions of the Deficit Reduction Act to close loopholes which were estimated to reduce Federal receipts by approximately $2.2 billion within the next 3 years. We were not, however, intending to force average Americans to restructure their sales of property to conform with any prescribed notion of what fair interest rates were. There has been a lot of confusion on this matter and it is understandable. The concepts are complex, but the potential for abuse was real and reform was necessary.

THE ABUSES THAT SHOULD BE PROHIBITED

It may be useful to describe in summary form the type of abuses that were intended to be prohibited. There are two major types of games that taxpayers could play using the imputed interest rates and accounting rules that were in place prior to the enactment of the Deficit Reduction Act. First, by using a combination of low interest rates and the installment method of accounting, taxpayers could defer tax on installment payments beyond what would be possible if they were required to account for economic interest in an appropriate way. Second, and more importantly, taxpayers could state deliberately low interest rates in order to argue that their basis in property which was purchased in a transaction with seller financing was far in excess of the real value of that property according to any reasonable estimate of that value. By doing this, the taxpayer could take unreasonably high amounts of investment tax credits and correspondingly high depreciation deductions. These deductions could far outweigh the value of interest-paid deductions which would be available if the real value of the property were used amounts were recharacterized as interest.

The Internal Revenue Service could argue that the fair market value of the property really was not as high as the taxpayer was claiming and thus disallow some of the credits and depreciation, but reputable law firms were giving opinions that the taxpayer had a reasonable basis for taking the position that the low rates of interest could be used as a basis for determining the value of the property.

These were not hypothetical cases—they were real and prospectuses were printed showing how investors take advantage of this tax reduction scheme.

LIMITATIONS ARE APPROPRIATE

We did not, however, intend to adversely affect the average American who decided that it was in his best interest to provide financing in order to sell a piece of property. While it is undoubtedly appropriate to conform the tax laws to economic reality, the practical reality that some taxpayers are less sophisticated than others should also be taken into account.

This amendment strikes a balance between our rightful concern that tax abuses should be curtailed and the concern that average Americans should not have to be a tax specialists in order to comply with the law. The amendment will conform the tax law to economic reality for large transactions with the greatest potential for abuse to the economic reality of the deal. It will, however, not require individuals selling their residences or their vacation homes, people selling their small businesses or their family farm to learn any substantial new rules with respect to the calculation or reporting for tax purposes of interest when they finance their sale.

The amendment also addresses the concern that even larger sales of real estate were being forced to recharacterize too much of their gain from a transaction as interest income rather than gain. And finally, the amendment provides additional relief, on a transitional basis, to give taxpayers more time even in the larger transactions to adapt to the new rules. Of course, there are a number of additional protections to make the application of the tax law in these types of transactions fairer recognizing the need for stability in interest rates in order to avoid discouraging the sales of property.

A COMPROMISE SOLUTION

Probably the best indication that this is a reasonable compromise between the needs of taxpayers and the concerns of the Federal Treasury is the groups who have helped us design it and who unequivocally support it. These groups include the American Land Development Association, the National Apartment Association, the National Association of Homebuilders, the National Association of Realtors, the National Federation of Independent Business, the National Multi-Housing Council, and the National Small Business Association. Mr. President, this is a very broad spectrum of support. To my knowledge, the only groups who have not endorsed this compromise represent those who engage in the largest commercial real estate transactions with the greatest opportunity for tax abuse. The groups who represent the average taxpayer—people selling their own homes or farms, people selling thier business, and people building single family homes and apartment buildings—all support this compromise.

TREASURY'S POSITION

On the other side, Treasury also believes that this compromise goes far to meet the objections of taxpayers while curtailing the worst abuses. They would still prefer the provisions enacted this summer, but acknowledge that changes of the type included in this amendment are appropriate. They support this amendment although they think we may have provided too much relief for taxpayers.

This Senator acknowledges that this is not the simplest legislation that would be possible. However, the structure of the amendment reflects the fact that this is a compromise which reflects the special needs of taxpayers in different positions. We worked carefully with representatives of these taxpayers to assure that we accommodated their needs without sending up new loophoes. I am confident we have succeeded.

The compromise follows:

IMPUTED INTEREST COMPROMISE

1. RESIDENCES

a. General rule

A person who sells his residence or vacation home residence with a purchase price of $250,000 or less would be subject to a 9 percent imputed interest test rate.

If commercial interest rates went down, Treasury would have the authority to lower the 9 percent rate. They would not have authority to raise the 9 percent rate.

The 9 percent rate would apply to both principal residences (at the time of the sale) and vacation homes. Vacation homes would be defined as residences on which depreciation was not allowable for the 2 years before the sale. Inventory property (e.g., a homebuilder's inventory) would not qualify for this rule.

If the purchase price is greater than $250,000, the applicable test rate would be a weighted "blend" of 9 percent and 100 percent of the applicable Federal rate.

No sale-leasebacks would be allowed and both buyer and seller would account for the transaction on a cash basis.

b. Dealer property

A homebuilder or realtor selling a residence which he holds in inventory and sells for a purchase price of $250,000 or less would be subject to an imputed interest rate of 80 percent of the applicable Treasury rate (10.5 percent for the first 6 months of 1985).

The 80 percent rate would apply to sales of homes to be occupied by the owner. It would not apply to residences on which depreciation is claimed by the buyer. If the buyer subsequently took depreciation on the property, the benefit of the 80 percent rate would be recaptured.

If the purchase price is greater than $250,000, the applicable test rate would be a weighted "blend" of 80 percent of the Federal rate and 100 percent of the applicable Federal rate.

For borrowings to carry seller-financing, interest deductions on the borrowing would be limited to current interest income, including imputed interest, recognized on seller financing; deferred interest deductions would be allowed on a pro-rata basis as the homebuyer made payments on his mortgage.

The seller would account for the seller financing on an accural basis under the original issue discount rules.

2. FARMS AND RANCHES

A farm or ranch with a purchase price of not more than $2 million would also be subject to a 9 percent test rate.

Treasury would have authority only to lower the rate, if appropriate.

The property must have been used by any person (not necessarily the seller) as a farm or ranch for the 3 prior years and the purchasers must intend to use the property as a farm or ranch.

If the purchase price is over $2 million, the test rate will be a weighted blend of 9 percent and the applicable Federal rate.

No sale-leasebacks would be allowed, both buyer and seller would account for the transaction on a cash basis, and the 9 percent rate would not apply to new section 38 (investment tax credit) property. The seller would not be required to liquidate his farm interests.

3. SMALL BUSINESS

This rule would apply only to businesses with a value of no more than $1 million. The sale of a business with a purchase price of $1 million or less would be subject to a 9 percent test rate.

Treasury would have the authority only to lower the rate, if appropriate.

The 9 percent rate would apply to sale of a complete line of such business and to a sale of an ownership interest in such a business.

If the business is worth more than $1 million, then the test rate will be a weighted "blend" of 9 percent and 100 percent of the applicable Federal rate.

No sale-leasebacks would be allowed, both the buyer and seller would account for the transaction on a cash basis, and the 9 percent rate would not apply to new section 38 property.

4. MEDIUM-SIZED REAL ESTATE TRANSACTIONS

For sales of real property involving no more than $4 million of deferred payments, the applicable rate would be 80 percent of the applicable Federal rate (about 10.5 percent for the first 6 months of 1985).

Payments under the agreement would not extend for more than 12 years. Any amount exceeding the $4 million amount would be subject to a rate equal to 100 percent of the applicable Federal rate. Buyer and seller would account for the transaction on a cash basis.

5. LARGE REAL ESTATE TRANSACTIONS

For sales of real property involving more than $4 million of deferred payments, the test interest rate would be 100 percent of the applicable Federal rate.

The maximum rate for transactions subject to the 100 percent of the Federal rate would be 11 percent for the first 6 months of 1985. Thereafter, the rate could be increased no more than 50 basis points (0.5 percent) every 6 months until the rate equaled 100 percent of the applicable Federal rate.

The payments would be accounted for under the original issue discount rules.

Eighty percent of interest due under the contract would be required to be paid currently.

6. OTHER TRANSACTIONS

Transactions not meeting any of the preceding rules would have a test rate of 110 percent of the applicable Federal rate.

7. ASSUMPTIONS

Assumptions of loans originally entered into before date of enactment of these rules would be grandfathered under pre-Deficit Reduction Act rules. Sales of principal residences and vacation homes would also be exempt from the new assumption rules together with other transactions where the Secretary of Treasury determined there was no tax avoidance problem.

8. LIMITATION OF INCREASE IN RATES

If applicable Federal rate increases by more than 2 percent during a 6-month period, the imputed interest test rate generally may not be increased by more than half the amount of the increase (with a minimum of 1 percent).

If there is a significant drop in interest rates, the Secretary of Treasury may reduce the imputed interest rate to reflect the drop in rates.

Mr. DOLE. I am pleased that we were able to work out a compromise bill on imputed interest that satisfies the legitimate tax policy concerns which led to the administration's original proposal, and also satisfies the concerns of homeowners, farmers and ranchers, small businesses, and the major real estate associations that have endorsed the compromise.

I have every reason to believe the bill should also be satisfactory to Members, since it permits nonabusive seller financing to be provided on terms essentially similar to existing practice in the real estate industry, while preventing tax shelters that overvalue the tax basis of depreciable property or mismatch the timing of interest income and interest deductions.

The only remaining concern that I am aware of relates to the problem of complexity. I would like to address that concern in detail. Despite the fact that the compromise bill is long—I believe it will not be complex or difficult to apply in practice.

Although there are essentially five new rules in the bill, the vast majority of transactions will be clearly within one rule or another. And once the seller or his real estate agent knows which rule applies—the rules are relatively simple and straightforward to apply.

RULE NO. 1. HOMEOWNERS

The vast majority of homeowners selling their principal residences or vacation homes have one very simple rule to apply. Seller financing must provide for 9 percent compound interest, and interest income and deductions are accounted for on the cash basis. In the relatively infrequent case where a home is sold for more than $250,000, the required interest rate is not 9 percent but a blended interest rate somewhat higher than 9 percent. The blend is a simple arithmetic calculation that I am confident every licensed realtor and every seller of a $250,000 residence will be able to compute.

RULE NO. 2. FARMS AND RANCHES

Every farmer or rancher selling farm land or ranch property for less than $2 million also has a very simple rule to apply. The transaction must state 9 percent compound interest, and income and deductions are computed on the cash method. If the sale exceeds $2 million a blended interest rate applies involving a simple arithmetic computation, and accounting is done on the accrual method. Once again, these computations are not at all burdensome or complex in the context of a $2 million transaction.

RULE NO. 3. SMALL BUSINESSES

Any small businessman selling his business, or a separate line of business or buying out one or more of his partners also has a simple rule. The 9-percent interest rate applies, and cash method accounting applies. Only if the business is worth more than $1 million does the owner have to think about anything else. And the same arithmetic blending formula for interest rates applies for such larger businesses.

RULE NO. 4. SMALL REAL ESTATE TRANSACTIONS

For all small real estate transactions, involving less than around $1 million, the rule is also simple. State an interest rate equal to 80 percent of the Federal rate on a note no longer than 12 years, and the imputed interest rules are satisfied. That will satisfy the exception for transactions with less than $4 million of deferred payments.

RULE NO. 5. LARGER REAL ESTATE TRANSACTIONS

For sales of real estate involving more than $4 million of deferred payments—about a $1 million purchase price if all interest is deferred—there are several options, and several computations that must be done if a taxpayer wants to figure out all of his choices. But, again, $1 million real estate deals are not done today without figuring the tax consequences and the options for different kinds of depreciation and other tax benefits. So I do not believe it will be too complex to offer sophisticated real estate investors some choices on the imputed interest rules.

Mr. MURKOWSKI. I rise today in support of this amendment. By this time, we all are aware of the imputed interest provisions that are scheduled to become effective January 1, 1985, as a result of the tax legislation passed this summer. These provisions would require that sellers financing the sale of real property, with limited exceptions, must receive interest at least equal to 110 percent of the 6 month average interest rate on Federal securities of comparable maturity. If interest is not charged at this level, then the IRS will impute interest to the transactions and tax the seller as if interest equal to 120 percent of the Federal rate were received. If the new rules were effective today sellers would have to charge at least 14.3 percent interest or be taxed as if receiving 15.6 percent interest. I believe this would eliminate seller financing as an affordable alternative to conventional third party financing.

There seems to be a general agreement that final congressional action on this issue overreached the target and that the Senate never intended to

catch up in its antitax abuse net millions of routine property transactions in which ordinary Americans have no choice but to accept part of the financing role themselves. We are now presented with the opportunity to extricate ourselves from that net. We should take advantage of it.

To those who would suggest that repeal or modification of there provisions would result in substantial revenue loss, I must disagree. Those revenue estimates assume that the same number of transactions now occurring would continue under the new set of rules. This is simply not true. I have received too many letters from constituents that contradict that assumption. In fact, the suggestion has been made, that the Government may experience a revenue loss if this change is not made. This would be attributable to the fact that a certain number of the current seller-financed transactions would never occur.

Many individuals have worked hard to reach a compromise that is acceptable to the interested parties. I think this amendment strikes an equitable solution that protects both the interests of the Government and the public alike.

Mr. President, I urge the adoption of this amendment and hope that my colleagues will join me.

Mr. DECONCINI. Mr. President, I would like to confirm that I am correct in my understanding of this measure as it pertains to the reduced safe harbor test rates available to homebuilders taking back purchase money mortgages from home buyers. As I read this legislation, no interest will be imputed to the debt instrument if it satisfies the specially reduced test rate, provided that it contains a conspicious notice alerting the purchaser to possible adverse consequences to the depreciable basis of the property if it is used in a trade or business. If the homebuilder subsequently borrows against the purchase money obligation which satisfies this requirement, its deductions for interest paid or incurrred on such a loan will be limited to the amount of interest income on the purchase money obligation included in the homebuilder's income, subject to another special rule for deducting interest paid or incurred in excess of such amounts. I would like to know if I am correct in concluding that, if a homebuilder chooses to omit from a purchase money obligation the required legend concerning depreciable basis, imputed interest can, nevertheless, be avoided under certain other exceptions if the debt instrument satisfies test rates of either 80 percent or 100 percent of the applicable Federal rate and the special rules for those instruments with below market rates. As an alternative to any of these new special provisions, the homebuilder should be able to elect to apply test and imputed rates on the obligation of 110 percent and 120 percent, respectively, of the applicable Federal rate, as would currently be mandatory under the present law, and deductions for interest on indebtedness incurred to carry loans against the purchase money obligation would not be limited to the amount of interest income on the purchase money obligation.

Can the chairman of the committee assure me that this is the way the legislation will work?

Mr. DOLE. The distinguished Senator is correct in his analysis.

Mr. WARNER. Mr. President, if a home owner today sells his home and takes back a second mortgage, he is required by the Internal Revenue Service to charge at least 9 percent interest on the loan, or the IRS will treat the home seller as if he actually charged 10 percent.

As a result of passage and enactment of the Deficit Reduction Act, that same seller—after January 1, 1985—will be required to charge interest equal to 110 percent of the rate paid by the Federal Government on obligations of similar maturity.

In the case, for example, of a 10-year loan the rate would be approximately 14.3 percent.

If the seller does not charge that rate he will be treated by the IRS as if he charged the buyer 16 percent.

There are, of course, some exceptions to this rule. They include:

The sale of principle residences below $250,000; farms sold for less than $1 million; or land sales between family members below $500,000.

Mr. President, the effect of this new standard, which I opposed when it was enacted, is to severely restrict an alternative means of financing which has kept the real estate market from suffocating under extraordinarily high interest rates while promoting still higher interest rates.

The Congress should not put itself in the position of promoting artificially high interest rates.

Yet that is exactly what the imputed interest provisions of the Deficit Reduction Act will do.

The role of the Congress should be one of enabling the free market to work its will on interest rates.

If the market wants higher interest rates, that's the business of the market.

Likewise, if the market wants lower interest rates, the market should be free to move interest rates in that direction.

But the imputed interest provisions of the Deficit Reduction Act preempt the ability of the market to do that.

As a result, the imputed interest provisions impose undersirable restraints on the real estate market and foreclose for millions of Americans the opportunity to buy and/or sell their homes, farms, and small businesses.

Mr. President, I appreciate the intentions of both the Congress and the Treasury in their efforts to address capital gains abuses.

But the weapon used to combat those abuses will injure the innocent as well as penalize the guilty.

It is the shotgun approach to killing ants.

Therefore, it is imperative that Congress act quickly to undo what has been done before harm comes to those innocent victims.

That's why I joined the distinguished Senator from Idaho [Mr. SYMMS] as a cosponsor of his measure to repeal the onerous imputed interest provisions of the Deficit Reduction Act.

I support the efforts of Senators JEPSEN, SYMMS, and MELCHER, and I am grateful to the distinguished chairman of the Finance Committee to work with Senators to reach a proper agreement, curbing a tax abuse while ensuring that undue harm is not inflicted on our Nation's strong economic recovery.

The PRESIDING OFFICER. The time having expired on the amendment of the Senator from Montana, further amendments are in order but they are not debatable.

The question is on agreeing to the amendment.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk wiil call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MELCHER. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue the call of the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi [Mr. COCHRAN] and the Senator from Illinois [Mr. PERCY] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Texas [Mr. BENTSEN], the Senator from Oklahoma [Mr. BOREN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Arkansas [Mr. BUMPERS], the Senator from Florida [Mr. CHILES], the Senator from Colorado [Mr. HART], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Vermont [Mr. LEAHY], the Senator from Michigan [Mr. LEVIN], the Senator from Louisiana [Mr. LONG], the Senator from Maine [Mr. MITCHELL], the Senator from New York [Mr. MOYNIHAN], the Senator from Georgia [Mr. NUNN], the Senator from Tennessee [Mr. SASSER], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan [Mr. LEVIN] would vote "yea."

The PRESIDING OFFICER (Mr. WILSON). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 81, nays 0, as follows:

[Rollcall Vote No. 286 Leg.]

YEAS—81

Abdnor	Garn	Murkowski
Andrews	Glenn	Nickles
Armstrong	Goldwater	Packwood
Baker	Gorton	Pell
Baucus	Grassley	Pressler
Biden	Hatch	Proxmire
Bingaman	Hatfield	Pryor
Boschwitz	Hawkins	Quayle
Burdick	Hecht	Randolph
Byrd	Heflin	Riegle
Chafee	Heinz	Roth
Cohen	Helms	Rudman
Cranston	Huddleston	Sarbanes
D'Amato	Humphrey	Simpson

NOT VOTING—19

Bentsen	Hollings	Moynihan
Boren	Johnston	Nunn
Bradley	Kennedy	Percy
Bumpers	Leahy	Sasser
Chiles	Levin	Stennis
Cochran	Long	
Hart	Mitchell	

So the amendment was agreed to.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, what is the pending question?

The PRESIDING OFFICER. The pending question is the amendment of the Senator from Kansas [Mr. DOLE], as amended by the amendment of the Senator from Iowa [Mr. JEPSEN].

Mr. BAKER. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. That measure must now be disposed of before the Melcher amendment is further amendable, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, I ask unanimous consent that I may proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, let me say this: As I see the situation right now, we have two amendments that are going to be dealt with on this subject of imputed interest at this point. One of them is the Dole amendment, which is now the pending question as amended by Mr. JEPSEN. The other is an amendment that I shall offer on behalf of Mr. JEPSEN, which is identical to the Jepsen amendment just adopted to the Dole amendment, but this will be offered to Mr. MELCHER. It will be after Dole is disposed of.

It is my hope that, since we have already dealt with this issue, we can do both those things by voice vote. That does not mean that other amendments on imputed interest cannot be offered; indeed, they may be. What it does mean is that we shall have then fulfilled the requirement of the time limitation on Melcher. So any further amendment on this or any other subject would be open to debate.

Mr. President, let me at this point also say what I see in prospect for the balance of the day. What I should say, perhaps, is what I do not see in prospect. I do not see sine die in prospect, which is an aggrievement of great proportion for this Senator.

Mr. President, I am advised that the conferees on the continuing resolution will not reconvene until about 7:30 this evening. Based on the information that I have at hand, it would not appear likely that they will soon reach an agreement. I would like to be mistaken about that, but that is my best judgment at this moment.

I have spoken to the Speaker of the House, who indicates that the House will consider sending us another short conference report—I requested one that would extend through Thursday midnight—yet tonight. But it is my understanding that that cannot occur until about 8 or perhaps later.

So, Mr. President, it is my hope that we could dispose of this train of amendments—that is, Dole as amended; the amendment that I will then offer to Melcher after Dole is disposed of; then the Melcher amendment as amended. Then, Mr. President, the bill will be open to further amendment. I would not be certain, by any means, that we are going to have any further Record votes on the subject. I know that the Senator from Idaho has another amendment to offer, but I expect there will be a considerable debate on that issue.

As soon as we get the conference report from the House, the short conference report, the leadership on this side would expect to ask the Senate to take it up and to pass it, I hope, by voice vote. I hope all that can happen by 8:30 or 9 o'clock, then we shall plan to go out until tomorrow at 10:30.

That is the schedule as I now see it, Mr. President. I thank the Senate for its attention.

Mr. President, have the yeas and nays been ordered on the Dole amendment?

The PRESIDING OFFICER. They have not.

The question is on agreeing to the amendment of the Senator from Kansas, as amended.

The amendment (No. 7082), as amended, was agreed to.

Mr. BAKER. I move to reconsider the vote, Mr. President.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 7084

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I now send to the desk for the distinguished Senator from Iowa [Mr. JEPSEN] an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], for Mr. JEPSEN, proposes an amendment numbered 7084 to amendment No. 7080 by Mr. MELCHER.

Mr. BAKER. I ask unanimous consent that further reading be dispensed with.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Is there objection to dispensing with the reading of the amendment?

Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. . TAX TREATMENT OF CERTAIN DEFERRED PAYMENTS.

(a) REDUCTION IN INTEREST RATES UNDER SECTION 483.—Section 483 of the Internal Revenue Code of 1954 (relating to interest on certain deferred payments) is amended—

(1) by redesignating subsections (f), (g), and (h) as subsections (h), (i), and (j), and

(2) by striking out subsection (e) and inserting in lieu thereof the following new subsections:

"(e) Reduced Rate of Interest in Case of Certain Sales of Residences, Farms, or Trades or Businesses.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsection (b) or (c)(1)(B) shall be the rate prescribed by the Secretary in regulations but shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any of the following sales or exchanges:

"(A) RESIDENCES.—Any sale or exchange of a residence by an individual, an estate, or a testamentary trust, but only if—

"(i) either—

"(I) such residence on the date of such sale or exchange (or in the case of an estate or testamentary trust, on the date of death of the decedent) was the principal residence (within the meaning of section 1034) of the individual or decendent, or

"(II) during the 2-year period ending on such date, no substantial portion of such residence was of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of such individual or decedent, and

"(ii) such residence was not at any time, in the hands of such individual, estate, testamentary trust, or decedent, described in section 1221(1) (relating to inventory, etc.).

"(B) FARMS.—Any sale or exchange by a qualified person of—

"(i) real property which was used as a farm (within the meaning of section 6420(c)(2)) at all times during the 3-year period ending on the date of such sale or exchange, or

"(ii) tangible personal property which was used in the active conduct of the trade or business of farming on such farm and is sold in conncection with the sale of such farm,

but only if such property is sold or exchanged for use in the active conduct of the trade or business of farming by the transferee of such property.

"(C) TRADES OR BUSINESSES.—

"(i) IN GENERAL.—Any sale or exchange by a qualified person of any trade or business.

"(ii) APPLICATION WITH SUBPARAGRAPH (B).—This subparagraph shall not apply to any sale or exchange of any property described in subparagraph (B).

"(iii) NEW SECTION 38 PROPERTY.—This subparagraph shall not apply to the sale or exchange of any property which, in the hands of the transferee, is new section 38 property.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall apply to any debt instrument to the extent that the sales price does not exceed the applicable limit with respect to such sale or exchange.

"(B) APPLICABLE LIMIT DEFINED.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2)(A)	$250,000
Paragraph (2)(B)	$2,000,000
Paragraph (2)(C)	$1,000,000.

"(4) BLENDED RATE WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any sale or exchange to which this subsection applies with respect to which the sales price exceeds the applicable limit—

"(A) TEST RATE.—The discount rate under subsection (c)(1)(B) shall, in lieu of the rate under paragraph (1), be equal to the sum of—

"(i) 9 percent, multiplied by a fraction the numerator of which is the applicable limit and the denominator of which is the sales price, and

"(ii) 110 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus the applicable limit, and

"(II) the denominator of which is the sales price.

In the case of a transaction described in paragraph (2)(A), clause (ii) shall be applied by substituting '100 percent' for '110 percent'.

"(B) IMPUTED RATE.—The discount rate under subsection (b) shall, in lieu of the rate under paragraph (1), be equal to the rate determined under subparagraph (A) by substitution '10 percent' for '9 percent' and, except in the case of any transaction described in paragraph (2)(A), '120 percent' for '110 percent' each place it appears.

"(C) RATES AS ADJUSTED.—For purposes of this paragraph, if the Secretary prescribes, pursuant to paragraph (1), a lower discount rate under subsection (c)(1)(B) or (b) than the maximum rate allowed under paragraph (1), such lower rate shall apply in lieu of '9 percent' or '10 percent' in subparagraphs (A)(1) or (B), respectively.

"(5) AGGREGATION AND ALLOCATION RULES.—For purposes of this subsection, except as provided in regulations—

"(A) DEBT INSTRUMENTS.—All debt instruments arising from a transaction (or any series of related transactions) shall be treated as 1 debt instrument.

"(B) SALES AND EXCHANGES.—All sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(C) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property (or a trade or business) described in paragraph (2) with respect to which there is more than 1 owner, the applicable limit under paragraph (3) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(6) APPLICATION WITH SUBSECTION (h).—In the case of any qualified sale (as defined in subsection (h)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (h)(1) applies.

"(7) DEFINITIONS.—For purposes of this subsection—

"(A) QUALIFIED PERSON DEFINED.—The term 'qualified person' means—

"(i) a person who—

"(I) is an individual, estate, or testamentary trust,

"(II) is a corporation which immediately prior to the date of the sale or exchange has 35 or fewer shareholders, or

"(III) is a partnership which immediately prior to the date of the sale or exchange has 35 or fewer partners,

"(ii) is a 10-percent owner of a farm or a trade or business,

"(iii) pursuant to a plan, disposes of—

"(I) an interest in a farm or farm property, or

"(II) his entire interest in a trade or business and all substantially similar trades or businesses, and

"(iv) the ownership interest of whom may be readily established by reason of qualified allocations (of the type described in section 168(j)(9)(B), one class of stock, or the like).

"(B) 10-PERCENT OWNER DEFINED.—The term '10-percent owner' means a person having at least a 10-percent ownership interest, applying the attribution rules of section 318 (other than subsection (a)(4)).

"(C) SALES PRICE DEFINED.—The term 'sales price' means the sum of—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(D) TRADE OR BUSINESS DEFINED.—

"(i) IN GENERAL.—The term 'trade or business' means any trade or business, including any line of business, qualifying as an active trade or business within the meaning of section 355.

"(ii) RENTAL OF REAL PROPERTY.—For purposes of this subparagraph, the holding of real property for rental shall not be treated as an active trade or business.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) real property described in subparagraph (D) or (F) of subsection (c)(2) of section 168 (whether or not such property is of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of the purchaser),

including de minimis amounts of tangible personal property associated with such real property.

"(B) CERTAIN PROPERTY NOT INCLUDED.—This subsection shall not apply to any sale or exchange—

"(i) of new section 38 property, or

"(ii) with respect to which the transferor and transferee are related persons.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years, or

"(ii) in the case of a debt instrument issued in exchange for recovery property, ⅔ of the shortest recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(i) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued,

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of all interest accruing thereunder for that year, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL. If the applicable Federal rate determined under section 1274(d) for any period after June 30, 1985 (other than the Federal short-term rate) exceeds by more than 2 percentage points such rate for the preceding period as limited by this paragraph, such applicable Federal rate shall not exceed the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1-June 30, 1985	10.5
July 1-Dec. 31, 1985	11
Jan. 1-June 30, 1986	11.5
July 1-Dec. 31, 1986	12.

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection, all sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

(7) RELATED PERSON DEFINED.—For purposes of this subsection and subsection (g), the term 'related person' means a person who is related (within the meaning of section 267(b) or section 707(b)(1)) to another person other than a qualified 5-percent or less partner (within the meaning of section 267(e)(5)(B)).

"(g) SPECIAL RULES FOR APPLICATION OF THIS SECTION.—For purposes of this section—

"(1) APPLICATION OF SUBSECTIONS (e) AND (f).—In the case of any sale or exchange, either subsection (e) or subsection (f) may be applied, but not both.

"(2) TREATMENT OF ASSUMPTIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if, after December 31, 1984, any person—

"(i) assumes any debt obligation issued after October 15, 1984, or described in subparagraph (C), in connection with the sale or exchange of any property, or

"(ii) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(B) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(C) OBLIGATIONS DESCRIBED IN THIS SUBPARAGRAPH.—A debt obligation is described in this subparagraph if such obligation—

"(i) was issued on or before October 15, 1984, and

"(ii) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(D) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments.

"(E) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction shall be exempt from the application of this paragraph if such exemption is not likely to significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(3) FAIR MARKET VALUE RULE IN POTENTIALLY ABUSIVE CASES.—In the case of any potentially abusive situation (within the meaning of section 1274(b)(3)(B)), the principal amount of any debt instrument received in any sale or exchange of property to which this section applies shall be the fair market value of such property adjusted to take into account other consideration involved in the transaction.

"(4) SALE-LEASEBACKS.—Subsections (e) and (f) shall not apply to any sale or exchange if, pursuant to a plan, the transferor or any related person leases such property.

"(5) RULES NOT TO APPLY WHERE PREPAYMENT PROHIBITED.—Subparagraph (A) of paragraph (1) shall not apply to any obligation arising from a loan from a third-party creditor, pursuant to which the obligor is not permitted to pay the instrument prior to maturity.

"(6) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to satisfy the applicable rate under subsection (c)(1)(B), the rate under subsection (b) shall be considered equal to the rate so applicable under subsection (c)(1)(B).".

(b) INTEREST INCOME AND DEDUCTIONS COMPUTED ON CASH BASIS IN CERTAIN CASES.—

(1) IN GENERAL.—Section 1274 of such Code (relating to determination of issue price in the case of certain debt instruments issued for property) is amended by adding at the end thereof the following new subsection:

"(e) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES TO WHICH INTEREST RULES OF SECTION 483 APPLY.—Notwithstanding any other provision of this subpart—

"(1) TRANSACTIONS TO WHICH SECTION 483(E) APPLIES.—In the case of any sale or exchange to which section 483(e) applies—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any inclusion in income or deduction under this title with respect to interest on any debt instrument issued in connection with such sale or exchange shall be computed on the cash receipts and disbursements method of accounting.

"(B) SALES PRICE EXCEEDS APPLICABLE LIMIT.—In any case in which the sales price exceeds the applicable limit under section 483(e)(3)—

"(i) except in the case of any transaction to which section 483(e)(2)(A) applies, subparagraph (A) shall not apply, and

"(ii) the discount rates under subsections (c)(3) and (b)(2)(B) shall be equal to the rates determined under subparagraphs (A) and (B) of section 483(e)(4).

"(2) TRANSACTIONS TO WHICH SECTION 483(F) APPLIES.—In the case of any sale or exchange to which section 483(f) applies—

"(A) TRANSACTIONS WITH 80 PERCENT TEST RATE.—

"(i) IN GENERAL.—Except as provided in clause (ii), any inclusion in income or deduction under this title with respect to interest on any debt instrument described in section 483(f)(3) shall be computed on the cash receipts and disbursements method of accounting.

"(ii) SPECIAL RULE FOR TRANSACTIONS NOT QUALIFYING FOR 80 PERCENT TEST RATE.—Clause (i) shall not apply to any debt instrument issued in such sale or exchange if, in addition to such instrument, a debt instrument not described in section 483(f)(3) is issued in such sale or exchange.

"(B) TRANSACTIONS TO WHICH SUBPARAGRAPH (A) DOES NOT APPLY.—

"(i) IN GENERAL.—If subparagraph (A) does not apply to any debt instrument issued in such sale or exchange, subsection (c)(3) shall be applied—

"(I) in the case of any debt instrument described in section 483(f)(4), by substituting '100 percent' for '110 percent', and

"(II) in the case of any debt instrument described in section 483(f)(3), by substituting '80 percent' for '110 percent'.

"(ii) SPECIAL RULES FOR 1985 AND 1986.—In the case of any debt instrument to which clause (i) applies issued during 1984 or 1986, the discount rate under subsection (c)(3) shall not be greater than the rate determined under section 483(f)(5).

"(3) SPECIAL RULE FOR HOLDING AND TRANSFER OF DEBT OBLIGATION.—

"(A) Paragraphs (1)(A) and (2)(A) shall apply to the holder of a debt obligation only if such obligation is—

"(i) held by the first obligee of such obligation or such obligee's spouse or estate, and

"(ii) secured by the property sold or exchanged in the transaction in which such obligation is issued.

"(B) Except as otherwise provided in regulations, in the case of a transfer property by the obligor in which the obligation is not satisfied and the transferee does not become

liable to pay such obligation to the first obligee, any deduction for interest on any indebtedness paid or incurred by the transferee to the immediate transferor attributable to such obligation shall be deferred until such time as such deduction would have been allowed if such obligation had been assumed by the transferee.

"(C) In any case in which the transferee assumes or takes property subject to any obligation under subparagraph (A) or is considered to do so under subparagraph (B), the transferee shall compute the amount of the deduction for any interest on such obligation on the cash receipts and disbursements method of accounting.

"(4) SUBSECTION ALSO TO APPLY TO DEBT USED TO CARRY OBLIGATIONS.—In any case in which an obligor of a debt obligation to which paragraph (1)(A) or (2)(A) applies pays or incurs interest on indebtedness to carry such debt obligation, any deduction for such interest shall be deferred to the extent necessary to achieve a proper matching of interest income and expense.

"(5) REGULATIONS TO PREVENT ABUSE OF REQUIRED CASH ACCOUNTING.—The Secretary may by regulation prescribe rules to prevent the mismatching of interest income and interest deduction in connection with obligations on which interest is computed on the cash receipts and disbursements method of accounting.

"(6) OTHER RULES APPLY.—For purposes of this subsection, rules similar to the rules under subparagraphs (B) and (D) of section 483(g)(2) shall apply.".

(2) SPECIAL RULE FOR ASSUMPTIONS.—Paragraph (4) of section 1274(c) of such Code (relating to debt obligations to which section applies) is amended by adding at the end thereof the following new subparagraph:

"(G) TREATMENT OF ASSUMPTIONS.—

"(i) IN GENERAL.—(Except in the case of property described in subsection (e)(2)(A) of Section 483, if after December 31, 1984, any person—

"(I) assumes any debt obligation issued after October 15, 1984, or described in clause (ii) in connection with the sale or exchange of any property, or

"(II) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(ii) OBLIGATION DESCRIBED IN THIS CLAUSE.—A debt obligation is described in this clause if such obligation—

"(I) was issued on or before October 15, 1984, and

"(II) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(III) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction would be exempt from the application of this subparagraph if such exemption would not significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(iii) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(iv) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments."

(c) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—

(1) IN GENERAL.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection.

"(f) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—Notwithstanding any other provision of this subpart—

"(1) IN GENERAL.—In the case of any debt instrument described in paragraph (4) arising from a sale or exchange to which this subsection applies—

"(A) subsection (c)(3) shall be applied by substituting '80 percent' for '110 percent', and

"(B) subsection (b)(2)(B) shall be applied by substituting '110 percent' for '120 percent'.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—This subsection applies to any sale or exchange of any residence by a dealer who holds such residence as section 1221(1) property to a person who intends to occupy such residence if the sales price of such residence does not exceed $250,000.

"(B) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property described in subparagraph (A) with respect to which there is more than 1 owner, the applicable limit under subparagraph (A) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(3) BLENDED RATE WHERE SALES PRICE EXCEEDS $250,000.—In the case of any sale or exchange to which this subsection would otherwise apply with respect to which the sales price exceeds $250,000—

"(A) TEST RATE.—The discount rate under subsection (c)(3) shall, in lieu of the rate under paragraph (1)(A), be equal to the sum of—

"(i) 80 percent, multiplied by a fraction the numerator of which is $250,000 and the denominator of which is the sales price, and

"(ii) 100 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus $250,000, and

"(II) the denominator of which is the sales price.

"(B) IMPUTED RATE.—The discount rate under subsection (b)(2)(B) shall be the rate under paragraph (1)(B).

"(4) DEBT INSTRUMENT.—A debt instrument is described in this paragraph if it provides conspicuous notice to the obligor in a manner prescribed by regulations that if the obligor of such instrument places the residence in service in a trade or business the depreciation rules under section 168(f)(16) shall apply.

"(5) SALES PRICE DEFINED.—For purposes of this subsection, the term 'sales price' means—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(6) RULES RELATING TO INTEREST TO CARRY DEALER OBLIGATIONS ARISING UNDER THIS SUBSECTION.—

"(A) EXCESS DEDUCTIONS DISALLOWED.—For each year the interest expense paid or incurred on any debt incurred or continued to carry any dealer obligation shall be disallowed to the extent such expense exceeds interest income includable with respect to such dealer obligation for such year.

"(B) DISALLOWED INTEREST EXPENSE ALLOWED IN SUBSEQUENT YEARS.—For any year the amount of disallowed interest expense shall be allowed as a deduction with respect to any dealer obligation in an amount equal to the disallowed interest expense as of the close of such year (not including any amount previously allowed under this subparagraph) multiplied by a fraction—

"(i) the numerator of which is the sum of the principal payments on such dealer obligation made in such year, and

"(ii) the denominator of which is the total amount of principal outstanding on such dealer obligation at the beginning of such year.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) Dealer obligation defined.—The term dealer obligation' means an obligation arising pursuant to a transaction to which paragraph (1) of this subsection applies.

"(ii) Disallowed interest expense defined.—The term 'disallowed interest expense' means the aggregate amount of interest expense disallowed under subparagraph (A) with respect to any dealer obligation.

"(D) NO INFERENCE.—Nothing in this paragraph shall be construed to imply that any transaction described in this paragraph is or is not subject to the rules of section 453B, and any determination of such issue shall be made as if this paragaph had not been enacted.".

(d) RULE WHERE SPECIAL STATE LAW APPLIES.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(g) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to result in an adequate stated interest in the transaction, a rule similar to the rule of section 483(g)(6) shall apply."

(e) CONFORMING AMENDMENTS.—Paragraph (4) of section 1274(c) of such Code (relating to certain expected debt instruments) is amended—

(1) by striking out subparagraphs (A) and (B),

(2) by striking out "section 483(e)" and "SECTION 483(e)" in subparagraph (F) and the heading to subparagraph (F), respectively, and inserting in lieu thereof "section 483(i)" and "SECTION 483(i)", respectively, and

(3) by redesignating subparagraphs (C), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(f) DEPRECIATION.—Subsection (f) of section 168 of such Code (relating to accelerated cost recovery system) is amended by adding at the end thereof the following new paragraph—

"(16) Special rules for certain residences.—In the case of any debt instrument described in section 1274(f)(1), the original

principal amount of the debt instrument shall be deemed to be the lesser of—

"(A) the stated principal amount, or

"(B) the imputed principal amount determined by applying section 1274(f) using a discount rate of 110 percent of the applicable Federal rate at the time the debt was issued.".

(g) FAIR MARKET VALUE IN POTENTIALLY ABUSIVE SITUATIONS.—Subparagraph (B) of section 1274(b)(3) of such Code (relating to fair market value rule in potentially abusive situations) is amended in clause (ii), by striking out "or" at the end of subclause (III), by redesignating subclause (IV) as subclause (V), and by adding after subclause (III) the following new subclause:

"(IV) deferred interest, or".

(h) DETERMINATION OF APPLICABLE FEDERAL RATE.—

(1) IN GENERAL.—Paragraph (1) of section 1274(d) of such Code (relating to determinations of applicable Federal rate) is amended by adding at the end thereof the following new subparagraph:

"(E) AUTHORITY FOR SECRETARY TO DETERMINE RATE MORE FREQUENTLY.—If there is a significant decrease in any applicable Federal rate following any 6-month test period referred to in subparagraph (B), the Secretary may determine the applicable Federal rate on the basis of a more recent period (not less than 30 days) as he determines appropriate to reflect such decrease.".

(2) SPECIAL RULE FOR 1984.—

(A) IN GENERAL.—In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate of purposes of sections 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(B) PARAGRAPH NOT TO APPLY.—Subparagraph (A) shall not apply to any debt instrument to which section 483 (e) or (f) of the Internal Revenue Code of 1954, as amended by this section, applies.

(1) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 41 of the Deficit Reduction Act of 1984.

Mr. BAKER. Now, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, what is the pending question?

The PRESIDING OFFICER. The pending question is the majority leader's amendment to the amendment of the Senator from Montana.

Mr. BAKER. Mr. President, does the Senator from Montana wish to speak?

Mr. MELCHER. Yes, Mr. President.

Mr. BAKER. I ask unanimous consent, Mr. President, that the Senator from Montana may speak for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. I thank the majority leader.

I want to make sure that everybody understands what we are doing. We are incorporating the Dole proposal into my proposal, or substitute the Dole proposal for mine.

Now, at some point there will be other amendments eligible to one or the other place in this bill, or to several places. There are some points Senator DOLE has proposed with which I do not agree, although we are very close. And after discussion with the chairman, Senator DOLE, and others, I will still have the opportunity to offer some corrections on which the whole Senate can vote. So I think this is fair, and I am glad we are doing this by voice vote because we have to reach a conclusion with which everybody in the Senate can live, so that we can have this package sent over to the House and they can agree to it, whether it is on the debt ceiling or some other bill.

I thank the majority leader.

Mr. SYMMS. Will the distinguished majority leader yield to me for 1 minute?

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator from Idaho may be recognized for purposes of making a statement for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. I thank the distinguished majority leader.

Mr. President, I appreciate the plight of the majority leader.

The parliamentary situation is such that there still may be a chance to vote for a clean repeal, which would give us the opportunity next year to work out these problems.

The Senator from Idaho voted both for the position of the Senator from Montana and the Senator from Iowa. That would not preclude Senators, if the opportunity avails itself tomorrow, to vote for repeal, which would set us back to where we were from 1964 to 1984, current law. I still think it would be in the best interests of the country to come back next year and straighten this thing out.

I think the votes are here to do that, I say to my friend, the majority leader, and I understand the reasons why the Finance Committee chairman has problems. He is trying to pass a debt limit which has profound importance to the country.

I think we should understand that we may still get that opportunity, and it is the intention of this Senator to press this to a vote on this debt ceiling bill before we leave.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the distinguished Senator from Iowa may be recognized for the purpose of making a statement of not more than 1 minute in length.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, I thank the majority leader. I also wish to state that my colleagues, Senator MELCHER and Senator SYMMS, have worked side by side on imputed interest. The reason that the amendment which I have proposed is better than repeal at this point in time is that it does provide latitude for people to dispose of their property under the circumstances in the agriculture community, specifically for businesses and farms, and do so to escape the phantom tax and help young people get started. It provides that latitude. Repeal does not provide that latitude.

So I say we come back next year to work on total repeal and maybe even lower the imputed interest rate as far as I am concerned. But right now we need something which we can address and have go into effect immediately in the agriculture community.

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 7084).

The amendment (No. 7084) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, what is the pending question now?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Montana, as amended by the amendment of the majority leader.

The amendment (No. 7080), as amended, was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I indicated previously to the distinguished Senator from Idaho and others principal to this controversy that at this point it was the intention of the leadership on this side to take us off this measure and resume consideration of it tomorrow.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent there now be a period for the transaction of routine morning business until not later than 8 p.m., in which Senators may speak for not more than 10 minutes each, with the exception of the two leaders, against whom no limitation of time will apply.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, Senators should not assume that this means there will be no more votes. I hope it means there will be no more votes, but the business yet to be transacted is to pass a short continuing resolution, if and when it is received from the House of Representatives, or other matters with which we must deal.

So the fact that we are now in morning business does not necessarily mean we are free of record votes for the evening.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

Mr. MATHIAS. Mr. President, will the Senator withhold that request?

Mr. BYRD. I withhold.

The PRESIDING OFFICER. Does the majority leader wish to continue advising the Senate as to his plan?

Mr. BYRD. May I say to the Chair, I would like to suggest the absence of a quorum for just a moment.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAUL TSONGAS

Mr. MATHIAS. Mr. President, The retirement at the end of this session of the Senate of the Senator from Massachusetts [Mr. TSONGAS] is a matter of regret to me. I am particularly sad that the decision he made was based on medical advice.

On the other hand, we are all indebted to him for restoring our perspective, our sense of proportion, by identifying so clearly what is truly important in life. He has stated a table of priorities with which no responsible person can disagree. In a day when family values are often exalted in oratory and ignored in practice, he has placed his responsibility to his family in the forefront of his life. It is a powerful example for every man and woman in public life.

I shall miss him and his staff as neighbors in the Russell Senate Office Building. Even more, I shall miss the intellectual challenges that he offers. We have not always seen eye to eye on issues, but we have always worked to reconcile our different points of view and we have always come to a mutually acceptable position.

PAUL TSONGAS' commitment, concern, and patent dedication are his hallmarks in the Senate. They will accompany him in the next chapter of his career, which I hope will be as successful as his service in the Congress and even longer and more fulfilling for him.

Mrs. Mathias joins me in saying farewell and wishing happiness and success to Senator and Mrs. TSONGAS and to their children.

ASHRAF GHORBAL—THE GOOD NEIGHBOR

Mr. MATHIAS. Mr. President, the retirement of Ashraf Ghorbal as Ambassador of the Arab Republic of Egypt and his departure from Washington brings to a close a dramatic period of history. It is an era that saw a transition from virtual estrangement between Egypt and the United States to the climax of renewed relations at Camp David and the establishment of a working partnership that persists in the face of frustrations and dangers.

Ashraf Ghorbal has not only been a part of this positive change, he has been one of the principal causes of it. His role is recorded in history and is fully set out for the world to read as future generations study these tumultuous years. It would be presumptuous of me, therefore, to repeat what is so universally known and acknowledged.

What does bear repetition, however, is the story that cannot be retold too often of the courage and commitment of the three Moslem Ambassadors in Washington who showed us all how citizens of the world must act to help our neighbors, regardless of where the neighborhood may be.

Ashraf Ghorbal is the last of the three Ambassadors to leave Washington. Ardeshir Zahedi, the Ambassador of Iran, is now living as an exile from his country. Sahabzada Yakub-Khan, the Ambassador of Pakistan, is now the Foreign Minister. But when Ambassador Ghorbal takes his leave, their story will not be forgotten.

When a group that had adopted an Islamic name and style seized the national headquarters of B'nai B'rith and took a number of hostages, there was widespread concern and worry. In any form of terrorism there is always unpredictability. Fear for loss of life pervaded the Capital of the United States. All the might, majesty, power, and dominion of the world's greatest Nation was confounded by the dilemma. To stage a shootout would surely jeopardize the hostages, but to do nothing was intolerable.

Into this breach stepped the three Moslem Ambassadors. They came as friends of America, who wanted to help, and as citizens of the world, who knew that the price of civilization must be paid in every generation. They were willing to accept responsibility for their share, even though that involved acceptance of high risk and physical danger.

Without weapons, armed only with the tenets of the Islamic faith, they entered the B'nai B'rith headquarters and put themselves in the power of the terrorists. By persuasion and negotiation they brought about an end to the siege and release of the hostages. They brought a solution to a problem that had paralyzed the efforts of municipal forces and embarrassed the Nation.

Above all, they gave us an example of what is meant by brotherhood.

When Ambassador and Mrs. Ghorbal return to Alexandria to continue their lives in their own country, they will take with them many honors and many well-earned expressions of esteem and appreciation. They will certainly carry with them the wishes of their American friends for continued health and happiness.

Ashraf Ghorbal will also carry with him our recognition as our brother. He offered to lay down his life to save the lives of Americans who were in mortal danger. By that act he became our brother and we shall never forget it.

Mrs. Mathias joins me in wishing Ambassador and Mrs. Ghorbal health and happiness and the repose that they both have earned.

TRIBUTE TO SENATOR BAKER

Mr. McCLURE. Mr. President, "The great mind knows the power of gentleness," according to a verse once composed by Robert Browning.

I should like to offer today a tribute to a great mind and a great man. He has wielded his gentle power over this body and particularly over his Republican colleagues with wisdom, justice, and forbearance for 7 eventful years. I refer, of course, to our distinguished majority leader, HOWARD BAKER.

Throughout his remarkable 18-year service in the Senate, HOWARD BAKER has been characterized by that gracious, easy courtesy for which Southerners are well known.

Henry Clay, a great statesman and one of our most distinguished predecessors, once observed that "The courtesies of a small and trivial character are the ones which strike the deepest to the grateful and appreciating heart." It is for those countless small and endearing courtesies that we will always remember HOWARD BAKER. Freshman and junior Senators now becoming seasoned legislators will remember Senator BAKER for his kindly, patient help, and instruction. They will cherish the Senator's many words of encouragement during those challenging first weeks and months.

While energetic in the execution of his arduous duty, HOWARD BAKER has been ever mindful of the prerogatives of seniority and careful to preserve the dignity of his senior colleagues.

The occasional foe found in Senator BAKER a skilled and formidable opponent but an equally chivalrous and generous victor. And in defeat, few among us have been as gracious and forgiving as the Senator from Tennessee.

HOWARD BAKER has led the Senate through one of the most momentous periods in the history of our country and of the world. Never before in the long history of democratic institutions has so much depended on the wisdom, concord, and unity of purpose of 100 men and women. As minority and later majority leader, HOWARD BAKER has been a unifying force in the Senate. He has patiently composed numberless disagreements, healed deep and serious wounds, reconciled passionate foes. He has been our mirror, light, counselor, and true guide.

As he goes to a well-earned respite from the cares of Government, Senator BAKER leaves behind an exemplary record of legislation cordially enacted, a working relationship between the Senate and the President restored, and a national era of good will which he has done so much to bring about. He has brought a new meaning to the notion of comity and has managed the Senate in a manner which has earned him the gratitude of all official Washington.

I might also add, Mr. President, that all Senators are by profession listeners to and evaluators of speeches. Senator BAKER's oratory has seldom been equalled in this company of professional rhetoricians since the spellbinding eloquence of Senator, mentor, and friend, the beloved Ev DIRKSEN.

In style, Senator BAKER has demonstrated an extraordinary facility in the use of the enthymeme or "rhetorical syllogism," as mentioned by the classical rhetorician Demetrius in his text, "on style."

The enthymeme, as we all know, is a syllogism with one of its three propositions missing. The missing term must therefore come "from the heart." Senator BAKER has on countless occasions masterfully touched the hearts of his colleagues, even in the midst of passionate debate, by appealing to those unquestioned universal principles, those "touchstones," which inseparably link us together, liberal and conservative, Republican and Democrat, Northerner and Southerner.

His voice can drop in timbre from full-throated resonance to a hushed whisper. By his skillful control of the cadence of his speech, the majority leader can, at will, like Shakespeare's Prospero, control the tempest of debate and weave a spell over this Chamber which often lingers long after the leader's immediate purpose is achieved.

Like Willmoore Kendall, Will Rogers, Davy Crockett, William Faulkner, and other famous soldiers, statesmen, scholars, and humorists of his native South, HOWARD BAKER has that wonderful gift of anecdote—a heritage of the region's rich oral tradition. His abundant stock of stories, jokes, aphorisms, and lore, together with his quick wit and warm sense of humor, have supplied our deliberations with an essential leavening, an ingredient that only can come from a wise and understanding heart.

I know I speak for many here today and many long absent when I express to the majority leader our sincere and most profound gratitude for his faithful and farsighted stewardship.

TRIBUTE TO SENATOR TOWER

Mr. McCLURE. Mr. President, I rise in tribute today to the honored senior Senator from the great State of Texas, JOHN TOWER.

It is with sadness and fond remembrance that we take our leave, at the close of this Congress, of a man who has become an institution during his 23 years of distinguished service in the Senate.

Samuel Taylor Coleridge once remarked "the three great ends for a statesman are security to possessors, facility to acquirers, and liberty and hope to the people." The record of JOHN TOWER's public life reflects, accordingly, the achievements of a successful statesman.

Few men in Government have done more to promote the financial security of the people than has Senator TOWER. His work as chairman of the Financial Institutions Subcommittee of the Banking Committee has alone helped to restore the confidence of the world in the integrity of U.S. banks and in the soundness of the U.S. dollar. Senator TOWER has labored timelessly to facilitate the endeavors of thousands of aspiring entrepreneurs, whose daring and ambition provide employment for millions of Americans and provide this Nation with a standard of living unmatched in history. These outstanding men and women—the most creative, the most productive, the visionaries; in short, the best and brightest—owe a tremendous debt to one of their own, JOHN TOWER, for securing the freedom which makes their progress possible. Free enterprise has always had a true and trusted friend in JOHN TOWER.

Freedom has been menaced for half a century by a totalitarian foreign state. JOHN TOWER recognized this threat from his first days in the Senate. While others sought accommodation with tyranny through paper guarantees and dissembling "negotiation," Senator TOWER has fought for the real security that comes only with military preparedness.

Throughout the 1960's and 1970's Senator TOWER waged a heroic and often lonely battle in the Armed Services Committee to preserve as much as he could of our ebbing military strength in the face of a mortal threat, unprecedented in our history. Millions of Americans are secure and free today because JOHN TOWER was there to check and ~~~ntain the damage of a disastrous policy of unilateral disarmament so popular in this town about a decade ago. As chairman of the Armed Services Committee, Senator TOWER set about the task of restoring our neglected defenses. Today, we are well on the way to completing that restoration and providing the free world with a shield that will protect it for decades to come.

JOHN TOWER has left a legacy of liberty and hope to a generation of Americans. And while we will no longer have the privilege of having him directly at our side, we trust that this body and the great Republic which it serves will yet have the benefit of his wise counsel and clearsighted statesmanship.

For his service past and for service still to come, let us give him our salute.

TRIBUTE TO SENATOR RANDOLPH

Mr. McCLURE. Mr. President, it is my pleasure today to offer tribute to the distinguished senior Senator from West Virginia, JENNINGS RANDOLPH.

Montaigne has wisely observed that "every society has its particular forms of civility" and that "the knowledge of courtesy and good manners is a very necessary study."

Perhaps no institution in the world is so conscious of its unique code of activity; nowhere is the rule of courtesy so zealously enforced than in the U.S. Senate.

Yet freshmen Senators, scholars, veteran observers of the Senate will search in vain for a printed book of etiquette that could instruct them in the management of relations between Senators. No such publication exists. The rule of courtesy, the "forms of civility," in this Chamber are learned by example only.

Since its first session in March 1789 the Senate has always had among it a conspicuous few placekeepers, able and respected Senators who instructed by personal example their younger or less experienced colleagues in the subtle ways of representative government.

When I entered the Senate in 1972, I was fortunate to have JENNINGS RANDOLPH's example before me as proper guide to the daily conduct of legislative affairs.

Several generations of Senators, in fact, owe much of what they have learned of the business of government to the quiet tutelage of this venerable statesman during his 26 years in the Senate.

Senator RANDOLPH's great achievements in legislation to aid the handicapped, to promote and develop U.S. aviation, to extend the franchise to millions of young adults, to improve and extend our public highways, to

assist the veterans of our Armed Forces, and to make our country energy sufficient—these and other public services are too well known to all of us here today to require further exposition.

Rather, I would like to recognize my esteemed colleague for the lesson he has taught by means of the whispered confidence, the silent gesture, the humorus anecdote, the gentle rebuke, the welcome plaudit, and all of the characteristic wit and wisdom of a gentleman we will always remember with affection. JENNINGS RANDOLPH embodies the finest traditions of the U.S. Senate. He has been, and will always be, a Senator's Senator.

PRESIDENT REAGAN SIGNS THE OLDER AMERICANS ACT AMENDMENT OF 1984

Mr. RANDOLPH. Mr. President, today it was my privilege to be present at the White House when President Reagan signed the Older Americans Act Amendments of 1984 into law.

As we all know, the Older Americans Act programs are among the most effective federally sponsored and funded programs in place today enjoying broad-based, bipartisan support in both the Congress and the executive branch.

I am pleased that we are able to increase authorization levels for these activities, particularly those sections dealing with nutrition and health and employment opportunities.

Mr. President, during this current fiscal year, total funding for older Americans is set at $1.12 billion. Beginning in fiscal year 1985, funding is authorized to rise to $1.25 billion, to $1.30 billion in fiscal year 1986, and to $1.37 billion in fiscal year 1987. This represents approximately $3.9 billion to be spent over the 3-year life of this bill. In West Virginia, which ranks 15th in the Nation as the State having a very large portion of its population—approximately 341,269—over the age of 60 years, these new services and funding levels will be greeted with gratitude.

Our senior citizens nationwide deeply appreciate Federal support for Older Americans Act activities, and they are particularly pleased with this bill because it contains a new focus on growing problems not previously addressed; that is, such as elder abuse, employment needs, and services for victims of Alzheimer's disease and their families. We have only recently begun to learn about Alzheimer's disease, and we must do more and more to provide services to those victims and families who must learn to cope with a progressive, incurable disease that accelerates the aging process—Alzheimer's is not the same—but is far worse, than the advent of senility that affects many older Americans.

Mr. President, I am pleased also to note that the funding in fiscal year 1984 for the Senior Community Service Employment Program increased from $317.3 million to $319.5 million; and is authorized to increase to $335 million in fiscal year 1985—an increase of $15.5 million to provide jobs for the elderly. Older Americans, we have come to realize, want a helping hand, not a handout. The employment opportunity programs provided for under title V of the act provide instances in which our senior citizens can work a few hours each week to supplement their low, fixed incomes. In turn, these job opportunities have a vital impact on their feelings of selfworth, is a boost to their morale, and brings them a better quality of life.

According to 1982 figures, Mr. President, there are 8.2 million persons who are between the ages of 74 and 84 years in this country. There are 2.4 million persons in the United States today who are over the age of 85 years. We have come a long way toward dispelling many myths concerning old age—that we are more sickly than most, or that we are mostly feeble and not interested in participating in the daily activities of community life, or the world of work. This is not necessarily so. Older Americans—many of them in my age group—between the ages of 74 and 84—are perfectly willing and able to work. That is why I am pleased to see the increased authorization of funds that can be spent on title V of the Older Americans Act—for these, little jobs mean a great deal to their recipients—enabling them to be self sufficient and independent while at the same time contributing much to their communities.

Another problem addressed in the legislation the President signed today, is one of elder abuse. This act allows local offices on aging to operate elderly abuse prevention and intervention programs—again holding out a helping hand to those senior Americans who are at risk, and provides for counseling for the abusive family member or other caretakers of the elderly, or action where possible to remove those at risk from an environment where abuse occurs.

The bill signed into law today allows States to shift more funds between the title III supportive services and nutrition programs, from the 20 percent allowed under old law, to 27 percent in fiscal year 1985, 29 percent in fiscal year 1986, and 30 percent in fiscal year 1987. States will be able to use 5 percent of their total title III allotment, or $300,000 whichever is greater, for administration—representing a major change from current law. Currently, Mr. President, State administration is a separate "line item" appropriation within the Labor, HHS, and Education appropriations bill. Under this new arrangement, State administration would be funded out of the title III allotment.

Mr. President, I have highlighted only a few of the new provisions in the Older Americans Act, but I would be remiss if I did not congratulate the Members who drafted and perfected these amendments for requiring that proposed regulations to implement the new act must be issued within 120 days of enactment, and that regulations must be finalized within 90 days after publication of the proposed rules. This will allow appropriated funds to flow more freely and quickly to the States so that essential services can and will be provided to eligible older Americans without undue and unwarranted delays.

Mr. President, I was a cosponsor of S. 2603, the bill enacted by Congress and signed by the President today. I take this opportunity to commend my colleagues on the Committee on Labor and Human Resources for this effort, representing as it does many long hours of hard and dedicated work. I particularly commend the ranking minority member of the Subcommittee on Aging, Mr. EAGLETON of Missouri, as well as the subcommittee chairman, Mr. CHARLES GRASSLEY of Iowa. Of course, we owe our thanks to the chairman of the full committee, Senator ORRIN HATCH, and the ranking minority member EDWARD KENNEDY of Massachusetts for reporting S. 2603 favorably, and recommending its passage by the full Senate. Their sincere commitment to the needs of an aging population is well-known, and deeply appreciated by everyone at the Federal, as well as the State levels, where this work must go forward every day in accordance with the intent of the legislation to serve, and to serve equitably and well, the older citizens of the United States who are eligible for and who desperately need our assistance.

By February of next year the proposed rules implementing these programs should be published in the Federal Register, and by April the final rules should be in place for driving the funds to the States where those who are eligible can be assisted through these Federal efforts on their behalf. I am leaving the Senate in January 1985, and I will not be a part of the process when the new act, which I witnessed being signed into law today, becomes effective. Although I am retiring from congressional service, I am not retiring from the world of work or the activities of the citizens of West Virginia on behalf of the elderly, or from the ongoing activities of life in Washington. I am pleased to be living proof that the usual myths of aging are myths—in that even though I will reach the age of 83 soon after my retirement next year, I am far from re-

tiring from the everyday activities of life.

ADDRESS AT CLEMSON UNIVERSITY BY NANCY HARVEY STEORTS, CHAIRMAN OF THE U.S. CONSUMER PRODUCT SAFETY COMMISSION

Mr. THURMOND. Mr. President, in an address on Friday, October 5, 1984, at Clemson University in my State of South Carolina, Nancy Harvey Steorts, Chairman of the Consumer Product Safety Commission [CPSC], has set forth a detailed policy of Government, business, and consumers working cooperatively to achieve the goal of consumer safety in the American marketplace. It is a policy which has developed at CPSC during the last 3 years when Chairman Steorts has led the agency, producing more results with less resources and, perhaps more importantly, more cooperation with less confrontation. As she has stated in her address, it has begun a new era of partnership with benefits accruing to each American. I commend her for her foresight and perseverance in developing such a concept and practice of regulatory effectiveness.

Mr. President, Chairman Steorts made her remarks last Friday at the Strom Thurmond Institute for Government and Public Affairs at Clemson and I am highly pleased that she could deliver this informative policy address at the institute which bears my name.

In addition to her speech, Chairman Steorts has also written an article which was published recently in Directors and Boards magazine, even more extensively setting forth this new policy of cooperation and effectiveness in behalf of all consumers.

Mr. President, in order that my colleagues may have the opportunity to review both her address and the article which she has written on this important subject, I ask unanimous consent for the text of both the address and the article to be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

"CONSUMER PRODUCT SAFETY: A PUBLIC POLICY ISSUE"

(By Nancy Harvey Steorts)

THE CONSUMER PRODUCT SAFETY COMMISSION IN A NEW NATIONAL ENVIRONMENT

I am very pleased to have this opportunity to share with you my experiences and views as Chairman of the U.S. Consumer Product Safety Commission.

Since becoming Chairman in 1981, I have witnessed and been part of dramatic changes in the Commission's approach to protection of the American consumer. During this past three years, a new more positive, open and constructive relationship among the consumer, business and government has evolved. In and of itself. this new relationship is very significant.

But, perhaps more importantly, it reflects a change in national attitude, a maturing of American consumerism and a new willingness of American business and government to communicate and cooperate.

GOVERNMENT-BUSINESS COOPERATION: AN AMERICAN TRADITION REBORN

In characterizing the relationship between the U.S. Consumer Product Safety Commission and American business over the past three years, the words which always come to mind are "communication" and "cooperation."

From its inception, the U.S. Consumer Product Safety Commission had been too often cast in an adversarial role in its relationships with American business and industry. Too often, it was assumed that this independent regulatory agency and those whom it regulated were "natural enemies" with no common purpose.

As we entered the decade of the 1980's the time had arrived to question that basic assumption. Whether because of enlightened self-interest or a genuine concern for the American consumer, American business had come to learn the marketing advantages of safer consumer products.

A NEW PARTNERSHIP IN THE REAGAN ERA

President Reagan set the tone and provided the framework for a new cooperative relationship between government and business while simultaneously maintaining the paramount importance of consumer protection.

The time was right for the growth of a new partnership among business, the consumer and government. I am happy to report that this new approach has worked because, for the most part, business has made a new commitment to safety; because government has been willing to listen; and, because the consumer has a new sense of confidence in both business and government.

While this new partnership represented a dramatic departure from the government's approach to regulation of the immediate past, it also symbolized a return to philosophy of government-business compatibility espoused in colonial America.

EROSION OF THE COOPERATIVE APPROACH

Last year, I had the privilege of chairing a seminar on "Business, Government, and Public Policy" during the Third Annual Donald S. McNaughton Symposium at Syracuse University.

As part of this seminar, Bruce L.R. Smith of Brookings Institution pointed out that, in its early days, our nation took a posture which fostered cooperation between business and government. That philosophy was subsequently eroded by social, political and economic trends.

It was Alexander Hamilton who early on laid out a blueprint for a partnership between business and government in his "Report on Manufacturers."

THE IMPACT OF AMERICAN INDUSTRIAL GROWTH

As Smith points out, in the 19th Century and the early part of the 20th Century, a new pattern of business-government relations emerged as the Social Darwinists entered the picture. It was during this period that William Graham Summer developed his doctrine of "business survival of the fittest" and the concept of laissez faire capitalism became popular.

It was during this period that the nation's giant corporations were experiencing their most dramatic growth. America's industrial complex had been formed and big business was becoming the foundation of the nation's economic structure. Not only was the business-government partnership being brushed aside, but the stage was being set for a new relationship, one in which the government and business would be at odds.

Journalists aroused the ire of the nation's citizenry by spotlighting the abuses which grew up along with the new industrial America. Government stepped in with legislation and regulation designed to control American business.

SEPARATION OF BUSINESS AND STATE DOMINATED THIS CENTURY

The gap between government and industry had grown wider and there arose a new relationship in which partnership was replaced by confrontation. The fact that this pattern existed for at least six decades helps explain the signficance of the new cooperative business-government relationship which we are now witnessing.

The technological revolution which began after World War II and which has accelerated ever since spawned a new breed on consumerism, fanning the flames of the adversarial relationship which had grown up between business and governement.

Technology began delivering new, more complex and more diverse products. Consumers began to feel that they needed help in making wise decisions in the marketplace.

But, just as importantly, technology gave rise to a revolution in communication. Mass marketing of products reached new levels of effectiveness. And, activists quickly gained access to a net network of instantaneous, national communication, primarily television.

THE TURBULENT 60S: A NEW ERA

At the Consumer Product Safety Commission's National Conference for Retailers last week, Virginia Knauer, Special Adviser to the President for Consumer Affairs, put this into perspective when she described the mood of the American consumer during the 1960s.

She said, "In the field of consumerism, distrust between the public and business was rampant. All the faults—and there were many real ones—were magnified by the television camera—and picket lines by protesting consumers were not unusual sights. The public was concerned about shoddy and unsafe products, warranties that offered little or no protection and about the 'runaround' from business."

It was a group of housewives in Denver that captured the attention of this nation's consumers when they called for a national boycott of beef in 1966. Their message spread overnight and the new battle lines between the consumer and business had been drawn.

THE CONSUMER PRODUCT SAFETY COMMISSION IS BORN

It was in this atmosphere that our Federal government formed a national commission to address the problem of consumer product safety. One of the outgrowths of this two-year study group was the establishment of the Consumer Product Safety Commission.

In justifying the creation of the Consumer Product Safety Commission, the report of the group stated that "* * * hazards must be controlled and limited not at the option of the producer but as a matter of right to the consumer. Many hazards described are unnecessary and can be eliminated without substantially affecting the price to the consumer."

With this as its credo, and amidst the business-government-consumer tensions which prevailed, the Consumer Product Safety Commission was born on October 27, 1972.

Perhaps as a product of its roots or perhaps as a reflection of the mood of the era, in its early years, the Commission took an adversarial stance toward business. Its emphasis was on mandatory decrees and litigation of violations.

THE BALANCE REDRESSED: FORD AND REAGAN

When President Ford initiated a series of deregulation efforts in the mid-1970s, the groundwork was being laid for a new, healthier relationship between government and business. This trend culminated under President Reagan, who took the process one step further. He called on the states and the private sector to be equal partners with the Federal government in developing solutions to public needs.

Nowhere is the wisdom President Reagan's approach more evident than in the achievements of the Consumer Product Safety Commission on behalf of the American consumer during the past three years.

In 1981, the Commission embarked on a new course characterized by communication and cooperation. The Commission has opened up, its activities are focused and its serves as a catalyst for voluntary action by American industry.

A NEW APPROACH TO THE CPSC MANDATE

Although the Commission's philosophy and approach have changed, its congressional mandate to protect the consumer from unreasonable risk of injury associated with consumer products has not changed.

The Commission administers five safety laws: The Consumer Product Safety Act; The Federal Hazardous Substances Act; The Flammable Fabrics Act; The Poison Prevention Packaging Act; and, the Refrigerator Safety Act. It has jurisdiction over 15,000 generic consumer products.

As a direct result of its programs, thousands of accidents, injuries and deaths have been averted and billions of dollars have been saved. However, its job is far from complete.

Every year, consumer products are involved in the deaths of 28,000 Americans and injuries to 33-million others. The annual cost of these accidents is a staggering $12-billion.

MEETING THE CHALLENGE: COMMISSION PROGRAM

The Commission strives to reduce this annual toll in five ways:

1. By working with industry in the development of voluntary standards;

2. By recalling products from the marketplace;

3. By issuing packaging or labeling requirements;

4. By issuing bans or creating mandatory standards; and

5. By informing and educating consumers on the safe use of products.

As I indicated, I prefer and emphasize voluntary, cooperative action before using the regulatory power of the Commission. However, because consumer product safety is the Commission's overriding concern, we do not hesitate to regulate when an industry or manufacturer does not respond. When we regulate, we regulate fairly by taking into consideration the needs of the consumer as well as the limitations of industry.

OPENING UP THE COMMISSION

As John Naisbitt said in his book Megatrends, "People whose lives are affected by a decision must be part of the process of arriving at that decision." The lines of communication between the Commission and the consumer and industry have opened up in specific, programmatic ways, such as outside involvement in the Commission's priority setting national conferences, open meetings and special meetings.

1. Priority-setting

Last year, the Commission held its first public meeting on priority-setting, soliciting the views of a wide range of consumer and industry representatives. This input was invaluable to us in charting the future course of the Commission and setting the national agenda for consumer product safety.

2. Open meetings

I believe that it is crucial for the Commission to get direct, unfiltered information. For this reason, I insist on meeting directly with chief executive officers, not the legal officers of industry. Many CEO's make presentations before the Commission; and the improved communication and understanding have resulted in the more efficient resolution of problems in an atmosphere of cooperation.

3. Public participation

A major change in the Commission's meeting policy permits members of the public to participate in policy issue discussions on a case-by-case basis.

4. Special meetings

In addition, the Commission has special meetings with consumers and industry to allow for the exchange of views and information.

BUSINESS IS RESPONDING: SAFETY IS GOOD BUSINESS

Business is responding to these new opportunities to communicate more openly and more effectively with the Consumer Product Safety Commission. Manufacturers and industries find that it is much better to work with the Commission than against it, especially in view of the trend of increasing consumer demand for safety.

The Food Marketing Institute study

A study conducted earlier this year for the Food Marketing Institute provides evidence of the importance of quality and safety in today's marketing program, Robert O. Aders, President of the Institute, has said that the study clearly shows that consumers are demanding excellence in the products they purchase and that they shop until they find that excellence.

The Whirlpool study

A landmark study conducted for the Whirlpool Corporation noted that when making judgment of the quality of manufactured goods, consumers place safety at the top of the list of indicators. Some 80 percent of Americans named safety as an always important indicator, Safety was followed by workmanship (74 percent) and materials (66 percent).

Consumer Federation of America findings

Further, research done for the Consumer Federation of America indicates that while product safety may be somewhat of an intangible, it is an important factor in a consumer's decision to buy a product. If consumers have doubts about the safety of a product, sales decrease; and, because consumers will be demanding more consumer product safety information, they will increasingly buy the products of those manufacturers and retailers who emphasize consumer information and education.

The corollary to these findings is that the manufacturer whom consumers identify with excellence and safety already have a definite marketing edge in this new ERA of consumerism.

While there are many case studies I could cite to illustrate this point, there are two which I feel deserve our attention and recognition.

The General Electric Answer Center

The first is the General Electric Answer Center, a 24-hour toll-free information service. The Answer Center employs 150 trained specialists, handling calls for not only major appliances, but all GE consumer products. Consumers can ask questions about the use, installation and maintenance of products and even do-it-yourself advice.

According to Mr. Roger W. Schipke, Senior Vice President and Group Executive of the General Electric Appliance Group, consumers have responded. The Answer Center gets an average of 8,000 calls a day, seven days a week. Mr. Schipke reports that since the Answer Center opened two years ago, it has handled over 3-million calls with a prefect safety record, not one injury resulting from any form of the Center's do-it-yourself advice.

General Electric has opened its doors to consumers through its Answer Center. The information it provides consumers is valuable in itself but the underlying message is even more important. Through its Answer Center, GE is showing its sense of corporate responsibility to the American consumer. It is hard to imagine that this would not be a factor in the purchasing decisions of the consumers it has reached.

The chain saw industry

A second example which comes to mind is the chain saw industry. Every year, there are more than 23,000 injuries and 12 deaths resulting from the rotational kickback of chain saws. We worked with that industry to develop new safety standards to minimize this problem.

I am happy to report that in March, 1985, the new standard for low-energy chains goes into effect. It is anticipated that 80 percent of these kickback injuries and possibly all of the deaths will eventually be eliminated as a result.

More significant is the fact that four of five chain saws already meet this new standard. And, some companies which launched pioneering information and education campaigns on the safety aspects of chain saws gained a market advantage. Their efforts to have consumers retrofit older chain saws with the new, safer chains have been outstanding.

THE NEW STATUS OF PRODUCT SAFETY

Why is American industry now taking actions such as these? Because the importance of product safety has been upgraded in the mind of today's corporate executive. Product safety is no longer an esoteric, technical issue in American industry. There is a clear trend to make it part of the overall management agenda, moving it from the technical laboratory to the CEO's desk and the boardroom.

This trend signals a new era for consumer product safety and an environment in which the Consumer Product Safety Commission can work in a more fruitful manner with both industry and the consumer. There is growing and convincing evidence that we can achieve so much more for the American consumer when we work together.

None of the three partners in this relationship can do it alone. Should government try to solve these problems without the involvement of industry, the process would be expensive and inefficient. A case-in-point is the ongoing consumer information and education programs of the Commission.

COOPERATIVE INFORMATION AND EDUCATION

During the past three years, the Commission has conducted several high-impact information and education campaigns in cooperation with industry, consumer and volunteer groups and state and local governments.

Electrical safety awareness

Our most recent success story in this regard is the National Electrical Safety Awareness Campaign, launched in February of this year. We wanted to reach consumers with vital information on the safe use of electricity in their homes.

Each year, 600 Americans are electrocuted in and around their homes; some 205,000 residential fires of electrical origin cause 1,100 deaths and an estimated 16,300 injuries. Property losses total about $950-million from such fires.

The goal of the program was to have consumers check the electrical safety of their homes through the use of a room-by-room checklist developed by the Commission.

To date, more than four million of these checklists have been distributed to American consumers. And, government has not footed the bill. Most of these checklists have been printed and distributed by business and industry at their own expense.

More than 70 organizations, including trade associations, consumer and volunteer groups, fire organizations, state and local governments and businesses were actively involved. The 500,000 member General Federation of Women's Clubs lent major support to the campaign, with many local affiliated clubs reproducing the document at their own expense.

Several companies reprinted the checklist and distributed it to their employees and customers; and, most recently, daily and weekly newspapers have printed it as a service to their readers.

The smoke detector program

In a similar effort, the Consumer Product Safety Commission cooperated with nearly 1,600 communities, 26 states and scores of businesses and volunteer groups in a program to place smoke detectors in American homes.

By joining forces, we were able to have 1.5 million smoke detectors installed in low income homes; and, countless more were installed as a result of the information and education aspects of this campaign.

A partnership? Yes! But, more importantly, an indication that it is possible for government to serve as a catalyst and an equal partner in cooperative efforts to meet public needs.

THE CHANGING ROLE OF THE REGULATOR

Partnerships, Cooperation, Communication. It may strike you as being somewhat incongruous with the role of the head of a Federal regulatory agency. You may ask, as others have, if there is not an inherent danger in conciliatory relationships between the regulators and the regulated.

But the greater danger is insulation of one from the other. Consumerism is a force with which American business has reckoned; and, American business is increasingly recognizing its responsibility to the American consumer and the advantages of being responsive.

Under the conditions, to attempt to improve consumer product safety within a Federal regulatory cocoon would not be cost-effective for the American taxpayer nor efficient for the American consumer.

In the vast majority of cases, our new approach has worked. Millions of products have been voluntarily recalled; safety standards for scores of products have been upgraded; and consumer information and education has been improved and increased.

WHEN REGULATION IS NECESSARY

However, the Commission has encountered resistance and lack of responsiveness by some manufacturers and industries. When it has, it has acted in the best interests of the consumer.

We have made great progress through the development of voluntary standards. For example, the Upholstered Furniture Action Council has worked with the Commission in developing furniture far more resistant to ignition of a smoldering cigarette, which is the single most frequent cause of fire death.

Voluntary standards for lawn mowers are beginning to reduce the thousands of injuries associated with these products in the past.

While the voluntary approach has worked in most instances, the Commission has had to issue mandatory standards, ban products or require certain labeling and packaging. However, it has used these regulatory powers only after encountering a lack of cooperation or an inability by manufacturers and industries to solve the problems themselves.

THE RETAILER AS THE MISSING LINK

The emphasis of the Commission has most definitely been on manufacturers. We recognize that to solve the problems we face, everyone on the consumer product safety chain must be involved.

The missing link in this chain is the retail industry; and, we are now taking steps to build that link by developing a cooperative program with retailers, similar to the one we have with manufacturers.

At the first National Consumer Product Safety Conference For Retailers held in September, we began the process of communication and information which is essential to the success of this new initiative.

Frankly, I was very impressed by the retailers' presentations at the conference. Many have well-established, sophisticated consumer product safety programs. We need retailers if we are to make even further progress in consumer product safety.

We want retailers involved in our major consumer information and education campaigns; we need retailers to make product recalls more effective; and, we will help retailers meet their legal responsibilities to report potential product hazards.

A GROWING COALITION

The Consumer Product Safety Commission is now extending its hand to retailers as the last important group to be brought into the new fold.

This coalition we have formed with the American consumer and American business will be a powerful force in achieving consumer product safety. There will become discord and differing points of view but we will continue to have the opportunity to listen to and understand one another.

REDISCOVERING THE COOPERATIVE PHILOSOPHY

Business-Government cooperation may not be the simple proposition it was when Alexander Hamilton wrote his "Report on Manufactures." The implementation of the principle is certainly more complex in technical, political, social and economic terms.

Our return to a philosophy which emphasizes communication and cooperation over litigation and confrontation is yielding benefits for all three members of our new partnership: the consumer, business and government.

The record of the Consumer Product Safety Commission during the first half of this decade symbolizes a rebirth of an American tradition. Our goal of "safer products, safer people" is being realized. I know that our nation will be stronger as a result.

NEW DIRECTIONS IN PRODUCT-SAFETY REGULATION

(By Nancy Harvey Steorts)

The book "Megatrends" by John Naisbitt, which has been on the best-seller lists for a year, is being compared by some critics to such influential books as "The Organization Man" and "Future Shock." Of personal interest to me is the fact that several of the ideas expressed in this book parallel my own. For example, in a chapter that outlines the current movement away from representative democracy and toward a participatory democracy, Naisbitt voices a philosophy that applies to the new era of product-safety regulation: "People whose lives are affected by a decision must be part of the process of arriving at that decision."

Here are 10 related trends that I see occurring in the field of consumer product-safety regulation—which I call my reg-u-trends for the corporate executive of tomorrow.

1. A NEW STATUS FOR PRODUCT SAFETY

The first major trend I see is the upgrading of the importance of product safety in the minds of corporate executives: It has moved from the technical level to the executive level—out of the research laboratory and into the boardroom. In years past, product safety was solely the province of the scientists, the engineers, and the product designers. This is no longer the case. Instead, it is now frequently the primary concern of one of the major officers of the company: sometimes a vice president in charge of quality control or consumer affairs, and often a chief executive officer.

No doubt the consumer movement that began in the 1950s served to raise the corporate consciousness about the need for product safety, a fact that was driven home by the creation of the Consumer Product Saftey Commission 10 years ago. The development of "Nadarism" and the subsequent increased emphasis on litigation have made the executive painfully aware of the meaning of product liability.

I have seen numerous examples of companies taking the responsibility for safety testing and for incorporating safety in production. A toy-manufacturing company, Fisher-Price, tests each of its products before it leaves the factory. At Carrier Corp. safety is made a vital part of an extensive quality-control program that double-checks safety factors at each stage in the manufacturing process. Celanese Corp. has put out a booklet titled "Product Safety: It's Everybody's Business." In the introduction are these important statements: "Product safety is on the very cutting edge of social responsibility. The product-safety program at Celanese is the focal point of the corporation's overall commitment to health, safety, and environmental protection. . . . Product safety is more than just complying with the law or

being a good corporate citizen. It also makes good business sense."

Conscience of the board

The safety issue, whether it is product safety, food safety, airplane safety, or whatever, should be a part of the overall management agenda of the corporation. I also think it should be a part of the agenda for corporate boards of directors. The board represents different publics, and I feel very strongly that there should be directors who can be the conscience of the board on safety issues. There are directors who have this expertise and there are those who don't, but it is extremely important that the public concern for safety be on the board agenda on a continuous basis.

2. BALANCE OF CONSUMER/BUSINESS NEEDS

As with many new movements, the initial consumer movement was excessively one-sided. Because of this the Consumer Product Safety Commission, a child of the marriage between consumerism and big government, was born with an adversarial chip on its shoulder. A confrontational relationship was quickly established between the agency and the business community. The thinking went something like this: The consumer could do no wrong and the manufacturer could do no right. By the same token, industry and business felt that a government agency created to regulate them could not contribute anything to the development of a better product.

Fortunately, these attitudes are changing, and I am doing everything in my power to foster a nonadversarial relationship. Today we are in an era of cooperation. Cost-benefit analyses are now part of the decisionmaking process, and bottom-line considerations are being taken into account without overlooking the needs of the consumer. Much more can be accomplished if there is a three-way balanced partnership among the producer (manufacturer), the protector (the commission), and the purchaser (consumer). This has been a guiding principle during my years as chairman and will continue to be.

3. OUT WITH THE LAWYERS

In his book Megatrends, Naisbitt points out that "Lawyers are like beavers: They get in the mainstream and damn it up." When I first came to the commission I was criticized for seeking to get rid of the lawyers. Early in my chairmanship I said that I felt it was much more important for the commission to deal directly with corporate executives, rather than through lawyers or third-party representatives.

It is my preference that when there is a problem and an industry needs to come before the commission, the executives should come in person and not be represented only by their lawyers. I find that much more can be accomplished if the executives who make the decisions—the marketing, design, advertising, consumer affairs, and technical representatives—are present to hear our side and for us to hear their position. In addition, and maybe most importantly, no time or meaning is lost in the translation. The actions of Johnson & Johnson in involving top management to resolve a serious product-safety problem represent what I consider the epitome of corporate responsibility. (See sidebar on page 31.)

$25 million settlement

Industry is facing extremely expensive product-liability suits today. Consider, for example, the $25 million out-of-court settlement against Robertshaw Controls Co. because of a gas valve that did not work. Large awards and expensive litigation are facts of life and will continue in the future. Consumers know that they can use the courts and they will use the courts. It's up to the corporate executive to know that if there is a problem with a product he must resolve it immediately, either by getting it out of the marketplace or by correcting it. To sit around and play litigation games is not the way to act.

4. SHARING OF INFORMATION

I believe that no one can work effectively—in government or in industry—if he does not have all the information. Shortly after coming to the commission I learned that the consumer complaints we received were not being sent on to the manufacturers concerned. The complaints were being stored up in our data-collection system, and not shared with industry.

I felt that this was unfair. The company producing the product should know what we know, as soon as we know it. In this way they have a chance to deal with the situation immediately—evaluate it and respond to it voluntarily. If the consumer takes the time to write a letter or to make a phone call, the corporate executive should take the time to see it as an early warning of something he may need to address and to handle it.

Advisory letters to chairmen

Consequently, the commission has instituted several changes so that manufacturers will be getting consumer complaints expeditiously. Advisory letters are going out over my signature directly to the chairman or president. Additionally, and for the first time, companies will also be receiving copies of any in-depth investigations that the commission undertakes.

Just as we are trying to let industry and business know about the complaints that we are receiving, industry should let us know when it discovers a problem. Improved reporting under Section 15 of the Consumer Product Safety Act, which requires producers to report to the commission product defects that could create substantial product hazards in a timely fashion is a priority project of the commission for 1984. The fine for not reporting properly can be as much as $500,000. We will increase our efforts to identify hazardous products that should be removed from the market and recalled from consumers, and we will develop additional sources of information concerning products that may present substantial product hazards.

I also ask that when a company has been doing research on a product problem, this information be shared with us. In spite of many fears and the naysayers who contend otherwise, this can work, and it has. Here are two examples:

The commission and the kerosene-heater industry worked on a joint project to study pollution emissions and fire hazards. As a result, important provisions of the existing voluntary standards will be upgraded. Over the eight months the study was conducted, the industry and the commission staff shared what they knew at every step.

The American Gas Association, the American Gas Association Laboratories, the Gas Research Institute, and the manufacturers of gas-fueled appliances have agreed to form a task force with the commission to study consumer exposure to emissions from unvented gas space-heaters and their health consequences.

5. THE FOOD AND DRUG INITIATIVE

In many respects, the food and drug industries have led the way on the innovative consumer-oriented issues—for example, in the development of nutritional labeling with substantial consumer information. The food industry had leaders like Bill Smithburg at Quaker Oats and Jim Ferguson at General Foods who understood that they had to address these issues.

I have also noticed a change when food and drug corporations take consumer-product companies under their corporate umbrellas. When this happens an interrelationship develops, particularly in the areas of quality control and hazard analysis, as many of the high performance standards used for food and drugs are also applied to consumer products.

6. THE BOTTOM-LINE BENEFIT OF CONSUMER INFORMATION

In addition to the development of safer products by change of design, I firmly believe in the need for adequate consumer education and information. After all, the vast majority of safety problems are created by consumer misuse rather than by product fault. It has been theorized that only 20 percent of the problems with unsafe products can be dealt with through government regulation.

Application of information

The commission has addressed several product-safety problems specifically through information and education—creatively and effectively:

One of our priority projects for 1983 was a highly successful smoke-detector campaign, because smoke detectors provide an early-warning system when fire strikes. Another was our electrical safety awareness program. Over 1.6 million electrical safety audit checklists have been distributed through public/private-sector cooperative programs.

The commission has had meetings with representatives of the mesh-sided-crib industry, the chainsaw industry, and the gas-valve-control industry. All three are developing consumer-information programs as a technique to reduce or eliminate death and injury associated with their products.

A study conducted for Coca-Cola Co. in cooperation with American Express Co. supports my philosophy on consumer information. This study is the first report to demonstrate that education programs can be a cost-effective way to improve corporate image and brand loyalty. Briefly, here are some of the findings:

Confidence in the sponsoring company increases;

There is an indication that more of the sponsoring company's products will be purchased;

The sponsoring company enjoys the benefits of a better educated consumer base;

The findings also suggest a behavioral change can be achieved by consumer-education campaigns.

There is outstanding opportunity today for corporate America to conduct educational programs in cooperation with the public sector. Suggestions should be coming forward from top management and the board.

7. THE NEED TO SELL SAFETY

Closely aligned with the need for consumer education and information is what I describe as the need to "sell" safety. I firmly believe that safety features of a product will help sell it if the product is marketed properly.

Manufacturers and retailers need to look at their preconceived ideas of why a customer selects one product over another. For a very long time price has been believed to be the prime consideration, followed by color, brand name, convenience, status, etc., in one order or another. However, times have changed. These traditional tyrants of product selection are being replaced by a combination of new factors, with safety a prime consideration.

This is borne out in a unique national study conducted by Research & Forecasts Inc. for Whirlpool Corp. Titled "The Whirlpool Report on Consumers in the 80s: America's Search for Quality," this study noted that when making judgments of the quality of manufactured goods, four characteristics are said to be important all the time by more than half of all Americans. At the top of the list is safety: 80 percent of Americans named safety as an always important key indicator of quality. Safety was followed by workmanship (74 percent), and materials (66 percent). Incidently, a high price was considered a key indicator of quality by only 24 percent of those polled.

The truth is that safety features add value to a product. Instead of burying this information, the manufacturers and the retailers should promote it. Many consumers will pay more if they are aware that they are buying a safer product.

8. THE MISSING LINK: THE RETAILER

In the past, consumer-product safety has been though of primarily in terms of manufactures. This is consistent with the old idea that product safety is only a technical/design concern. As I see it, the only way to fully achieve product safety is to bring the retailer in closer.

I intend to get the retailer more involved in this aspect of merchandising. Safety should feed straight through the entire merchandising process. The retailer is the manufacturers' consumer. It is the retailer that can ensure that only safe products reach the marketplace.

Retailers' persuasive power

It is a matter of buying power. One excellent example, of retail cooperation recently came out of a meeting with executives at Macy's. In response to a compliance letter regarding noncompliance sleepwear, the president, Herbert Yalof, came to a meeting in my office. As a result of that meeting, Macy's is going to create a training tape for its buyers and assistant buyers. In addition, a training tape for all members of the National Retail Merchants Association is being developed.

The retailer will have an effect particularly if he takes upon himself the responsibility to be sure—to test—to see that the products he buys are safe. Additionally, if this happens manufacturers will probably be much more careful in adhering to safety standards.

9. LOCAL/WORLD INTERRELATIONSHIP

According to Naisbitt, one of the current megatrends is a change from a national economy to a world economy: We must now adjust to living in a world of interdependent communities. The burgeoning international trade in goods is giving rise to new consumer concerns.

This is already evident in the field of consumer-product safety, where America is looked to as the world leader. With just a few exceptions, we have the best and strongest consumer-product safety standards in the world. From talking to representatives, I know that many American assocations are working closely with foreign manufacturers to bring them up to date on what is being done in this country. This is particularly true with toys, chainsaws, and kerosene heaters. But more still needs to be done to bring the importer into the safety circle.

Last year I was invited to speak in both England and Sweden about the Consumer Product Safety Commission and how it works. In response to this quest for knowledge about product safety, I have initiated briefings for embassy trade officials to keep them informed about consumer-product safety. A new global interrelationship is developing, and safety is, again, a prime consideration.

Made in the U.S.A.

Recently, the commission affirmed its existing export policy under the Consumer Product Safety Act and the Federal Hazardous Substances Act. I voted to retain this policy because I feel that in the minds of the people of the world, "Made in the U.S.A." stands for quality and safety, and this should never be compromised to any degree.

10. THE IMPORTANCE OF INVOLVEMENT IN PRODUCT SAFETY

As my final reg-u-trend, I return to the point made in the beginning: namely, Naisbitt's assertion that, "People whose lives are affected by a decision must be part of the process of arriving at that decision." I have related my insistence on involving corporate executives in meetings concerning problems with their products, and the ways in which changes have been made in the distribution of consumer complaints. Here are two other examples of consumer and industry involvement:

On June 27, 1983, the commission held its first public meeting on setting priorities, obtaining input from outside the agency regarding priority projects for fiscal year 1985.

On July 29, 1983, the commission voted 5-0 to change its rules on public participation. Prior to that date members of the public were allowed to attend commission meetings, but their attendance was limited to observation. The rules stated flatly that attendance "shall not include participation." In fact, to allow the June meeting, the commission had to waive this rule. The rule has now been changed, and future participation shall be at the commission's decision.

Everyone—and that includes top management and the board—needs to be involved in product safety, and we at the Consumer Product Safety Commission are doing our part to be sure that everyone can and will participate.

SHIMON PERES

Mr. BAKER. Mr. President, I had the welcome opportunity on yesterday to meet with the new Prime Minister of Israel, Shimon Peres. The Prime Minister, who has long been a distinguished leader in Israel, has embarked on what surely must be one of the most difficult endeavors of his career.

The Israeli elections resulted in a coalition that represents the broadest possible spectrum of the Israeli electorate. Under the best of circumstances, a coalition formed in this fashion would be a new experiment in the governing of Israel. However, with the compounded difficulties of Lebanon and the staggering Israeli economy, the road ahead for Prime Minister Peres will be most difficult.

The Prime Minister and other members of his cabinet are here to discuss both of these problems with the administration. In his usual careful and methodical way, Prime Minister Peres described in our conversation his own view of the options available with respect to both problems. I was pleased to note the President's announcement this afternoon of the administration's willingness fully to explore these options in our mutual search for Israeli economic recovery and peace in Lebanon and in the region at large.

Mr. President, I have the highest admiration for the Prime Minister and wish him well on his endeavors. He and his government merit our support and our help.

TRIBUTE TO SENATOR JENNINGS RANDOLPH

Mr. BURDICK. Mr. President, I would like to take a few moments to pay tribute to my dear friend and colleague from West Virginia, JENNINGS RANDOLPH, who as you know is retiring at the end of the 98th Congress, 52 years after having first been elected to public office.

I have been fortunate to work with JENNINGS in this great body. But I am not the only member of my family who has had the privilege of working with this great statesman, my late father, Usher Burdick, served with JENNINGS RANDOLPH in the House of Representatives.

It is testimony to the commitment and love JENNINGS RANDOLPH feels to this Nation that he chose to spend his life serving the people during six of the decades of this century. But JENNINGS did more than simply serve, he lead. I've been fortunate to work with JENNINGS RANDOLPH on the Environment and Public Works Committee where he was chairman for 14½ years. During that time he had the vision to sponsor major legislation that helped improve the lives of millions of Americans. His work has earned him the title of America's Environmental Architect. Among the visionary legislation he has sponsored are: The Clean Air Act, the Resource Recovery and Conservation Act and Superfund. He has also helped to create the greatest system of highways the world has known: The Interstate Highway System.

Through all the difficult deliberations on these monumental pieces of legislation, JENNINGS RANDOLPH has been a fair and thoughtful moderator as well as a superb advocate. He has gone out of his way to make sure that all Members regardless of political affiliations or seniority could count on having their proposals considered.

It is one of the greatest privileges of my life to serve with JENNINGS RANDOLPH, a fair and compassionate man, a man of intelligence and understanding, a man who was always cooperative and considerate of others. I will miss nim as I know the Senate will.

GOLDEN WEDDING ANNIVERSARY OF MABEL AND ORVILLE TANNER

Mr. HEFLIN. Mr. President, I rise today to give proper recognition to the golden wedding anniversary, on October 14, 1984, of Mabel and Orville Tanner of Hartselle, AL. During their 50 years of marriage, the Tanners have built a life together using the basic American values of commitment, honesty and true concern for another. They provided a stable and happy home for their four sons and are now blessed with seven grandchildren.

Mr. President, the Tanners are a fine example of Alabama and American family life at its best. Mr. and Mrs. Tanner's happy 50 years together reminds us that the family is indeed the fundamental building block of our society and a key to America's future.

I am submitting for the RECORD a copy of a resolution passed by the Alabama House of Representatives in honor of the Tanner's 50th wedding anniversary.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

H.J. RES. 176

Congratulating Mr. and Mrs. Orville W. Tanner of Hartselle, Alabama, on their forthcoming 50th Wedding Anniversary

Whereas the Legislature of Alabama notes with pleasure the forthcoming Golden Wedding Anniversary on October 14, 1984, of Mr. and Mrs. Orville W. Tanner of Hartselle, Alabama; and

Whereas Mr. Tanner and his wife, Mrs. Mabel L. Tanner were united in marriage by the Reverend Pickens on October 14, 1934, in the parsonage of Southside Baptist Church in Decatur; following the ceremony, Mr. and Mrs. Tanner, who were 24 and 21 years of age respectively, left for their wedding trip to scenic Athens, Alabama; and

Whereas later moving to Hartselle, Mr. and Mrs. Tanner became the parents of four sons—Bill Charles, Orville Joe, Thomas Jeff and John F. Tanner; they also are the grandparents of seven grandchildren—Terry, Billy, Blake, Tonja, Jeff, Junior, Kristin Nichole and John F., Junior; and

Whereas Mr. and Mrs. Tanner, who attend the First Baptist Church of Hartselle, have live their lives as one and, in devotion each to the other, have remained steadfastly faithful to their marriage vows, setting an enviable example for others; now: Therefore be it

Resolved by the Legislature of Alabama, both Houses thereof concurring, That we join with family and friends in congratulating this exemplary Morgan County couple, Mr. and Mrs. Orville W. Tanner, and direct that they receive a copy of this resolution that they may know of our congratulations and sincere best wishes for every future happiness together.

INDEPENDENT RETAIL PHARMACISTS LAUNCH FIGHT AGAINST DRUG ABUSE

Mrs. HAWKINS. Mr. President, I would like to bring to the attention of the Senate a new drug program whose aim is to enlist the support of the independent retail pharmacists in the fight against drug abuse.

The National Association of Retail Druggists and the Eli Lilly & Co. should be commended for their new national effort entitled "Drug Abuse: What, Who, How, and Why and Strategies for Prevention and Treatment." Mr. President, I ask unanimous consent that the text of the news release of the National Association of Retail Druggists on this important program be printed in the RECORD.

There being no objection the material was ordered to be printed in the RECORD as follows:

INDEPENDENT RETAIL PHARMACISTS LAUNCH FIGHT AGAINST DRUG ABUSE

ALEXANDRIA, VA, September 25, 1984.—Independent retail pharmacists will fight drug abuse in cities and towns throughout the United States in a major education effort announced today by the National Association of Retail Druggists [NARD].

"Many of the nation's smaller communities—which are served exclusively by independently owned pharmacies—often are overlooked in massive drug abuse education programs," said William E. Woods, NARD Executive Vice President. "The new NARD program can reach these communities because our members are local businessmen and businesswomen who want to take an active role in serving people in their home towns. We are very excited about this important new program which has been funded by Eli Lilly and Company.

"This grassroots campaign combines three elements in our effort to educate people about the abuse of prescription drugs, illicit substances, and alcohol," Woods continued. "First, through an eight-hour course, member pharmacists will become among the best-informed health professionals about drug abuse. Second, our members will have an informative audio-visual program they can present to service clubs, schools, and other community groups. Third, we are sending details about this program to local chapters of service clubs around the country encouraging them to call upon NARD members to present community drug abuse programs."

This continuing education program, designed to keep pharmacists abreast of new developments in drug abuse, was developed by Sidney Cohen, M.D., of the Neuropsychiatric Institute at UCLA and an internationally-recognized authority on drug abuse; Helen D. Gouin, P.D., a long-time member of NARD and currently Director of the U.S. Army Drug and Alcohol Program and Technical Activity; and Joseph A. Mosso, P.D., a Latrobe, Pennsylvania, independent community pharmacist long active in drug abuse prevention.

"We want to give NARD members the latest information about new drugs and other substances being abused," said Dr. Cohen. "For example, there is a synthetic compound called MPTP many addicts are now using in place of heroin. Neurologists recently discovered that a single dose of MPTP can cause an irreversible case of Parkinson's disease."

The NARD course also covers new data about older drugs of abuse, such as the amotivational syndrome from regular marijuana use. Users, even when not intoxicated by marijuana, typically have a low energy level, lose their former drive, interests, and ambition, and may regress to an existence of withdrawal.

"Community groups will find the NARD audio-visual program informative and stimulating," said Mosso. "It's thirteen minutes packed with insights, ideas, and suggestions for dealing with adolescent and adult drug problems. Follow this presentation with a question-and-answer session with an NARD-member pharmacist and you have a community program that's hard to beat. Interested groups should contact their independent community pharmacist or the National Association of Retail Druggists."

The National Association of Retail Druggists represents the owners of more than 30,000 independent retail pharmacies, where over 75,000 pharmacists practice their profession. Together, these pharmacists fill approximately 70 percent of all prescriptions and serve 18 million consumers daily.

TRIBUTE TO SENATE MAJORITY LEADER HOWARD BAKER

Mr. WEICKER. Mr. President, I want to express my admiration and gratitude for the service of HOWARD BAKER to this body throughout his career as Senator and leader.

As a freshman, Senator, I had the opportunity to observe HOWARD BAKER at close range as a member of the Senate Watergate Committee, of which he was the ranking minority member. His integrity and persistent pursuit of the truth in that critical time helped to bring the Nation through those dark days with Constitution and the rule of law intact.

As leader of the Republicans in the Senate, he has shown a reverent understanding of the importance of this institution and a commitment to stewardship of the Senate's unique role. Having served as minority leader, he learned the value of our rules and procedures which protect the rights of minority parties and viewpoints. As majority leader, he didn't forget those lessons. He sought and achieved the proper balance between maintaining the integrity and spirit of the Senate and our need to responsibly carry out the Nation's business. He managed the rigors and frustrations of a body seemingly invented for inefficiency, with all the grace and good humor that could be expected of a human being.

Mr. President, having read about Senator BAKER's plans when he leaves the Senate, I now understand with greater clarity his repeated claims for the value of Senators being involved in private sector affairs of the Nation we serve. I wish him success in his future endeavors away from this place.

We in the Senate and the Nation as a whole can be very grateful that men of HOWARD BAKER's character and abil-

ity still devote themselves to service to the greater good. They are the link between the greatness of our past and the America yet to be.

For that, HOWARD, we thank you.

TRIBUTE TO SENATOR PAUL TSONGAS

Mr. LUGAR. Mr. President, the career of PAUL TSONGAS has exemplified courage in advocating bold and controversial ideas and sensitivity in attempting to find effective ways for a public servant to meet the needs of underprivileged persons in this country and around the world.

I have been moved by his work in the Foreign Relations Committee to bring other members to an understanding of both the sense of hope and the fact of enormous suffering faced by human beings in Africa and Central America. PAUL TSONGAS is proud of his service in the Peace Corps and that service has given him insights which he has shared on many occasions with us. I admire his sense of humanity and his ability to articulate important points of view.

He has been an important spokesman for his political party and has frequently put aside short-term advantage to emphasize necessary long-term adjustments. Many of his ideas were at work during a very important legislative struggle which surrounded the provision of temporary loan guarantees for the Chrysler Corp.

Given the remarkable success of Chrysler Corp., there is ample room to credit the corporate and union leadership and the many thousands of rank-and-file persons in management and labor who made Chrysler profitable again.

Nevertheless, as an eye-witness observer to how the legislation for Chrysler came to pass at all, I must attempt to set history straight by pointing out that PAUL TSONGAS and I fashioned a bipartisan coalition in the Senate Banking Committee and created a formula which provided the fragile majority which the Chrysler legislation finally obtained in the U.S. Senate. His words at the conclusion of the Chrysler debate in the U.S. Senate were most important as he pointed out that if Senate amendments to our legislation had taken away too many of the sacrifices which we had thought were necessary, all of the plan would come to naught. Fortunately, the plan had been crafted with sufficient reserves to stand the onslaught of a seeimingly endless number of difficult circumstances. All those who rejoice in the success of Chrysler owe a large debt to PAUL TSONGAS.

But the Chrysler battle was only one important example of his ability to espouse new ways in which American industry and the American people might surmount outmoded institutions and procedures. He has been a champion of sound economic growth, productivity, and democracy in public institutions.

Senator TSONGAS is also a good husband and a good father for his children. I admire his devotion to essential family goals and I know that he and his family will continue to offer leadership and inspiration to all of us in the years to come.

I am hopeful that he will continue to write and to speak out on important issues which face our country and to offer the same bold insights in private life which we have been privileged to hear during his service in the U.S. Senate.

TRIBUTE TO SENATOR JOHN TOWER

Mr. LUGAR. Mr. President, as this legislative session draws to a close, I would like to recognize one of our colleagues who is completing a long and distinguished Senate career. JOHN TOWER of Texas has given more than 23 years of continuous and dedicated service in the U.S. Senate.

Senator TOWER has been a strong and forceful Senate leader in many areas. He has been active on important budget issues, a leader in banking, housing, and urban affairs, and a strong chairman of the Republican Policy Committee. But I am certain that many colleagues would agree with me that his accomplishments in the area of national security have been most significant.

JOHN TOWER'S leadership on the leading defense and foreign policy issues of our times has been remarkable. From his position as chairman of the Armed Services Committee, has helped to rebuild the Nation's defenses during the past 4 years. It is not too much to say that the President's program would have had a far more difficult time in securing support were it not for the disciplined and competent leadership of JOHN TOWER. He has been an articulate spokesman for national defense, both in the Senate and throughout the United States.

I have been most impressed by the way in which Senator TOWER has maintained the close connections between military preparedness and foreign policy. It is all too easy to lose sight of the goals of our policies when debating the merits of defense procurement bills. Likewise, it is all too easy to lose sight of the fact that our national goals in foreign policy necessarily depend upon appropriate choices affecting our military preparedness.

JOHN TOWER has never lost sight of these relationships. He know the importance of coordinating our military choices with our foreign policy goals, and many of us have benefited from his wealth of knowledge.

I am confident that JOHN TOWER will continue to contribute to our national education in the coming years. I look forward to Senator TOWER'S continuing contributions with much expectation. He has become a national resource, and we have every reason to anticipate that JOHN TOWER will provide leadership in many ways for many years to come.

TRIBUTE TO SENATOR JENNINGS RANDOLPH

Mr. LUGAR. Mr. President, I will always remember JENNINGS RANDOLPH of West Virginia as a Senator who brought a sense of reverence, a sense of duty, and a sense of history to the proceedings of the U.S. Senate.

He stood at his desk to vote on thousands of occasions from 1958 through 1984 and asked that the Senate maintain a sense of order that all Senators might be heard and that greater thoughtfulness might be given to the privilege of voting on important issues.

He gave generously of himself to the Senate Prayer Breakfast Group with his thoughful comments based upon a great lifetime of experience and with his profound prayers which uplifted each of us in his circle of friends.

It always seemed most appropriate that one of the most senior members of the U.S. Senate should be a great champion for the rights, privileges, and responsibilities of young people in our country.

His championship of the right of 18-year-old citizens to register and vote is an important part of American history. His annual sponsorship of youth luncheons honoring scholarship and scientific achievement provided opportunities for all of us to celebrate the achievements of young people and to honor them appropriately under his leadership.

I remember the celebration of the 100th anniversary of the birth of Franklin D. Roosevelt and the participation by JENNINGS RANDOLPH in that joint session of Congress. He recalled the opening days of Franklin Roosevelt's first Presidential term of office and he provided, on the floor of the U.S. Senate, numerous insights into the legislative and executive leadership of our country during the past 50 years.

JENNINGS RANDOLPH is a personal testimony to the idea that public life is enriched through the continuity of great public servants who span decades of history and make important contributions in each year of that service. Our country will be blessed for many years by the ability of JENNINGS RANDOLPH to articulate not only the living history which he has influenced but additional goals and aspirations which we should have before us.

I look forward to witnessing his many achievements in the life of the great State of West Virginia which he has served so well and in the continued inspiration which his thoughts will give to the U.S. Senate.

TRIBUTE TO SENATOR HOWARD BAKER

Mr. LUGAR. Mr. President, HOWARD BAKER was elected leader of Republicans in the Senate on January 3, 1977, by a vote of 19 to 18. The Presidential election of 1976 had not been kind to Republicans but eight freshman Republican Senators were sworn into the Senate on January 3, 1977, and HOWARD BAKER appealed, successfully, to a substantial majority of that group. I remember receiving a telephone call from HOWARD BAKER at 4 p.m. on January 2. He asked me for support for leader and in response to my question, he affirmed that he thought he had at least 13 supporters. I gave him my personal commitment and sought to find others. I will always count that vote among the most significant that I have cast. Every expectation that I had for HOWARD'S leadership was fulfilled abundantly, again and again.

He will be remembered as the Republican leader who led the Republican Party in the Senate to accept responsibility for the governance of this country as a majority party. The transition form a quarter of a century of vigorous opposition to acceptance of the chairmanship of committees and subcommittees and responsibility to work with the President could have led to many stumbles and subsequent lack of confidence.

From the first legislative day in 1981, it was apparent that HOWARD BAKER would be chief advocate of President Ronald Reagan in the U.S. Senate and that he would attempt to obtain 51 votes for every reasonable administration proposal. He won those votes with an extraordinary combination of intelligence, patience, humility, good timing, personal eloquence, and careful vote-counting on all occasions, with generous accommodation for those Members who could not give help, immediately, but could be summoned to help in a later emergency.

President Reagan articulated a bold series of programs, but they took on legislative flesh only because HOWARD BAKER was able to enlist a majority of Senate Republicans to debate and, occasionally, to improve upon original proposals before enacting them into Senate legislation. At a recent dinner, President Reagan summed up the feeling of all of us when he said that he could not bear to think of HOWARD'S leaving the Senate because it simply hurt too much.

I have cherished him as a mentor and a loyal friend. I have seen him in temporary defeat but never in total discouragement or despair. He has not lacked ambition as his three tries to become leader of Republicans in the Senate and his campaign for the 1980 Presidential nomination will testify, but he has been prepared to subordinate personal recognition to the demands as which the history of this country put upon his shoulders and he leaves the Senate with universal respect and affection for an unparalleled leadership achievement.

Throughout all of this, his romance with Joy has continued and his pride in Cissy and Derek is enormous.

He is a good, sound, and complete man fully prepared for new adventure and for important service to our country.

CHILD SEXUAL ABUSE PREVENTION: TIPS TO PARENTS

Mrs. HAWKINS. Mr. President, the National Association of Retail Druggists has joined with the Department of Health and Human Services in introducing a new national campaign to assist parents in better understanding how to prevent the sexual abuse of their children.

"Child Sexual Abuse Prevention: Tips to Parents," a new HHS brochure developed by the National Center on Child Abuse and Neglect, was unveiled at the 86th Annual Convention of the National Association of Retail Druggists in Miami Beach, FL, September 30, 1984. The brochure carries the NARD service-mark, "Ask Your Family Pharmacist®." This symbolizes the typical role played by these health care professionals, who serve 18 million citizens daily, and are deeply involved in community and civic activities.

The National Association of Retail Druggists is to be complimented for its efforts to better inform the public about this most serious of national concerns.

Mr. President, I ask unanimous consent to print in the RECORD a copy of a letter dated September 28, 1984, from HHS Secretary Margaret Heckler to NARD outlining the new awareness campaign and saluting the NARD for its social commitment and leadership as well as printing a copy of the new brochure, "Child Sexual Abuse Prevention: Tips to Parents," and an article from the New York Times.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF HEALTH AND HUMAN SERVICES,
Washington, DC, September 28, 1984.

DEAR NARD MEMBER: In the last few weeks, 44 million American youngsters have returned to school. An additional six million preschool children will be in and out of home child care while their parents work. For most of these preschool and school aged girls and boys, the new academic year will be a rewarding and successful one; but for some, the months ahead will be fraught with uncertainty, fear, pain and indignity. Child abuse and neglect will darken the present and the future of those American children.

The statistics are awesome. This year the names of more than 1.5 million children will be reported to local child protective services agencies as the suspected victims of child abuse or neglect. We obviously cannot count or calculate the unreported cases. But we can fairly estimate that more than 100,000 youngsters will fall victim to sexual abuse.

This is an authentic American tragedy. It touches every sector of our society. It is a plague that can attack any child. Worst of all, our best estimate is that more than 80 percent of child sexual abuse occurs at the hands of a relative or adult who is known and trusted by the child.

The only silver lining in the storm cloud of recent reports about the sexual molestation of children in day care centers, schools and community organizations is that those sordid accounts have sounded a national alarm. Parents and the public have been alerted—a counter-attack is being mobilized.

Parents are not helpless. There are safeguards which can help parents prevent sexual abuse: by listening to their children, by recognizing the signs of child maltreatment, by teaching their children that their bodies belong to them alone and that any child has the right to say "no" to adults who make them feel uncomfortable. Parents must also subject their child care service choices to careful and continuous scrutiny.

You too can help us to do something about this problem. Our National Center on Child Abuse and Neglect has prepared a leaflet for parents, "Child Sexual Abuse Prevention: Tips for Parents." As health care professionals and as business persons, you have broad access to the public. More importantly, you have the public's trust. By assisting us in the distribution of this information, you become a valuable ally in the war against child abuse and neglect. When you hand this pamphlet to your customers—when you put it into their shopping bags, you are rendering a genuine public service. Your professional and personal concern for consumers and for children will serve as an inspiration to other national groups.

Thank you for your cooperation. It will benefit our nation's children. They are both our most valuable resource and our destiny. I salute the social commitment and the leadership of your National Association for reaching out to work with us and with you in this important task.

Sincerely,

MARGARET M. HECKLER,
Secretary.

CHILD SEXUAL ABUSE PREVENTION: TIPS TO PARENTS

LISTEN AND TALK WITH YOUR CHILDREN

Perhaps the most critical child sexual prevention strategy for parents is good communication with your children. This is not only challenging to every parent but also can be difficult, especially for working parents and parents of adolescents.

Talk to your child every day and take time to really listen and observe. Learn as many details as you can about your child's activities and feelings. Encourage him or her to share concerns and problems with you.

Explain that his or her body belongs only to them alone and that he or she has the

right to say no to anyone who might try to touch them.

Tell your child that some adult may try to hurt children and make them do things the child doesn't feel comfortable doing. Often these grownups call what they're doing a secret between themselves and the child.

Explain that some adults may even threaten children by saying that their parents may be hurt or killed if the child ever shares the secret. Emphasize that an adult who does something like this is doing something that is wrong.

Tell your child that adults whom they know, trust and love or someone who might be in a position of authority (like a babysitter, an uncle, a teacher or even a policeman) might try to do something like this. Try not to scare your children—emphasize that the vast majority of grownups never do this and that most adults are deeply concerned about protecting children from harm.

CHOOSING A PRESCHOOL OR CHILD CARE CENTER

Although the vast majority of this nations preschools and child care centers are perfectly safe places, recent reports of child sexual abuse in these settings are a source of great concern to parents.

Check to make sure that the program in reputable State or local licensing agencies, child care information and referral services, and other child care community agencies may be helpful sources of information. Find out whether there have been any past complaints.

Find out as much as you can about the teachers and caregivers. Talk with other parents who have used the program.

Learn about the school or center's hiring policies and practices. Ask how the organization recruits and selects staff. Find out whether they examine references, background checks, and previous employment history before hiring decisions are made.

Ask whether and how parents are involved during the day. Learn whether the center or school welcomes and supports participation. Be sensitive to the attitude and degree of openness about parental participation.

Ensure that you have the right to drop in and visit the program at any time.

Make sure you are informed about every planned outing. Never give the organization blanket permission to take your child off the premises.

Prohibit in writing the release of your child to anyone without your explicit authorization. Make sure that the program knows who will pick up your child on any given day.

If you think that your child has been abused—

Believe the child. Children rarely lie about sexual abuse.

Commend the child for telling you about the experience.

Convey your support for the child. A child's greatest fear is that he or she is at fault and responsible for the incident. Alleviating this self-blame is of paramount importance.

Temper your own reaction, recognizing that your perspective and acceptance are critical signals to the child. Your greatest challenge may be to not convey your own horror about the abuse.

Do not go to the school or program to talk about your concern. Instead, report the suspected molestation to a social services agency or the police.

Find a specialized agency that evaluates sexual abuse victims—a hospital or a child welfare agency or a community mental health therapy group. Keep asking until you find a group or an individual with appropriate expertise.

Search for a physician with the experience and training to detect and recognize sexual abuse when you seek a special medical examination for your child. Community sexual abuse treatment programs, childrens' hospitals and medical societies may be sources for referrals.

Talk with other parents to ascertain whether there are unusual behavior or physical symptoms in their children.

Remember that taking action is critical because if nothing is done, other children will continue to be at risk. Child sexual abuse is a community interest and concern.

Make sure that your child knows that if someone does something confusing to them, like touching or taking a naked picture or giving them gifts, that you want to be told about it. Reassure the child and explain that he or she will not be blamed for whatever an adult does with the child.

OBSERVE PHYSICAL AND BEHAVIORAL SIGNS

Children who may be too frightened to talk about sexual molestation may exhibit a variety of physical and behavioral signals. Any or several of these signs may be significant. Parents should assume responsibility for noticing such symptoms including:

Extreme changes in behavior such as loss of appetite.

Recurrent nightmares or disturbed sleep patterns and fear of the dark.

Regression to more infantile behavior such as bedwetting, thumb sucking, or excessive crying.

Torn or stained underclothing.

Vaginal or rectal bleeding, pain, itching, swollen genitals, and vaginal discharge.

Vaginal infections or venereal disease.

Unusual interest in or knowledge of sexual matters, expressing affection in ways inappropriate for a child of that age.

Fear of a person or an intense dislike at being left somewhere or with someone.

Other behavioral signals such as aggressive or disruptive behavior, withdrawal, running away or delinquent behavior, failing in school.

Finally, do not blame yourself. Sexual abuse is a fact in our society. Many individuals who molest children find work through employment and community activities which give them access to children. The vast majority of abuse occurs in situations where the child knows and trusts the adult. Do your homework well, but remember a community and national consciousness is needed before we can stamp out sexual molestation in our society.

[From the New York Times, Oct. 4, 1984]

SYMPOSIUM STUDIES CHILD MOLESTATION

WASHINGTON, Oct. 3.—The United States Justice Department today called child molestation one of the country's most frequent, least understood crimes and said that it might be affecting as many as one out of four children.

About 80 medical, mental-health, legal and social-service experts attended a two-day national symposium that ended this afternoon at the department. They shared professional opinions about the treatment of molesters, education to prevent sexual abuse of children and legislation to deal with the problem. The Federal Bureau of Investigation cited a study recently that said child molestation in this country could affect as many as 25 percent of the country's female children before they reach the age of 13. It also said that perhaps only 1 to 10 percent of the incidents of child molestation are reported.

Assistant Attorney General Lois Haight Herrington aid that child molestation was "perhaps the least understood and most poorly handled crime by our communities and our mental-health and criminal-justice systems."

She added that statistics on child molestation reflect "only the tip of the iceberg" and that the crime "is often not reported or discovered, let alone adequately investigated, prosecuted and sentenced."

Patti Linebaugh, the founder and executive director of Society's League Against Molestation, an organization, known as SLAM, that has branches in 43 states, called for an increase in Federal and state legislation and funds.

In her address at the symposium she said: "We must convince every state in the union to enact laws for mandatory, determinate prison sentences for first-time molesters." Mrs. Linebaugh told the group that her 2-year-old granddaughter was raped and strangled by a man who admitted to having committed at least 150 other acts of child molestation before he was put in prison.

"If the chain remains unbroken, by the turn of the century, just 15 years from now, the majority of our children will become victims of a molester," she said.

Last Friday, Congress authorized an increase that more than doubles the amount allocated for child-protection programs. Awaiting President Reagan's signature, the legislation authorizes about $158 million to be used in the next three years for the prevention and treatment of child abuse. The legislation also authorizes a three-year, $63 million program of matching grants to states for programs serving victims of family violence.

Society has a responsibility "to promise the abused child that the administrative and judicial system will protect him, will provide him with justice," Senator Paula Hawkins, Republican of Florida, told the group. "I am not sure that I can guarantee that today." Senator Hawkins, who earlier this year revealed she had been sexually molested by a neighbor as a child, said that too many sexually abused children were dealt with by a judicial system that humiliates and frightens them.

The symposium participants frequently referred to the final report, issued last month, of the Attorney General's Task Force on Family Violence. Among other recommendations was a suggestion that all Federal regulations require criminal-history backgrounds on all volunteers or employees working for agencies receiving Federal funding and providing care, training, supervision or otherwise dealing with children.

The task force also recommended that the Federal Government provide financial incentives to encourage states to train criminal-justice personnel. It suggested that states enact laws to extend the statute of limitations in criminal cases of child sexual abuse.

The Department of Health and Human Services is working with the National Association of Retail Druggists to seek funding for national distribution in pharmacies of a brochure for parents about the detection and treatment of child abuse occurring outside the home.

The brochure, "Child Sexual-Abuse Prevention: Tips to Parents," points to the most common behavior patterns in children who are being or have been molested, some of which include loss of appetite; recurrent

nightmares or disturbed sleep patterns; bedwetting and thumb-sucking; aggressive or delinquent behavior, and fear of a person or an intense dislike for being left alone with someone. For the free brochure, write to the National Center on Child Abuse and Neglect, P.O. Box 1182, Washington, D.C. 20013.

ANNIVERSARY OF THE CONSTITUTION, 1984

Mr. HATCH. Mr. President—

On Monday the 14th of May, A.D. 1787, and in the eleventh year of the independence of the United States of America, at the State-House in the city of Philadelphia—in virtue of appointments from their respective States, sundry deputies to the Federal convention appeared—but, a majority of the States not being represented, the Members present adjourned from day to day until Friday the 25th of the said month.

With these words the journal of the Constitutional Convention begins its account of the remarkable 16 weeks of work done by 55 men 197 years ago. The first act of the Convention on May 25 was to elect unanimously as chairman the man referred to affectionately in Madison's original journal of the proceedings as the general, George Washington. The last act of the Convention on September 17 was the signing by 39 delegates of the document which has formed the foundation of our liberties for nearly two centuries. Many have striven to describe with suitable majesty the forces and philosophies that gave rise to the Constitution. It seems to me, however, that Abraham Lincoln, speaking in 1860 when the Constitution withstood its greatest test, captured fittingly the motivating principle of the document:

Prosperity is not the result of accident. It has a philosophical cause. Without the Constitution and the union, we could not have attained the result; . . . . yet, there is something back of these entwining itself more closely about the human heart. That something is the principle of "liberty to all—" the principle that clears the path for all—gives hope to all—and, by consequence, enterprise and industry to all.

The liberties preserved by our Constitution are indeed the source of our prosperity and hope for the future. Accordingly, on September 17, 1984, the 197th anniversary of the signing of the Constitution, I was pleased as chairman to welcome as witnesses four students who had participated in an essay contest on the subject of the doctrine of federalism within the Constitution. I would like to submit for the RECORD the essay of each first-place winner, as well as the second and third place winners from the States that participated in the essay contest. At this time, I would also like to recognize and thank the judges from my home State of Utah who were involved in selecting the winners. They are as follows: Representative Donna Dahl, R-SL, Dr. W. Cleon Skousen, Dr. R.J. Snow, and Representative James Witucki, D-SL.

Mr. President, I ask unanimous consent that the essays be printed in the RECORD.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

FEDERALISM: A PERSEVERING FORCE IN AMERICAN GOVERNMENT

(Sloane Kathryn Ivancich, Salt Lake City, Utah)

Following the Revolutionary War, the people of America needed to form their own system of government. Because of the lack of freedom the colonies had under the rule of Great Britain, the people were determined to ensure the rights of the individual states. Hence, the people would not allow the new government to be a unitary one. Yet, it was soon realized that a confederation of sovereign states and a national government without power, the government under the Articles of Confederation, was inadequate to run a country. As a result, a federal system of government was established and the doctrine of federalism emerged. Federalism is the distribution of political power between two independent spheres of government: a national government, with authority over the entire country; and many separate, local governments.[1] Or as political theorist K.C. Wheare once suggested, ". . . federalism is a system in which two levels of government operate within the same geographical limits and neither has the power to destroy the other." [2] Although federalism is not a system without flaws, it has remained a part of our government and is perpetuated by the beliefs and institutions inherent in American society.

The United States Constitution has helped to form the basis for maintaining federalism in the American governmental structure. Although it is not directly stated in the Constitution that the United States is based on a federal system of government, there are three key clauses in the Constitution that have determined the character of American federalism.[3] The first of these clauses is the Tenth Amendment which helps to draw the distinction between what the states can and cannot do. This amendment states that the "powers not delegated to the United States by the Constitution, nor prohibited by it to the States are reserved to the States respectively, or to the people." [4] In adding this amendment to the Constitution, it was clarified that all powers not enumerated to the national government would be left to the states.

The second of these clauses is the "supremacy" clause. It is written into Article IV of the Constitution and begins, "This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be made the supreme law of the land . . ." [5] Thus, if a state constitution or law conflicts with the United States Constitution, a national law, or treaty, the national ordinance prevails.

The third key clause in the Constitution that determines the system of federalism in America is the "necessary and proper clause." It is the eighteenth grant of power to Congress in section 8 of Article I and gives Congress the power to "make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the government of the United States or in any department or officer thereof." [6] This clause, also known as the elastic clause, enables the national government to stretch its powers beyond the enumerated powers. This interpretation of the clause was affirmed by the Supreme Court in the 1819 case of *McCulloch v. Maryland*, in which the Court stated, ". . . we think the sound construction of the Constitution must allow to the national legislature that discretion, with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it, in the manner most beneficial to the people." [7]

Thus, in three key clauses of the Constitution, America's system of federalism is outlined. Moreover, it has been sustained by the traditional strength of the United States Constitution.

However, because the Constitution does not set absolute limits to the power of the national government, it is often difficult to define the boundaries between state and national powers. It is thereby necessary to find an arbitrator to solve the conflicts between the state governments and the national government. This arbitrator was found in the Supreme Court. Without it, the federal system could not last. As author Bernard Schwartz points out in his book, *The Reins of Power*, ". . . the high bench is the bolt that holds the federal machinery together. Draw it out and there would be no real federal system, but only a moral union between the states." [8] Yet, even the Supreme Court cannot always determine the exact boundary between what should fall under the authority of the states and what should fall under the authority of the national government. One example of this is the difficulty in trying to determine what is interstate commerce and what is intrastate commerce. By decree of the Constitution, the national government has the right to regulate interstate commerce. But it is extremely difficult to determine when intrastate commerce becomes interstate commerce. In cases such as this, it is necessary for both levels of government to compromise.[9]

Not everyone believes that federalism has remained a vital part of our government. Some people feel that federalism no longer exists because the national government has swallowed-up much of the power of the states. These people feel that federalism exists only in theory and that it is no longer in practice.[10] However, the increases in na-

tional power are based on the nation's needs at a particular time. The first Hoover Commission once said, "Emphasis shifts from generation to generation as the American people fashion their government to meet the needs of changing times and changing conditions."[11] For example, during President Franklin D. Roosevelt's administration, the country was faced with a severe economic depression. Roosevelt's New Deal, which shifted a lot of power to the national government, was an effort to alleviate the problems caused by the poor economy. Thus, federalism allows for a national or centralized government to deal with nationwide problems. And that does not mean that the states are losing all of their powers. Furthermore, the national government exercises its increased powers through the state governments, still allowing the states to retain much of their power.[12] The welfare system, the interstate highway system, city improvement projects, and grant-in-aid programs are all examples of programs in which the national government doesn't exactly govern as much as it attempts to encourage the states to govern in agreement with national plans.[13]

In addition, the people are unwilling to allow the national government to destroy the power of the state and local levels. Not only do they fear too strong a national government, but they also still depend on a largely localized government because of the differences between various localities.[14] The needs of one community are not always identical to the needs of another community. States can maintain their independence because of a commitment by Americans "to the idea of local self-government and on the fact that Congress consists of persons who are selectecd by and responsive to local constituencies."[15] Hence, the people of America play a large role in keeping the federal system working. As Alexis de Tocqueville stated after observing American federalism in 1831, "I have never been more struck by the good sense and the practical judgement of the Americans than in the manner in which they elude the numberless difficulties resulting from their federal constitution."[16] Tocqueville again praised the American people when he stated:

"The accidental defects of the federal system which originate in the laws may be corrected by the skill of the legislator, but there are evils inherent in the system which cannot be remedied by any effort. The people must therefore find in themselves the strength necessary to bear the natural imperfections of their government."[17]

According to Tocqueville, federalism works in the United States, even though it often fails in other countries, because of the good sense, pragmatism, and tolerance of the American people.

The country of Brazil, for example, tried to imitate the United States' federal system, but it failed for two major reasons. First, the principals of federalism were foreign to Brazil and were never adequately combined with the nation's traditions.[18] However, the situation is different in the United States. The federal system was developed by the American people to suit their own needs; it was not a copy of another country's government. Second, the states within Brazil were too dissimilar.[19] There were only a few states in Brazil with the financial resources that could support a modern government; the rest of the states were, to a large degree, backward. Thus, in Brazil there could not be a balance between the states and the central government because only a few states had the means to support the central government.[20] In contrast is the United States. As Alexis de Tocqueville points out, "The circumstance which makes it easy to maintain a Federal government in America is not only that the states have similar interests, a common origin, and a common language, but they have also arrived at the same stage of civilization."[21]

The system of federalism has been sustained in the American society. The factors that have added to its perpetuation are many. The traditional strength of the United States Constitution is a vital force in maintaining federalism. In addition, the American people, themselves, have made a contribution in their determination to preserve the federal system. And, lastly, the grass-roots structure of the American society has added to the perpetuation of federalism.

FEDERALISM

(By Miss Claire Lawerence, Judge Memorial High School, Salt Lake City, UT)

"If we are unwilling to be placed in this perilous situation; if we still adhere to the design of a national government, or, which is the same thing, of a superintending power, under the direction of a Common council, we must resolve to incorporate into our plan those ingredients which may be considered as forming the characteristic difference between a league and a government; we must extend the authority of the Union to the persons of the citizens—the only proper objects of government." Alexander Hamilton, *The Federalist*[1]

"American government can no longer be understood from the singular perspective of the national, state or local—if it ever could. Its operations are too intertwined, engaging more than one level in almost all operations. Whether the function is as universally essential as sewage disposal or as esoteric as support for a symphony orchestra, more than one government is likely to be involved. Understanding requires consideration of all governments and their interactions. Furthermore, the relationships themselves have consequences for the adoption and implemenation of public policy." Parris N. Glendening and Mavis M. Reeves, *Pragmatic Federalism*[2]

Federalism is the central characteristic of American government and politics. In its American form it is the relationship between the intricate aspects and levels of government. It is impossible to understand the workings of America's government without understanding the doctrine of federalism—that of the diffusion of power between the national and local governments.

"Federalism is a governmental operation seen as being developed in America for the purpose of providing a balance between the completely democratic government in which injustices could be fostered by the spread of popular passion and the autocratic and dictatorial government in which abuses could take place at the hands of a few powerful men".[3]

Our founding fathers, in creating the federalistic Constitution, sought to eliminate in our system the despotism that can exist in all forms of government, from the largest democracy to the smallest dictatorship.

After the failure of the Articles of Confederation our government was set up as a political experiment in the principle known as covenant—a lasting but limited contract between men—and not a hierarchical system of contracts between governments.[4] The word *federal* is in fact ". . . derived from the Latin *feodus*, which means covenant, first used in 1645 in the midst of the English Civil War to describe covenantal relationships of both a political and theological nature."[5] Federal as a word was not used in its present sense until 1777 during the American Revolution.

To understand federalism one must first realize that our founding fathers (Jefferson, Hamilton, Madison and the rest) were not the first to come up with the idea of a federal system of government. Examples throughout history had shown the successes and failures of a centralized government; there were models and ideas readily available for them to build on.

One of the main problems these men had to face was the size and geographic diversity of the area they were trying to govern. A prime question was the ability of a central government to send messages and govern

when transportation and mail carrying were risky at the least.

The Roman Empire was a historical example of a huge sovereign empire controlled by a strong central government. Because it conquered many countries and cultures and covered a vast territory, it is an example of division of power down to the governments under control of the Emperor and how sovereign states can exist while being controlled by a strong central government. Its contribution to modern federalism is its employment of coordinated authority and its seeking to reduce imperial domination to the authority of councils, etc.

Johannes Althanasius became one of the first federalistic thinkers when, influenced by Jean Bodin's concept of sovereignty, he wrote about sovereign states bound together by pacts or classes of laws dealing with mutual aid, defense against internal and external attack and the settlement of disputes between members of a federalistic system. Althanasius developed the idea of "corporation"—recognizing not only the states in the confederation but also the importance of other lower divisions such as cities being vehicles of government.

Pirfendorf was the next to add any serious ideas to the doctrines of federalism. He developed his theory of a state containing states within itself and of a confederation being the most logical form of a union of states. He developed the idea of a federal assembly to govern and decide among the states while allowing them to maintain their sovereignty.

To understand how the doctrine of federalism developed it is necessary to understand the political climate of the times in which it began. John Locke had destroyed the theory of "divine right of kings" and the political thinkers were just beginning to deal with the concept of popular government. Rousseau's federal ideas were of the small state in which every citizen could take part in the governing of that state. And Montesquieu dealt with two views—rituality and expediency, meaning that states in a confederation should be similar in goals and purposes. He also developed the ideas of representation proportional to the size and status of the confederate states.

In 1787 the Constitutional Convention met at Philadelphia, Pennsylvania. One of its purposes: to draw up a constitution for the United States of America that would give the newborn republic a chance of surviving as the weak and inefficient Articles of Confederation under which the country was presently struggling were nearing collapse. A distinguished and brilliant group attended: Thomas Jefferson, Benjamin Franklin, Alexander Hamilton, George Washington, James Madison—all statesmen of the highest caliber. They desired the formation of a stronger government, one that would sustain the country in times of peace and war and one that would bond the states together to form a republic. They drafted the Constitution—a startling and unprecedented document that set up a form of government that had never been tried before—that of a federalistic centralized republic.

The Constitution shocked states' rights advocates. They believed that under a federal system of government the states would lose their sovereignty and thus the country would again be under the control of an autocratic government as it was under Great Britain. Elbridge Gerry pointed out what he felt to be the major defect in the draft constitution:

"It is presumed the great body of the people unite in sentiment with the writer of these observations . . . They wish to see the Confederated States bound together by the most indissoluble union, but without renouncing their separate sovereignties and independence, and becoming tributaries to a consolidated fabric of aristocratic tyranny.—They wish to see government established, and peaceably holding the reins with honour, energy, and dignity; but they wish for no *federal city* whose 'cloud cap't towers' may screen the state culprit from the hand of justice, while its exclusive jurisdiction may protect the riot of armies encamped within its limits."[6]

Four states immediately ratified the Constitution. Three others soon joined, giving the two-thirds majority that was required to adopt it. It was formally adopted on June 21, 1788; but four states still had not ratified it.

Alexander Hamilton, John Jay and James Madison published a series of essays known as The Federalist in the New York newspapers under the pseudonym *Publius*. They were engineered chiefly as propaganda to promote ratification by the largest remaining dissenter, New York. This collection of papers set out the basic tenets of what was to become the American system of government, written in defense of the Constitution. The three main ideas set out in the eighty five essays were: the difficulties of administration would be lessened by a strong centralized government without interfering with the administration of local affairs; foreign policy would be more easily dealt with in a federation than a confederation of individual states; and, because of man's very nature, there would be dissention among the states unless a strong union formed by common goals was formed.

"Nothing is more certain than the indispensible necessity of Government, and it is equally undeniable that whenever and however it is instituted, the people must cede to it some of their natural rights, in order to vest it with requisite powers. It is well worthy of consideration therefore whether it would conduce more to the interest of the American people, that they should to all general purposes, be one nation under one federal government than that they should divide themselves into separate confederacies, and give to the head of each, the same kind of powers which they are reluctant to place in one national government.[7]

The preamble of the Constitution starts "We, the People", not "We, the States" as did the Articles of Confederation. Thus is implied a union of the American people as individuals involved in their own governing process, not a confederation of states, each separate and diverse and incapable of working together to foster our Great Experiment in democracy.

Influential in the formation of our form of government was nationalism—a patriotic feeling of pride and unity with one's country that was strongly fostered in young America because of its recent fight for liberty. To the founding fathers America was more than a country. It was an idea—liberty, freedom of the individual and escape from a monarchic government which controlled every aspect of life. They had a strong nationalistic sense and an intense desire to preserve the union. And the only way they could see to do this was to create a central government strong enough to discipline the states and avoid breaking up the union. Federalism did not evolve because the founding fathers were nationalistic in the modern sense, that they loved America because it was "the land of the free and the home of the brave." It was impossible for them to feel this way because the American character had not yet been shaped. Their feelings were for a set of ideas written in a document known as the Constitution—ideas that they prayed would work.

Sectionalism—the feeling of loyalty to a state or particular region of the country—also played a role in the shaping of American government. The American people were intensely frightened of strong government; they leaned much more closely towards anarchy. This was the cause of the weakness of the Articles of Confederation, in which a group of states were closely bonded together with no regulation of trade or of the amounts of currency coined. Disputes between states which were geographically, politically and socially diverse of course erupted, thus causing the articles to fail. Sectionalism was then of prime importance in influencing our founding fathers because it was the cause behind the Articles of Confederation which were themselves testament to the need for a strong government without the loss of individual rights.

Federalism is of great importance today. It deals with several of the questions raised in today's politics, such as the right of the federal government to place the MX missile sites and toxic waste dumps in federally owned Utah lands without the permission of the Utah State government. These are important questions that have a direct effect on our lives today and that can be answered only when we come to an understanding of exactly which powers belong to the state and federal governments. A people cannot safely maintain their government (and prevent abuses from taking place) if they are ignorant of the basic doctrines upon which it is based. I feel that it is important to have a knowledge of American federalism because it is an integral part of our government—a government that has so long protected us and given us freedom, but a government that, like all others, can become corrupt if the delicate system of checks and balances becomes upset.

"Americans . . . face unprecedented problems of national security—possibly even of survival—in a divided world, but they face critical problems at home in the preservation of American federalism, problems which few of them seem to realize. It is quite conceivable that the nation might survive, and its federal system of government by irretrievably lost.

"The American federal system has served the people well for nearly 200 years. It has great elements of strength. It has survived crises in the past and will, in all probability, survive others in the future. But there is no assurance that it will always continue to do so unless statesmanlike solutions are found—and found quickly—to meet new problems arising out of an almost completely different set of social and economic conditions under which it must operate now and in the future.

"The time may be later than we think."[8]

I feel this to be an overly pessimistic view of our federal system of government. One of the main reasons this government has endured has been its adaptability to changing circumstances. I feel that the system will

[6] Mason, *op. cit.*, p. 257.

[8] Glendening and Reeves, *op. cit.*, p. 311.

continue to adapt as the world changes around it. Daniel Elazar has projected a policy framework that he feels our government will follow: "(1) All governments will continue to grow in size, expenditures and scope of activities. (2) Sharing of power will be equally important in the future and will even seem to increase. (3) The states will have to act constantly and with greater vigor to maintain their traditional position as the keystones in the American governmental arch. (4) Localities will have to struggle for policy—as distinct from administrative—control of new programs."[9]

I would add a fifth to his list of predictions, the fact that our government system can and will prevail if we understand it and learn how to use it to secure the common good. Based on one belief—that of the individual's right to liberty—all aspects of the American system are geared toward safekeeping democracy, especially the federalistic system because it is the only form in which we have known true freedom to survive.

FEDERALISM IN THE UNITED STATES

(By Mr. Jack Edward Ottaway, Weber High School, North Ogden, Utah)

The principle of federalism, since its inclusion in our Constitution, has become an integral part of the American government and history. The word federalism takes its origin from the Greek term foedus meaning treaty.[1] Today, however, historians describe federalism as the coexistence of two or more governmental levels, each with its own powers and duties, yet still maintaining unity. The federal system is unique from other democratic forms of government because of that. Confederacies and unitary systems allow for imbalances in power; a true federation does not.[2] Our American government has, for nearly two hundred years, sought to preserve this belief.

The beginnings of federalism were seen as early as Ancient Greece; however, the Holy Roman Empire is generally accepted as Eurasia's first federation.[3] Others included the early Swiss Confederation and the United Netherlands of the sixteenth century. In 1787 the United States of America became the first true federation in North America. The U.S. Constitution incorporated a bold new federalistic theory. Switzerland followed suit in 1848 with a constitution similar to that of America. Nineteen years later, the British-North America Act established a federal type of government in Canada. Britain's other large possession, Australia, became a federation in 1900.[4] Since then a number of federations have arisen in post-World War II Europe and the turbulent Central American countries.

The reasons for the Founding Fathers' choice of an American government involving federalism are debated even today. An opinion I share is that when a country encompasses a large number of special interest groups, it is best served by federalism. Such was the case during America's "Critical Period" betwen 1781 and 1789. A national government formed in 1781 under the Articles of Confederation proved itself much too weak and subordinate to the thirteen states. Significant weaknesses in the Articles were: no national executive branch, ineffective tax collection, no central power over interstate commerce, and the absence of a federal judiciary. As a result, the United States was shown disrespect at home and abroad. While disgruntled Massachusetts farmers staged a rebellion to demand more paper currency, scheming European countries plotted to recover territory in the Americas. In response, delegates to the Annapolis Convention of 1786 urged Congress to take action immediately.[5]

The Continental Congress, on February 21, 1787, decreed that a meeting of the states was imperative "for the sole and express purpose of revising" the Articles of Confederation.[6] Later that spring the Philadelphia Convention gathered to do so. Representatives from every state except Rhode Island spent nearly four months in session. The end product was a new United States Constitution composed of numerous compromises. The new government was intended to concede as much power to the states as possible without impairing national sovereignty.

Opposition to the Constitution swelled, nevertheless, especially from the less-educated people of agrarian background. Men who supported the Constitution took advantage of this apparent ignorance to accelerate the ratification process. Alexander Hamilton, James Madison, and John Jay authored the *Federalist*, a political thesis in support of the new government and federalism in general. The series of essays in the book was effective propaganda in that it convinced the states and people that their subordination would not lead to their obliteration. In essay forty-six Madison discussed that:

"The adversaries of the Constitution seem to have lost sight of the people * * * they must be told that the ultimate authority, wherever the derivative may be found, resides in the people alone * * *"[7]

Elsewhere in the book the philosophies of Montesquieu and Voltaire were incorporated to soothe fears of the new system. Ultimately the *Federalist* was successful; ratification concluded on July 2, 1788 with nine states giving the nod of approval.

Examples of federalism in the U.S. Constitution are evident. A compromise among convention delegates spurred the idea of a bicameral national legislation outlined in Article I of the Constitution. The House of Representatives pleased men of the "common interest," whereas the Senate was favorable to the aristocracy. Thus no region or interest took precedence over another.[8] Article I, Section 8 of the document "enumerates" the specific powers of the Congress and of the national government in whole. Section 9 goes on to discuss the limitations on the Congress. "Residual" or reserved powers to the states and people are found in the ninth and tenth amendments to the Constitution. "Those powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people."[9] Those privileges not specifically encountered in the above situations are held concurrently by both levels of government, or denied to both. An example of shared responsibility is the power to levy taxes on both a state and national level. In the same respect, neither level may grant a title of nobility. Overall, the structure of federalism in the U.S. Constitution began as a mere "skeleton"; the "meat" had yet to come.

Federalism has instituted a remarkable degree of success in the United States Constitution. The federal system unified our nation in a time of diverse opinions and interests. Moreover, the fragile position of the country was significantly bolstered by the strength of federalism. European nations had reason to respect the United States. Also, examples were set for all freedom-seeking countries desiring an effective government. Tested and tried by a civil war, two world wars, a massive economic depression, and changing politics, federalism appears to have succeeded in America.

The weaknesses of federalism are evident, just as strengths were. Notable was the lack of an effective national banking system until the twentieth century. The early attempts of Alexander Hamilton to secure a stong federal bank were futile. States' rights advocates, including President Andrew Jackson, stifled the early banks as a protection of their sovereign interests.[10] Not until the Federal Reserve Act of 1913 did a solution occur. A network of twelve national banks was designated to serve private banks throughout the country. Other challenges to federalism regarding commerce control, civil rights, et al. have seen review by either congressional legislation or court decisions. The menace of rampant bureaucracy is a problem still unsolved, though.

The excessive involvement between national and state governments is a concern of contemporary politicians and historians. One author, Michael Reagan, believes that the old style of federalism has been severely diminished in the wake of intergovernmental bureaucracy.[11] In his opinion, a "New Federalism" has evolved stressing the interdependence and sharing of functions between the levels of government. Today's federalism is changed not by the Constitution, but by court decisions, legislation, political custom.[12] Reagan explains this threat

---

[9] Elazar, *op. cit.*, pp. 221-225.

[1] Footnotes at end of article.

to federalism as the failure of states to adequately finance the services they provide. To remedy the problem, the federal government has involved itself in state affairs, thereby creating an unseparated system contrary to the idea of federalism. Now those same federal officials are seeking to get government "off the back" of the states.

President Ronald Reagan vowed in his 1980 inaugural address to see the proper division of responsibility between the levels of government. He proposed a "New Federalism" not of bureaucracy, but of efficiency.[13] Initial support for President Reagan's program came from the National Governors' Association, congresssional committees, and the Advisory Committee on Intergovernmental Relations (ACIR).[14] ACIR issued a report stating that "the federal government's influence has become more pervasive, more intrusive, more unmanageable, more ineffective, more costly, and above all, more unaccountable."

Murray Weidenbaum, Chairman of the President's Council of Economic Advisors, explained the reasons for the "New Federalism" in a September, 1981 speech. He stated that the administration is "committed to restoring and strengthening the federal system."[15] The states formed the federal government and therefore should not have to face some 1,259 regulations on use of federal grants, he believes. In addition, Weidenbaum cited the recommendations of the President's Federalism Advisory Committee as a reason for the "New Federalism."

To accomplish the "New Federalism," the Reagan administration implemented a "block grant" system. Block grants were designed to consolidate the 500 individual grants into a few large, moderately restricted grants.[16] Benefits of the block grants include: reduced overhead burdens on all levels, more accountability over expenditures to state and local governments, and overall better cooperation among the governments. Despite these promising reforms, opposition has been expressed to the block grants.

The poor reception of Reagan's "New Federalism" is apparent in Congress, and among the public. A bi-partisan Congress rejected the majority of the proposed block grants. Of the six planned block grants, only two were formed to consolidate a few health programs.[17] At the U.S. Conference of Mayors, concerns were raised about the program. Civil rights, education, and religious leaders also expressed wariness at entrusting finances to the states. Furthermore, citizens' groups have formed coalitions to oppose the President's plan.[18] The current outlook for the "New Federalism" is rather gloomy, and unlikely to improve in the wake of these protests. A compromise between conflicting groups is imperative to the well-being of federalism in the United States.

In the future, federalism will probably not meet its demise, but may be faced with more change. For nearly two centuries federalism has guided this nation; any catastrophes are unlikely. The people of America may change and the policies of our country may change, but this was to be expected in a federation. Just as conflicting interests were overcome in 1787, so will those facing us in years to come. Federalism in the United States Constitution truly has been influential in the success of America.

FEDERALISM

(By Nanci Jean Bandes, Scottsdale, AZ.)

". . . An indestructible Union, composed of indestructible States." [1] As given by the Supreme Court justices in the case of Texas v. White, 1869, this definition represents the true essence of American federalism itself. Federalism has had the most impact on our democracy in the United States, and is the most important concept of American governmental organization today.

". . . American federalism is a form of political organization in which the exercise of power is divided between two levels of government, each having the same citizen body." [2] These powers of government are divided on a constitutional basis, and are divided between a central or national government and regional units or states. Both governments have authority, though limited, to act in ways which directly affect the people of the governed area.

Federalism is unique in that it permits local action in areas of local concern, yet also provides for the strength and power that come from a union of separate entities. New Jersey, for example, gives bus transportation to private as well as public school students, while other states may not. Other examples are Nebraska's unique unicameral legislature, and Nevada's legalized gambling.[3]

While permitting variance in local concerns, federalism also, however, provides unity and strength in national concerns, such as a natural disaster or a crisis in a particular state, when all the resources of the entire country are available for any necessary aid.

A primary principle of American federalism is that "the national government would use its superior resources to initiate and support national programs principally administered by the states and localities." [4] The sharing that occurs between national and state governments has a great effect on the lives of every American citizen.

It is important to note that the division of power by the Founding Fathers was based on the needs of the times rather than a preconceived formula, although some members of the Constitutional Convention knew of other federal systems in ancient Greece and Switzerland and were familiar with the theoretical literature about such systems.[5] Since that time, there have come to be certain principles common to all federal systems, as well as an important part of government in the United States.

1. The Federal relationship must be established or confirmed through a written covenant that outlines the terms by which power is shared.

2. Power is diffused into many substantially self-sustaining powers in noncentralization.

3. Territorial democracy is present to ensure equal representation of various groups and interacts, and to secure representation of diverse groups.[6]

Later, the new states to be admitted to the Union were even less interested in the legal or theoretical aspects of federalism as they were in its utility: "cooperation, joint enterprise, and partnership in building a prosperous nation." [7] The effects of the practical uses of federalism, past and present, in fact, are felt in every aspect of our national activity.

Like all governments, that of the United States began of necessity. The social, economic, and political problems of the 1780s proved the need for a stronger central government than that of the weak Congress under the Articles of Confederation.[8] Subject to many strong limitations on its powers, Congress could enforce no decision, and in many matters, including amendment, the consent of every state was required. Furthermore, before the states combined, the charters of the colonies defining the modes of their governments were radically different. In both war and peace, the people of the young nation could neither conduct their own affairs nor foreign relations. It was federalism that was needed to bring the country together in unity and strength.

Before the Constitutional Convention even met, it was known there would be a strong move towards federalism and the weakening of the states. In strong support of federalism, John Adams wrote in March, 1776, "Each colony should establish its own government and then a league should be formed between them all." [9] A collection of essays known as "The Federalist," was written and prepared by Alexander Hamilton, James Madison, and John Jay to persuade the New York convention to ratify the Constitution, with its federalistic principles.[10] On the other hand, however, anti-federalists Robert Yates and John Lansing felt that

[1] Footnotes at end of article.

the "consolidation" invaded "the individual states in their uncontrolled constitutional rights" and was not feasible for so extensive a country.[11]

In initiating a federal system of government, the Americans had the advantage of working with a modern society with no traditional hierarchies and being relatively isolated from the King and his power. The three major difficulties they did encounter in unifying the states, however, were: (1) uniting a traditionaly heirarchial society with equality and sharing of power; (2) dissolving the conflict between local autonomy and the need for a strong central government; and (3) resolving the problem of executive leadership and succession, which was not solved until the initiation of the elected presidency.[12] By solving these problems, the Americans laid the major foundations of American federalism.

The division of powers between national and state governments has many specifications, some provided by the Constitution and some by tradition of statutes. The question was originally raised as to the purpose of the federal government. On one side, the new federal government was paramount, and the states were simply subordinate political units. On the other hand, some felt that the central government was erected only to aid the states when they felt the need for it.[13] It is the former which has been upheld time and time, again, however, and the supremacy of the national government, combined with the balancing effect of the states' powers, is that which distinguishes American federalism from other governmental systems in other countries and provides the basis for a united country.

National supremacy was first established in 1819 in the case of Maryland v. McCulloch, when the Bank of the United States, a federal bank, refused to pay Maryland state taxes. The justices concluded that ". . . the government of the Union, though limited in its powers, is supreme within its sphere of action." [14] Consequently, no state had any power to "retard, impede, burden, or in any manner control the operations of the constitutional laws enacted by Congress." [15] Secondly, no form of state law may conflict with any form of national law. When Oregon entered the Union in 1859, for example, its Constitution prohibited voting by any person of Chinese descent. When the Fifteenth Amendment was added in 1870, however, the provision in the Oregon Constitution ceased to be effective.[16] Although many people feel that the federalistic principle of national supremacy gives too much power to a centralized source, it must be remembered that the national government actually has only certain powers.

The national government possesses only those powers delegated to it by the Constitution. There are three types of delegated powers: expressed, implied, and inherent. The expressed powers are those that are provided in so many words. Most are found in Article I, Section 8 of the Constitution, and include the powers to lay and collect taxes; to declare war; to make treaties, and to raise and maintain armed forces.[17] Secondly, the implied powers are not stated but may be reasonably implied from those which are. The "elastic clause" of the Constitution, found in Article I, Section 8, Clause 18, gives Congress the authority to ". . . make all laws which shall be necessary and proper . . ." [18] Lastly, the inherent powers are those which belong to the national government by virtue of its existence as the national government. They include the powers to regulate immigration; to acquire territory; and to protect the nation against internal subversion.[19] The powers which may be exercised only by the national government are known as exclusive powers.

Certain powers are also denied to the federal government. Some are stated, such as granting a title of nobility or levying a duty on exports. Other powers, such as the power to create public schools or enact national marriage laws, are denied to the national government only because of the Constitution's silence on the matter. The other powers denied to the national government are those which would threaten the existence of the federal system. They cannot, for instance, tax the government functions of the states, for it is then possible that one of the states could be taxed out of existence.[20]

The Constitution reserves to the states those powers that are not granted to the national government nor denied to the states through the Tenth Amendment. The states have the power to do anything which the Constitution does not specifically prohibit and which the national government has not been granted. The Tenth Amendment provides that, "The powers not delegated to the United States by the Constitution, nor prohibited by it to the states, are reserved to the states respectively, or to the people." [21] Evidence indicates that the framers of the Constitution merely intended to reaffirm the principle of federalism that was implied in the original Constitution: the national government has delegated powers and the states have reserved powers.[22]

Some powers are expressly denied to the states; states may not enter into any treaty or alliance, or coin or print money, for example.[23] Some powers are also denied the states because of the existence of the national government or because the individual state Constitution contains denial of power to the state. Finally, the concurrent powers are those which belong to both the national government and the states. These powers include the authority to lay and collect taxes, define and punish crimes, and condemn property for public use.[24]

What, then, is the purpose of such specific instructions for national and state governments? Why did the framers of the Constitution provide such detailed specifications? The most crucial concept of federalism is that national and state governments are brought to work together for the best interests of all people. This is the most important application of federalism. The best example, however, lies in the amendment process, in that it best demonstrates the federalistic nature of our government, with proposal being a national function and ratification a state matter.[25]

In conclusion, therefore, by pinpointing the exact location of authority and power, the United States Constitution through federalism permits centralized action and national strength, distinguishing the American democracy from the governmental organization of all other countries. Federalism permits action where it is most needed. Federalism permits joint enterprise and cooperation. Federalism brings about a greater national unity. Federalism provides specific authority to national and state governments. Finally, federalism, by restricting the powers of the central government, protects the American people against the tyranny that our ancestors fled when they left their original homeland. By securing all rights of independent sovereignty to each state, and yet providing for the interests and safety of all, federalism has become the most important concept in American governmental organization.

FEDERALISM—NATIONAL AND STATE GOVERNMENTS IN HARMONY

(By Amy Lynn Erb, Phoenix, AZ)

The concept of federalism is, and always has been, of great importance and significance to the success and survival of the United States of America. As a country dedicated to human ideals, we have incorporated into our system a form of federalism that

strives to accomplish the everchanging goals of a prosperous nation. While still experiencing some degree of imperfection, federalism has succeeded in maintaining and upholding the concepts of freedom that are existent in America today.

The American system of federalism was officially established in 1787 at the Constitutional Convention in Philadelphia. As an interwoven system of States governed by a weak national government under the Articles of Confederation, America's need for a better form of organization was considered a vital necessity by the Founding Fathers. While some of the prominent delegates like James Madison and Alexander Hamilton preferred a unitary system, most delegates agreed that a system of federalism was the only logical choice for our rapidly expanding country. Under a system of federalism, a stronger national government could be created while still retaining the State governments that were considered essential to the maintenance of liberty. Thus, through much compromising and hard bargaining, a system of federalism was designed to fit the needs of America.

Except for a few adjustments, the basic structure of our federal system is the same as it was when it was originated. Our American federal union is made up of one strong national government and fifty relatively strong State governments. To help maintain a division of power between the two levels of government, the Founding Fathers decided to enumerate those powers delegated to the national government. Accordingly, Section 8, Article 1 of the Constitution contains a formal list of the specific powers vested in Congress. By implication, the powers not delegated to the national government are reserved to the States unless specifically denied to them by other provisions of the Constitution. The Tenth Amendment explictly makes this statement valid.

To further secure a division of power and protect the concept of individual liberty, our federal system was designed so that neither the national government nor the State governments receive power from the other. Instead, the two governmental levels derive their power from a common source; the Constitution.

Within the Constitution is contained a basic set of guidelines as to the distribution of both national and State powers and limitations. The powers belonging to the national government are the delegated powers and are outlined in Section 8, Article 1 of the Constitution. While this list appears limiting, the provisions of an elastic clause have helped to broaden some of the national government's powers. The implied powers are those powers of the national government which are derived out of the delegated powers with the help of the elastic clause. the reserved powers are those powers of the State governments that embrace all powers not delegated to the national government or prohibited to the States. By not being specifically listed within the Constitution, the scope of the States' reserved powers are not as defined as the national government's powers. Those powers possessed by both the national government and the State governments are called concurrent powers. The fact that a certain power is delegated to the national government does not necessarily imply that the power is exclusive to that governmental level. Instead, if not expressly prohibited by the Constitution, certain powers can be shared by both levels of government. Within the concurrent powers, however, the States' powers must never conflict with the superior national powers. To help promote the belief in limited government, certain powers are withheld from both the national government and the State governments. The mutually forbidden powers help to protect the American ideal of individual liberty.

By instilling into the American system of federalism a distribution of powers as complex as these, the concept of a limited national government and a set of functioning State governments has survived over the years. The ability to change the constitutional distribution of powers only by mutual consent of the two levels of government has also strengthened the composition of our federal system.

Despite the amount of time and effort that was invested into forming a productive power distribution system, the people of the national and State governments have continued to debate and struggle with the extent of powers that they are allowed to have. The maneuvering for position and power between the two governmental levels had only just begun when the Connecticut Compromise was reached in 1787.

From Alexander Hamilton and Chief Justice Marshall through Abraham Lincoln and Franklin D. Roosevelt, have been those who supported a nation-centered federalism with a strong national government. From Thomas Jefferson and Thomas Burke and on to President Ronald Reagan have been others who have strived to prevent the continuing centralization of government. But as Woodrow Wilson once expressed it, "The relation of the State to the federal government is the cardinal of our constitutional system. It cannot, indeed, be settled by the opinion of any one generation." So the power debate has continued, and will continue, and certain changes have been made. In McCulloch versus Maryland the national powers were enlarged, while in the National League of Cities versus Usery the States' rights were confirmed.

In viewing federalism then, it is evident that it is a governmental concept that is able to respond to the changing needs and circumstances of the United States. Through almost 200 years, the most notable change in the federalism system has been a growth of power in the national government. This major change was not revolutionary and, with the exception of the Civil War and the Great Depression, was not conflict ridden. The change was brought about by many factors. The growth of national demands of Washington, D.C., the establishment of America as a world power with diverse interests and responsibilities, and the tremendous changes that have taken place in both communication and transportation have all been of great significance in the change to a more powerful national government.

To help counteract the growing national power within the United States, other changes have occurred and are still occurring. The introduction of "New Federalism" by President Ronald Reagan during his 1982 State of the Union address was a major step in the effort to decentralize the power of the national government. Under this plan, the State and local governments would receive fewer Federal grants but would once again be able to run their programs without national attachment.

Many advantages are embodied within the federal system of the United States. The chief advantage of federalism is that it provides a means of combining local autonomy in matters primarily of State concern with national unity in matters of general interest. Another major advantage of federalism is its ability to encourage experimentation. The States are able to serve as testing centers for new ideas and issues and help to promote nation-wide benefits. The virtue of the federal system to maintain and develop mechanisms vital to the fulfillment of governmental strength, political flexibility, and individual liberty is another asset that the people of America have come to appreciate and expect from their federal system.

Like all types of governmental concepts, federalism is not perfect. It does have a few disadvantages. The most obvious disadvantage is the surfacing of both conflict and competition for power. The power struggle also results in a certain degree of financial complications and adversities. The duplication of governmental machinery is another complexity that is associated with a system of federalism.

Despite a few minor disadvantages, it is clearly evident that federalism has served the needs of the American people well for nearly 200 years. It has great elements of strength and has survived crises in the past and in all probability will survive them in the future. The future of federalism, however, is dependent upon the satisfaction of the American people and the future of the nation as a whole. The American people have so far always been proud of their system of government and depending upon external factors, the concept of federalism will probably reign supreme within the United States of America forever. As Chief Justice Salmon P. Chase once said during a case of Texas versus White 1869, "The Constitution, in all its provisions, looks to an indestructible Union composed of indestructible States."

THE CONSTITUTIONAL DOCTRINE OF FEDERALISM

(The diffusion of authority between national and state governments)

(By Karen Elizabeth Forrester, Des Moines, Iowa)

One fact that very few people realize is that the government of the United States is a very old form of government. Since we are a young nation, it seems surprising that our constitution is older than those of the governments of very old nations in Europe and Asia. Perhaps the reason that the constitution has continued to serve its people so well and has been used by many other countries as a guide for the formation of their own governments is the flexibility in its doctrine of federalism.

When ratified in 1788, the constitution was a combination of two opposite political philosophies. Alexander Hamilton's supporters wanted a strong central government ruled by the better educated and wealthier members of society. The American people, however, would not tolerate a government that resembled the tyrannical monarchy from which they had just escaped. Thomas Jefferson's supporters wanted a weaker central government with strong state governments ruled by the common people. At that time in our history, however, the American people needed a government to unite them. The failure of the Articles of Confederation proved that the people of the United States were not yet mature or knowledgeable enough for such unrestricted self-government. The result of the Constitutional Convention was a federalistic government that combined both Hamilton's and Jefferson's philosophies.

It was Benjamin Franklin who persuaded the representatives to the Constitutional Convention to accept what most of them thought was an imperfect form of government. He stated that there is no such thing as a perfect government. He warned them that all governments eventually end in despotism when the people become so corrupted as to need a despotic government. Because all people possess prejudices, passions, and errors of opinion, a perfect government can not be produced by a group of people no matter how wise they might be. However, he thought that the constitution they had before them was as close to perfection as possible. "Thus I consent, Sir," said Benjamin Franklin in his speech to this convention of 1787, "to this constitution, because I expect no better, and because I am not sure that it is not the best."

The federal government was created to unify the states, to regulate interstate commerce, and to represent the country as a whole. The wording in the constitution concerning the powers of the federal government seems to be rather vaguely stated. This flexibility built into the constitution encourages debate among people with varying opinions. Debate creates an opportunity for all people to be represented, all ideas to be considered, and the most appropriate action for the particular situation to be taken. A choice between a liberal action or a conservative action, depending upon the situation, protects the government against unnecessary uprisings, rebellions and disorder. A more rigid form of government might not be able to adjust to an emergency; a more pliable government might not insure the rights of all the people.

The strength of the federal government has been periodically tested. In 1832 the Columbian Convention declared a federal tariff null and void within the borders of South Carolina. It called upon the South Carolina legislature to make necessary military preparations and threatened that South Carolina would secede if Washington used force to collect the customs. This enraged President (General) Jackson and he began preparing a sizeable army. A violent conflict was avoided, however, when the United States Congress passed the Compromise Tariff to pacify the South Carolinians and, as a face-saving device for the president, also passed the Force Bill which authorized the president to use military force if necessary to collect federal tariff duties.

The next test of the federal authority was the Civil War. The major issue at the beginning of the war was not slavery, but states rights versus the federal government. When the South was beaten, so was the argument for states rights. Since then the federal government has grown more powerful. There have been some presidents who have attempted to slow down the growth of the central government, but since the Civil War there has been no real champion for states rights.

After the Civil War a strong central government was needed to hold the country together. It continued to grow as Americans held on to the belief that since a larger government was successful then, it would be in the future. The belief was reinforced during the Great Depression. President Franklin Roosevelt's New Deal Acts greatly increased the size and power of the executive branch of government. During the depression Congress was in just as great a state of panic as the people were. It was ready to follow whatever lead the President took. Some of the laws passed by Congress early in the depression delegated legislative authority to the chief executive. For the first time the federal government intervened in state and local affairs. The government created jobs, helped farmers meet their mortgages and created the Home Owner's Loan Corporation. The federal government even put restrictions on business to aid labor. During the depression a strong federal government was needed to preserve the rights of the people and to provide for the general welfare. The President did provide relief to the suffering people so it was assumed that the only way to run the country efficiently was to have a strong central government.

In the face of many emergencies the flexibility of the United States Constitution has enabled the government to act promptly and efficiently while avoiding a needless revolution. It has been the general assumption, however, that the government would relinquish its emergency powers after the emergency has passed.

When the argument for states rights was abandoned after the Civil War, part of the flexibility of our government was also abandoned. Before the Civil War there was an alternative to increasing the influence of the federal government when a new problem arose. Responsibilities could even be given to the individual states. With the growth of the federal government came inefficiency. Many things just seemed to get lost in the oversized bureaucracy. Quality of services also went down.

When it is up to a community to directly support their own public services and schools, they put more care into their job. People become more thrifty when they are handling their own money. The small community understands its needs better than an outsider does. The needs of a small town are obviously different from those of a big city. The federal government, however, must generalize its programs for each town and city because it must support so many.

As time passes America changes. In the past a strong central government was needed. Now, however, America is growing rapidly. It is growing in population and is becoming more mature. The federal government can no longer efficiently control everything, nor should it try. People are now better educated and better informed than they were during Hamilton's time. The type of government he proposed was necessary to hold the states together until they matured. The federal government is still needed to preserve national unity and coordination and to provide national defense, but affairs within a state should usually be left to local governments.

President Reagan has now proposed what he calls a "new federalism." Under his plan the federal government would take care of medical benefits while welfare and thirty-five other programs would be turned over to the state governments. According to R. C. Wade of the *New York Times*, the "* * * new federalism will insure these programs will be more responsive to both the people they are meant to help and the people who pay for them." It is also the opinion of the Reagan administration that more people will participate in fundamental decisions since these decisions will have an immediate effect on their community.

"The President has been more successful in bringing the bureaucracy under control than any other president." declared White House personnel chief E. Pendleton James. Besides the reduction in federal services there has been some reduction in personnel. In 1981 roughly 43,000 nondefense jobs were cut with 75,000 more cuts proposed.

During the last few years the suburbs have been growing immensely. Because most federal policies favor urban centers, suburbanites want decentralization in the government. Sometimes their property taxes and health and welfare costs deplete one half of their county's budget, yet they receive very little federal aid. If more control were given to the local governments, this disproportionate aid could be leveled. As a result perhaps fewer people would move to urban centers just to receive government services and welfare, and those in the suburbs would be able and willing to care for their own residents.

It is the flexibility of our constitution that has enabled this country and this government to endure so long. When a very strong central government like the one Alexander Hamilton advocated is needed, it can be supplied. When a freer and more democratic form of government like that which Thomas Jefferson supported is needed, it can be supplied. Our constitution is unique in that it can easily adjust to the needs of the times and to different national situations. Though it is not a perfect government, it is a good one. As long as the citizens of this country remain knowledgeable of its contents and purposes and are dedicated to the democratic principles which it was designed to preserve, this federalistic country will not only endure, but will continue to improve.

THE FATE OF STATES' RIGHTS

(By Greg Martin)

Federalism, without it each of the fifty states would be no more than second rate powers in the international picture. With it, the fifty states assembled as one large nation, the United States has become the largest economic and military power in the world. This paper will discuss the Constitutional doctrine of federalism, the diffusion of authority between the state and national governments, and President Reagan's New Federalism.

Federalism is the principle according to which two levels of government, national and state, exist side by side, each possessing certain assigned powers and functions. Each level is limited to its own sphere, and within that sphere is autonomous and independent; neither may arrogate to itself power assigned to the other; each operates directly upon the people, and neither is dependent upon the other for its legislation, taxes, or administration.

The Founding Fathers outlined the role each level was to play in the Constitution, which is the foundation of the American system of Federalism. To the national government, they supplied what they hoped was sufficient power to create order and unity in the new nation and to provide security. It also gave the national government enough power to deal with the disputes between the states, but not to infringe on certain inalienable rights of the states and their citizenry. To the states, they granted the right to maintain an independent political existence and to serve as centers of local government, without extinguishing their separate administrations, legislatures, and local patriotisms.

Two ways the Constitution wove the power of the states into that of the nation were through the processes it required before the Constitution could be ratified and amended. Ratification or approval of the Constitution was not to be made by the people of the nation as a whole, but by the states.

"In ratifying the Constitution," James Madison said, "each state . . . is considered as a sovereign body, independent of all others, and only bound by its own voluntary acts." Thus, "the new Constitution if established," he concluded, "be a *federal* and not a *national* Constitution" because each of the states will have been intimately involved in its adoption."

Amendment of the Constitution was likewise dependent upon the states. Amendments could be proposed by two-thirds of both houses of Congress or by two-thirds of the state legislatures. But whatever their origin, amendments could become law only after the approval of the legislatures or conventions of three-quarters of the states. Under this rule, Madison pointed out, the states would not only have a say in the ratification of the Constitution, but would continue to play an important role in its development and alteration.

In the American system of Federalism the national authority is supreme but, in most instances, that does not exclude the state authorities wherever they can be helpful in a situation. The states are to deal with those areas in which they are not specifically prohibited from, as long as those powers are not granted to the federal government in the Constitution as stated under Amendment 10.

The framers of the Constitution were careful to delegate to the national government only specifically enumerated powers which they listed in Article 1, Section 8, of the Constitution. All those rights and powers not listed in that section were to remain with the states. At the same time, the framers of the Constitution were also careful to allow the states a voice in almost every exercise of authority that the national government might undertake, so that state and national power were inextricably and intimately woven together.

The Constitution spelled out national powers as clearly as possible, but it made no list of the powers granted to the states. It was simply assumed that the states would continue to exercise all those powers that they had before the Constitution—except for those that had been given to the national government. The states would maintain control of their own internal affairs, from the regulation of intrastate commerce, to education, state judicial systems and other local matters.

Article I, Section 10 of the Constitution specifically denied certain powers to the states. No state, for instance, was permitted to "enter into any Treaty, Alliance, or Confederation" or to "coin money." Nor could any state, "without the consent of Congress, lay Imposts or Duties on Imports or Exports." These restrictions on state power helped to eliminate the financial and commercial problems that had arisen under the Articles of Confederation.

The Constitution also made provisions to secure the individual liberties of the citizens from the government. The founding fathers realized that in a Federalist form of government, the people must be given certain irrevocable privileges and rights in order to preserve what was so fiercely fought for in the Revolution. The Bill of Rights so eloquently states what sacred areas that no state or national government may infringe upon. The framers of the Constitution knew that the preservation of the liberties of the people would be the basis for the survival of the Federalist system. For every American once he steps into the voting booth, has as an equal say in the structure of his or her government. If certain groups of Americans were not allowed to speak freely for their candidate or if certain sectors of the American public are kept from voting, or if the rights of the people were not to be maintained, the very substance of our nation as it is today would be quickly eroded.

A major problem with our federalist system is the large and quick growth of the national government. Big government is dangerous because it is enormously wasteful and tends to erode the Federalism that was envisioned by the founding fathers. Centralized government was the very thing the founding fathers sought to minimize.

In the eighteenth and nineteenth centuries, the power was centered with the states. The states seemed to work out the level of government necessary for them. The states in the west were concerned with internal improvements, such as roads and canals. On the other hand, the states in the south were concerned about advancements in agriculture. Each state had programs that could handle their needs for governmental assistance and regulation. The national government, at this time, was still trying to consolidate the states into the union and was still trying to consolidate its power.

For example, in the Supreme Court case *United States v. Peters* (1809), Pennsylvania refused to abide by a decision in federal court which overturned a ruling by a state court. The state, however, ignored the reversal and asserted its rights as a sovereign and independent government to decide matters for itself. The Court had to decide whether a state could be compelled to abide by a decision by the federal courts. Chief Justice Marshall came down firmly on the side of the national government. At first, Pennsylvania attempted to resist the decision by calling out the militia. But President Madison countered the threat of rebellion by calling out a federal posse of two thousand troops. Pennsylvania then backed down and obeyed the ruling.

Much of the energy of the federal government at this time was also being used in settling the nation and trying to console differences between different regions of the nation, especially between the north and south on the issue of slavery. The north and south seemed destined to a military conflict that only a strong national government could resolve. The Civil War would mark the beginning of the end for states' rights, the national government would assume more power in subduing the Confederate States of America.

Near the end of the nineteenth century, with the advent of the corporation, some states proved to inadequately handle "big business." In an unprecedented move, Congress passed the Interstate Commerce Act in 1887 to enable the regulation of railroads and other public utilities. Congress also passed the Sherman Antitrust Act in 1890, which enabled the federal government to deal with large monopolistic corporations, which was similar to a set of laws that existed in Massachusetts nearly thirty years earlier.

The drive for a stronger national government, however, continued to grow. Between 1901 and 1909 the strongly nationalist administration of Theodore Roosevelt sponsored federal legislation in the area of conservation and supported further regulation of big business. In 1913 nation-centered federalism was given another enormous boost by the adoption of the Sixteenth Amendment to the Constitution, which gave Congress the power "to lay and collect" a tax on the incomes of American citizens. The federal income tax opened a vast new source of revenue to the national government. The income tax, marked the beginning of a rapid rise in federal authority and the decline of state and local importance. But more significantly, it gave the federal government a source of almost unlimited income that could be used to finance any undertaking it may choose to pursue.

A large increase in federal power came about during the Great Depression. The New Deal legislation under Franklin Delano Roosevelt, put even more power into the hands of the federal government. The federal government assumed control or created several programs in banking and finance, farm relief, public works job creation, conservation of water, the national park system, and other areas of environmental concern. Although, the largest increase of federal power is largely due to the Great Society legislation of Lyndon Johnson.

President Johnson sought and received federal programs guaranteeing medical aid to the poor and the needy and the elderly. He expanded federal support for education, the arts and science. He made available student loans for college students like never before. His War on Poverty created many new and expensive programs, of which the likes of had never been seen before. These programs set the precedent for the many social programs in place at the federal level today.

The Federal government has assumed control or created more and more programs. In 1960, the federal government administered 132 Grants-in-aid programs that cost $7 billion. By 1980, only twenty years later, these programs had more than tripled in number, to 500, while their cost had grown by more than fourteen times the original amount, rising to nearly $110 billion. In the Congress, it takes at least 166 committees just to try to keep track of them. Since neither the president nor the Congress can properly oversee this jungle, the growth of these grants has led to a distortion of the vital functions of government.

In recent years the national government has set a bad example for the states, with huge budget deficits and millions of employees that seem to do less and less every year. Like the national government, the state governments have increased spending and have become wasteful, prodigal, and a threat to the liberties of their respective citizens. It is time for less government on all levels, but particularly at the national level where all

the trouble began. If the states are to have more and more power revoked from them each year then they will become mere agents and provinces of the federal government.

That is why this author supports President Reagan's New Federalism. It is designed to keep the big brother type of government from developing. It would transfer 43 different programs from the national government to the states. The New Federalism would transfer $22.8 billion out of a federal budget of $777.6 billion to the states. Out of the $22.8 billion, $7.925 billion would involve social, health, and nutrition services, $6.53 billion community development services, $4.442 billion education and training programs, $2.0174 billion transportation programs, and $1.9 billion for energy assistance programs.

This program is designed to accomplish three major tasks. First, it would relieve Congress and the federal government of many trivial responsibilities that now absorb their time and leave them free to concentrate on more important issues. Second, it would cut down on the waste in government, because the programs could be handled more efficiently by the states.

Third, it would allow the states and localities themselves to decide what programs they wished to finance and which to eliminate. A significant amount of responsibility for decision making would be returned to the states and a new balance of federalism achieved. The drift of power toward Washington would be checked.

With the current state of the federal government we are headed for a major social and economic disaster. The large unchecked federal government is eroding federalism in the nation, and the large federal deficit, which comes from retaining too much power at the federal level, is destroying our economy with artificially high interest rates. But with President Reagan's New Federalism we could recover from the current plight of our nation.

The Constitutional Doctrine of Federalism

"All men are endowed by their creator with certain unalienable rights. . . ." This phrase from the Declaration of Independence is one of the principles upon which our country was founded; one of the "rocks" upon which our Constitution was built.

Unlike any other society in the history of the world, the United States governmental structure is based upon a conviction that the people derive certain unalienable rights from God, and a Federal Government derives its rights and its powers from the people. There is a contract which establishes this principle and that contract is the Constitution. The Constitution provides for a Federal Government with certain limited powers and by ratifying the Constitution, the states and the people agree to be governed by or according to the terms of that document. The people are governed with their permission and that permission extends only to the principles found in the Constitution.

Contrary to what some people have been lead to believe, the people and the states receive no rights from the federal government as in the case in some forms of government. A government which can give people rights can also deprive people of rights. One of the major elements of the U.S. Constitution is the protection of the people from their own government.

Our system of government is known as a Republic. It is a system in which established law rules. Although democratic processes are used in our system to elect officials and pass laws, no majority has the power to infringe upon our fundamental freedoms. Although this is characteristic of a free society, rights and freedoms must sometimes be limited in a system of pre-emptive rights which requires a free people to exercise rights in a responsible, common-sense way.

The first ten amendments to the Constitution are referred to as the Bill of Rights. They are known as the Bill of Rights but the "Bill of Limitations" would be a more proper name for them because the first ten amendments clearly state what the federal government cannot do:

First Amendment: "The Congress shall pass no law * * *"

Second Amendment: "* * * the right of the people * * * shall not be infringed."

Third Amendment: "No soldier shall * * *"

Fourth Amendment: "The right of the people * * * shall not be violated * * *"

The Federal Government shall not * * * This is the commandment of the first eight amendments and to be sure that there would be no misunderstanding, the ninth and tenth amendments specify further that power stays with state and local governments or with the people themselves when not specifically given to the federal government.

When our forefathers left Europe, it was to escape a harsh dictatorship. They fled the oppression of Kings and Monarchs where religious freedom, among other things, were infringed upon. Naturally, when the pioneers settled on the new land, they were reluctant to form a national government of any kind. The wise men who wrote the constitution and signed the Declaration of Independence really had to convince the people and the states of the need for a federal government. The people already had all the rights that were to be had, and a central government could give them no more. The only need was for a body to conduct foreign affairs; provide a postal system; and, above all, provide the national defense. It was for consideration of such items as these that the people were eventually persuaded that a federal government would be to their advantage but only if it were very limited in its power over them.

It seemed that a society in which the federal government was very limited in power and that most of the power was as close to the people as possible was what most everyone would be happy with. So, in 1789, the people of the states ratified the constitution. The people were then assured that they would not be forced to obey a law that violated the principles contained in their new constitution.

The Republic established by our forefathers created a free society unlike any other in history. In the absence of interference by government, the American people were free to pursue their goals without unreasonable obstacles and restraint from government. With the incentive to own what they produced and working within the free enterprise system, Americans gave the world the automobile, mass production, the radio, miracle drugs, mechanized agriculture, electricity, etc. With these modern inventions of the industrial age came the attendant benefits which produced the highest standard of living the world had ever known. The freedoms of America resulted in more advancement in civilization in 200 years than the world had witnessed in the previous 5,000 years.

Solid evidence produced throughout the last 200 years proves that our Constitutional Republican form of government is the most humane and workable model of government ever devised by man. Still, some forces are working hard to lessen the importance of the constitution and they are meeting with some success. The federal government, which already has too much power, is growing. While centralization of power progresses, waste increases; a gigantic bureaucracy becomes unmanageable; tax burdens increase to the point of stunting the growth of production; and the free enterprise system is slowly being suffocated.

The freedoms we cherish and the principles upon which our nation was founded are eroding as the meaning and significance of the constitution are lost. Freedom from religion, some argue, means the same thing as freedom of religion. As the taxation of everything becomes the norm, the absence of a tax is now considered by some to be synonymous with a subsidy from government. Some cry for greater roles by the federal government in education while ignoring the fact that the constitution provides no authority for this. A national defense budget is described by some as an "an assault upon the poor" by those who seem not to know that the most fundamental responsibility of government is to defend and protect innocent human life.

While there are those who argue that the United States Constitution is obsolete, it seems obvious that no such document could endure forever in its original form. The farmers understood this, however, and provided the means for changing the Constitution in order to maintain order and a government of the people. If the principles by which we have agreed to govern and be governed are to be changed by judicial fiat, distorted, or simply ignored, that barrier between tyranny and justice; order and anarchy; freedom and slavery . . . . .will crumble.

The Ingenious Separation of Powers Under the U.S. Constitution

(By Shaun Kevin Kirby, Essex Junction, Vermont)

Our founding fathers made the arduous, three thousand mile voyage across the Atlantic Ocean in search of freedom and a better way of life. Some sought expansion of trade, others freedom of religion or land ownership. Most importantly, the desire for self-government as opposed to the restraining European monarchy drove the explorers of the seventeenth century to flee their native lands. Our courageous forefathers such as William Penn, Lord Baltimore, and others founded the thirteen American Colonies, and their descendants won our freedom on the battlefields of the American Revolution. As an independent nation in the eyes of a world hungry for conquest, we needed a strong national government to bind us together as one people and protect us from invasion.

The Articles of Confederation, our first plan of national government, proposed a loose conglomeration of states which re-

tained sovereignty. This plan of government failed due to its lack of federal authority. It did not provide for a chief executive nor a judicial body. Moreover, it lacked the power to tax the citizens.

In May 1787, our nation's most sage and seasoned politicians gathered at Independence Hall to revise the Articles. Behind closed doors and drawn blinds they secretly rejected them and began discussing the plan of government which they later drafted into the United States Constitution. The founding fathers envisioned a democracy—a government of the people, by the people, and for the people. Remembering the inappropriate balance of power in their European governments (monarchs held great sovereignty), they sought to establish a strong, central leader whose authority would be checked and kept in control. The Constitution which they drafted establishes a Chief Executive, head of the Executive Branch of government, and two other branches to check his power—the Legislative Branch and the Judicial Branch. These three branches of government harmonize and provide the centralization of government which our newly freed colonies desperately needed but lacked under the Articles of Confederation.

Our forefathers endowed each branch with specific federal powers and rights so that no single branch could ever assume total control of our nation. Nevertheless, the federal government remains strong. For nearly two hundred years this master plan of government has withstood the violent upheavals of changing times and society. Only the appropriate separation of powers and the elaborate system of checks and balances in our Constitution makes this possible.

Article I, Section 1 of our Constitution states that "All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and a House of Representatives." This clause establishes a bicameral legislature with the sole power to make laws—the Legislative Branch. It does not, however, grant the Legislative Branch supreme power to legislate. The president may make an "executive agreement" (with a foreign country) which has the impact of a law. Theodore Roosevelt, the great progressive President of the early twentieth century, greatly expanded the presidental power in this respect when he used the "executive agreement" in place of a treaty. In addition, treaties made "under the Authority of the United States" (Article VI, Section ii) have the force of laws.

Likewise, when the Supreme Court hands down a decision, it sets a precedent which serves to guide further decisions. In this respect, a precedent is similar to a law. The greatest check on the law making power of the Legislative Branch is vested in the Chief Executive himself. He must sign all legislation before it becomes law. He may veto a bill which he feels unfit for our nation, but the Congress may override his vote by a two-thirds vote. Thus the lawmaking power of the Legislative Branch remains strong and effective, but not absolute nor overbearing. This unique interrelation between the three branches of government and the separation of legislative power serve to balance our federal government.

In addition to legislative supremacy, the Legislative Branch possesses the enumerated and implied powers which give it the national authority the Articles of Confederation lacked. Article I, Section 8 of our Constitution grants it the power to levy and collect taxes, borrow money, coin money, and regulate a currency system. These powers give our federal government the efficiency it needs to achieve financial stability for our nation and economic competition in foreign markets. The Legislative Branch may also punish counterfeiters and piracy, but this power is checked by the Supreme Court since it has the final decision in all federal suits. The Legislative Branch may also provide for an army and a navy, of which the President of the United States is Commander in Chief. The Legislative Branch retains the final authority in the declaration of war. This balance and counterbalance of power works efficiently and prevents any one branch from assuming total power to direct our armed forces. As an overseer of the states, the Legislative Branch has the power to issue patents and copyrights, regulate foreign and interstate commerce, and establish uniform rules of naturalization and bankruptcies. This "policing" of the states binds our nation as a whole since it precludes the states from following their own political whims and diverging from one another. The most important power granted to the Legislative Branch, the "Elastic Clause" of Article I, Section 8, paragraph 18, is the power "To make all laws which shall be necessary and proper for carrying into Execution the foregoing Powers." Although the Supreme Court may attempt to declare an act of Congress unconstitutional, Congress may use this clause to support its stand in many cases by arguing that its actions were "necessary and proper" to the functioning of our government. Indeed, the powers granted to the Legislative Branch in the Constitution give it strength, and yet it remains effectively checked by the Executive and Judicial Branches.

The Executive Branch consists of the President and his cabinet and associates. The President retains the greatest power of any government official, but our founding fathers prevented him and his office from becoming a monarchy by subjecting the President and the Executive Branch of government to many restraints under the Legislative Branch. Article II, Section 2 states that "He shall have power, by and with the Advice and Consent of the Senate, to make treaties . . . appoint Ambassadors, other public Ministers and Consuls, Judges of the Supreme Court and all other officers of the United States." This gives the President great opportunity to supervise the execution of legislation, which the Constitution enumerates as his chief duty.

Also, working with the men he knows and likes best, he can perform his duties more efficiently. He does by no means, due to the checks and balances of Article II, maintain absolute power. He may enter into foreign treaties only when two-thirds of the Senators concur. Likewise, he may ask the opinion of his chief advisers in a decision. Although Congress limits his power to legislate, he delivers his annual State of the Union Address to the Senate and House of Representatives, thus greatly influencing their legislative decisions. The office of the President greatly strengthens the Federal government and provides the centralization necessary to fortify our nation against threats to our independence. Thus we see the careful planning and separation of powers between the Executive and Legislative branches of government.

The Judicial Branch insures that the Legislative and Executive Branches adhere to the principles of our Constitution which our forefathers so precisely constructed. Article III, Section 1 states that "The Judicial Power of the United States shall be vested in one Supreme Court and in such inferior courts as the Congress may from time to time establish."

Article IV, Section 2 grants the Supreme Court jurisdiction over cases involving the Constitution and laws of Congress. With this power, the Supreme Court can declare acts of Congress unconstitutional. This greatly strengthens the Judicial Branch of Government and prevents our Legislative Branch from exercising too much power.

The Judicial Branch may also settle disputes involving "admiralty and maritime jurisdiction" and controversies involving states, citizens, and foreign parties. This supplies the Federal government with the sovereignty over states it needs and balances the Legislative Branch's powers to regulate interstate commerce.

Although powerful itself, the Supreme Court is limited by the Legislative and Executive Branches. The President must appoint the Supreme Court Justices. With this advantage, he has more power over their decisions. If Congress does not favor a Supreme Court decision declaring a law unconstitutional, it can propose an amendment (under Article V) to the Constitution which would allow the law. Congress may also impeach and try the members of the Supreme Court. In this way Congress balances the Presidential power of appointment.

In addition, Article III, Section 2 states that Congress may "regulate" the appellate jurisdiction of the Supreme Court. This clause, although severely diminishing the Supreme Court's power, has been seldom employed. Thus the Supreme Court exercises a powerful check on the Legislative and Executive Branches while remaining sufficiently restrained by them at the same time.

As we have seen, our forefathers erected a network of interlocking powers in the United States Constitution. In many cases one branch of government has the power to overrule an action of another branch. In some cases this "overruling" itself may be overruled. Similarly, various powers granted to one branch are balanced by similar powers granted to another branch. The system of checks and balances provides the key to the prosperity of our national government.

Why has our Constitutional government endured conflict and crisis both foreign and domestic? Why are we, as Americans, the freest and yet the most responsible, coherent people in the world? What makes the United States a supreme world leader? Our Constitution provides us with the government we need—a strong, central government with the proper limitations so that the people maintain an active voice in politics. Only because of this may we justly term our government a democracy. We may rest assured that no one branch of government will assume the stifling power of the European monarchs under which the founding fathers suffered. We have a unique and ingenious separation of power in our federal government—that is what gives our nation its enduring prosperity and influence on the world. We are truly "One nation, under God, indivisible, with liberty and justice for all."

A TRIBUTE TO SENATOR JOHN TOWER

Mr. WEICKER. Mr. President, I want to say a few words of farewell today to my departing colleague, Senator JOHN TOWER. JOHN TOWER came to the Senate over 23 years ago to fill a seat vacated by Lyndon Johnson. Growing up in a small, rural community in east Texas, the son of a Methodist minister, JOHN acquired a strong sense of self and a willingness to fight for what he believed in.

With an intense interest in defense issues from the start, JOHN TOWER gravitated toward the Armed Services Committee, and since becoming a member of that committee in 1965, he has involved himself in all aspects of military affairs. As chairman of the committee since 1981, JOHN TOWER has emerged as an important figure—a powerful leader and a man to be reckoned with on all matters relating to defense. He has been a staunch advocate of President Reagan's defense policies and programs, guiding the administration's budget requests through Congress, fending off attacks, and engaging all nonbelievers in fierce debate along the way. As one such nonbeliever, I can tell you that JOHN TOWER is a hard man to beat.

Mr. President, perhaps JOHN TOWER's greatest single contribution in the defense field has been his persistence in attempting to bring the two major sectors of the defense budget—the procurement account versus personnel and operating accounts—into better balance. He believes that the quality of manpower and leadership are as important to our military strength as technology and weapons. Many pay lip service to this idea but few have adhered to it as tenaciously as JOHN TOWER. He was instrumental as armed services chairman in bringing to life the famous Nunn-Warner amendment, and that measure helped turn the tide in the military in the early 1980's by halting the hemorrhaging of talent from its ranks and restoring morale.

While we disagree on some defense issues, I greatly respect and admire the role that JOHN TOWER has played in national security affairs. It has been a necessary and important one, and one that he has played with a high degree of success. He believes that the United States can afford both guns and butter. I can't disagree with that; our difference is one of emphasis only.

Upon his retirement, JOHN TOWER will become a professor of undergraduate studies at Southern Methodist University. In keeping with his character, we can expect JOHN to engage his students in lively discussion and encourage them to hold their beliefs with conviction. I wish JOHN TOWER well in this and all future endeavors.

DOD PUBLIC RELATIONS CAMPAIGN ON DEFENSE RESOURCES MANAGEMENT

Mr. NUNN. Mr. President, recently a number of stories have appeared in the press about the efforts the Department of Defense has made to correct abuses and eliminate waste in the acquisition of weapons and spare parts. All of us are aware of the horror stories of such things as $400 hammers and $7,600 coffee pots.

Some of these recent stories originated because the Department of Defense discovered the abuse. Some of the stories have originated from members of the Armed Services; and some stories have originated from Congress performing its oversight functions.

However, there were also press reports that these stories were the result of a preplanned media campaign, approved by the Secretary of Defense, to combat the public image that the Pentagon has serious management problems. At least one of these stories reported on a press conference given by the Department of Defense Inspector General, Joseph Sherick.

When these news reports first surfaced, Senator BINGAMAN and I had a colloquy on the floor in which we expressed our concern about the impact of Mr. Sherick's participation in this campaign and about the propriety of the campaign in general.

Our concerns have been heightened by the release by Common Cause of two Department of Defense memorandums which corroborate the press reports that Mr. Sherick's press conference, and the other statements by other Department of Defense officials are part of an orchestrated media blitz, apparently with political purposes in mind.

One is a memorandum, dated July 24, 1984, for the Under Secretary of Defense [R&E] Dr. DeLauer, from Russell Rourke, the Assistant Secretary of Defense for Legislative Affairs. The memorandum notes, and I quote,

> The Senate Armed Services Committee is concerned over the press this weekend concerning the Department's program for disposal of spare parts. This, coupled with the press we received on prices paid for selected spare parts, I.E., claw hammer, stool cap, allen wrench, if gone unchecked, will definitely be a key campaign issue. The opposition will cite these examples and portray the Department as having serious management problems.

The memo goes on to say that the committee would like certain information for use in rebutting these press stories.

As the ranking Democrat on the Armed Services Committee, I have no knowledge of nor participated in any request of this nature. Nor have I seen any of the material apparently requested on behalf of the committee.

The second memorandum dated August 31, 1984, is from Kathleen Troia, the principal Deputy Assistant Secretary of Defense for Public Affairs. The memorandum indicates that the Secretary of Defense has approved a public affairs plan, which is attached to Ms. Troia's memorandum, to "enhance media and public understanding and support for the Department's management improvement program" concerning the procurement process. The memorandum details a series of steps including speeches by Secretary Weinberger and Deputy Secretary Taft and the press briefing by the Department's Inspector General. It also encourages local military commanders to take such steps as necessary to participate in this overall effort. Interestingly, the program concludes on November 3, only 3 days before the election.

I am more troubled by this memo. First, it has long been a tradition in this country that the Secretaries of State and Defense do not engage in political activities during presidential political campaigns. This media campaign clearly calls that tradition into question. I have written to the General Accounting Office and asked them to look into this matter to determine if it is consistent with all applicable rules and regulations governing the activities of career Federal employees. I ask that my letter to GAO be inserted in the RECORD at this point.

Mr. President, I am particularly concerned about the role of the Department of Defense Inspector General in these activities. The Congress enacted a number of provisions in 1983 to ensure the independence of the Department of Defense Inspector General. In my view, it is essential that the Inspector General of the Department of Defense be independent and of the highest integrity. He should not engage in partisan political activities nor permit his office to be so used. It is therefore particularly disturbing to see Mr. Sherick's participation in this campaign. I have written directly to Mr. Sherick expressing my concern and asking him to provide me with his views on the legality and propriety of his participation, as well as that of other DOD employees, in this program. I ask unanimous consent that my letter by printed in the RECORD.

Finally, Mr. President, we all support efforts to find waste, fraud, and mismanagement in Government, particularly in the Defense Department. But I am concerned that this process should not be used for political purposes. I intend to carefully monitor these activities and to study the responses from GAO and Mr. Sherick.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, October 5, 1984.

Hon. CHARLES A. BOWSHER,
Comptroller General of the United States, General Accounting Office, Washington, DC.

DEAR MR. BOWSHER: Mr. Fred Wertheimer of Common Cause has recently provided the Committee on Armed Services with two Department of Defense memoranda which establish that the Department of Defense, including the Department's Inspector General, has launched a "plan to enhance media and public understanding and support for the Department's management improvement program." Those two memoranda are attached.

The program, which is well underway, involves a number of speeches, press conferences, and other public events, which conclude on November 3, 3 days before the general election. It appears to have clear political overtones. There have been suggestions that the participation of the Department's inspector general and other government employees in this program may raise questions of legality and propriety.

Enclosed is a copy of my remarks on the floor of the Senate in which I stated that I believe Congress should carefully monitor these activities.

I request that the General Accounting Office examine this program to determine if there are any violations of law or regulations. I believe that your inquiry should address the following questions:

What is the nature and extent of this program? How many personnel are involved and what is the cost? Is there more to it than is disclosed by the August 31 memorandum from Deputy Assistant Secretary Kathleen Troia?

Does the participation of the Inspector General of the Department of Defense in such a program violate any applicable law or regulation?

Does the participation of other Department of Defense personnel, both military and civilian, violate any applicable law or regulation?

Are any public moneys being spent in violation of applicable laws or regulations?

I look forward to your report at the earliest possible time.

Sincerely,

SAM NUNN,
Ranking Minority Member.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC, October 4, 1984.

Hon. JOSEPH H. SHERICK,
Inspector General, Department of Defense, Washington, DC.

DEAR MR. SHERICK: Last week, press reports indicated that you had provided a press briefing designed to show that the Pentagon is vigorously attacking fraud and corruption. According to these same press reports, this briefing was the first in a series scheduled between now and the Presidential election on this general subject. Common Cause has now provided documents to this committee detailing an elaborate public relations campaign that has strong overtones of partisan political activity.

Frankly, I am concerned that your participation in this type of program undermines the independence of the Office of Inspector General within the Department of Defense. It certainly was not the intent of Congress that any Inspector General, including the Defense Department Inspector General, should become involved in partisan political activities.

These same concerns were expressed last week on the Senate floor during consideration of the Conference Report on the fiscal year 1985 defense authorization bill. I am enclosing the relevant portions of this discussion from the CONGRESSIONAL RECORD for your information.

As I indicated on the Senate floor, I have been very supportive of your work since your appointment as Inspector General. You have a reputation for integrity and frankness. In that spirit, I would appreciate your views as to the legality and propriety of the participation of the Inspector General of the Department of Defense, as well as other DOD civilian and military employees, in the program outlined by the attached DOD documents. In addition, I would also like your views as to how you intend to maintain the independence and nonpartisan nature of your office, as well as your credibility, if you continue to participate in this type of public relations campaign.

Sincerely,

SAM NUNN,
Ranking Minority Member.

DEFENSE DEPARTMENT INVOLVEMENT IN PRESIDENTIAL CAMPAIGN

Mr. BINGAMAN. Mr. President, I want to join Senator NUNN in expressing concern about the interjection of the Defense Department into the political arena. I associate myself entirely with his remarks and support the letters Senator NUNN is sending to the GAO and Mr. Sherick. The documents which Common Cause released last Wednesday look to this politician, and I believe would look to anyone, like Presidential campaign planning documents. Drawing them up seems to me not to be the proper role of the Pentagon's public affairs office and executing the plans seems to me not to be the proper role for the Pentagon's Inspector General or career civil servants and military officers. The release of these documents confirms the suspicions that I raised on September 27, when I addressed this issue on the floor of the Senate.

I would like to note, however, that the public relations campaign has not been going entirely as planned, and is not having the intended effect of assuring the public that all problems have been solved.

Mr. Sherick, at his September 26 briefing, made it clear that mismanagement and malfeasance in the Defense Department and in the defense industry were still widespread. He said: "I keep turning over rocks and each one I turn over, I keep finding things." Mr. Sherick should be commended both for his efforts thus far as the Pentagon's Inspector General to combat waste, fraud, and abuse, and for his honesty in admitting much remains to be done.

The same thing apparently happened at last Wednesday's briefing according to articles in last Thursday's papers. Mary Ann Gilleece, the Deputy Under Secretary of Defense for Acquisition Management, outlined Pentagon efforts to increase competition in defense procurement. This is something which many of us in the Congress have supported, with Senators COHEN and LEVIN out front as principal sponsors of the Competition in Contracting Act passed in June. Unfortunately for the Reagan administration, Ms. Gilleece's charts at last Wednesday's briefing showed that much of the increase in competition in defense procurement since the mid-1970's actually occurred in the Carter/Mondale administration, though the trend toward increased competition has continued in this administration. And I might note that we clearly have more to do to foster real competition in the defense industry.

Finally, I would like to give credit to a Marine Corps lieutenant colonel, David Evans, who serves in the Office of the Secretary of Defense and who published an op-ed piece entitled "A Runaway Pentagon," in last Wednesday's New York Times. Presumably, this was not part of the Pentagon Public Affairs Office's campaign plan. For it is an indictment of the way the Pentagon goes about its weapons system acquisition process. The article is reminiscent of the points which another member of Secretary Weinberger's staff, Chuck Spinney, has been making for some time about a plans-reality mismatch. As Colonel Evans points out, costs are never as low as expected. We add bells and whistles to our weapons in response to threats which are not real. And we get, as a result, a vicious cycle of rising costs, declining production rates, and fewer weapons, all of which combine to produce tremendous pressure for increased defense spending.

I would ask unanimous consent that the entire text of Colonel Evans' article appear at the end of my remarks.

Mr. President, we clearly do have many problems before us that we will need to tackle in the new Congress. The briefings by Mr. Sherick and Ms. Gilleece, and the article by Colonel Evans, amply point to unsolved problems. We are going to need to approach these problems on a bipartisan basis. And the Pentagon's involvement in the Presidential campaign is not going to foster such bipartisan cooperation. I hope they will reconsider their current plans.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 3, 1984]

A RUNAWAY PENTAGON

(By David Evans)

WASHINGTON.—At a recent internal Pentagon briefing concerning the fiscal 1986 defense budget, the Air Force speaker raised irony to a new level. A tentative budget of "only" $109 billion, he said, placed "severe fiscal constraints" on the Air Force. This conviction, shared equally by the Army and Navy, is as unconvincing as the kid who laps down a three-scoop ice cream cone and says he's "still hungry." But the remark is revealing. Despite the biggest sustained budget growth since the World War II mobilization, the Pentagon still regards a shortage of money as the main obstacle to a full renaissance of American military power.

The perception of a cash shortage is driven, first, by an out-of-control requirements process. One immutable law of Pentagon force planning is that the Joint Chiefs of Staff will generate requirements greater than the existing force, irrespective of the strategy in vogue at the time. It is the inevitable result of a cycle that a former officer calls "incestuous amplification."

It begins with the services each going through an elaborate itemization of the number of ships, planes and divisions they want. These listings are stapled together to produce the whole. Real trade-offs—say, giving up a wing of Air Force F-15 fighters for an extra Army division—do not intrude on this stylized ritual. The process is additive, and the result is an inflated "requirements menu" with a five-year cost of about a trillion dollars more than the existing force. Naturally, any peacetime defense budget compared to this target appears woefully inadequate.

The perception of a cash shortage stems also from the seductive notion that we can fight a "sanitary" war using complex (and costly) weapons—sophisticated target-acquisition devices, computers, long-range missiles, etc.—that will whittle down a numerically superior foe before he can use his own arms. The unstated premise is that the side doing the whittling will suffer minimal losses.

From this optimistic vision of conventional conflict the "force multiplier" idea originates: a single fighter equipped to shoot down five MIG's at long range is really the equivalent of more than one plane. There are two assumptions: first, the enemy will accommodate us by charging blindly into the teeth of this technology; second, he will continue to do so in the face of unacceptable losses. In short, a predictable foe destroyed by arms that always work perfectly.

This video-game vision would be fine were it not for a few real-world problems. Not only are these expensive and difficult-to-maintain systems vulnerable to saturation attacks, they can be thwarted in cheap and unpredictable ways, as Iran is doing by using simple radar reflectors to lure Iraqi Exocet missiles away from their intended targets, the oil tankers at Kharg Island.

It is also doubtful that our heavy investment in this "beyond visual range" technology will be used in a shooting war, where the rules of engagement dictate positive identification of the target before shooting. This means that the pilot must make sure the blip on his radar screen is an enemy plane, not a buddy. But combat at such close quarters does not require complex technology: short-range missiles and cannons are brutally effective. More importantly, aircraft stripped of all the electronic "black boxes" and heavy long-range missiles are much more agile. Greater effectiveness does not necessarily come at greater cost.

The net result is the creation of a self-fulfilling prophecy. Long-range capability is touted as essential to prevail against a numerically superior foe; this drives up each weapon's cost, which reduces the number that can be bought. The inevitable numerical shortfall is then served up to justify spending additional sums. This is why, after an increase in the defense budget of more than $100 billion in the past four years, the claim is still made that Moscow is "outproducing" us.

The budgetary arguments are clouded still further by the "should cost" dilemma. Billion dollar warships and $50 million fighters may no longer raise eyebrows among inside budgeteers, but do these huge sums reflect what these weapons *should* cost? The unappreciated answer from A. Ernest Fitzgerald, a cost analyst for the Secretary of the Air Force, is that the Pentagon is generally getting taken to the cleaners by contractors charging anywhere from two to 10 times what would be expected in the private sector. The brouhaha over the $400 claw hammer is symptomatic of how major items like bombers and cruisers themselves are priced.

Closely related to the "should cost" phenomenon is the habit of underestimating initial production costs and assuming that they will decline as experience is gained on the production line. Actual experience dictates otherwise. Costs are generally underestimated and tend to increase over the life of the production cycle.

While these costing assumptions are at odds with reality, they are bureaucratically useful for getting programs started. The system in effect rewards underbid proposals for new weapon systems. The result? A vicious cycle of rising costs, declining production rates and fewer weapons, all of which combine to produce tremendous pressure for increased defense spending.

Speaking for myself, I think that exaggerated force requirements, inappropriate technology and high costs are symptomatic of a runaway system. A 45 percent real increase in defense spending over the past four years has been necessary just to keep the force from shrinking. The former Army Chief of Staff, Gen. Edward C. Meyer, was on target when he said: "Either we are going to spend ourselves into extinction, or we have to come up with alternative strategies and new way to allocate resources."

MESSAGES FROM THE HOUSE

At 7:52 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3398) to change the tariff treatment with respect to certain articles, and for other purposes.

The message also announced that the House has agreed to the amendments of the Senate to the following bills:

H.R. 2790. An act to amend the Colorado River Basin Salinity Control Act to authorize certain additional measures to assure accomplishment of the objectives of title II of such Act, and for other purposes; and

H.R. 3331. An act to authorize the exchange of certain lands between the Bureau of Land Management and the city of Los Angeles for purposes of the Santa Monica Mountains National Recreation Area.

The message further announced that the House has agreed to the amendments of the Senate to the following bills:

H.R. 5121. An act to designate certain national forest system lands in the State of Virginia as wilderness; and

H.R. 6163. An act to amend title 28, United States Code, with respect to the places where court shall be held in certain judicial districts, and for other purposes.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 771. An act to revise and extend provisions of the Public Health Service Act relating to health promotion and disease prevention, to provide for the establishment of centers for research and demonstrations concerning health promotion and disease prevention, and for other purposes.

The message further announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 144. Concurrent resolution authorizing the rotunda of the United States Capitol to be used in connection with the proceedings and ceremonies for the inauguration of the President-elect and Vice President-elect of the United States.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 371. Concurrent resolution directing the Clerks of the House of Representatives to make a correction in the enrollment of the bill H.R. 2790.

At 8:35 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, each without amendment:

S. 2526. An act to authorize appropriations for the Coast Guard for fiscal years 1985 and 1986, and for other purposes; and

S. 2565. An act to extend programs under the Head Start Act, and for other purposes.

The message also announced that the House agrees to the amendment of the Senate to the following bill:

H.R. 999. An act to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the following bills:

H.R. 6007. An act to establish certain procedures regarding the judicial service of retired judges of District of Columbia courts, and for other purposes; and

H.R. 6224. An act to provide for the assumption of selected functions, programs, and resources of Saint Elizabeths Hospital

by the District of Columbia, to provide for the establishment of a comprehensive mental health care system in the District of Columbia, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 540) to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the amendment of the House to the bill (S. 2301) to revise and extend programs for the provision of health services and preventive health services, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2616) to extend the Adolescent Family Life Demonstration Program.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2574) to revise and extend title VIII of the Public Health Service Act, relating to nurse education.

The message also announced that the House has passed the following bill and joint resolution, in which it requests the concurrence of the Senate:

H.R. 5716. An act providing for the conveyance of public lands, Seneca County, Ohio; and

H.J. Res. 663. Joint resolution making further continuing appropriations for fiscal year 1985.

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 372. A concurrent resolution to correct the enrollment of H.R. 3398; and

H. Con. Res. 373. A concurrent resolution to correct a technical error in the enrollment of the bill H.R. 6257.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 607. An act to amend the Communications Act of 1934;

S. 648. An act to facilitate the exchange of certain lands in South Carolina;

S. 1102. An act to provide authorization of appropriations for title III of the Marine Protection, Research, and Sanctuaries Act of 1972, and for other purposes;

S. 1151. An act to compensate heirs of deceased Indians for improper payments from trust estates to States or political subdivisions thereof as reimbursements for old age assistance received by decedents during their lifetime;

S. 1330. An act to establish a National Council on Public Works Improvement to prepare three annual reports on the state of the Nation's infrastructure, to amend the provisions of title 31, United States Code, relating to the President's budget to require it to separately identify and summarize the capital investment expenditures of the United States, and for other purposes;

S. 1510. An act to establish uniform audit requirements for State and local governments receiving Federal financial assistance;

S. 1790. An act to authorize the Secretary of the Interior to enter into contracts or cooperative agreements with the Art Barn Association to assist in the preservation and interpretation of the Art Barn in Rock Creek Park in the District of Columbia, and for other purposes;

S. 2048. An act to provide for the establishment of the Task Force on Organ Transplantation and the Organ Procurement and Transplantation Network, to authorize financial assistance for organ procurement organizations, and for other purposes;

S. 2125. An act to designate certain national forest system lands in the State of Arkansas for inclusion in the National Wilderness Preservation System, and for other purposes;

S. 2166. An act to reauthorize and amend the Indian Health Care Improvement Act, and for other purposes;

S. 2303. An act to amend the Public Health Service Act to revise and extend the authorities of that Act for assistance for alcohol and drug abuse and mental health services;

S. 2483. An act to rename Dulles International Airport in Virginia as the "Washington Dulles International Airport";

S. 2496. An act to extend the authorization of appropriations for certain education programs, and for other purposes;

S. 2663. An Act pertaining to the inheritance of trust or restricted land on the Lake Traverse Indian Reservation, North Dakota and South Dakota, and for other purposes;

S. 2773. An act to designate certain National Forest System lands in the State of Georgia as wilderness, and for other purposes;

S. 2808. An act to designate certain National Forest System lands in the State of Mississippi as wilderness, and for other purposes;

S.J. Res. 80. Joint resolution to grant posthumously full rights of citizenship to William Penn and to Hannah Callowhill Penn; and

S.J. Res. 273. Joint resolution to designate the week of October 7, 1984, through October 13, 1984, as "Smokey Bear Week".

MEASURES PLACED ON THE CALENDAR

The Committee on the Judiciary was discharged from the further consideration of the following measures; which were placed on the calendar:

S. 3034. A bill to grant a Federal charter to the National Society, Daughters of the American Colonists;

H.R. 1095. An act to grant a Federal charter to the 369th Veterans Association;

H.R. 2087. An act for the relief of Hans Robert Beisch;

H.R. 4401. An act for the relief of Shu-Ah-Wei, her husband Yen Wei, and their sons, Teh-fu Wei and Teh huei Wei;

H.J. Res. 332. Joint resolution to designate the week beginning May 20, 1985, as "National Medical Transcriptionist Week"; and

H.J. Res. 594. Joint resolution designating the week beginning February 17, 1985, as a time to recognize volunteers who give their time to become Big Brothers and Big Sisters to youths in need of adult companionship.

The Committee on Foreign Relations was discharged from the further consideration of the following measures; which were placed on the calendar:

S. Res. 386. A resolution entitled the "Mandela Freedom" resolution; and

H. Con. Res. 196. A concurrent resolution calling upon the President to study the advisability and practicality of a collaborative people-to-people program between the United States and Mexico.

The Committee on Environment and Public Works was discharged from the further consideration of the following bill; which was placed on the calendar:

H.R. 2823. An Act to amend title I of the Reclamation Project Authorization Act of 1972 in order to provide for the establishment of the Russell Lakes Waterfowl Management Area as a replacement for the authorized Mishak National Wildlife Refuge, and for other purposes.

The Committee on Armed Services was discharged from the further consideration of the following bill; which was placed on the calendar:

H.R. 6100. An act to clarify the intent of Congress with respect to the families eligible for a commemorative medal authorized for families of Americans missing or otherwise unaccounted for in Southeast Asia.

The Committee on Labor and Human Resources was discharged from the further consideration of the following bill; which was placed on the calendar:

H.R. 5496. An act to amend the Public Health Service Act to rename the National Center for Health Services Research as the National Center for Health Services Research and Medical Technology Assessment, and for other purposes.

The Committee on the Judiciary was discharged from the further consideration of the following measure; which was placed on the calendar:

H.R. 2671. An act for the relief of Edgar Gildardo Herrera.

The Committee on Governmental Affairs was discharged from the further consideration of the following measure; which was placed on the calendar:

H.R. 4473. An act to designate the Federal Archives and Records Center in San Bruno, California as the "Leo J. Ryan Memorial Federal Archives and Records Center".

MEASURES HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent:

H.R. 6342. An act approval of the governing international fishery agreements with Iceland and the European Economic Community.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED IN THE SENATE

The following enrolled bills and joint resolutions, signed by the Speaker of the House of Representatives on Friday, October 5, 1984, and transmitted to the Senate were signed on October 5, 1984 by the President pro tempore [Mr. THURMOND]:

S. 416. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic Rivers System, and for other purposes.

S. 1146. An act to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificate and for the transportation by aircraft of controlled substances, and for other purposes.

S. 1711. An act providing for a fifteen-year extension of patent numbered 3,376,198.

S.J. Res. 299 Joint resolution to designate November 1984, as National Diabetes Month.

S.J. Res. 309. Joint resolution authorizing and requesting the President to designate January 1985 as "National Cerebral Palsy Month".

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary reported that on today, October 9, 1984, he had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 416. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic Rivers System, and for other purposes;

S. 566. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain tracts of land conveyed to the South Carolina State Commission of Forestry, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such land to such Commission, and for other purposes;

S. 905. An act to establish the National Archives and Records Administration, and for other purposes;

S. 1097. An act to consolidate and authorize certain atmospheric and services programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce;

S. 1146. An act to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificates and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes;

S. 1711. An act providing for a fifteen-year extension of patent numbered 3,376,198;

S. 1868. An act to add $2,000,000 to the budget ceiling for new acquisitions at Sleeping Bear Dunes National Lakeshore;

S.J. Res. 295. Joint resolution to provide for the designation of the week of October 14 through October 20, 1984, as "Myasthenia Gravis Awareness Week";

S.J. Res. 299. Joint resolution to designate November 1984, as "National Diabetes Month"; and

S.J. Res. 309. Joint resolution authorizing and requesting the President to designate January 1985 as "National Cerebral Palsy Month".

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS (for himself, Mr. MOYNIHAN, Mr. GORTON, Mr. THURMOND, and Mr. PELL):

S. Res. 476. A resolution to designate room S230 in the United States Capitol Building as the "Howard H. Baker, Jr., Room;" to the Committee on Rules and Administration.

ADDITIONAL COSPONSORS

S. 2266

At the request of Mr. CRANSTON, the name of the Senator from Illinois [Mr. PERCY] was added as a cosponsor of S. 2266, a bill to grant a Federal charter to Vietnam Veterans of America, Inc.

S. 2720

At the request of Mrs. HAWKINS, the names of the Senator from Rhode Island [Mr. CHAFEE] and the Senator from West Virginia [Mr. BYRD] were added as cosponsors of S. 2720, a bill to recognize the organization known as the Women's Army Corps Veterans' Association.

S. 3008

At the request of Mr. ARMSTRONG, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 3008, a bill to recognize the organization known as the Retired Enlisted Association, Inc.

SENATE JOINT RESOLUTION 351

At the request of Mr. SASSER, the names of the Senator from Maryland [Mr. SARBANES], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Illinois [Mr. PERCY], the Senator from New Mexico [Mr. DOMENICI], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from South Dakota [Mr. ABDNOR], the Senator from Delaware [Mr. ROTH], and the Senator from Alaska [Mr. STEVENS] were added as cosponsors of Senate Joint Resolution 351, a joint resolution designating the week beginning February 17, 1985, as a time to recognize volunteers who give their time to become Big Brothers and Big Sisters to youth in need of adult companionship.

SENATE CONCURRENT RESOLUTION 133

At the request of Mrs. HAWKINS, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from Wisconsin [Mr. KASTEN], the Senator from South Carolina [Mr. THURMOND], the Senator from Indiana [Mr. LUGAR], and the Senator from New York [Mr. D'AMATO] were added as cosponsors of Senate Concurrent Resolution 133, a concurrent resolution to express the sense of the Congress that television stations should publicize kidnaped children cases.

SENATE RESOLUTION 467

At the request of Mr. ROTH, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of Senate Resolution 467, a resolution expressing the appreciation of the Senate to members of the entertainment industry, especially the Entertainment Industries Council, for their concern over the drug problem in America, and urging the industry to undertake a comprehensive program to communicate to the citizens of the United States the dangers of drug abuse.

SENATE RESOLUTION 476—DESIGNATING ROOM S-230 IN THE CAPITOL AS THE "HOWARD H. BAKER, JR., ROOM"

Mr. MATHIAS (for himself, Mr. MOYNIHAN, Mr. GORTON, and Mr. THURMOND) submitted the following resolution; which was referred to the Committee on Rules and Administration.

S. RES. 476

Resolved, That the room S230 in the United States Capitol Building is hereby designated as, and shall hereafter be known as, the "Howard H. Baker, Jr., Room".

(The remarks of Mr. MATHIAS on this resolution appear earlier in today's RECORD.)

AMENDMENTS SUBMITTED

INCREASING THE PUBLIC DEBT LIMIT

MELCHER AMENDMENT NO. 7080

Mr. MELCHER proposed an amendment to amendment No. 7072 proposed by Mr. TSONGAS (and others) to the joint resolution (H.J. Res. 654) increasing the statutory limit on the public debt; as follows:

At the end of the pending amendment, insert the following new section:

SEC. . (a) Subsection (e) of section 483 of the Internal Revenue Code of 1954 (relating to reduced rate of interest in case of sales of principal residences or farms) is amended to read as follows:

"(e) REDUCED RATE OF INTEREST IN CASE OF SALES OF RESIDENCES, FARMS, OR REAL PROPERTY USED IN A TRADE OR BUSINESS.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsections (b) and (c)(1)(B) shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any sale or exchange—

"(A) of property for use as a residence by an individual,

"(B) of a farm (within the meaning of section 6420(c)(2))—

"(i) by an individual, estate, or testamentary trust,

"(ii) by a corporation which as of the date of the sale or exchange is a small business corporation (as defined in section 1244(c)(3)), or

"(iii) by a partnership which as of the date of the sale or exchange meets requirements similar to those of section 1244(c)(3), or

"(C) of real property by any person (whether or not described in subparagraph (A)) used in a trade or business of such person or held by such person for the production of income.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall not apply to the portion of the stated principal amount of the debt instrument arising from the transaction which exceeds the applicable limit.

"(B) APPLICABLE LIMIT.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2) (A)	$250,000
Paragraph (2) (B)	2,000,000
Paragraph (2)(C)	1,000,000

"(C) REDUCTION IN APPLICABLE LIMIT WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any transaction with respect to which the sales price exceeds the applicable limit, the applicable limit shall be the amount which bears the same ratio to the applicable limit as—

"(i) as the applicable limit, bears to

"(ii) the sales price.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) 15-year or 18-year real property (within the meaning of section 168), disregarding de minimis amounts of personality associated with such real property.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years," or

"(ii) in the case of a debt instrument involving recovery property, ⅔ of the recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(i) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued.

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of the total interest accruing thereunder, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274(d) for any period (other than the Federal short-term rate) exceeds by more than 2 percent such rate for the preceding period, such applicable Federal rate for purposes of applying this section to any debt instrument to which this subsection applies shall be equal to the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) the greater of 1 percent or one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1–June 30, 1985	10.5
July 1–Dec. 31, 1985	11
Jan. 1–June 30, 1986	11.5
July 1–Dec. 31, 1986	12.

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection—

"(i) all debt instruments arising from any transaction (or any series of related transactions) shall be treated as 1 sale or exchange.

"( ) SALES PRICE.—For purposes of this paragraph, the sales price shall be determined as of the time of the sale or exchange.

"(7) APPLICATION WITH SUBSECTION (f).—In the case of any qualified sale (as defined in subsection (f)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (f)(1) applies."

(b) Special rule for determination of Applicable Federal Rate for 1984.

In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of Sections 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(c) Subparagraph (A) and (B) of Section 1274(c)(2) (relating to exceptions from the determination of the issue price in the case of certain debt instruments issued for property) are amended to read as follows:

"(A) SALES OF FARMS AND REAL PROPERTY USED IN A TRADE OR BUSINESS.—Any debt instrument arising from a sale or exchange described in subparagraph (B) or (C) of section 483(e)(2) but only to the extent of that portion of the stated principal amount to which section 483(e) applies."

"(B) RESIDENCES.—Any debt instrument arising from the sale or exchange of any property for use as the residence of the obligor under such instrument."

(d)(1) Section 483(d) of the Internal Revenue Code of 1954 (relating to exceptions and limitations) is amended by adding at the end thereof the following new paragraph:

"(5) ASSUMPTIONS.—This section shall not apply to any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion or any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

"(2) Section 1274(c)(4) of such Code (relating ot exceptions) is amended by adding at the end thereof the following new subparagraph:

"(G) ASSUMPTIONS.—Any debt instrument which is assumed (or taken subject to) by the transferee as part of the sale or exchange of property, or to the portion or any wraparound mortgage equal to the unpaid balance of the seller's existing financing."

(e) Subparagraph (F) of section 1274(c) (relating to exceptions for sales or exchanges to which section 483(e) applies) is amended by striking out "section 483(e)" in the text and heading thereof and inserting in lieu thereof "section 483(f)."

(f) The amendments made by this section shall take effect as if included in the amendments made by the Tax Reform Act of 1984.

PREVENTIVE HEALTH AMENDMENTS

HATCH AMENDMENT NO. 7801

Mr. BAKER (for Mr. HATCH) proposed an amendment to the amendment of the House of Representatives to the bill (S. 2301) to revise and extend programs for the provision of health services, and for other purposes; as follows:

In lieu of the matter proposed to be inserted by the amendment of the House of Representatives to the text of the bill, insert the following:

That this Act may be cited as the "Preventive Health Amendments of 1984".

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

SEC. 2. (a) Section 317(j)(1) (42 U.S.C. 247b(j)(1)) is amended—

(1) by striking out "immunize children against immunizable diseases" and inserting in lieu thereof "immunize individuals against vaccine-preventable diseases", and

(2) by striking out "and" after "1983," and by inserting before the period a comma and the following: "$52,000,000 for the fiscal year ending September 30, 1985, $59,000,000 for the fiscal year ending September 30, 1986, and $65,000,000 for the fiscal year ending September 30, 1987".

(b) Section 317(j)(2) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$8,000,000 for the fiscal year ending September 30, 1985, $9,000,000 for the fiscal year ending September 30, 1986, and $10,000,000 for the fiscal year ending September 30, 1987".

SEC. 3. (a) The first sentence of section 318(d)(1) (42 U.S.C. 247c(d)(1)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$57,000,000 for the fiscal year ending September 30, 1985, $62,500,000 for the fiscal year ending September 30, 1986, and $68,000,000 for the fiscal year ending September 30, 1987".

(b)(1) Subsection (a) of section 318 is amended by striking out "research" and all that follows in such section and inserting in lieu thereof the following: "research in, and training and public health programs for, the prevention and control of sexually transmitted diseases,".

(2) Subsection (b) of section 318 is amended to read as follows:

"(b) The Secretary may make grants to States, political subdivisions of States, and any other public and non-profit private entity for—

"(1) research into the prevention and control of sexually transmitted diseases;

"(2) demonstration projects for the prevention and control of sexually transmitted diseases;

"(3) public information and education programs for the prevention and control of such diseases, and

"(4) education, training, and clinical skills improvement activities in the prevention and control of such diseases for health professionals (including allied health personnel).".

(3) Subsection (c) of section 318 is amended by inserting "and" at the end of paragraph (3), by striking out paragraph (4), and by redesignating paragraph (5) as paragraph (4).

(4) The second sentence of section 318(d)(1) is amended by striking out "5 per centum" and inserting in lieu thereof "10 per centum".

(5)(A) Section 318 is amended by redesignating subsections (d) through (f) as subsections (e) through (g) and by adding after subsection (c) the following new subsection:

"(d) The Secretary, acting through the Director of the centers of disease control, may make grants to public and non-profit entities for information and education programs on, and for the diagnosis, prevention, and control of, acquired immune deficiency syndrome. The authority to make grants under this section for acquired immune deficiency syndrome is not the exclusive authority to make grants under this Act for acquired immune deficiency syndrome.".

(B) Subsection (e)(1) of section 318 (as so redesignated) is amended—

(i) by striking out "(b) and (c)" in the first sentence and inserting in lieu thereof "(b), (c), nd (d)",

(ii) by striking out "(b) or (c)" in the second sentence and inserting in lieu thereof "(b), (c), or (d)", and

(iii) by adding at the end the following: "If the appropriations under the first sentence for fiscal year 1985 exceed $50,000,000, one-half of the amount in excess of $50,000,000 shall be made available for grants under subsection (d); if the appropriations under the first sentence for fiscal year 1986 exceed $52,500,000 shall be made available for such grants; and if the appropriations under the first sentence for fiscal year 1987 exceed $55,000,000, one-half of the amount in excess of $55,000,000 shall be made available for such grants.".

(6)(A) Section 318 is amended by striking out "veneral disease" each place it occurs and inserting in lieu thereof "sexually transmitted diseases".

(B) The heading for such section 318 is amended by striking out "venereal disease" and inserting in lieu thereof "sexually transmitted diseases and acquired immune deficience syndrome".

(C) Section 318 is amended by striking out the subsection (g) which was in effect on the day before the date of enactment of this Act.

SEC. 4. (a) Section 1901(a) (42 U.S.C. 300W(a)) is amended by striking out "and" after "1983," and by inserting before the period a comma and the following: "$98,500,000 for the fiscal year ending September 30, 1985, $98,500,000 for the fiscal year ending September 30, 1986, and $98,500,000 for the fiscal year ending September 30, 1987".

(b) Section 1901(b) is amended by striking out "$3,000,000" and inserting in lieu thereof "$3,500,000".

SEC. 5. (a) Section 1905(c) (42 U.S.C. 300W-4) is amended by striking out paragraphs (2) and (4) and redesignating paragraphs (3) and (5) through (8) as paragraphs (2) through (6), respectively.

(b) Section 1906(a)(1)(B) (42 U.S.C. 300W-5) is amended by striking out "activities of the State under this part" and inserting in lieu thereof "preventive health and preventive health services programs in the State assisted by funds from allotments under this part, including a summary of the services which were provided, the providers of such services, and the individuals who received such services".

(c) Section 1906 is amended by adding at the end the following:

"(d) The Secretary, in consultation with appropriate national organizations, shall develop model criteria and forms for the collection of data and information with respect to services provided under this part to enable States to share uniform data and information with respect to the provision of such services.".

(d) Subsection (e) of Section 1905 is repealed

SEC. 6. (a) Section 339(a)(5) (42 U.S.C. 255(a)(5)) is amended by striking out "and" after "1983," and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

(b) Section 339(b)(5) is amended by striking out "and" after "1983," and by inserting before the period a comma and "September 30, 1985, September 30, 1986, and September 30, 1987".

SEC. 7. Part of title XIX is amended by inserting after section 1909 (42 U.S.C. 300W-8) the following new section:

"EMERGENCY MEDICAL SERVICES FOR CHILDREN

"SEC. 1910. (a) For activities in addition to the activities which may be carried out by States under section 1904(a)(1)(F), the Secretary may make grants to not more than four States in any fiscal year to support a program of demonstration projects in such States for the expansion and improvement of emergency medical services for children who need treatment for trauma or critical care. Any grant made under this subsection shall be for a one-year period.

"(b) The Secretary may renew a grant made under subsection (a) for one additional one-year period only if the Secretary determines that renewal of such grant will provide significant benefits through the collection, analysis, and dissemination of information or data which will be useful to other States.

"(c) To carry out this section, there are authorized to be appropriated $2,000,000 for fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 8. Part A of title XIX (as amended by section 7 of this Act) is amended by adding at the end the following new section:

"STATE PLANNING GRANTS

"SEC. 1910A. (a) The Secretary may make grants to assist States to—

"(1) develop long range plans to achieve the goals, objectives, and priorities established by the Secretary pursuant to title XVII;

"(2) identify particular needs within States for services and activities that may be conducted with payments made under allotments under section 1902; and

"(3) determine the progress of States in achieving the goals, objectives, and priorities described in paragraph (1) and, to the extent feasible, use scientifically valid measures to make such determinations.

"(b) To carry out this section, there are authorized to be appropriated $5,000,000 for fiscal year 1985 and for each of the two succeeding fiscal years.".

SEC. 9. Section 1001 (42 U.S.C. 300) is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

"(c) The Secretary, at the request of a recipient of a grant under subsection (a), may reduce the amount of such grant by the fair market value of any supplies or equipment furnished the grant recipient by the Secretary. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment on which the reduction of such grant is based. Such amount shall be deemed as part of the grant and shall be deemed to have been paid to the grant recipient.".

INCREASE IN PUBLIC DEBT LIMIT

DOLE AMENDMENT NO. 7082

Mr. DOLE proposed an amendment to the joint resolution (H.J. Res. 654), supra; as follows:

On line 6 of the resolution, strike out "$1,823,800,000,000" and insert in lieu thereof "$1,823,800,000,001 on and after October 2, 1984"

JEPSEN AMENDMENT NO. 7083

Mr. JEPSEN proposed an amendment to amendment No. 7082 proposed by Mr. DOLE to the joint resolution (H.J. Res. 654), supra; as follows:

In lieu of the matter proposed to be inserted, insert the following: "$1,823,800,000,002 on and after October 1, 1984."

SEC. . TAX TREATMENT OF CERTAIN DEFERRED PAYMENTS.

(a) REDUCTION IN INTEREST RATES UNDER SECTION 483.—Section 483 of the Internal Revenue Code of 1954 (relating to interest on certain deferred payments) is amended—

(1) by redesignating subsections (f), (g), and (h) as subsections (h), (i), and (j), and

(2) by striking out subsection (e) and inserting in lieu thereof the following new subsections:

"(e) REDUCED RATE OF INTEREST IN CASE OF CERTAIN SALES OF RESIDENCES, FARMS, OR TRADES OR BUSINESSES.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsection (b) or (c) (1)(B) shall be the rate prescribed by the Secretary in regulations but shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any of the following sales or exchanges:

"(A) RESIDENCES..—Any sale or exchange of a residence by an individual, an estate, or a testamentary trust, but only if—

"(i) either—

"(I) such residence on the date of such sale or exchange (or in the case of an estate or testamentary trust, on the date of death of the decedent) was the principal residence (within the meaning of section 1034) of the individual or decedent, or

"(II) during the 2-year period ending on such date, no substantial portion of such residence was of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of such individual or decedent, and

"(ii) such residence was not at any time, in the hands of such individual, estate,

testamentary trust, or decedent, described in section 1221(1) (relating to inventory, etc.).

"(B) FARMS.—Any sale or exchange by a qualified person of—

"(i) real property which was used as a farm (within the meaning of section 6420 (c)(2)) at all times during the 3-year period ending on the date of such sale or exchange, or

"(ii) tangible personal property which was used in the active conduct of the trade or business of farming on such farm and is sold in connection with the sale of such farm,

but only if such property is sold or exchanged for use in the active conduct of the trade or business of farming by the transferee of such property.

"(C) TRADES OR BUSINESSES.—

"(i) IN GENERAL.—Any sale or exchange by a qualified person of any trade or business.

"(ii) APPLICATION WITH SUBPARAGRAPH (B).—This subparagraph shall not apply to any sale or exchange of any property described in subparagraph (B).

"(iii) NEW SECTION 38 PROPERTY.—This subparagraph shall not apply to the sale or exchange of any property which, in the hands of the transferee, is new section 38 property.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall apply to any debt instrument to the extent that the sales price does not exceed the applicable limit with respect to such sale or exchange.

"(B) APPLICABLE LIMIT DEFINED.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2)(A)	$250,000
Paragraph (2)(B)	2,000,000
Paragraph (2)(C)	1,000,000

"(4) BLENDED RATE WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any sale or exchange to which this subsection applies with respect to which the sales price exceeds the applicable limit—

"(A) TEST RATE.—The discount rate under subsection (c)(1) (B) shall, in lieu of the rate under paragraph (1), be equal to the sum of—

"(i) 9 percent, multiplied by a fraction the numerator of which is the applicable limit and the denominator of which is the sales price, and

"(ii) 110 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus the applicable limit, and

"(II) the denominator of which is the sales price.

In the case of a transaction described in paragraph (2)(A), clause (ii) shall be applied by substituting '100 percent' for '110 percent'.

"(B) IMPUTED RATE.—The discount rate under subsection (b) shall, in lieu of the rate under paragraph (1), be equal to the rate determined under subparagraph (A) by substituting '10 percent' for '9 percent' and, except in the case of any transaction described in paragraph (2)(A), '120 percent' for '110 percent' each place it appears.

"(C) RATES AS ADJUSTED.—For purposes of this paragraph, if the Secretary prescribes, pursuant to paragraph (1), a lower discount rate under subsection (c) (1) (B) or (b) than the maximum rate allowed under paragraph (1), such lower rate shall apply in lieu of '9 percent' or '10 percent' in subparagraphs (A) (i) or (B), respectively.

"(5) AGGREGATION AND ALLOCATION RULES.—For purposes of this subsection, except as provided in regulations—

"(A) DEBT INSTRUMENTS.—All debt instruments arising from a transaction (or any series of related transactions) shall be treated as 1 debt instrument.

"(B) SALES AND EXCHANGES.—All sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(C) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property (or a trade or business) described in paragraph (2) with respect to which there is more than 1 owner, the applicable limit under paragraph (3) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(6) APPLICATION WITH SUBSECTION (H).—In the case of any qualified sale (as defined in subsection (h) (2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument to which subsection (h) (1) applies.

"(7) DEFINITIONS.—For purposes of this subsection—

"(A) QUALIFIED PERSON DEFINED.—The term 'qualified person' means—

"(i) a person who—

"(I) is an individual, estate, or testamentary trust,

"(II) is a corporation which immediately prior to the date of the sale or exchange has 35 or fewer shareholders, or

"(III) is a partnership which immediately prior to the date of the sale or exchange has 35 or fewer partners,

"(ii) is a 10-percent owner of a farm or a trade or business,

"(iii) pursuant to a plan, disposes of—

"(I) an interest in a farm or farm property, or

"(II) his entire interest in a trade or business and all substantially similar trades or businesses, and

"(iv) the ownership interest of whom may be readily established by reason of qualified allocations of the type described in section 168 (j) (9) (B), one class of stock, or the like).

"(B) 10-PERCENT OWNER DEFINED.—The term '10-percent owner' means a person having at least a 10-percent ownership interest, applying the attribution rules of section 318 (other than subsection (a) (4));

"(C) SALES PRICE DEFINED.—The term 'sales price' means the sum of—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(D) TRADE OR BUSINESS DEFINED.—

"(i) IN GENERAL.—The term 'trade or business' means any trade or business, including any line of business, qualifying as an active trade or business within the meaning of section 355.

"(ii) RENTAL OF REAL PROPERTY.—For purposes of this subparagraph, the holding of real property for rental shall not be treated as an active trade or business.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) real property described in subparagraph (D) or (F) of subsection (c)(2) of section 168 (whether or not such property is of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of the purchaser),

including de minimis amounts of tangible personal property associated with such real property.

"(B) CERTAIN PROPERTY NOT INCLUDED.—This subsection shall not apply to any sale or exchange—

"(i) of new section 38 property, or

"(ii) with respect to which the transferor and transferee are related persons.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years, or

"(ii) in the case of a debt instrument issued in exchange for recovery property, ⅔ of the shortest recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(i) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued,

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of all interest accruing thereunder for that year, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274(d) for any period after June 30, 1985 (other than the Federal short-term rate) exceeds by more than 2 percentage points such rate for the preceding period as limited by this paragraph, such applicable Federal rate shall not exceed the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1–June 30, 1985	10.5
July 1–Dec. 31, 1985	11
Jan. 1–June 30, 1986	11.5
July 1–Dec. 31, 1986	12

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (i), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection, all sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(7) RELATED PERSON DEFINED.—For purposes of this subsection and subsection (g), the term 'related person' means a person who is related (within the meaning of section 267(b) of section 707(b)(1)) to another person other than a qualified 5-percent or less partner (within the meaning of section 267(e)(5)(B)).

"(g) SPECIAL RULES FOR APPLICATION OF THIS SECTION.—For purposes of this section—

"(1) APPLICATION OF SUBSECTIONS (E) AND (F).—In the case of any sale or exchange, either subsection (e) or subsection (f) may be applied, but not both.

"(2) TREATMENT OF ASSUMPTIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if, after December 31, 1984, any person—

"(i) assumes any debt obligation issued after October 15, 1984, or described in subparagraph (C), in connection with the sale or exchange of any property, or

"(ii) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(B) OTHER ASSUMPTION.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(C) OBLIGATIONS DESCRIBED IN THIS SUBPARAGRAPH.—A debt obligation is described in this subparagraph if such obligation—

"(i) was issued on or before October 15, 1984, and

"(ii) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338 (a)) the sales price of which is greater than $100,000,000.

"(D) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments.

"(E) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction shall be exempt from the application of this paragraph if such exemption is not likely to significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basic of the acquired asset.

"(3) FAIR MARKET VALUE RULE IN POTENTIALLY ABUSIVE CASES.—In the case of any potentially abusive situation (within the meaning of section 1274(b)(3)(B)), the principal amount of any debt instrument received in any sale or exchange of property to which this section applies shall be the fair market value of such property adjusted to take into account other consideration involved in the transaction.

"(4) SALE-LEASEBACKS.—Subsections (e) and (f) shall not apply to any sale or exchange if, pursuant to a plan, the transfer or any related person leases such property.

"(5) RULES NOT TO APPLY WHERE PREPAYMENT PROHIBITED.—Subparagraph (A) of paragraph (1) shall not apply to any obligation arising form a loan from a third party creditor, pursuant to which the obligor is not permitted to pay the instrument prior to maturity.

"(6) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to satisfy the applicable rate under subsection (c)(1)(B), the rate under subsection (b) shall be considered equal to the rate so applicable under subsection (c)(1)(B).".

(b) INTEREST INCOME AND DEDUCTIONS COMPUTED ON CASH BASIS IN CERTAIN CASES.—

(1) IN GENERAL.—Section 1274 of such Code (relating to determination of issue price in the case of certain debt instruments issued for property) is amended by adding at the end thereof the following new subsection:

"(e) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES TO WHICH INTEREST RULES OF SECTION 483 APPLY.—Notwithstanding any other provision of this subpart—

"(1) TRANSACTIONS TO WHICH SECTION 483 (E) APPLIES.—In the case of any sale or exchange to which section 483 (e) applies—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any inclusion in income or deduction under this title with respect to interest on any debt instrument issued in connection with such sale or exchange shall be computed on the cash receipts and disbursements method of accounting.

"(B) SALES PRICE EXCEEDS APPLICABLE LIMIT.—In any case in which the sales price exceeds the applicable limit under section 483(e)(3)—

"(i) except in the case of any transaction to which section 483(e)(2)(A) applies, subparagraph (A) shall not apply, and

"(ii) the discount rates under subsections (c)(3) and (b)(2)(B) shall be equal to the rates determined under subparagraphs (A) and (B) of section 483(e)(4).

"(2) TRANSACTIONS TO WHICH SECTION 483(F) APPLIES.—In the case of any sale or exchange to which section 483(f) applies—

"(A) TRANSACTIONS WITH 80 PERCENT TEST RATE.—

"(i) IN GENERAL.—Except as provided in clause (ii), any inclusion in income or deduction under this title with respect to interest on any debt instrument described in section 483(f)(3) shall be computed on the cash receipts and disbursements method of accounting.

"(ii) SPECIAL RULE FOR TRANSACTIONS NOT QUALIFYING FOR 80 PERCENT TEST RATE.—Clause (i) shall not apply to any debt instrument issued in such sale or exchange if, in addition to such instrument, a debt instrument not described in section 483(f)(3) is issued in such sale or exchange.

"(B) TRANSACTIONS TO WHICH SUBPARAGRAPH (A) DOES NOT APPLY.—

"(i) IN GENERAL.—If subparagraph (A) does not apply to any debt instrument issued in such sale or exchange, subsection (c)(3) shall be applied—

"(I) in the case of any debt instrument described in section 483(f)(4), by substituting '100 percent' for '110 percent', and

"(II) in the case of any debt instrument described in section 483(f)(3), by substituting '80 percent' for '110 percent'.

"(ii) SPECIAL RULES FOR 1985 AND 1986.—In the case of any debt instrument to which

clause (i) applies issued during 1985 or 1986, the discount rate under subsection (c)(3) shall not be greater than the rate determined under section 483(f)(5).

"(3) SPECIAL RULE FOR HOLDING AND TRANSFER OF DEBT OBLIGATION.—

"(A) Paragraphs (1)(A) and (2)(A) shall apply to the holder of a debt obligation only if such obligation is—

"(i) held by the first obligee of such obligation or such obligee's spouse or estate, and

"(ii) secured by the property sold or exchanged in the transaction in which such obligation is issued.

"(B) Except as otherwise provided in regulations, in the case of a transfer of property by the obligor in which the obligation is not satisifed and the transferee does not become liable to pay such obligation to the first obligee, any deduction for interest on any indebtedness paid or incurred by the transferee to the immediate transferor attributable to such obligation shall be deferred until such time as such deduction would have been allowed if such obligation had been assumed by the transferee.

"(C) In any case in which the transferee assumes or takes property subject to any obligation under subparagraph (A) or is considered to do so under subparagraph (B), the transferee shall compute the amount of the deduction for any interest on such obligation on the cash receipts and disbursements method of accounting.

"(4) SUBSECTION ALSO TO APPLY TO DEBT USED TO CARRY OBLIGATIONS.—In any case in which an abligor of a debt obligation to which paragraph (1)(A) or (2)(A) applies pays or incurs interest on indebtedness to carry such debt obligation, any deduction for such interest shall be deferred to the extent necessary to achieve a proper matching of interest income and expense.

"(5) REGULATIONS TO PREVENT ABUSE OF REQUIRED CASH ACCOUNTING.—The Secretary may by regulation prescribe rules to prevent the mismatching of interest income and interest deductions in connection with obligations on which interest is computed on the cash receipts and disbursements method of accounting.

"(6) OTHER RULES APPLY.—For purposes of this subsection, rules similar to the rules under subparagraphs (B) and (D) of section 483(g)(2) shall apply.".

(2) SPECIAL RULE FOR ASSUMPTIONS.—Paragraph (4) of section 1274(c) of such Code (relating to debt obligations to which section applies) is amended by adding at the end thereof the following new subparagraph:

"(G) TREATMENT OF ASSUMPTIONS.—

"(i) IN GENERAL.—(Except in the case of property described in subsection (e)(2)(A) of section 483, if, after December 31, 1984, any person—

"(I) assumes any debt obligation issued after October 15, 1984, or described in clause (ii) in connection with the sale or exchange of any property, or

"(II) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(ii) OBLIGATION DESCRIBED IN THIS CLAUSE.—A debt obligation is described in this clause if such obligation—

"(I) was issued on or before October 15, 1984, and

"(II) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(III) Certain exempt transactions.—The Secretary shall prescribe regulations under which any transaction would be exempt from the application of this subparagraph if such exemption would not significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(iii) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(iv) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments."

(c) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—

(1) IN GENERAL. Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—Notwithstanding any other provision of this subpart—

"(1) IN GENERAL.—In the case of any debt instrument described in paragraph (4) arising from a sale or exchange to which this subsection applies—

"(A) subsection (c) (3) shall be applied by substituting '80 percent' for '110 percent', and

"(B) subsection (b)(2) (B) shall be applied by substituting '110 percent' for '120 percent'.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—This subsection applies to any sale or exchange of any residence by a dealer who holds such residence as section 1221 (1) property to a person who intends to occupy such residence if the sales price of such residence does not exceed $250,000.

"(B) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property described in subparagraph (A) with respect to which there is more than 1 owner, the applicable limit under subparagraph (A) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(3) BLENDED RATE WHERE SALES PRICE EXCEEDS $250,000— In the case of any sale or exchange to which this subsection would otherwise apply with respect to which the sales price exceeds $250,000—

"(A) TEST RATE.—The discount rate under subsection (c)(3) shall, in lieu of the rate under paragraph (1)(A), be equal to the sum of—

"(i) 80 percent, multiplied by a fraction the numerator of which is $250,000 and the denominator of which is the sales price, and

"(ii) 100 percent of the applicable federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus $250,000, and

"(II) the denominator of which is the sales price.

"(B) IMPUTED RATE.—The discount rate under subsection (b)(2)(B) shall be the rate under paragraph (1)(B).

"(4) DEBT INSTRUMENT.—A debt instrument is described in this paragraph if it provides conspicuous notice to the obligor in a manner prescribed by regulations that if the obligor of such instrument places the residence in service in a trade or business the depreciation rules under section 168(f)(16) shall apply.

"(5) SALES PRICE DEFINED.—For purposes of this subsection, the term 'sales price' means—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(6) Rules relating to interest to carry dealer obligations arising under this subsection.—

"(A) EXCESS DEDUCTIONS DISALLOWED.—For each year the interest expense paid or incurred on any debt incurred or continued to carry any dealer obligation shall be disallowed to the extent such expense exceeds interest income includable with respect to such dealer obligation for such year.

"(B) DISALLOWED INTEREST EXPENSE ALLOWED IN SUBSEQUENT YEARS.—For any year the amount of disallowed interest expense shall be allowed as a deduction with respect to any dealer obligation in an amount equal to the desallowed interest expense as of the close of such year (not including any amount previously allowed under this subparagraph) multiplied by a fraction—

"(i) the numerator of which is the sum of the principal payments on such dealer obligation made in such year, and

"(ii) the denominator of which the total amount of principal outstanding on such dealer obligation at the beginning of such year.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) DEALER OBLIGATION DEFINED.—The term 'dealer obligation' means an obligation arising pursuant to a transaction to which paragraph (1) of this subsection applies.

"(ii) DISALLOWED INTEREST EXPENSE DEFINED.—The term 'disallowed interest expense' means the aggregate amount of interest expense disallowed under subparagraph (A) with respect to any dealer obligation.

"(D) NO INFERENCE.—Nothing in this paragraph shall be construed to imply that any transaction described in this paragraph is or is not subject to the rules of section 453B, and any determination of such issue shall be made as if this paragraph had not been enacted.".

(d) RULE WHERE SPECIAL STATE LAW APPLIES.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(g) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to result in an adequate stated interest in the transaction, a rule similar to the rule of section 483(g)(6) shall apply.".

(e) CONFORMING AMENDMENTS.—Paragraph (4) of section 1274 (c) of such Code (relating to certain excepted debt instruments) is amended—

(1) by striking out subparagraphs (A) and (B),

(2) by striking out "section 483(e)" and "SECTION 483(e)" in subparagraph (F) and the heading to subparagraph (F), respectively, and inserting in lieu thereof "section 483(i)" and "SECTION 483(i)", respectively, and

(3) by redesignating subparagraphs (C), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(f) DEPRECIATION.—Subsection (f) of section 168 of such Code (relating to accelerated cost recovery system) is amended by adding at the end thereof the following new paragraph—

"(16) SPECIAL RULES FOR CERTAIN RESIDENCES.—In the case of any debt instrument described in section 1274(f)(1), the original principal amount of the debt instrument shall be deemed to be the lesser of—

"(A) the stated principal amount, or

"(B) the imputed principal amount determined by applying section 1274(f) using a discount rate of 110 percent of the applicable Federal rate at the time the debt was issued.".

(g) FAIR MARKET VALUE IN POTENTIALLY ABUSIVE SITUATIONS.—Subparagraph (B) of section 1274(b)(3) of such Code (relating to fair market value rule in potentially abusive situations) is amended in clause (ii), by striking out "or" at the end of subclause (III), by redesignating subclause (IV) as subclause (V), and by adding after subclause (III) the following new subclause:

"(IV) deferred interest, or".

(h) DETERMINATION OF APPLICABLE FEDERAL RATE.—

(1) IN GENERAL.—Paragraph (1) of section 1274(d) of such Code (relating to determination of applicable Federal rate) is amended by adding at the end thereof the following new subparagraph:

"(E) AUTHORITY FOR SECRETARY TO DETERMINE RATE MORE FREQUENTLY.—If there is a significant decrease in any applicable Federal rate following any 6-month test period referred to in subparagraph (B), the Secretary may determine the applicable Federal rate on the basis of a more recent period (not less than 30 days) as he determines appropriate to reflect such decrease.".

(2) SPECIAL RULE FOR 1984.—

(A) IN GENERAL.—In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of sections 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(B) PARAGRAPH NOT TO APPLY.—Subparagraph (A) shall not apply to any debt instrument to which section 483 (e) or (f) of the Internal Revenue Code of 1954, as amended by this section, applies.

(i) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 41 of the Deficit Reduction Act of 1984.

JEPSEN AMENDMENT NO. 7084

Mr. BAKER (for Mr. JEPSEN) proposed an amendment to amendment No. 7080 proposed by Mr. Melcher to the joint resolution (H.J. Res. 654), supra; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. . TAX TREATMENT OF CERTAIN DEFERRED PAYMENTS.

(a) REDUCTION IN INTEREST RATES UNDER SECTION 483.—Section 483 of the Internal Revenue Code of 1954 (relating to interest on certain deferred payments) is amended—

(1) by redesignating subsections (f), (g), and (h) as subsections (h), (i), and (j), and

(2) by striking out subsection (e) and inserting in lieu thereof the following new subsections:

"(e) REDUCED RATE OF INTEREST IN CASE OF CERTAIN SALES OF RESIDENCES, FARMS, OR TRADES OR BUSINESSES.—

"(1) IN GENERAL.—In the case of any debt instrument arising from a sale or exchange to which this subsection applies, the discount rate under subsection (b) or (c) (1)(B) shall be the rate prescribed by the Secretary in regulations but shall not be greater than 10 percent and 9 percent, respectively.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—This subsection shall apply to any of the following sales or exchanges:

"(A) RESIDENCES.—Any sale or exchange of a residence by an individual, an estate, or a testamentary trust, but only if—

"(1) either—

"(I) such residence on the date of such sale or exchange (or in the case of an estate or testamentary trust, on the date of death of the decedent) was the principal residence (within the meaning of section 1034) of the individual or decedent, or

"(II) during the 2-year period ending on such date, no substantial portion of such residence was of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of such individual or decedent, and

"(ii) such residence was not at any time, in the hands of such individual, estate, testamentary trust, or decedent, described in section 1221 (1) (relating to inventory, etc.).

"(B) FARMS.—Any sale or exchange by a qualified person of—

"(i) real property which was used as a farm (within the meaning of section 6420 (c)(2)) at all times during the 3-year period ending on the date of such sale or exchange, or

"(ii) tangible personal property which was used in the active conduct of the trade or business of farming on such farm and is sold in connection with the sale of such farm,

but only if such property is sold or exchanged for use in the active conduct of the trade or business of farming by the transferee of such property.

"(C) TRADES OR BUSINESSES.—

"(i) IN GENERAL.—Any sale or exchange by a qualified person of any trade or business.

"(ii) APPLICATION WITH SUBPARAGRAPH (B).—This subparagraph shall not apply to any sale or exchange of any property described in subparagraph (B).

"(iii) NEW SECTION 38 PROPERTY.—This subparagraph shall not apply to the sale or exchange of any property which, in the hands of the transferee, is new section 38 property.

"(3) DOLLAR LIMITATION.—

"(A) IN GENERAL.—Paragraph (1) shall apply to any debt instrument to the extent that the sales price does not exceed the applicable limit with respect to such sale or exchange.

"(B) APPLICABLE LIMIT DEFINED.—For purposes of this paragraph, the term 'applicable limit' means the limit determined in accordance with the following table:

"If the transaction is described in:	The limit is:
Paragraph (2)(A)	$250,000
Paragraph (2)(B)	$2,200,000
Paragraph (2)(C)	$1,000,000

"(4) BLENDED RATE WHERE SALES PRICE EXCEEDS APPLICABLE LIMIT.—In the case of any sale or exchange to which this subsection applies with respect to which the sales price exeeds the applicable limit—

"(A) TEST RATE.—The discount rate under subsection (c)(1)(B) shall, in lieu of the rate under paragraph (1), be equal to the sum of—

"(i) 9 percent, multiplied by a fraction of the numerator of which is the applicable limit and the denominator of which is the sales price, and

"(ii) 110 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus the applicable limit, and

"(II) the denominator of which is the sales price.

In the case of a transaction described in paragraph (2)(A), clause (ii) shall be applied by substituting '100 percent' for '110 percent'.

"(B) IMPUTED RATE.—The discount rate under subsection (b) shall, in lieu of the rate under paragraph (1), be equal to the rate determined under subparagraph (A) by substituting '10 percent' for '9 percent' and, except in the case of any transaction described in paragraph (2)(A), '120 percent' for '110 percent' each place it appears.

"(C) RATES AS ADJUSTED.—For purposes of this paragraph, if the Secretary prescribes, pursuant to paragraph (1), a lower discount rate under subsection (c)(1)(B) or (b) than the maximum rate allowed under paragraph (1), such lower rate shall apply in lieu of '9 percent' or '10 percent' in subparagraphs (A)(1) or (B), respectively.

"(5) AGGREGATION AND ALLOCATION RULES.—For purposes of this subsection, except as provided in regulations—

"(A) DEBT INSTRUMENTS.—All debt instruments arising from a transaction (or any series of related transactions) shall be treated at 1 debt instrument.

"(B) SALES AND EXCHANGES.—All sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(C) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sales exchange of any property (or a trade or business) dscribed in paragraph (2) with respect to which there is more than 1 owner, the applicable limit under paragraph (3) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of such owner's interests of such owners.

"(6) APPLICATION WITH SUBSECTION (h).—In the case of any qualified sale (as defined in subsection (h)(2)), the applicable limit determined under paragraph (3) shall be reduced by the amount of any debt instrument ot which subsection (h)(1) applies.

"(7) DEFINITIONS.—For purposes of this subsection—

"(A) QUALIFIED PERSON DEFINED.—The term 'qualified person' means—

"(i) a person who—

"(I) is an individual, estate, or testamentary trust,

"(II) is a corporation which immediately prior to the date of the sale or exchange has 35 or fewer shareholders, or

"(III) is a partnership which immediately prior to the date of the sale or exchange has 35 or fewer partners.

"(ii) is a 10-percent owner of a farm or a trade or business,

"(iii) pursuant to a plan, disposes of—

"(I) an interest in a farm or farm property, or

"(II) his entire interest in a trade or business and all substantially similar trades or businesses, and

"(III) the ownership interest of whom may be readily established by reason of qualified allocations (of the type described in section 168 (j)(9)(B), one class of stock, or the like).

"(B) 10-PERCENT OWNER DEFINED.—The term '10-percent owner' means a person having at least a 10-percent ownership interest, applying the attribution rules of section 318 (other than subsection (a)(4))".

"(C) SALES PRICE DEFINED.—The term 'sales price' means the sum of—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(D) TRADE OR BUSINESS DEFINED.—

"(i) IN GENERAL.—The term 'trade or business' means any trade or business, including any line of business, qualifying as an active trade or business within the meaning of section 355.

"(ii) RENTAL OF REAL PROPERTY.—For purposes of this subparagraph, the holding of real property for rental shall not be treated as an active trade or business.

"(f) SPECIAL TEST RATES FOR SALES OR EXCHANGES INVOLVING CERTAIN REAL PROPERTY.—

"(1) IN GENERAL.—In the case of any sale or exchange to which this subsection applies, subsection (c)(1)(B) shall be applied by substituting—

"(A) '80 percent' for '110 percent' in the case of any debt instrument described in paragraph (3), and

"(B) '100 percent' for '110 percent' in the case of any debt instrument described in paragraph (4).

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—Except as provided in this paragraph, this subsection applies to any sale or exchange of—

"(i) land, or

"(ii) real property described in subparagraph (d) or (F) of subsection (C)(2) of section 168 whether or not such property is of a character subject to an allowance under this title for depreciation (or amortization in lieu thereof) in the hands of the purchaser)

including de minimis amounts of tangible personal property associated with such real property.

"(B) CERTAIN PROPERTY NOT INCLUDED.—This subsection shall not apply to any sale or exchange—

"(i) of new section 38 property, or

"(ii) with respect to which the transferor and transferee are related persons.

"(3) DEBT INSTRUMENTS TO WHICH 80 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the term of the instrument (determined with regard to any extension or renewal) is not greater than the lesser of—

"(i) 12 years, or

"(ii) in the case of a debt instrument issued in exchange for recovery property, ⅔ of the shortest recovery period under section 168 for such property, and

"(B) the total deferred payments under such instrument, when added to the sum of the total deferred payments under all other debt instruments issued in connection with the sale or exchange—

"(i) to which this paragraph applies, and

"(ii) which were issued before such instrument was issued.

do not exceed $4,000,000.

"(4) DEBT INSTRUMENTS TO WHICH 100 PERCENT RATE APPLIES.—A debt instrument is described in this paragraph if—

"(A) the rate of interest stated in the instrument is not less than the applicable Federal rate,

"(B) such instrument provides for—

"(i) the unconditional payment each year of at least 80 percent of the interest so stated, or

"(ii) after the close of the 2-year period beginning on the date such instrument was issued the instrument provides the unconditional payment each year of all interest accruing thereunder for that year, and

"(C) such instrument is not described in paragraph (3).

"(5) SPECIAL RULES FOR DETERMINATION OF DISCOUNT RATES.—

"(A) IN GENERAL.—If the applicable Federal rate determined under section 1274 (d) for any period after June 30, 1985 (other than the Federal short-term rate) exceeds by more than 2 percentage points such rate for the preceding period as limited by this paragraph, such applicable Federal rate shall not exceed the greater of—

"(i) the sum of—

"(I) such applicable Federal rate for such preceding period, plus

"(II) one-half of such excess, or

"(ii) the highest such applicable Federal rate during the 2-year period before the period for which such determination was made after the application of this paragraph.

"(B) SPECIAL RULES FOR 1985 AND 1986.—Notwithstanding any other provision of this section, in the case of any sale or exchange with respect to which a binding contract was entered into during 1985 or 1986—

"(i) TEST RATE.—The discount rate for purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (3) shall not be greater than the rate determined in accordance with the following table:

"For contracts entered into during the period:	The rate is:
Jan. 1-June 30, 1985	10.5
July 1-Dec. 31, 1985	11.0
Jan. 1-June 30, 1986	11.5
July 1-Dec. 31, 1986	12.0

For purposes of applying subsection (c)(1)(B) to any debt instrument described in paragraph (4), the discount rate shall not be greater than the rate determined in accordance with the table, plus one-half percentage point.

"(ii) IMPUTED RATE.—The discount rate for purposes of applying subsection (b) to any debt instrument described in paragraph (3) or (4) shall not be greater than the rate determined under clause (1), plus 1 percentage point.

"(6) AGGREGATION RULES.—For purposes of this subsection, all sales and exchanges which are part of the same transaction (or a series of related transactions) shall be treated as 1 sale or exchange.

"(7) RELATED PERSON DEFINED.—For purposes of this subsection and subsection (g), the term 'related person' means a person who is related (within the meaning of section 267(b) or section 707(b)(1)) to another person other than a qualified 5-percent or less partner (within the meaning of section 267(e)(5)(B)).

"(g) SPECIAL RULES FOR APPLICATION OF THIS SECTION.—For purposes of this section—

"(1) APPLICATION OF SUBSECTION (E) AND (F).—In the case of any sale or exchange, either subsection (e) or subsection (f) may be applied, but not both.

"(2) TREATMENT OF ASSUMPTIONS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if, after December 31, 1984, any person—

"(i) assumes any debt obligation issued after October 15, 1984, or described in subparagraph (C), in connection with the sale or exchange of any property, or

"(ii) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(B) OTHER ASSUMPTIONS.—In the case of any assumption to which subsection (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(C) OBLIGATIONS DESCRIBED IN THIS SUBSECTION.—A debt obligation is described in this subparagraph if such obligation—

"(i) was issued on or before October 15, 1984, and

"(ii) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338 (a)) the sales price of which is greater than $100,000,000.

"(D) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments.

"(E) CERTAIN EXEMPT TRANSACTIONS.—The Secretary shall prescribe regulations under which any transaction shall be exempt from the application of this paragraph if such exemption is not likely to significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(3) FAIR MARKET VALUE RULE IN POTENTIALLY ABUSIVE CASES.—In the case of any potentially abusive situation (within the meaning of section 1274(b)(3)(B)), the principal amount of any debt instrument received in any sale or exchange of property to which this section applies shall be the fair market value of such property adjusted to take into account other consideration involved in the transaction.

"(4) SALE-LEASEBACKS.—Subsections (e) and (f) shall not apply to any sale or exchange if, pursuant to a plan, the transferor or any related person leases such property.

"(5) RULES NOT TO APPLY WHERE PREPAYMENT PROHIBITED.—Subparagraph (A) of paragraph (1) shall not apply to any obligation arising from a loan from a third-party creditor, pursuant to which the obligor is not permitted to pay the instrument prior to maturity.

"(6) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to satisfy the applicable rate under subsection (c)(1)(B), the rate under subsection (b) shall be considered equal to the rate so applicable under subsection (c)(1)(B).".

(b) INTEREST INCOME AND DEDUCTIONS COMPUTED ON CASH BASIS IN CERTAIN CASES.—

(1) IN GENERAL.—Section 1274 of such Code (relating to determination of issue price in the case of certain debt instruments issued for property) is amended by adding at the end thereof the following new subsection:

"(e) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES TO WHICH INTEREST RULES OF SECTION 483 APPLY.—Notwithstanding any other provision of this subpart—

"(1) TRANSACTIONS TO WHICH SECTION 483 (e) APPLIES.—In the case of any sale or exchange to which section 483(e) applies—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any inclusion in income or deduction under this title with respect to interest on any debt instrument issued in connection with such sale or exchange shall be computed on the cash receipts and disbursements method of accounting.

"(B) Sales price exceeds applicable limit.—In any case in which the sales price exceeds the applicable limit under section 483(e)(3)—

"(i) except in the case of any transaction to which section 483(e)(2)(A) applies, subparagraph (A) shall not apply, and

"(ii) the discount rates under subsections (c)(3) and (b)(2)(B) shall be equal to the rates determined under subparagraphs (A) and (B) of section 483(e)(4).

"(2) TRANSACTIONS TO WHICH SECTION 483(f) APPLIES.—In the case of any sale or exchange to which section 483(f) applies—

"(A) TRANSACTIONS WITH 80 PERCENT TEST RATE.—

"(i) IN GENERAL.—Except as provided in clause (ii), any inclusion in income or deduction under this title with respect to interest on any debt instrument described in section 483(f)(3) shall be computed on the cash receipts and disbursements method of accounting.

"(ii) SPECIAL RULE FOR TRANSACTIONS NOT QUALIFYING FOR 80 PERCENT TEST RATE.—Clause (i) shall not apply to any debt instrument issued in such sale or exchange if, in addition to such instrument, a debt instrument not described in section 483(f)(3) is issued in such sale or exchange.

"(B) TRANSACTIONS TO WHICH SUBPARAGRAPH (A) DOES NOT APPLY.—

"(i) IN GENERAL.—If subparagraph (A) does not apply to any debt instrument issued in such sale or exchange, subsection (c)(3) shall be applied—

"(I) in the case of any debt instrument described in section 483(f)(4), by substituting '100 percent' for '110 percent', and

"(II) in the case of any debt instrument described in section 483(f)(3), by substituting '80 percent' for '110 percent'.

"(ii) SPECIAL RULES FOR 1985 AND 1986.—In the case of any debt instrument to which clause (i) applies issued during 1985 or 1986, the discount rate under subsection (c)(3) shall not be greater than the rate determined under section 483(f)(5).

"(3) SPECIAL RULE FOR HOLDING AND TRANSFER OF DEBT OBLIGATION.—

"(A) Paragraphs (1)(A) and (2)(A) shall apply to the holder of a debt obligation only if such obligation is—

"(i) held by the first obligee of such obligation or such obligee's spouse or estate, and

"(ii) secured by the property sold or exchanged in the transaction in which such obligation is issued.

"(B) Except as otherwise provided in regulations, in the case of a transfer of property by the obligor in which the obligation is not satisfied and the transferee does not become liable to pay such obligation to the first obligee, any deduction for interest on any indebtedness paid or incurred by the transferee to the immediate transferor attributable to such obligation shall be deferred until such time as such deduction would have been allowed if such obligation had been assumed by the transferee.

"(C) In any case in which the transferee assumes or takes property subject to any obligation under subparagraph (A) or is considered to do so under subparagraph (B), the transferee shall compute the amount of the deduction for any interest on such obligation on the cash receipts and disbursements method of accounting.

"(4) SUBSECTION ALSO TO APPLY TO DEBT USED TO CARRY OBLIGATION.—In any case in which an obligor of a debt obligation to which paragraphs (1)(A) or (2)(A) applies pays or incurs interest on indebtedness to carry such debt obligation, any deduction for such interest shall be deferred to the extent necessary to achieve a proper matching of interest income and expense.

"(5) REGULATIONS TO PREVENT ABUSE OF REQUIRED CASH ACCOUNTING.—The Secretary may by regulation prescribe rules to prevent the mismatching of interest income and interest deductions in connection with obligations on which interest is computed on the cash receipts and disbursements method of accounting.

"(6) OTHER RULES APPLY.—For purposes of this subsection, rules similar to the rules under subparagraphs (B) and (D) of section 483(g)(2) shall apply.".

(2) SPECIAL RULE FOR ASSUMPTIONS.—Paragraph (4) of section 1274(c) of such Code (relating to debt obligations to which section applies) is amended by adding at the end thereof the following new subparagraph:

"(G) TREATMENT OF ASSUMPTIONS.—

"(i) IN GENERAL.—Except in the case of property described in subsection (e)(2)(A) of section 483, if after December 31, 1984, any person—

"(I) assumes any debt obligation issued after October 15, 1984, or described in clause (ii) in connection with the sale or exchange of any property, or

"(II) takes such property subject to any such debt obligation,

and the terms and conditions of such debt obligation are not changed, then this section shall apply only to the person assuming, or taking property subject to, such obligation and the obligation shall be treated as issued by the purchaser to the seller in the transaction in which such obligation was assumed or the property taken subject to such obligation.

"(ii) OBLIGATION DESCRIBED IN THIS CLAUSE.—A debt obligation is described in this clause if such obligation—

"(I) was issued on or before October 15, 1984, and

"(II) was assumed (or property was taken subject to such obligation) in connection with the sale or exchange of property (including a deemed sale under section 338(a)) the sales price of which is greater than $100,000,000.

"(III) Certain exempt transactions.—The Secretary shall prescribe regulations under which any transaction would be exempt from the application of this subparagraph if such exemption would not significantly reduce the tax liability of the purchaser by reason of the overstatement of the adjusted basis of the acquired asset.

"(iii) OTHER ASSUMPTIONS.—In the case of any assumption to which subparagraph (A) does not apply, the rules regarding assumptions as in effect prior to the enactment of the Deficit Reduction Act of 1984 shall apply.

"(iv) REGULATIONS.—The Secretary shall prescribe such regulations as may be appropriate to effect the purpose of this subsection, including regulations relating to tax-exempt obligations, government subsidized loans, or other similar instruments."

(c) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—

(1) IN GENERAL.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULES FOR CERTAIN SALES OR EXCHANGES OF RESIDENCES BY DEALERS IN SUCH PROPERTY.—Nothwithstanding any other provision of this subpart—

"(1) IN GENERAL.—In the case of any debt instrument described in paragraph (4) arising from a sale or exchange to which this subsection applies—

"(A) subsection (c)(3) shall be applied by substituting '80 percent' for '110 percent', and

"(B) subsection (b)(2)(B) shall be applied by substituting '110 percent' for '120 percent'.

"(2) SALES OR EXCHANGES TO WHICH THIS SUBSECTION APPLIES.—

"(A) IN GENERAL.—This subsection applies to any sale or exchange of any residence by a dealer who holds such residence as section 1221(1) property to a person who intends to occupy such residence if the sales price of such residence does not exceed $250,000.

"(B) PRORATION OF APPLICABLE LIMIT WHERE MORE THAN ONE PERSON HOLDS AN INTEREST.—In the case of a sale or exchange of any property described in subparagraph (A) with respect to which there is more than 1 owner, the applicable limit under subparagraph (A) shall be apportioned among each owner on the basis of the ratio which the fair market value of such owner's interest bears to the fair market value of all interests of such owners.

"(3) BLENDED RATE WHERE SALES PRICE EXCEEDS $250,000.—In the case of any sale or exchange to which this subsection would otherwise apply with respect to which the sales price exceeds $250,000—

"(A) TEST RATE.—The discount rate under subsection (c)(3) shall, in lieu of the rate under paragraph (1)(A), be equal to the sum of—

"(i) 80 percent, multiplied by a fraction the numerator of which is $250,000 and the denominator of which is the sales price, and

"(ii) 100 percent of the applicable Federal rate, multiplied by a fraction—

"(I) the numerator of which is the sales price minus $250,000, and

"(II) the denominator of which is the sales price.

"(B) IMPUTED RATE.—The discount rate under subsection (5)(2)(B) shall be the rate under paragraph (1)(B).

"(4) DEBT INSTRUMENT.—A debt instrument is described in this paragraph if it provides conspicuous notice to the obligor in a manner prescribed by regulations that if the

obligor of such instrument places the residence in service in a trade or business the depreciation rules under section 168(f)(16) shall apply.

"(5) SALES PRICE DEFINED.—For purposes of this subsection, the term 'sales price' means—

"(i) money and fair market value of property received in the sale or exchange, plus

"(ii) the stated principal amount of any debt instrument issued in such sale or exchange.

"(6) RULES RELATING TO INTEREST TO CARRY DEALER OBLIGATIONS ARISING UNDER THIS SUBSECTION.—

"(A) EXCESS DEDUCTIONS DISALLOWED.—For each year the interest expense paid or incurred on any debt incurred or continued to carry any dealer obligation shall be disallowed to the extent such expense exceeds interest income includable with respect to such dealer obligation for such year.

"(B) DISALLOWED INTEREST EXPENSE ALLOWED IN SUBSEQUENT YEARS.—For any year the amount of disallowed interest expense shall be allowed is a deduction with respect to any dealer obligation in an amount equal to the disallowed interest expense as of the close of such year (not including any amount previously allowed under this subparagraph) multiplied by a fraction—

"(i) the numerator of which is the sum of the principal payments on such dealer obligation made in such year, and

"(ii) the denominator of which is the total amount of principal outstanding on such dealer obligation at the beginning of such year.

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) DEALER OBLIGATION DEFINED.—The term 'dealer obligation' means an obligation arising pursuant to a transaction to which paragraph (1) of this subsection applies.

"(ii) DISALLOWED INTEREST EXPENSE DEFINED.—The term 'disallowed interest expense' means the aggregate amount of interest expense disallowed under subparagraph (A) with respect to any dealer obligation.

"(D) NO INFERENCE.—Nothing in this paragraph shall be construed to imply that any transition described in this paragraph is or is not subject to the rules of section 453B, and any determination of such issue shall be made as if this paragraph had not been enacted.".

(d) RULE WHERE SPECIAL STATE LAW APPLIES.—Section 1274 of such Code is further amended by adding at the end thereof the following new subsection:

"(g) NO IMPUTATION RATE WHERE RESTRICTIONS ON STATED INTEREST APPLY.—Except as otherwise provided in regulations, in any case in which State law applicable to a transaction prohibits the parties from stating interest sufficient to result in an adequate stated interest in the transaction, a rule similar to the rule of section 483(g)(6) shall apply.".

(e) CONFORMING AMENDMENTS.—Paragraph (4) of section 1274(c) of such Code (relating to certain excepted debt instruments) is amended—

(1) by striking out subparagraphs (A) and (B),

(2) by striking out "section 483(e)" and "SECTION 483(e)" in subparagraph (F) and the heading to subparagraph (F), respectively, and inserting in lieu thereof "section 483(i)" and "SECTION 483(i)", respectively, and

(3) by redesignating subparagraphs (C), (D), (E), and (F) as subparagraphs (A), (B), (C), and (D), respectively.

(f) DEPRECIATION.—Subsection (f) of section 168 of such Code (relating to accelerated cost recovery system) is amended by adding at the end thereof the following new paragraph—

"(16) SPECIAL RULES FOR CERTAIN RESIDENCES.—In the case of any debt instrument described in section 1274(f)(1), the original principal amount of the debt instrument shall be deemed to be the lesser of—

"(A) the stated principal amount, or

"(B) the imputed principal amount determined by applying section 1274(f) using a discount rate of 110 percent of the applicable Federal rate at the time the debt was issued.".

(g) FAIR MARKET VALUE IN POTENTIALLY ABUSIVE SITUATIONS.—Subparagraph (B) of section 1274(b)(3) of each Code (relating to fair market value rule in potentially abusive situations) is amended in clause (ii), by striking out "or" at the end of subclause (III), by redesignating subclause (IV) as subclause (V), and by adding after subclause (III) the following new subclause:

"(IV) deferred interest, or".

(h) DETERMINATION OF APPLICABLE FEDERAL RATE.—

(1) IN GENERAL.—Paragraph (1) of section 1274(d) of such Code (relating to determination of application Federal rate) is amended by adding at the end thereof the following new subparagraph:

"(E) AUTHORITY FOR SECRETARY TO DETERMINE RATE MORE FREQUENTLY.—If there is a significant decrease in any applicable Federal rate following any 6-month test period referred to in subparagraph (B), the Secretary may determine the applicable Federal rate on the basis of a more recent period (not less than 30 days) as he determines appropriate to reflect such decrease.".

(2) SPECIAL RULE FOR 1984.—

(A) IN GENERAL.—In the case of any debt instrument issued during the first 6 months of 1985 pursuant to a sale or exchange for which a binding contract was entered into during 1984, the applicable Federal rate for purposes of sections 483 and 1274 of the Internal Revenue Code of 1954 shall be 10 percent.

(B) PARAGRAPH NOT TO APPLY.—Subparagraph (A) shall not apply to any debt instrument to which section 483 (e) or (f) of the Internal Revenue Code of 1954, as amended by this section, applies.

(i) EFFECTIVE DATE.—The amendments made by this section shall take effect as if included in the amendments made by section 41 of the Deficit Reduction Act of 1984.

CORRECTING THE ENROLLMENT OF H.R. 3398

DANFORTH AMENDMENT NO. 7085

Mr. BAKER (for Mr. DANFORTH) proposed an amendment to the concurrent resolution (H. Con. Res. 372) to correct the enrollment of H.R. 3398; as follows:

At the end of H. Con. Res. 372, add the following:

In section 806(a): delete "805" and insert in lieu thereof "805(a)".

In section 806(b)(1)(C): delete "905" and insert instead "805(a)".

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS

DURENBERGER AMENDMENT NO. 7086

Mr. BAKER (for Mr. DURENBERGER) proposed an amendment to the bill (S. 1052) to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations; as follows:

Strike all after the enacting clause and insert in lieu thereof the following: That this Act may be cited as the "Advisory Commission on Intergovernmental Relations Amendments of 1984".

SEC. 2. (a) Section 3(a) of the Act entitled "An Act to establish an Advisory Commission on Intergovernmental Relations", approved September 24, 1959 (73 Stat. 704; 42 U.S.C. 4273(a)), hereafter in this Act referred to as the "Act", is amended—

(1) by striking out "twenty-six members" in the matter preceding paragraph (1) and inserting in lieu thereof "twenty-eight members";

(2) by striking out "Governors' Conference" in paragraph (4) and inserting in lieu thereof "National Governors' Association";

(3) by striking out "board of managers of the Council of State Governments" in paragraph (5) and inserting in lieu thereof "National Conference of State Legislatures";

(4) by striking out "and" at the end of paragraph (6);

(5) by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon; and

(6) by inserting after paragraph (7) the following new paragraphs:

"(8) One appointed by the President from a panel of at least two elected officers of a township submitted by the National Association of Towns and Townships; and

"(9) One appointed by the President from a panel of at least two elected school board members submitted by the National School Boards Association.".

(b) Section 3 of such Act (42 U.S.C. 4273) is further amended by adding at the end thereof the following new subsection:

"(d) For purposes of subsection (a)(8), the term 'township' means a township as described in the Governmental Organization volume of the 'Census of Governments' publication most recently issued by the Bureau of the Census prior to the date on which an appointment is made under such subsection.".

SEC. 3. Section 4 of the Act (73 Stat. 705; 42 U.S.C. 4274) is amended—

(1) in subsection (d), by inserting "or otherwise voluntarily resigns," after "section 3 (a),"; and

(2) by striking out subsection (e) and inserting in lieu thereof the following:

"(e) One-half of the members appointed and serving on the Commission shall constitute a quorum, but two or more members shall constitute a quorum for the purpose of conducting hearings. The use of proxies or voting by alternates shall not be permitted by the Commission.".

SEC. 4. Section 6 of the Act (73 Stat. 705; 42 U.S.C. 4276) is amended—

(1) in subsection (d) by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) to procure temporary and intermittent services under section 3109 of title 5, United States Code, as if the Commission were an agency and the Chairman were the head of an agency (as used in subsection (b) of such section)."; and

(2) by adding at the end thereof the following new subsection:

"(g) Not later than 120 days after the effective date of the Advisory Commission on Intergovernmental Relations Amendments of 1984, the Commission shall issue such bylaws governing the operations and procedures of the Commission as the Commission considers appropriate.".

SEC. 5. Section 7(b) of the Act (42 U.S.C. 4277(b)) is amended to read as follows:

"(b) Unless prohibited by State or local law, members of the Commission, other than those to whom subsection (a) of this section applies—

"(1) shall be paid compensation in accordance with the guidelines with respect to uniform rates of pay established for members of advisory committees pursuant to section 7 (d)(1) of the Federal Advisory Committee Act (5 U.S.C. App.) for each day they are engaged in the performance of their duties as members of the Commission; and

"(2) Shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Commisison, as provided in subsection (a) of this section.".

SEC. 6. The amendments made by this Act shall take effect January 1, 1985.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Senate Subcommittee on Public Lands and Reserved Water on Thursday, November 8, 1984, in Stevenson, WA. The subcommittee will receive testimony on the management by Federal and non-Federal entities of land within the Columbia River Gorge in the States of Oregon and Washington and the possible need for Federal legislation to protect scenic, natural, cultural, and other resource values in the Columbia River Gorge.

The hearing will be held at the Skamania County Recreation Center on Second Street, Stevenson, WA, starting at 9 a.m. Those wishing to testify should contact the office of Senator EVANS, 3206 Jackson Federal Office Building, Seattle, WA, 98174. Telephone (206) 442-0350. Those wishing to testify must sign up in advance no later than Monday, November 5, 1984.

Oral testimony will be limited to no more than 3 minutes and possibly less, depending on the number of witnesses who wish to testify. Witnesses will be placed in panels. Witnesses are requested to bring 15 copies of their testimony with them to the hearing.

For further information regarding this hearing, contact Senator EVANS' office at the above-listed number or Mr. Tony Bevinetto of the subcommittee staff at (202) 224-5161.

ADDITIONAL STATEMENTS

COLORADO RIVER SALINITY CONTROL ACT AMENDMENTS

● Mr. SIMPSON. Mr. President, it is with great pleasure that I express my support for passage of the Colorado River Salinity Control Act amendments. This has been an issue that affects seven Western States in the Colorado River Basin as well as our relations with our fine neighbor to the south—Mexico. In addition, the passage of this measure will have some very positive environmental consequences.

Ten years ago, after a decade of intense discussions between the Republic of Mexico, the U.S. Government and the Colorado River Basin States, Congress enacted the Colorado River Basin Salinity Control Act. This important legislation—drafted in order to meet our country's treaty commitments—established a program to reduce the concentration of salts in the Colorado River flowing into Mexico. To accomplish this worthwhile task, the act provided a mechanism in which the Federal Government and the basin States worked closely together in order to prevent increases in the amount of salts entering the Colorado River. In addition, the Bureau of Reclamation was authorized to construct four salinity control units and to investigate the possibility of the construction of others. To complete the overall program, the Agriculture Department was directly involved for purposes of assisting in reducing salts from irrigated lands.

Since the mechanism was put in place, the basin States have worked with the Federal Government and have suggested necessary amendments that are needed to fulfill the purposes of the original act.

To accomplish this, the Senators from the basin States joined together and introduced these amendments early in this Congress. Similar legislation was also introduced in the House.

Through the legislative process of hearings and negotiations, I am pleased to say that we have fashioned a package of amendments that are apparently agreeable to all of the concerned parties. The package of amendments that the Senate is considering at this time has the support of the Senate sponsors, the House sponsors, the seven basin States, this administration, as well as the support of the National Wildlife Federation and the Environmental Policy Institute.

I have been in this legislation arena long enough to know that type of support does not just happen. It is a long and always difficult process, during which the communication between the parties is often full and rich—but it is so necessary if we are ever to get this type of comprehensive and important legislation to become law.

Mr. President, I will not go into a detailed explanation of the bill for my Senate colleagues—others have, and more will do so. However I would wish to emphasize to my fine colleagues that this bill is actually a culmination of 10 years of concerted effort. Effort that has involved many diverse interests and needs. And the bill before the Senate meets those needs. The passage of this bill will enable the United States to keep its treaty commitments to Mexico as well as to improve the quality of water and conditions of life all through the Colorado River Basin—and I add that this includes the wildlife interests as well.

I would also wish to express my gratitude to my fellow colleagues from the seven Colorado Basin States and thank them for their untiring effort in bringing this bill to fruition. In addition, the bill would never have become a reality without the full-fledged support of the Colorado River Basin salinity control forum with its representatives from each basin State. Their efforts have been nothing less than Herculean—and I commend them.

With these remarks, I urge my Senate colleagues to support this measure.●

ARE NUCLEAR WEAPONS OBSOLETE?

● Mr. KENNEDY. Mr. President, the August/September issue of the Bulletin of the Atomic Scientists features an important article by Bernard Weissbourd entitled "Are Nuclear Weapons Obsolete?" Drawing on recent studies of the probable climatic effect of even a limited nuclear exchange—the nuclear winter—Mr. Weissbourd demonstrates that the only way to ensure against nuclear catastrophe by accident, miscalculation or design is through a dramatic reduction in the number of nuclear warheads on both sides. Mr. Weissbourd argues persuasively that the best means for achieving significant reductions is through a strengthened conventional defense.

The article discusses the two avenues that could lead to greater conventional security—negotiations such as MBFR and improved conventional forces. Mr. Weissbourd is under no illusions that strengthening our conventional posture will be cheap or easy to achieve in light of political obstacles. But his essay makes clear the enormous benefits that would come about from pursuing this course.

Mr. President, I have long considered that raising the nuclear threshold is one of the most important chal-

lenges facing our national security needs today. Mr. Weissbourd's article provides a cognent and compelling argument which should be carefully studied by all who are interested in reducing the risk of nuclear war. I commend it to my colleagues and ask that the article appear in the RECORD.

The article follows:

ARE NUCLEAR WEAPONS OBSOLETE?

(By Bernard Weissbourd)

The momentum of the arms race has been carrying us steadily, inexorably, toward the acceptance of nuclear weapons as useful tools of war. Improvements in missile accuracy have given rise to the fear—and, in some quarters, the hope—that these weapons have become just that, weapons, devices that can be used to achieve military objectives other than deterring their use by others. The arms race has thus come to follow a perverse logic: each side seeks to insure deterrence by developing warfighting capabilities which by their nature threaten deterrence.

Animated by fear, this trend is, ironically, sustained by an illusion of control: the illusion that nuclear weapons can be used in limited, calculable, predictable ways. In view of what we know—and, more important, do not know—about the effects of nuclear war, this illusion is impossible to maintain.

A stunning demonstration of this is provided by recent studies of the possibility that a nuclear war might precipitate a climatic catastrophe—a "nuclear winter." These studies deepen our awareness of how precarious our situation is. They force us to recognize the extent of our ignorance about the effects of nuclear war. They powerfully reinforce arguments for massive reductions in the world's nuclear arsenals. And, as I will argue below, they make providing an adequate conventional defense of Europe a matter of the utmost urgency. In short, far from becoming useful and usable, nuclear weapons are becoming obsolete. The central goal of defense policy should be to hasten their obsolescence.

The "nuclear winter" findings have been reported in the April 1984 Bulletin and elsewhere.[1] Briefly, they indicate that even a relatively small nuclear exchange might result in the extinction of the human species due to a factor earlier studies neglected to consider—the dense clouds of soil particles and the smoke from fires that would be generated by nuclear explosions. Beyond a certain threshold, nuclear dust and smoke would largely block out sunlight for months, perturbing the Earth's climate. Temperatures would fall. Crops would fail. Ecological systems would be disrupted. Radiation would be several times more intense than previously estimated. When the soot and smoke clouds lifted, ultraviolet rays from the sun could reach unbearable levels because of ozone loss. And there might be still worse synergistic effects not yet identified. As a result of these developments, the human population "conceivably could be reduced to prehistoric levels or below, and extinction of the human species itself cannot be excluded."[2]

The precise threshold beyond which a climatic catastrophe would occur cannot be fixed with any certainty. But it appears to be extremely low relative to the 12,000 megatons of yield in the world's nuclear arsenals. Carl Sagan offers this estimate of the number of nuclear explosions beyond which a nuclear winter would occur:

"There is an indication of a very rough threshold at which severe climatic consequences are triggered—around a few hundred nuclear explosions over cities, for smoke generation, or around 2,000 to 3,000 high-yield surface bursts at, e.g., missile silos, for dust generation and ancillary fires.[3]"

The single most startling finding in Sagan's report is that a 100-megaton exchange, causing the centers of 100 major NATO and Warsaw Pact cities to burn, could bring on a nuclear winter. In other words, even a relatively small and contained nuclear war—one employing less than one percent of the world's nuclear arsenals—could threaten the survival of the human species.

These findings are necessarily hypothetical. They are based upon various models, simulations, scenarios and projections. While the conclusions of the report have been endorsed by a large number of American scientists, and the findings have been confirmed by Soviet scientists, some of the assumptions used have been challenged. It is important to recognize, however, that the ultimate significance of these studies resides not only in their contribution to our knowledge of the effects of nuclear war but also in the sharp reminder they provide of how incomplete that knowledge is. Ironically, they improve our perspective by enlarging our uncertainty; they extend our knowledge by forcing us to recognize how little we know. It is chastening to realize that policies and strategies upon which the fate of the world hangs have been formulated in ignorance of the possibility of the nuclear winter phenomenon. And it is only prudent, in light of the evidence amassed thus far and in view of what is at stake, to assume the worst case, pending further investigation.

Once political leaders become aware of the risk of climatic catastrophe due to a nuclear exchange, we will be safer than we are now. In general, the nuclear winter findings strengthen deterrence. More specifically, they render obsolete scenarios for "winning" a limited nuclear war through a counterforce attack. For an effective counterforce strike by either superpower would require several thousand warheads, enough to trigger a nuclear winter. No rational leader would contemplate such an attack, knowing it would mean suicide for his own country, even if there were no retaliation.

Nations do not, however, always have rational leadership. And a nuclear war may start by miscalculation or accident as well as by design. The only way to be sure that humanity will not be extinguished in the event of a nuclear war is to keep the tonnage of nuclear weapons in the world well below the threshold beyond which a climatic catastrophe may occur. It is thus imperative that we work toward reducing the world's nuclear arsenals by more than 99 percent.

This is an ambitious goal. Where should we start? Where might we most productively invest our efforts? I believe that the crucial first step is to provide an adequate conventional defense of Europe. Such a course would ease the great dangers inherent in present NATO policies. It would eliminate a major stimulus to the arms race: the U.S. effort to compensate for NATO's conventional inferiority by seeking nuclear superiority. And it would help to create the conditions for achieving massive reductions of nuclear weapons.

Our present policy seeks to remedy NATO's conventional inferiority by threatening the first use of nuclear weapons in the event of a conventional attack. In view of the risk of uncontrollable escalation threatened by any use of nuclear weapons, this policy is at once unworkable and reckless. In view of the possibility that a relatively small nuclear war in Europe, even if it remained "limited," might produce a climatic catastrophe that would extinguish the human species, it is intolerable.

The present NATO policy of "flexible response" is designed to bring about escalation to the use of nuclear weapons. Because of the perception that NATO's conventional defense is inadequate, we installed tactical nuclear weapons in Europe. Because some of our allies believe that there is a "gap" between our tactical nuclear weapons and our strategic ones, we are now deploying intermediate weapons—Pershing II and cruise missiles—in Europe. We have thus constructed an "escalation ladder" to assure our allies that our strategic arsenal will indeed be used in the event of a conventional attack.

In order to escape from the perverse logic of this policy, we must correct the asymmetry at the bottom of the escalation ladder: we must, in short, provide an adequate conventional defense of Europe. There is, in fact, growing support for this course of action. Cost need not be an insurmountable barrier. And the nuclear winter findings should help make clear to all that there is no sensible alternative.

What is an adequate conventional defense of Europe? There are several relevant considerations:

The Soviet Union cannot win a war of attrition against the Allies because of our industrial superiority. In World Wars I and II this superiority proved decisive.

The measure of an adequate conventional defense is not that it be certain to succeed in any possible circumstances. Rather, an adequate defense is one that will stop a blitzkreg. If a would-be attacker perceives that a blitzkrieg is likely to fail and to evolve into a war of attrition, he will be deterred from initiating hostilities.[4]

Adequacy does not mean equality. Adequate NATO conventional forces, even if less than equal, can stop a Soviet offensive, since more troops are required for offense than defense. Morever, new precision-guided munitions give an added advantage to the defense.

The ability to turn any conventional attack into a war of attrition is a more credible deterrent than the threat of using nuclear weapons under circumstances of nuclear parity. At present the lack of an adequate conventional defense leads the United States to threaten the first use of nuclear weapons as a means of deterring a conventional attack. If NATO had an adequate conventional defense, then conventional war would be deterred and the situation would be reversed. NATO's sole need for nuclear weapons would then be to deter a first use of nuclear weapons by others.

I do not call for a pledge of no-first-use but rather for creation of the conditions that would make a policy of no-first-use possible. Such a policy would be reflected in the types of weapons developed and deployed, their location, the training of troops and so on. A policy of this sort would make a real difference, while a pledge, in the absence of such a policy, might be broken by a superpower with "its back to the wall."

Footnotes at end of article.

There are two ways in which an adequate conventional defense of Europe can be achieved: by negotiation or by strengthening NATO's conventional capabilities. The former course is obviously preferable: we are far more likely to achieve true security by negotiating a balance at a lower level than by building up to a balance at a higher level. Moreover, successful negotiations would nurture mutual confidence and help create the conditions for realizing our ultimate goal of massive reductions in nuclear arsenals.

The chief avenue for pursuing a negotiated balance in conventional forces is the Mutual and Balanced Force Reduction (MBFR) talks in Vienna. The objective of these negotiations is to reduce the forces on each side in Central Europe below the levels required for a successful offensive. Initiated 12 years ago, they have thus far yielded little. But the obstacles to progress do not seem insurmountable, and the potential benefits of an agreement are great. The MBFR talks should thus be vigorously pursued.

They should also be expanded to include the objective of eliminating tactical nuclear weapons in Europe. In view of the close relationship between achieving conventional adequacy and reducing reliance on tactical nuclear weapons, negotiations in these areas should be combined. Were agreement reached on force reductions, there would be a strong incentive to remove tactical weapons. For under circumstances of conventional parity the great danger posed by these weapons would clearly outweigh any possible benefit.

Another important and complementary objective for negotiation is the establishment of a nuclear-weapons-free zone on either side of the East-West border in Central Europe. Such a zone would significantly lessen the danger of nuclear war in Europe by reducing the pressures to use nuclear weapons early in a conflict—pressures currently arising from the "use them or lose them" posture of NATO's tactical nuclear weapons.[5]

Serious consideration should be given to taking the initiative by withdrawing NATO's tactical nuclear weapons to the rear. Such a move could help create a positive climate for negotiations and might elicit reciprocal moves on the part of the Soviet Union. In any case, it would be in our interest, for there is little doubt that these weapons, as presently deployed, pose more of a threat to NATO than to the Warsaw Pact.

In the absence of successful negotiations, NATO must strengthen its conventional defenses. There is resistance to this course of action for several reasons: cost, political obtacles within the Alliance and the risk of provoking a conventional arms race. Yet if negotiations fail, there is no alternative; the dangers that attend our present course are intolerable. Conventional modernization has the potential to reduce those dangers. It also has the potential to compound them. So we must proceed with great care and clarity of purpose.

An important element in the effort to strengthen NATO's conventional defenses will be a rapidly advancing area of military technology known as "precision-guided munitions" (PGMs) which promise to shift the technological advantage away from offense and toward defense. Spawned by the computer revolution, PGMs are small missiles, equipped with conventional warheads, which are designed to destroy large targets such as tanks, planes and ships. Their effectiveness is a product of their accuracy; equipped with sophisticated guidance systems, they have a high probability of striking their targets. There are various weapons in this category—ranging from devices small enough to be shoulder-launched by a single infantryman to long-range cruise missiles capable of striking targets deep in enemy territory.

The essential feature of PGMs is that they make attack more difficult and defense easier. Light, mobile and relatively cheap, they render large, powerful, expensive vehicles—such as tanks—vulnerable. And they make the individual soldier far more valuable. In the past anti-tank weapons were of limited value and armored columns could virtually ignore pockets of infantry. Now anti-tank PGMs must be suppressed before the tank advances. Moreover, the increased firepower available to the individual soldier reduces the size of the force required to hold a front, thereby releasing troops for use in a strategic reserve or for deployment as part of a defense in depth.[6]

Economical and effective, PGMs thus hold great promise—the promise of helping to render tactical and theater nuclear weapons obsolete. They will undoubtedly be an important ingredient in any recipe for an adequate conventional defense of Europe. Their promise is not, however, without attendant difficulties and risks. For one thing, there is an open question as to the effectiveness of countermeasures now being developed to increase the survivability of tanks and aircraft against PGMs. There are also difficult questions regarding how best to orchestrate the transition from a defense relying on nuclear weapons to a defense relying on PGMs. The most troubling of these have to do with long-range, as opposed to battlefield, PGMs—specifically with missiles like the cruise which strategists contemplate using for deep strikes against enemy assets necessary for a successful blitzkrieg.

Some have argued against this strategy on the ground that it would create pressures for a Soviet preemptive strike early in a conflict and so would lower rather than raise the nuclear threshold. This argument fails to take into account one of the distinguishing characteristics of cruise missiles; their small size and mobility make them undetectable. While this feature makes them difficult, if not impossible, to subject to effective arms control, it also has the potential to contribute to crisis stability. For how can you preempt that which you cannot locate? It should thus be possible to deploy cruise missiles armed with conventional warheads in a manner that reinforces conventional deterrence without offering provocative targets for preemption.

A more serious problem is posed by the fact that these missiles can be used to deliver both nuclear and conventional warheads. A situation in which each side is armed with missiles, some of which have nuclear and some conventional warheads, is confusing and dangerous, for it is difficult to tell whether an incoming missile is conventional or nuclear. Thus a purely conventional attack against non-nuclear targets might trigger a nuclear response.

This is the chief difficulty with proposals for raising the nuclear threshold in Europe by strengthening NATO's conventional defenses by means of PGMs, while continuing to rely on nuclear weapons. One of the best known such proposals is that of General Bernard Rogers, currently the Supreme Allied Commander in Europe.[7] He argues that for a modest additional expenditure NATO could achieve an adequate conventional capacity by the end of the decade. Specifically, he would bring current forces up to peacetime standards, improve electronic sensor systems which can look deep into the aggressor's territory, improve information and control functions, and make heavy use of both battlefield and long-range PGMs. His use of these weapons, as I understand it, would not be governed by the objective of eliminating nuclear weapons but rather of supplementing them. This could result in a situation that is more, rather than less, dangerous, because a conventional attack might be mistaken for a nuclear attack.

A plan such as General Rogers' which makes heavy use of PGMs while continuing to rely on nuclear weapons, would, according to one study, cost roughly $20 billion over several years.[8] By contrast, the cost of providing an adequate NATO defense without relying on tactical or theater nuclear weapons has been estimated at $100 billion over six years, or $16-17 billion per year.[9] My argument accepts the latter figure. There is no way around the fact that a conventional defense of Europe that does not ultimately rely on nuclear weapons will cost more. But it will also purchase more: a conventional deterrent to conventional war which will not increase the risk of nuclear war.

Such an approach to NATO's security predicament is technically and financially feasible. Is it also politically feasible?

The United States' guarantee to defend Western Europe against an attack with conventional weapons by the Soviet Union was given at a time when we had a monopoly on nuclear weapons. Under present conditions of nuclear parity the credibility of that guarantee has been undermined. As Lawrence Freedman has observed, the doctrine of flexible response involves an inadequate conventional defense backed by an incredible nuclear guarantee. The real value of the doctrine, he argues, is that it serves as a basis for an alliance consensus, but "its prime political attribute—that it can mean all things to all men—is a serious military failing."[10]

Consider the dilemmas this state of affairs gives rise to. Not only is it hard for the United States to make its strategic guarantee seem ironclad, but, as David Schwartz has observed, its efforts to do so give rise to "the opposite fear within the alliance, namely, that the United States could commit its allies to a nuclear war they neither want" nor, given their vulnerability to Soviet nuclear attack, could suvive. This fundamental dilemma "force the United States to walk a thin line between European fear that the American strategic arsenal does not affort protection and fear that it does, with potentially suicidal consequences."[11]

In September 1979 Henry Kissinger put the point bluntly. "The secret dream of every European," he told an audience in Brussels, "was, of course, to avoid a nuclear war but, secondly, if there had to be a nuclear war, to have it conducted over their heads by the strategic forces of the United States and the Soviet Union."[12]

That is a characterization of the European position from an American perspective. The European perspective is that a conventional war fought by the superpowers on European soil would devastate their countries. What deters such a war, they believe, is precisely the threat of nuclear catastro-

phe. While Kissinger may have overstated the case, the conflict between the desire of Europeans to avoid a conventional war on their soil and the desire of Americans to avoid a nuclear war involving targets in the United States remains unresolved.

Perhaps the nuclear winter findings—and the recognition they force upon us of how little we know about the effects of nuclear war—will make a difference. They introduce a new factor: a war "fought over their heads" between the United States and the Soviet Union could create a nuclear winter that would destroy human life in Europe as well. The NATO policy of flexible response has built a doomsday machine which may be triggered by miscalculation, accident or irrational behavior. Surely it is now as apparent from a European perspective as it is from an American that there are better ways to deter conventional war.

It is often claimed that the chief threat to Western Europe is not armed attack by the forces of the Warsaw Pact but rather political intimidation and economic coercion. General Rogers is among those who have made this argument. The Soviet Union, he says, "does not want war, but she [sic] does wish to expand her influence in areas which lack of resistance permits. Her objective for Western Europe is to dominate it without having to fire a shot." [13]

Regardless of Soviet intentions, an adequate conventional defense will deter intimidation as well as war. But there is a larger point.

After World War II we were concerned that the Communist Parties in several West European countries would come to power. Since we believed these groups were subservient to the Soviet Union, we feared that the Soviet Union would dominate Europe through its "puppets." Today with much weaker Communist Parties in Western Europe, many of which are anti-Soviet, we fear "intimidation." Most Europeans would reject this view. The point is that where fear is mobilized, it does not matter whether a particular perceived threat is correct or not. If one such view is refuted, scenario writers will create another.

Much of the debate over nuclear weapons policy is based upon illustrations that are highly improbable, such as Albert Wohlstetter's example of a Soviet use of nuclear weapons against military targets in the course of an attack against the northernmost counties of Norway.[14] Other illustrations are only slightly more realistic. For example, it is said that an uprising in Eastern Europe that is getting out of control, or a U.S.-Soviet clash in Iran, or conflict in the Middle East may tempt the Soviet Union to gamble and try to end what they see as a great threat to their security. And so on.

We expect military strategists to practice a prudent vigilance. But too often the exercise of their proper role elides into a narrow, blinkered sort of vision that proves, in practice, to be anything but prudent. Indeed, there is a sense in which the single greatest threat to deterrence may be the strategic mindset that focuses narrowly on threats to deterrence. Seeking to anticipate and counter every conceivable situation in which deterrence might break down, this orientation has all too often generated the very dangers it seeks to prevent. We are captives of the flawed logic that issues from the premise: "if deterrence fails. . . ." Again and again we have pursued security by means that have brought us only insecurity; again and again we have sought to reinforce deterrence by means that have undermined it. Surely we have now had enough experience with this pattern to recognize its futility.

There is another way. It proceeds from the premise that deterrence must not fail. And it is animated by the knowledge that there can be no real security so long as nuclear weapons exist in such numbers. Its ultimate objective, repeat, is to reduce the world's nuclear arsenals by more than 99 percent; and its immediate priority is to provide an adequate conventional defense of Europe.

Under this approach, if security is established, it will be primarily a political, not a military, achievement. It will be a matter of working through differences of perspective—within the United States, with our allies and, ultimately, with the Soviets—toward policies and agreements that serve our profound common interest in survival. This approach is not without risks, but seen in the light of what we do and do not know about the effects of nuclear war, those risks pale beside the risks that daily attend our present ocurse.

70001 CELEBRATES AN IMPORTANT MILESTONE

● Mr. METZENBAUM. Mr. President, it is a sad fact that only three out of every four ninth-grade students will ever graduate from high school. The fourth will drop out because of pregnancy, illness, family problems, drugs, or economic need. Without help, many of them will drop out of society as well, their futures clouded by lack of skills and the absence of hope.

Today, I would like to recognize an organization that for 15 years has been providing high school dropouts with the skills and hope necessary to contribute to society—70001 Ltd., the Youth Employment Company.

In November, 70001 Ltd. celebrates its 15th anniversary. For the more than 32,000 young people who have benefited from 70001's unique program of preemployment training, educational upgrading, motivational activities, and job placement assistance, this anniversary is a special time. What began as a pilot project in Wilmington, DE, in 1969 in now a network of more than 50 programs in 16 States. Thanks to the cooperative efforts of the public/private sectors, these young people are not only helping themselves, but society as well by contributing to the economy and volunteering in the commmunity.

70001 works because it depends on the motivation of its participants and the goodwill of its supporters. 70001 exemplifies the spirit that is America—the idea that the American dream of prosperity and progress is within the grasp of every American. I congratulate 70001 on their commitment to excellence and encourage our support of them in their future endeavors.●

COMMENDING THE WYOMING CATASTROPHIC INFORMATION NETWORK

● Mr. WALLOP. Mr. President, at this time I would like to commend a woman who has searched for and found a creative answer to the problems that victims of catastrophic illness face. Shirley Phillips, a former medicaid employee, has created a unique organization called the Wyoming Catastrophic Information Network, Inc. Her program has set a shining example for other States that are feeling the crunch from pared Federal funding for health care programs.

The Wyoming Catastrophic Network, Inc., basically serves as a crisis hotline, matching victims of catastrophic illness with financial aid and other resources. The network tries to pinpoint the proper local, State, Federal, or other agency that can help to offset the patient's medical costs through loans, research grants or stipends. Then the patient is guided through the redtape that leads to securing that aid.

I am proud to say that, since the network's inception last March, it has initiated 45 contacts between callers and resources. Even more impressive is that the administrative costs for the network are funded entirely through donations and special funding from Wyoming's Governor and the Wyoming Committee on Aging. I heartily applaud Shirley Phillips and her colleagues for the intitiative they have taken. I know that their services will help to allay the confusion and fear

that accompanies catastrophic illness. Furthermore, I hope that their efforts will spark similar action across the country.

I submit for the RECORD a related article dated September 21, 1984:

NETWORK IS AIDING CATASTROPHICALLY ILL PATIENTS IN WYOMING

Patricia Cowley, a 48-year-old divorced Wyoming mother of three, faced more than the trauma of a second hospitalization when physicians told her earlier this year that she needed surgery to stem the onslaught of Crohn's disease.

She was looking at $10,000 in outstanding bills from her first operation last spring and a potential $15,000 for the procedure ahead of her. Besides those worries, the former waitress didn't know who was going to foot the food and rent bills for herself or her two daughters at home until she learned of the Wyoming Catastrophic Information Network, Inc.

Its sole purpose is to help patients like Patricia Cowley, who have come to the end of both their financial resources and emotional rope and need to know where they can find help—fast.

The network is a non-profit organization that seeks to match victims of catastrophic illnesses with financial and other resources, it helps patients and their families first find programs to offset the high costs of their diseases and then work through the paperwork maze to secure that aid.

When Cowley, whose married daughter introduced her to the agency, was through, she knew not only where to find the support but also how to apply for it. She received a hospital grant to cover medical expenses and discovered she was eligible for Aid to Families with Dependent Children (AFDC).

The Wyoming Catastrophic Information Network Inc. provides a reservoir of data about local, state, federal, and other agencies that offer loans, research grants, or stipends to cover medication, long-term hospice care, transportation, hospitalization, and related costs.

Its goals are to gather and distribute such information as eligibility requirements and emergency aid provisions for programs sponsored by a variety of organizations, including medical societies.

Spearheading the agency is Shirley Phillips, a 38-year-old former Medicaid employee who is more than a little familiar with bureaucratic red tape. On disability for a variety of lung and other diseases including bronchitis, asthma, arthritis, and diabetes, she knows the confusion and panic that can accompany a chronic illness.

Phillips organized the network last year after helping raise $42,000 for a friend's son whose skin cancer had spread to the liver. In the course of his illness, Robert Conkling Jr, 21 has accrued $35,000 in medical bills and was facing a $5,000 cash deposit before he could enter a Colorado hospital for further treatment. He died in May, 1983.

Phillips' crusade didn't end with Conkling, however. In the fund-raising process she also found many others who feared both their medical traumas and the debts they had to bear to fight them.

Often that aid exists, but victims of catastrophic illnesses just don't know where to look for it, Phillips said, noting, for example, the medication and services provided free at some major medical centers if patients qualify for their research programs.

"We believe there are resources out there," she said, citing as examples the National Spine Injury Assn. and Heart Assist and Transplant Fund programs that cover partial costs of medications. "You just have to tap into them, and it won't alway be in a big way."

It may range from informing a 60-year-old massive stroke victim that he is eligible for Veterans Administration benefits to finding a dialysis machine for an automobile crash victim to sorting out a computer mix-up that kept a critically ill man from receiving Social Security disability benefits.

Phillips' only frustrations are with patients whom the network can't help—because their diseases aren't catastrophic, or they have too high an income for aid, or research programs that might meet their needs aren't available to them.

It's not just the poor who are encountering problems, she said. Many middle-income families fall short of the social service program criteria and consequently fall through the cracks.

She notes, however, that although her agency focuses on people with catastrophic illnesses, it doesn't turn anyone away. She describes a catastrophic disease as "anything that overturns a family economically."

It does not necessarily have to be a chronic condition such as multiple sclerosis, a terminal illness such as cancer, or an ailment associated with the heart and lung, she said. There also is no dollar definition.

A $10,000 hospital bill might mean nothing to a wealthy couple secure in their retirement while $200 in medical fees to a husband and wife in their 80s with little resources can be catastrophic, she said. At the same time, catastrophic illness "can make the rich look poor."

Its $50,000-a-year administrative costs are covered by donations and special funding from Wyoming's governor and the Wyoming Committee on Aging. Once the network gets its tax-exempt status, however, she wants to approach foundations for support.

Phillips hopes that eventually the service will expand from a local and state network of contacts to one that links research, hospital, and other funding programs nationally. To further that aim, Phillips already, has launched a letter-writing campaign to medical associations for information on both research and financial programs.

Since the program was initiated formally last March, the agency has made 45 contacts between callers and resources. Although her primary target population comprises the residents of Wyoming, a state whose geographical vastness makes networking difficult, citizens throughout the country could benefit from a computer matching and medical information service, Phillips said. She already has received inquiries from as far away as Alabama and New York.

Response from both social agencies and physicians has been positive, she said. Her network not only relieves stress for patients but also removes the burden from other professionals who may not know how to help their patients or clients.

"The network helps sort out a lot of the red tape and misunderstanding that comes from dealing with government agencies," said Darryl Bindschadler, MD, internist, who sees its greatest value as an information network. "For that purpose alone, it's valuable."

The organization's credibility is enhanced because it doesn't have ties to a "big brother," he added. Its role in locating research programs and funds for patients is essential in a time of and increased awareness in paring welfare rolls and decreased availability of traditional funding sources.

"We don't have the mental stress of the family or the physician," Phillips said. "We can look at this situation more objectively and, therefore, can go to bat more easily for them, too."—Christine A. Hinz●

RURAL ELECTRIC AND TELEPHONE REVOLVING FUND SELF-SUFFICIENCY ACT

● Mr. SYMMS. Mr. President, I would like to call my colleagues' attention to S. 1300, the Rural Electric and Telephone Revolving Fund Self-Sufficiency Act. Through loans obtained from the revolving fund, rural cooperatives have established electric and telephone service in many remote and otherwise inaccessible parts of Idaho and the Nation.

Since 1935, when the Rural Electrification Administration [REA] began providing services for rural areas, Idaho has been a major benefactor. Idaho, with a population close to 1 million, is one of the few remaining States with a legitimate need for rural electrification funding.

I understand the great advantage rural cooperatives have provided for farmers and other citizens in rural communities throughout my State.

To assist rural cooperatives, revolving fund loans have been and continue to be made at very low interest rates. The original revolving fund, however, has been depleted by the increased demand for cooperative loans. To meet this demand, the REA borrowed additional funds, but at a much higher interest rate. The gap between lending rates caused the fund to accumulate a debt.

As our current national deficit threatens all of us with higher taxes and higher interest rates, we must now make decisions on what our Federal spending priorities are. If Federal spending is not consciously controlled and the debt curbed, the health of our national economy may be threatened. Though S. 1300, if passed, would benefit the State of Idaho, spending tax dollars in a multitude of problem-plagued Federal programs is not a solution to, but a cause of, our budget problems.

I feel that any further appropriations to the rural electric and telephone revolving fund, as in S. 1300, will aggravate the growing deficit and do little to solve the underlying problems of the rural electrification program. Legislation must be adopted that will do more than provide a temporary solution.●

TERRORISM

● Mr. GOLDWATER. Mr. President, with the word "terrorism" on the lips

of almost everyone in Government, it is always a relief to find somebody writing on the subject who seems to know a little bit about it or at least a little bit about how to approach this almost undefinable, unapproachable subject at this time.

Appearing in the Defense Systems Review magazine for September is an editorial by Martha Cosgriff-Martin, who is the editorial director of that magazine, on this subject, which should be read by my colleagues. I ask that it be printed in the Record.

The editorial follows:

TERRORISM: BAD, AND GETTING WORSE

(By Martha Cosgriff-Martin)

According to the State Department, terrorism against Americans is on the increase and will increase further still. The most unsafe city for Americans to visit is Paris, says Robert DuBose, Director of the Office of Global Issues, Bureau of Intelligence and Research in the State Department. Top business executives and government personnel obviously are in the highest risk category.

Terrorism can be defined as the deliberate use of terrorist tactics, or the threat of terrorist tactics, to achieve notoriety for a cause. However, this is only one type of terrorism, though still virtually impossible to predict or control. DuBose, speaking at a meeting recently in Northern California, highlighted some of the State Department's concerns about international terrorism. Statistics alone, however, do not provide too much information on a subject that is something most people try to avoid thinking about.

How prepared is the United States to cope with terrorism? Not very, appears to be the consensus. The free movement within democracies is something that by its nature provides a sort of hot-house environment for budding terrorists. While U.S. police departments see terrorism as simply crime, the State Department's involvement in terrorism in its various manifestations bears ample witness to a state of mind that acknowledges a political basis for these acts. At their minimum, terrorist activities often involve conspiracy, kidnapping, illegal detainment, flight from prosecution, and numerous other illegal acts. At its worst, terrorism is a state-directed tool for the subversion of a specific group or entire nation.

This aspect of being state-directed is part of a terrorist evolution, and most of us alive today have witnessed its startling growth. The Soviet Union or its surrogates, namely Cuba, appear to be behind much of the terrorism in the Western Hemisphere. Willing accessories in the Eastern Hemisphere include, primarily, Syria and Libya. The arch-terrorist for some time was Yassar Arafat and his polyglot band of goons. Now this same group is applying for membership in the recognized society of states—just which state Arafat represents has yet to be defined. The Israelis have maintained and have produced captured documents from Lebanon that Arafat was under the direct control of Moscow. This impact on Americans is not felt until Americans visit Israel, at which time the spector of terrorism assumes vivid form. There is no doubt, visiting that nation, that terrorism is a fact of life for which Israeli citizens are increasingly becoming prepared, as evidenced by the April bombing of a square in Jerusalem. The terrorists were fired upon by armed private citizens, and most were captured or killed. Thus a law of counterterrorism also was highlighted: nothing so discourages terrorists as being shot at. As soon as the first retaliatory shots were fired in Jerusalem, the majority of the attackers took to their heels.

According to DuBose, the U.S. policy is non-negotiation with terrorists. This means sacrificing valuable personnel at times to the demands of kidnappers. Americans posted abroad with the Foreign Service understand these rules before accepting assignments. Military personnel live with the fact of terrorist assault not only in the Middle East, but in Puerto Rico and other American possessions. While the policy is not diminishing terrorist attacks, neither is there a dramatic increase in incidents, but rather a steady increase. This in itself provides proof of an organized, state-ordered terrorist operation, if proof be needed.

DuBose stated that most of the terrorist groups did not appear to be organized among each other to any great degree—for instance, there seems no direct connection between the IRA and the Palestinian organization. Yet the State Department apparently knows of at least one Irish national in a Syrian terrorist training camp, giving instruction in explosive devices. Some literature provided by ex-terrorist indicates definite links between groups, especially Marxist groups, though DuBose thinks that these links are not very strong if they exist at all; and that they have been greatly exaggerated by writers of espionage and terrorist fiction.

The fact that Paris is the most dangerous place for Americans to be, even more dangerous than the Middle East, bears witness to the state of affairs in an increasingly politically uncertain Europe. A new generation of people who do not remember World War II, who are troubled by seeing their nations a potential battleground between the Soviets and the U.S., provide a far more hospitable climate for terrorism than should be the case. The vacillation at the top enhances the trend.

Within the United States, the climate for terrorism is never better than when international thuggery is condoned by misguided citizens and a misguided media. Terrorists make use of extensive psychological tools, as well as grenades, bombs, and automatic weapons. Reckless assults on the established order of things, and momentarily popular causes are bound to attract the sympathies of a young audience, while older and presumably wiser people are inclined to minimize the enormity of terrorist activities for various reasons.

The media in particular has been guilty in the past of providing just exactly the type of coverage the terrorists have as a primary motivation; and the removal of this type of coverage may be one of the strongest deterrents available within this country. It is not necessary to give a murderer equal time with the victim as if the two are engaged in some sort of political dabate. When the victim has been kidnapped by force and held hostage, he is not engaged in a polite disagreement. He has become the victim of a crime; and when he is murdered, he is dead. His death becomes a travesty when wrongly handled by the media; he is robbed of his last civil right, which is dignity and honor in death.●

SIGNING OF SOCIAL SECURITY DISABILITY REFORM ACT

● Mr. DOLE. Mr. President, I am pleased to announce that President Reagan today signed into law H.R. 3755, the Social Security Disability Amendments of 1984. This is a major accomplishment and one that should provide a new sense of confidence to the disabled population in the disability review process. This new law, which has broad bipartisan support, makes major changes in the way disability reviews are conducted. For the first time, a clear standard of review will be spelled out in the law. A finding of medical improvement or some other change in the beneficiary's condition will be required in order to terminate benefits. In addition, clear standards of rulemaking will be spelled out for the Social Security Administration with the hope of reducing some of the confusion surrounding the criteria being used by the State agencies, administrative law judges, and the Federal courts.

For over 2 years, the Congress has been working to develop a bipartisan approach to disability reform and to forge a bill that could protect the interests of the disabled population without prompting the runaway growth the program experienced in the 1970's. With the cooperation of the administration, I believe we now have a law that meets these objectives.

I would like to remind my colleagues that the legislation mandating a review of Social Security's 2.7 million disabled workers every 3 years was passed by Congress in 1980 and signed by President Carter. It is unfortunate that the Congress did not anticipate the problems that would result by requiring that such a massive review be conducted in such a short period of time.

Many people are to be commended for the role they played in the development of the reform bill. Congressman PICKLE, chairman of the House Social Security Subcommittee, and the House conferees showed a real willingness to try to accommodate the Senate position on reform. The Senate conferees—Senators PACKWOOD, ROTH, DANFORTH, LONG, BENTSEN, and MOYNIHAN—and other of my colleagues—Senators COHEN, HEINZ, LEVIN, DURENBERGER, and HELMS, to name a few—worked diligently to help resolve the difficult issues. And, of course, I would like to note the support we received from the administration in helping to develop this new law.

Mr. President, again, all of us involved in the development of this legislation are grateful that with the signing of the bill today we can finally offer to the disabled of this country the assurance that the disability program will be administered in a fair and equitable fashion.●

THE HOUSE PASSES THE AMERICAN CONSERVATION CORPS ACT

● Mr. MOYNIHAN. Mr. President, the Civilian Conservation Corps [CCC] is back.

Earlier today, the House of Representatives voted 296 to 75 to concur in the Senate amendment to H.R. 999, a bill to create an American Conservation Corps [ACC]. The 3-year effort to pass ACC-authorizing legislation—through seven congressional hearings, eight committee or subcommittee markups, and three rollcall votes in the House—has ended successfully. Now, the President must decide whether to sign the measure. If he does, he will put thousands of unemployed youths to work restoring and improving our public lands and facilities.

I sponsored the Senate amendment to H.R. 999. It authorizes program funding levels of $50 million, $75 million, and $100 million for fiscal years 1985, 1986, and 1987, respectively. Admittedly, such levels are below the $1.8 billion—$300 million annually from fiscal year 1984 through fiscal year 1989—authorized in H.R. 999 as passed by the House on March 1, 1983, or in my original ACC measure, S. 27. Nonetheless, we have taken an important first step toward preventing the continued erosion of our natural and human resources. Funded at $50 million, the ACC will enroll over 18,500 youths in the first year of operation.

A half century ago, President Franklin D. Roosevelt, recognized that creating a youth conservation corps would combat two serious problems: unemployment and the deterioration of our natural and cultural heritage. From 1933 to 1942, the CCC enrolled over 3 million young men, who planted over 2 billion trees, constructed thousands of miles of trails and access roads, and spent 6.5 million days fighting forest fires. The work of the CCC is evident even in the Washington, DC, area—in Rock Creek Park, along the Chesapeake and Ohio Canal, and at Camp David. The CCC was a good idea then; the ACC is a good idea now.

It is interesting to note that Ronald Reagan, as Governor of California, founded an ecology corps in 1971. In July 1976, its programs were transferred to the newly created California Conservation Corps. Since the "Cal Corps" was created, nearly 20,000 young men and women have performed over 15 million hours of public service. The corps' work—through fiscal year 1982—has been valued at $136 million, a return of $1.65 in appraised conservation work for every $1 expended. It is difficult, of course, to quantify the value of providing work experience for heretofore unemployed youths.

Mr. President, I wish to mention several people who have played integral roles in securing passage of ACC legislation. The late Senator Henry M. Jackson was a tireless champion of the ACC and its predecessors—the Youth Conservation Corps and the Young Adult Conservation Corps. Senator MATHIAS, ably assisted by staff member John Rixey, has been my partner in promoting the ACC.

Representative SEIBERLING has steered the ACC admirably through three recorded votes in the House of Representatives. His staff member, Loretta Neumann, deserves high accolades.

Some 45 organizations, representing a variety of concerns, have supported the ACC. Sydney Howe, executive director of the Human Environment Center, assumed the prodigious task of coordinating the groups' efforts on behalf of ACC. Mr. Howe deserves special commendation. No one is more dedicated to youth conservation programs than he. Mr. President, I have dwelled upon the benefits that accrue to our natural and cultural resources when programs such as the ACC are implemented. There is, of course, the human dimension to consider, as well. I ask that a letter appearing in the 1983 Annual Report of the California Conservation Corps be printed in the RECORD. This unsolicited letter from corp member Lawrence A. Wiggins speaks in eloquent terms to the human benefits of such a program.

The letter follows:

DO ALL THAT YOU CAN DO . . . IN THE CCC

It's been two months since I left the C's and began working for the National Park Service. I guess I've proved that there is "Life After the Corps", but I also wanted to tell you a few things about my life "during the Corps".

I believe I've learned more about hard work, people and life in my 20 months in the Corps than I did with 4 years in army life.

I've learned perseverance, integrity, honesty, and a little about love too. I learned how to admit to myself that I make mistakes but that I can learn from them as well . . . I've felt tired, blisters, heat and sweat and the good feeling one gets from hugging someone for no particular reason at all. I even learned how to open myself up a little and let other people in. . . .

I learned how to tune an engine, and listen to it . . . how to do brakes, change wheel bearings, timing chains and clutches. I learned how to weld (arc and gas) sweat pipe and how to lay a panel for a solar system so it would give a camper a good hot shower.

I could keep going on, I know; but I feel I've said enough.

Except perhaps thank you. And thanks to all the people who've put together such a wonderful program and keep it working.

It's been a wonderful experience. I will always cherish it.

LAWRENCE A. WIGGINS.●

U.S. ARMED FORCES

● Mr. GOLDWATER. Mr. President, an excellent article, appearing in the September issue of Defense Systems Review, puts the lie to those people who continually state that our forces are not up to what they were a few years ago. I ask that this article be printed in the RECORD.

The article follows:

AIR FORCE STATUS REPORT: "WE ARE BETTER THAN WE HAVE EVER BEEN."

(By Harry V. Martin)

Recent congressional criticism that U.S. forces are less prepared to fight a major war today than they were in 1980, are not only challenged by several high-ranking U.S. Air Force officers—but these military leaders emphatically contend that many positive trends have been esablished over the past four years.

From theatre commanders in Europe and the Pacific, to supporting forces commanders from TacAir to SAC, the same blunt message is stated: "We are better . . . there is absolutely no doubt about it." Reviewing the complete status of Air Force readiness were Gen. Richard L. Lawson (Deputy Commander-in-Chief, European Command); Lt. Gen. David L. Nichols (Deputy Chief of Staff, Plans and Operations Headquarters, USAF); Lt. Gen. Jack I. Gregory (Commander, Twelfth Air Force Tactical Air Command); Lt. Gen. Robert F. Coverdale (Vice-Commander, Military Airlift Command); Lt. Gen. James E. Light, Jr. (Commander, Fifteenth Air Force Strategic Air Command); and Brig. Gen. Jimmy C. Pettyjohn, director for Intelligence, Pacific Command.

The generals acknowledge that sustainability, not readiness, is the prime question of the military. Each officer individually admitted that spares and munitions are not at the level they should be to assure force sustainability in wartime, but they are eager to emphasize that the conditions today are vastly improved from four years ago. "You don't correct a decade of neglect overnight," Lt. Gen. Nichols said. He called the Nunn Report and one released by the House Appropriations Subcommittee on Defense as "not an accurate depiction" on the true status of military readiness in this country. "We changed our standards," Nichols added, "our current system is more demanding . . . when half the engines necessary were available in 1980 it meant we had C-1. Now if 60 percent is available we are at C-4."

Nichols pointed to some specific areas to prove the Air Force's increased readiness:

First term enlistments up 66 percent.

Current fighters delivered 2100 from 1000 in 1980.

Pilot retention up 70 percent.

Cruise missiles delivered 1195 from 0.

Air-to-air missiles delivered 14,200 from 3,300.

Support airlift capability up 67 percent.

Tactical flying time up 23 percent.

Mishaps down.

Guided munitions for training up 125 percent.

Airlift JCS exercises increased 50 percent.

Mobility, chemical protection up 100 percent.

Supportable tactical sorties up 62 percent.

"We have better weapons, better being combat-operational within two hours of landing. U.S. air forces have 25 main and standby bases operating in Europe.

Lt. Gen. Jack I. Gregory concurred with Nichols on the increased fighting fitness of U.S. forces. He said four years ago TacAir was not flying much and was not ready to go to war. Several years ago TacAir aver-

aged 11½ sorties per month and eight flights per crew. That level has increased by 78 percent, he said, emphasizing that the absolute minimum average sorties has risen to 15 to 16. Recognizing that in the next conflict TacAir will be expected to fly a surge rate of between three and four sorties a day, Gregory said it normally takes two to four hours to turn an aircraft around. Through increased training and maintenance methods, the turn-around period can be reduced to 30 minutes. Training methods have increased tremendously, he said, the most dramatic of which is simulation training. In 1980, Gregory said, TacAir training could only simulate 12 percent of Soviet electronics—today 80 percent of Soviet electronics are simulated in bi-weekly training sessions. Through this training, Gregory declares, "We have the ability to roll back or suppress the enemy's electronics." Gregory also stated that TacAir crews can concentrate on assigned combat areas and be familiar with their theatre. "We look for detail to make crews knowledgeable about bed-down bases as well as home bases. Commanders involved go to bed-down base locations annually." Gregory said that the prehand knowledge of the territory, language, allies, etc., has had some real pay-backs. "We have demonstrated the ability to move combat units to every theatre in 24 hours and be combat-operational in two hours," he added. Emphasizing that sustainability is the Air Force's biggest worry today, Gregory noted that in the early 80s there was a serious sustainability problem. "We're a lot better now than we were." Compounding the problem, however, is the ability to obtain parts for the aircraft spares kit. "We were on a starvation diet in 1978 and 1979," he said, "and because of this many companies that made the spares went out of business." Of 936 parts (this does not include 1936 bolts) required in the F-16 spares kit, the Air Force is short 450 pieces.

The Military Airlift Command has gained substantial capabilities over the last few years, according to Lt. Gen. Robert F. Coverdale. "We have 200 planes a day flying anywhere in the world," he said. Coverdale indicated that 40 percent of MAC's airlifts are provided by the Reserves. Military aircraft currently available include: 70 C-5s, 234 C-141s, 520 C-130s (302 being operated by the Reserves), 80 C-21s and 40 C-12s. A special operating force consists of: 13 MC-130s, 20 AC-130s, 4 EC-130s, 8 HH-53s, 6 HH-3s, and 9 UN-INs. MAC can also rely on 300 aircraft from its CRAF long-range program which incorporates the use of domestic airlines. In the last few years funding has become available for the C-5 Wing Modification Program, C-130 Wing Modification Program, the purchase of 50 C-5Bs, plus a CRAF Enhancement Program which upgrades 19 Boeing 747s used in commercial aviation. The development of the C-17—which can operate on smaller ramps, has a greater chance of survivability, and can reduce missions by 37 percent—is seen as eliminating any shortfall in MAC's airlift capacity.

Lt. Gen. James E. Light, Jr. stated emphatically, "The Air Force sustains the highest readiness that it ever has had." Light indicated the readiness of SAC to increase its conventional warfare capabilities. "A conventional encounter is much more likely than a nuclear one," he said. The general believes that the U.S. would have to contend with conflicts closer to Soviet territory than to U.S. territory, thus forcing the use of long range bombing and logistics. "The enemy would have the initiative," Light said, "and we would have to get there quickly to blunt the attack." Light maintained that the delivery of the B-1B would significantly improve SAC's conventional posture—having a lower radar cross section, more agility and capable of carrying more conventional payload. Light said the key to SAC operations is refueling. "Refueling is the key ingredient for rapid projection," he said. The focus of Light's message was: "As a nation we need to be combat ready." Light's assessment is that the nation is in such a status.

PACIFIC AND EUROPEAN THEATRE ASSESSMENT

"We have seen some very positive trends from Washington," admitted Brig. Gen. Jimmy C. Pettyjohn. The intelligence officer referred to the shift in the importance Washington is giving to the Pacific region. "The Pacific has become an important region—economically, politically and militarily," he said, adding "There is greater unity among Asian allied efforts than we ever thought possible."

Pettyjohn warned that the Soviets are rapidly modernizing their forces in the Pacific theatre. The menace is so great that the People's Republic of China insists that the U.S. should maintain strong military forces in the region. The complexity of the Asian alliance with the U.S. is viewed in the relationship of which country is perceived to be the enemy: The PRC, USSR, North Korea, or Vietnam—even Japan is still eyed warily. "Some Asian allies see the PRC as a greater threat than the Soviets," he said. "Some view Japan's buildup as dangerous. But, as a whole, relations with Pacific allies are sound."

Japan is reluctant to build up its military but their forces are gradually strengthening. Many Japanese believe their nation should not become involved in war with the Soviets and advocate a neutral stance. Korea is the most fully integrated military ally the U.S. has according to Pettyjohn. Great problems are associated with the Philippines. "We are greatly concerned with this area," he said. "Any loss (of U.S. bases) would be very harmful to our military posture in the Pacific," he added. But the U.S. is confident that any successor to President Marcos won't change the status with the U.S., he said, adding "But that is a big assumption." He indicated that the U.S. was not overly concerned about the New Peoples' Army. "We don't see them taking over the government—the guerrilla forces are not large, and the Philippine Army is well-equipped to handle them." Behind Pettyjohn's assumption is the fact, he said, that the Soviets are neither backing nor supplying the rebel force.

Some uncertainty is currently voiced concerning the ANZUS Pact nations of Australia and New Zealand: the Labor government in both nations are attempting to establish nuclear free movements. "The status of the ANZUS agreement is in some question. People in the civil section and the military side say it will work out," Pettyjohn said.

A major potential flashpoint to watch, according to Pettyjohn, is Korea—where the North is expanding and modernizing its forces far beyond a defense capability. "North Korea could initiate a large scale attack at any time with no outside help. It is the most militarized country in the world," he said. Vietnam is also a trouble spot with 170,000 troops in Kampuchea—and conducting limited incursions into Thailand. "We are concerned about a potential large scale incursion in to Thailand, though we believe it is highly improbable" he added, noting that the PRC is acting as a favorable counterbalance in Asia by tying down 40 percent of the Vietnamese forces in the south and 90 percent of Soviet Asian-deployed forces in the north. "The PRC may be a moderating force on Korea," he said, "but there are no guarantees." Soviet forces are increasing rapidly in Asia with 30 percent of its total navy divided between Vladivostok and Cam Ranh Bay. Deployment of Bear Aircraft has established a Soviet ocean reconnaissance force. In mid-November of last year, the Soviets deployed Badger aircraft to give them the potential of interdiction in Pacific waters.

Pettyjohn said the Soviets obviously desire to develop a two-front war capability. "They have that capability today," he said. One-third of the Soviet's SS-20s (about 135) are now deployed in Asia and their mobility enhances their survivability. The SS-20 ranges makes Thailand to the east, the Philippines to the south and Alaska to the north, vulnerable targets. The Backfire Bomber's range means the Soviets can strike targets as far south as the San Francisco Bay Area, Pettyjohn said.

With deployment of Flogger and Fencer aircraft, the Soviets hold a strike advantage over the U.S. defenses that will make any campaign against the Soviets a formidable challenge. "The Soviets maintain medium to high altitude early warning cover. What they lack in low altitude early warning is being filled by the MIG-23 (Foxer)." The U.S. has limited aircraft in the area—with the 5th Air Force located in Korea and Japan and the 13th in the Philippines. An F-16 wing will be dispatched to Misawa in Northern Japan—with the arrival of the first aircraft in April 1985 and the first squadron formation in September 1985. A second squadron will be formed by October 1987. "We have a pressing requirement for consumables," Pettyjohn said, "We are seeing improvements in every sustainable area. We think the Administration's long-range plans will correct the majority of these problems by 1988 to 1989." The ammunition shortfall will take several years to overcome—"it is neither easily nor quickly corrected," he said. Pettyjohn also feels that the deployment of either the F-111 or Strike Eagle to the Pacific Theatre will greatly improve the U.S. tactical strike capability. "Tactical intelligence upgrades are needed," he added. Pettyjohn emplasized that the Soviets are not great risk takers and that it is incumbent on the U.S. to place them at risk by building stronger forces in the Pacific.

Gen. Richard L. Lawson stated flatly that with the deployment of SS-20s, the Soviets were desirous of a role of superiority, not equilibrium. The U.S. deployment of Pershing and ground-launched Cruise missiles—which was originally requested by the German Chancellor—has found NATO allied governments standing shoulder-to-shoulder in unison, Lawson said. "There has always been a massive manpower military edge for Soviets. Now their technology is catching up as well—and the Soviet policy of defense in Europe has shifted to thoughts in terms of offense."

Lawson believes that the U.S. can count on the French in any conflict even though they are not part of the military participation in NATO. Spain can also be expected gradually to meld itself into NATO as well, despite political questions concerning Spain's role.

The gravest concern to General Lawson is air and sealift capabilities. "If we don't get airlift and sealift there [Europe in time of conflict] our ability to defend [Europe] will be measured in days," he said. NATO can conduct credible conventional defenses, he insisted. Lawson analyzed the European continent and the ability of the allies to hold against attack.

Norway: "We believe we can reinforce this area by air and Marine amphibious operations. This area can be held unless the Soviets use chemical warfare."

Central Europe: "The Soviets are stretched thin here and we will be able to hold them as far forward as possible. The Soviet C2 is extremely susceptible to electronic warfare and we have a chance to hold them."

Southern Europe: "We can hold the Soviets in Northern Italy."

Greece and Turkey: "The Navy can hold the Soviets if we can contain Greek and Turkish interfighting."

Lawson stated that the NATO allies are in strong shape, "They are prepared. We have the best we've ever had and that expands to the rest of the alliance," he said. Though Lawson maintains that NATO must be prepared for a solid front from the Warsaw Pact, he said he would not like to be a Soviet commander and go through Eastern Bloc nations.

Lawson said the top national security priority in NATO is to educate the U.S. and allied societies. "Society is not properly informed," he said, stating that only a properly informed society could give the allied military the tools they need to prevent Soviet aggression. "Those Soviets are not like us," he said. "You tell your fellow Americans that we can debate all we want, but that you're playing with the lives and the blood of young men and women because the Soviets don't think like you."●

SENATOR CRANSTON ADDRESSES KEY TRADE ISSUES

● Mr. DECONCINI. Mr. President, our colleague, the Democratic whip, ALAN CRANSTON, has outlined a most helpful agenda for the international trade issues confronting our Nation. In a piece recently published in the San Jose Mercury-News, Senator CRANSTON has laid out a clear set of priorities for consideration in the next Congress. As a member of the Senate Committees on Banking and Foreign Relations, Senator CRANSTON brings a great deal of experience together with his usual insight to this task.

I commend Senator CRANSTON's article to the attention of my colleagues and ask that it be printed in the RECORD.

The address follows:

TRADE AND THE AMERICAN FUTURE

(By Alan Cranston)

Californians are world-renowned for being the first to solve tomorrow's problems.

This glimpse of the future has always been a part of the excitement of the California experience.

Our talent for producing new ideas and technology together with our reputation for tolerance of cultural diversity has brought legions of energetic entrepreneurs to our state.

As a result, California has proven an extraordinary example of capitalism's ability to expand the economic pie and offer a better future for our citizens.

Today this ability to grow through innovation is threatened. The deterioration of America's position in internatonal trade presents potential dangers for our future economic health. The latest trade figures show a hemorrhaging of red ink—a monthly trade deficit exceeding $10 billion—and an annualized rate of more than $130 billion. Importing $130 billion more in goods and services than we export means that $130 billion is being drained from our national wealth. More ominous for the long term, we not only are exporting wealth, we are exporting jobs. The Commerce Department estimates that for every $1 billion decline in U.S. exports, 25,000 jobs are lost or not created.

If this trend continues, it will ensure the relentless mortgaging of the working future of a whole generation of Americans.

While the trade deficit soars, a somewhat sterile debate continues over "free trade versus protectionism" and the desirability of an "industrial policy" versus a noninterventionist federal attitude of "laissez-faire."

This debate is unhelpful in the task of reinvigorating U.S. trade efforts. The debate offers at one extreme the myth of a perfectly free trading system, a system which does not exist in the world today where government intervention and bilateral marketing arrangements are the rule. At the other extreme, it accepts the so-called "fallacy of the last move"—the naive notion that if America erected more protectionist barriers against foreign products, we would not face mutually harmful retaliation from abroad.

The debate over industrial policy is similarly polarized. Opponents fear an industrial policy would pervert our capitalist system, but they ignore the great success of federal participation in such national programs as the development of American agriculture. And many who advocate lavish rewards for growth industries offset by abandonment of declining ones are just too insensitive to the human costs involved in such a high-risk strategy.

I believe we need to move beyond this debate to take some prudent, real-world action. We need a mix of affirmative federal action and a rollback of federal impediments if we are to improve our international competitiveness.

My agenda for a stronger American trading future contains four essential components:

Investment in people: Human resources are the key to maintaining American competitiveness. We need new federal and business initiatives for an improved education system, particularly in the sciences, foreign cultures and languages, and international marketing practices. And we need better pay for teachers willing to forgo the benefits of the private sector to train a new generation of workers to meet the demands of the twenty-first century.

Support for entrepreneurs: Industries at the vanguard of American growth merit affirmative federal action on such measures as research and development tax credits, antitrust exemptions for joint R&D efforts and low capital gains tax rates.

Defense of fair trade: The federal government must be aggressive in its defense of American workers and industries against unfair foreign trade practices. We should work to uphold the principles of multilateralism in such arrangements as GATT (General Agreement on Tariffs and Trade). Trade is a two-way street; cheaper imports benefit American consumers and lower our inflation rate. But we must be realistic about the need to fight for reciprocity in the treatment of specific products in specific markets. For example: It is self-deluding to have our negotiators preach about the desirability of free trade at times when the Japanese are dumping high tech products below cost on the relatively open U.S. market while hiding behind high tariff barriers which harm American farmers and American industries. Determined defense of fair trade principles and reciprocity is the best alternative to potentially dangerous protectionist barriers.

Promotion of exports: Washington must recognize once and for all the crucial importance of exports to our economic future. Governments don't make most of our international business deals; businesses do. Exporters would like nothing more than to get the government off their backs and gain relief from burdensome licensing regulations, especially the draconian measures invoked by the Customs Service and the Pentagon to delay high technology exports to West Europe and Japan in the name of "national security." But there is much the federal government can do beyond removing such trade impediments. It must begin with a renewed commitment to financing assistance and the Export-Import Bank and energetic support of American business in our embassies abroad and at the Departments of Agriculture, State and Commerce at home. And it must encourage cooperative export planning with all sectors of private industry.

Two overreaching federal issues are also directly related to the success of any export action agenda: the budget deficit and defense spending.

Until we lower our budget deficit, we will continue to export jobs. The high interest rates needed to finance the soaring deficit keeps the dollar at a level many feel is overvalued and keeps American exports noncompetitive. Sound monetary policies must allow for reduced interest rates and for orderly growth in our money supply.

The dramatic growth in our defense budget must be curbed so that we can dedicate greater human and financial resources to the production of goods and services for export. So many of the best American minds are now dedicated to producing military items that add little to our long-term international competitiveness. The United States absolutely must maintain the lead in innovative technology with civilian commercial applications if we are to avoid continued erosion of our international trading position.

The economic security of our country relies on progress in taking such steps. We absolutely must make such progress if we are to stop mortgaging our future and to begin creating new opportunities for Americans.

[From the San Jose Mercury News]

TURNING THE TIDE ON FOREIGN TRADE

(By Alan Cranston)

Californians are world-renowned for being the first to solve tomorrow's problems.

This glimpse of the future has always been a part of the excitement of the California experience.

Our talent for producing new ideas and technology together with our reputation for tolerance of cultural diversity has brought

legions of energetic entrepreneurs to our state.

As a result, California has proven an extraordinary example of capitalism's ability to expand the economic pie and offer a better future for our citizens.

Today this ability to grow through innovation is threatened. The deterioration of America's position in international trade presents potential dangers for our future economic health.

The lastest trade figures show a hemorrhaging of red ink—a monthly trade deficit exceeding $10 billion—and an annualized rate of more than $130 billion. Importing $130 billion more in goods and services than we export means that $130 billion is being drained from our national wealth.

More ominous for the long term, we not only are exporting wealth, we are exporting jobs. The Commerce Department estimates that for every $1 billion decline in U.S. exports, 25,000 jobs are lost or not created.

If this trend continues, it will ensure the relentless mortgaging of the working future of a whole generation of Americans.

While the trade deficit soars, a somewhat sterile debate continues over "free trade vs. protectionism" and the desirability of an "industrial policy" vs. a non-interventionist federal attitude of laissez faire.

This debate is unhelpful in the task of reinvigorating U.S. trade efforts. The debate offers at one extreme the myth of a perfectly free trading system, a system which does not exist in the world today where government intervention and bilateral marketing arrangements are the rule.

At the other extreme, it accepts the so-called "fallacy of the last move"—the naive notion that if America erected more protectionist barriers against foreign products, we would not face mutually harmful retaliation from abroad.

The debate over industrial policy is similarly polarized. Opponents fear an industrial policy would pervert our capitalist system, but they ignore the great success of federal participation in such national programs as the development of American agriculture.

And many who advocate lavish rewards for growth industries offset by abandonment of declining ones are just to insensitive to the human costs involved in such a high-risk strategy.

I believe we need to move beyond this debate to take some prudent real-world action. We need a mix of affirmative federal action and a rollback of federal impediments if we are to improve our international competitiveness.

My agenda for a stronger American trading future contains four essential components;

Investment in People: Human resources are the key to maintaining American competitiveness. We need new federal and business initiatives for an improved education system, particularly in the sciences, foreign cultures and languages, and international marketing practices.

And we need better pay for teachers willing to forgo the benefits of the private sector to train a new generation of workers to meet the demands of the 21st century.

Support for entrepreneurs Industries at the vanguard of American growth merit affirmative federal action on such measures as research and development tax credits, antitrust exemptions for joint research and development efforts and low capital gains tax rates.

Defense of fair trade: The federal government must be aggressive in its defense of American workers and industries against unfair foreign trade practices. We should work to uphold the principles of multilateralism in such arrangements as GATT (General Agreement on Tariffs and Trade). Trade is a two-way street, cheaper imports benefit American consumers and lower our inflation rate.

But we must be realistic about the need to fight for reciprocity in the treatment of specific products in specific markets. For example, it is self-deluding to have our negotiators preach about the desirability of free trade at times when the Japanese are dumping high-tech products below cost on the relatively open U.S. market while hiding behind high tariff barriers which harm American farmers and American industries. Determined defense of fair trade principles and reciprocity is the best alternative to potentially dangerous protectionist barriers.

Promotion of exports. Washington must recognize once and for all the crucial importance of exports to our economic future. Governments don't make most of our international-business deals, businesses do. Exporters would like nothing more than to get the government off their backs and gain relief from burdensome licensing regulations, especially the draconian measures invoked by the Customs Service and the Pentagon to delay high technology exports to West Europe and Japan in the name of national security.

But there is much the federal government can do beyond removing such trade impediments. It must begin with a renewed commitment to financing assistance and the Export-Import Bank and energetic support of American business in our embassies abroad and at the Departments of Agriculture, State and Commerce at home. And it must encourage cooperative export planning with all sectors of private industry.

Two overreaching federal issues are also directly related to the success of any export action agenda; the budget deficit and defense spending.

Until we lower our budget deficit, we will continue to export jobs. The high interest rates needed to finance the soaring deficit keeps the dollar at a level many feel is overvalued and keeps American exports noncompetitive. So many of the best American minds are now dedicated to producing military items that add little to our long-term international competitiveness.

The United States absolutely must maintain the lead in innovative technology with civilian commercial applications if we are to avoid continued erosion of our international trading position.

The economic security of our country relies on progress in taking such steps. We absolutely must make such progress if we are to stop mortgaging our future and to begin creating new opportunities for Americans.●

1984 SMALL BUSINESS NATIONAL ISSUES CONFERENCE

● Mr. ARMSTRONG. Mr. President, "The good health and strength of America's small businesses are a vital key in the health and strength of our economy. Small business employs about half of our private work force, contributes 42 percent of sales, and generates about 38 percent our gross national product. Small firms are on the cutting edge of innovation, providing products, ideas, and opportunities for the future. Small business is dreaming impossible dreams and making those dreams come true."

These are the words President Reagan used in convening the 1984 Small Business National Issues Conference. This conference, sponsored by the American Institute of CPA's, the U.S. Chamber of Commerce, the National Federation of Independent Business and Small Business United, developed comprehensive recommendations to help American small business flourish and prosper.

The conference's 41 recommendations are a blueprint for action by Congress. The recommendations are sound, and ones I fully endorse, including such commonsense proposals as:

Enact a constitutional amendment to balance the budget.

Enact a constitutional amendment giving the President line item veto authority.

Oppose tax increases as the solution to reduce budget deficits.

Retain tax indexing.

Simplify tax laws, particularly in the areas of payroll tax deposit, inventory accounting, and debt-equity rules.

Increase small business access to equity capital.

Enact tax reform through promoting fringe benefit equity.

These and other reforms, if fully implemented by Congress, would spark a golden era for small business in America. I will work to implement these recommendations, and I encourage my colleagues to do so as well.

Mr. President, allow me a moment to express my home State pride that Coloradan Tom Brock, a certified public accountant from Longmont, served as founder and conference chairman. He did a masterful job in uniting the interests of small business and small business men and women congratulate him for his efforts.

Mr. President, I ask that the 41 recommendations for the Small Business National Issues Conference be printed at this point in the CONGRESSIONAL RECORD.

The recommendations are as follows:

CONFERENCE RECOMMENDATIONS

1. FEDERAL DEFICIT REDUCTION

Issue

Spending by the Federal Government of the United States is out of control. The Federal deficits resulting from this spending jeopardize American families and future generations, and could lead to the economic and social collapse of the Country and its institutions. Deficits contribute to high inflation, higher interest rates, higher unemployment, and a lower standard of living for all Americans. Previous attempts at balanc-

ing the budget or reducing spending have failed. Elected representatives have not demonstrated an ability to place the economic survival of the Country before political re-election goals.

Goals

The "down payment" proposals now before Congress are woefully inadequate. Dramatic action is essential this year, not promises for next year.

A. Short Term (immediate action)

1. An immediate one-year freeze of the total FY 1985 spending at FY levels.

2. Permanent adjustment of COLA increases to less than the CPI increases.

B. Long Term (five-year)

1. *Balanced Budget Amendment.*—Small business supports the concept of a constitutional amendment to force a balanced federal budget (to include all federal spending), provided that the requirement can be overridden by a two-thirds majority of both the House and the Senate.

2. *Limiting Federal Spending.*—Small business supports the effort to balance the budget and reduce the federal deficit by limiting total Federal spending to a percentage of G.N.P.

3. *Line-item Veto Amendment.*—Small business supports a constitutional amendment giving the President of the United States appropriation bill line-item veto power. The veto could be overridden by a simple majority of the House and Senate.

4. *Waste Reduction.*—Small business supports intensive effort to eliminate government inefficiency and waste, including implementing those Grace Commission recommendations which are appropriate, and eliminating direct or indirect government competition with small business.

C. Taxation

1. Tax increases must not be used by Congress as a bailout for failure to implement the short and long term recommendations above.

2. Tax indexation must not be eliminated or delayed.

2. GOVERNMENT COMPETITION: DIRECT AND INDIRECT

Issue

Government at all levels is increasingly competing unfairly with the private sector, in two ways. It competes directly by producing commercially available services and products internally. It competes indirectly by procuring these items from nonprofits, universities, and regulated industries whose tax exemptions and other economic preferences immunize them from effective competition. This unfair competition removes a major market from the private sector's reach—a market that under fair competitive conditions the private sector would ultimately serve more efficiently than subsidized sources can. In addition, it induces organizations that should be concentrating on public policy, education, and research to divert critical resources to commercial activities, at taxpayers' expense.

Proposed action

To minimize direct competition, establish through Federal legislation a national policy of procuring commercial goods and services from the taxpaying private sector. To control indirect competition, provide that preferences such as tax exemptions, postal rate discounts, and contracting priorities not be available to the commercially competitive activities of nonprofit and regulated industries. Extend those policies to state and local governments by withholding Federal funds from programs that violate them.

3. INEQUITABLE EFFECTIVE TAX RATES* (T)

Issue

Because they are labor, and often, inventory intensive, small businesses pay payroll, income, and other taxes at extremely high effective rates. These effective rates are far in excess of the average for all business.

Small businesses should carry their fair share of the responsibility of providing necessary Federal revenues, not a disproportionate burden.

The Congress and Administration are urged to undertake a comprehensive review of the tax structure to correct the disparity in effective tax rates which presently exists, as well as eliminate unnecessary tax complexities in the tax treatment of a small business.

Many believe that this can only be done through fundamental reform and restructuring of the tax code. Others think it preferable to work within the framework of the present system.

Equity, fairness, simplicity, and parity in effective tax rates for all businesses should be the guiding principles followed in addressing this issue.

While tax reform is of great concern to small business, it should not be used as an excuse to increase taxes or implement taxes of any kind on small firms in view of this already high effective tax rate.

Proposed action

Immediate and appropriate actions to rectify the current inequities are:

A. Graduated Income Tax

Replace the present corporate tax graduation schedule with a graduated rate scale, specifying a graduated rate schedule up to $500,000.

B. Used Equipment Investment Tax Credit

The tax credit limitation should be increased in the near term to $50,000.

In the long term, there appears to be no reason for retaining any distinction for purposes of the investment tax credit between new and used equipment; therefore, the limitation should be eliminated.

C. Accumulated Earnings Tax

This tax is assessed only on small businesses, ignores potential economic and business down turns, and was instituted when tax rates on "unearned income" was in excess of 50%. This section of the Internal Revenue Code should be repealed.

D. Proposed Double Taxation of Corporate Liquidations—Subchapter C Reform

The repeal of I.R.C. Sections 336 and 337 is strongly opposed by the small business community. Further, the bias in the tax code which provides a tax advantage for mergers with larger businesses is also opposed by small business.

4. SIMPLIFICATION OF TAX RULES AND REGULATIONS (T)

Issue

Unnecessarily complex tax rules and regulations continue to impose paperwork and compliance burdens which are costly to small business. Many of these can be greatly simplified and/or eliminated.

Some rules and regulations are complex to the point of effectively denying small businesses the utilization of beneficial provisions in the tax code.

Proposed action

It is proposed that the following immediate and appropriate actions be taken:

A. Debt Equity Rules

1. Clear legislative guidelines must be promulgated to allow a determination of whether a small business is at risk from the IRS assertions regarding debt and equity. Clear guidelines should be adopted to provide certainty for small firms based upon the following safe harbor rules:

(a) $1 million exemption for inside debt;

(b) Provision for a five-year exemption for new businesses, after which the regulation would apply;

(c) Provision for a 5:1 inside debt equity ratio; and

(d) Provision for using fair market value as a means for determining net assets and the ratio of debt to equity.

2. In the absence of clear legislative guidelines, Congress should repeal Section 385 of the Internal Revenue Code.

B. Payroll Tax Deposit Rules

Several changes in the IRS regulations would ease the burden of payroll taxes on small firms while in no way reducing the responsibility of the business owner.

1. Amend IRS regulations by changing the threshold for making payroll tax deposits from $3,000 to $7,500.

2. Employers with gross annual deposits of less than $75,000 will be considered to have complied if the deposit is not less than 90% of the taxes for the period.

3. Penalties should not be assessed against the potential shortfall of taxes owed for 1st penalties in a fiscal year and when the gross payroll rules change due to increases in total payroll.

4. Notification of penalty and taxes past due should include a detailed account of computations.

C. Inventory and Accounting Methods Simplifications

Simplified accounting and inventory valuation rules must be instituted to foster capital formation and retention. In this context, the following proposals should be enacted:

1. Increase to $10 million in annual sales the limitation for firms who can use simplified LIFO pooling rules.

2. Permit any small business to use a single inventory pool and a single price index for determining the LIFO deferral.

3. Allow any small business to elect the cash method of accounting if gross sales are less than $3 million.

4. The Department of Treasury should complete with all due speed the study of inventory and accounting methods which Congress requested in the 1981 Economic Recovery Tax Act.

5. SPIRALING PAYROLL TAXES: A DETERRENT ON SMALL BUSINESS GROWTH (T)

Issue

Payroll taxes have a disproportionate impact on small business because small firms are generally labor intensive and a larger portion of their total payroll is subject to these taxes.

Payroll taxes now constitute approximately 33% of Federal revenue collections. But perhaps even more significant is their growth. Between 1970 and 1990 there have already been or are now scheduled to be implemented nine FICA (Social Security) rate increases totaling 60%, 19 FICA base in-

* (T) After a ranking indicates a tie in the delegate voting.

creases totaling an estimated 677%, three FUTA (Unemployment Compensation) rate increases totaling 94%, and three FUTA base increases totaling 133%.

Congress has relied heavily on payroll-based taxes to fund social policy programs without consideration of how payroll-based taxes impact on labor-intensive small firms.

Proposed action

Payroll taxes must become part of the broad tax policy debate. Despite immediate as well as long-term problems of funding Medicare, Social Security, and unemployment compensation reserves, Congress must be convinced that the small business community can no longer support this continuing upward spiral. Therefore, any further increase in payroll taxes is opposed by small business.

6. PROCUREMENT

Issue

Current government procurement practices result in the waste of billions of dollars annually and the denial of the opportunity for millions of small businesses to participate in Federal procurements. Numerous studies have consistently confirmed that increasing the share of procurements from small business will result in substantial savings to the Federal government. Legislation should be enacted and policies developed and implemented to ensure that the maximum amount of goods and services are procured competitively from the private sector in a manner that creates the maximum opportunity for the direct participation of small business in government procurement.

Proposed action

Specifically, the small business community recommends the following:

A. The passage of current Senate and House amendments to the 1985 Defense Authorization Act and legislation from the Senate and House Small Business Committee addressing competition in spare parts procurement.

B. The initiation of administrative action to increase the use of incentives for prime contractors and Federal procurement officers to contract with small business.

C. Based on early indications of extraordinary success, the Small Business Innovation and Research Program (SBIR) should be strongly supported.

D. Full and prompt payment should be made for progress payments and for final payments on work satisfactorily completed. This includes payment on direct federal contracts, contracts using federal funding, and requires that prime contracts provide the same payment terms in their subcontracts as they are provided in the prime contract.

7. GRACE COMMISSION

Issue

The President's Commission on Cost Containment (the Grace Commission) recently offered recommendations that could eliminate significant waste. These savings can be effected with and without legislation and could significantly reduce the Federal budget deficit.

Proposed action

It is recommended that the President and Congress take immediate action to implement appropriate recommendations of the Commission. Specifically:

A. The President should mandate affected departments and agencies to take appropriate administrative action to implement cost saving recommendations by December 31, 1984, and report their progress by August 31, 1985.

B. The Office of Management and Budget should monitor the implementation plans of the agencies and recommend appropriate steps to accomplish the intent of the recommendations.

C. The Congress should review the Commission report by December 31, 1984, and report appropriate implementing legislation by August 31, 1985.

8. SMALL BUSINESS PARTICIPATING DEBENTURES (SBPD)

Issue

Current tax laws discourage investors from directing funds to small businesses in the form of either loans or equity.

Proposed action

Enabling legislation should be passed which would permit the issuance of SBPDs, providing for a fixed rate of interest plus a participation redeemable at a predetermined price on a future date and involving no ownership interest. The participating share of earnings would be taxes to the investor as a long-term capital gain, but deductible by the issuing company. Losses would be deductible in the amount of $100,000. SBPDs would combine the benefits of equity and debt financing which would make private investment in small businesses more desirable.

9. INTERNATIONAL TRADE INCENTIVES/DISINCENTIVES (T)

Issue

With the continuing movement from a world of national economies to an ever more interdependent global economic system, increased export trade and investments are vital to the future economic well-being of the United States and its employment base. Many believe that it is primarily through aggressive and enhanced world trade that record U.S. trade and national deficits and overall economic vitality can be substantially improved.

Proposed action

Recognizing the shift toward a world economy, the 1984 Small Business National Issues Conference strongly recommends that the Federal government of the United States take the following actions to provide equal and fair access to world markets for all the United States businesses.

A. U.S. Export-Import Bank

1. Credit worthy banks which serve the small business community should be granted greater discretionary lending authority to facilitate small business export sales in which the financing does not exceed $3,000,000.

2. Eximbank should establish a direct lending program to finance small business sales to countries where Eximbank is "open for business" but commercial banks are not willing to participate.

3. Eximbank should standardize commercial risk coverage at a level which will make export financing attractive to commercial banks which serve small business and allow states to implement supplemental commercial risk coverage.

4. Congress should play a strong oversight role in assuring that the Export-Import Bank carriers out its small business mandate.

B. FSC Alternative to DISC

Support an amendment to proposed Foreign Sales Corporation legislation that would include service firms and allow small businesses with up to $10 million in gross export receipts to use the small FSC exception to foreign requirements for a 5-year transition period; then impose a $5 million ceiling.

C. Department of International Trade

A Cabinet-level Department of International Trade should be established to consolidate export promotion and trade functions and to:

1. Negotiate, monitor, and forcefully support all United States international trade policy.

2. Coordinate the activities of all Federal government agencies which have an impact on the ability of small businesses to export.

3. Support regional and state export promotion assistance, and education programs.

D. Other Incentives

Congress is urged to continue, and where possible expand, export incentives such as the Export Trading Company Act and the Carribean Basin Initiative. Ambiguities of the Foreign Corrupt Practices Act should be simplified to encourage, rather than discourage, exports.

10. REDUCING REGULATORY ABUSE AND PAPERWORK BURDEN

Issues

Far too often, small business owners are required to deal with unreasonable regulation, duplicative paperwork, and egregious enforcement that cannot be justified. And to make this problem worse, the most serious regulatory, paperwork, and enforcement problems are found in the Internal Revenue Service and the Defense procurement system which have successfully exempted themselves from the scope of these laws. Agencies and the courts have tried to continually reduce the scope and strength of each of these Acts which were designed to reduce administrative costa and burdens on small business.

Proposed action

A. The Equal Access to Justice, Regulatory Flexibility and Paperwork Reduction Acts should be strongly enforced and extended to specifically include the Internal Revenue Service and the Defense Procurement system.

B. The Equal Access to Justice Act and Paperwork Reduction Act should be made permanent law.

C. The Equal Access to Justice Act "substantially justified" test should be applied to all of an agency's activities and not just the agency's position in court.

D. In keeping with the thrust of these public laws, the Federal Government must:

1. recognize and internalize the unique characteristics, limitations, and requirements of small business;

2. improve the size and quality of educational programs, particularly in the more technical regulatory areas;

3. develop a more co-operative and less adversarial approach to regulatory development and enforcement.

11. PRODUCT LIABILITY

Issue

Due to inconsistent and conflicting state laws and court decisions, businesses at all levels of the manufacturing, distribution and service chain are incurring high legal costs and unpredictable liability awards. The awards often penalize parties that were not actually responsible for any injuries incurred.

Proposed action

Enact a national law in the area of product liability that would:

A. Define manufacturers', distributors', and other parties' obligations in product liability for products they make, sell or service; and

B. Make only the party responsible for any injury caused by a product or service liabile for that injury.

12. INDUSTRIAL POLICY

Issue

Historically, policies of the United States have emphasized large institutions, i.e., big government, big business and big labor, as the vehicles for meeting our social and economic goals. Recent research recognizes that smaller enterprises are a major resource that must be considered as a significant partner in these efforts. As a partner, small business wishes to state its position regarding the government's role in guiding the growth of the United States economy.

Proposed action

A. Limitation of Government Role

1. Government should not play the role of central planner or industry leader. A more appropriate path to economic health is to encourage growth in the small business sector of our economy, where the bulk of jobs are generated, initial job training occurs, and a large share of innovation occurs.

2. The government should avoid policies which artificially distort the decision-making process implemented by the competitive market, including subsidies of all types and penalties which handicap some types of economic activity in favor of others. Competitive markets should guide the flow of our resources, not government policies.

3. The Federal government is not the appropriate vehicle for training or retraining workers.

B. Human and Non-Human Capital

1. It does not make sense to use total employment as a tax base. Financing government spending by raising taxes on employees artificially discourages the hiring of people by making them more expensive relative to equipment.

2. We must have even-handed treatment for non-human capital and human capital which does not discriminate between large and small firms, either in terms of benefits received or the cost of participation. Tax credits for investment should apply equally to machines and people so that firms are not artificially biased by the tax code in their decisions to hire people or buy machines.

C. Equal Treatment

There must be no discrimination in government programs against business because of small size; the cost of participation must not be disproportionate for small business.

13. PERPETUATING THE CLOSELY-HELD SMALL BUSINESS—FEDERAL ESTATE TAX BURDENS

Issue

The Federal estate and gift tax, which is a minor income producer for the government, is a major concern for many family-owned small businesses and farms. Its imposition after the death of an owner has caused the forced sale of many businesses and farms, despite sincere efforts to insure against such eventuality, often at the sacrifice of liquidity during the owner's lifetime.

Proposed action

A. Efforts to repeal or postpone the increase in the Unified Estates Tax Credit or postpone reduction in the estate and gift tax rates should be strongly opposed.

B. It is proposed that these rates be adjusted to reflect inflation. These adjustments should be similar to legislation enacted in the 1981 tax act which indexed individual income tax rates.

C. Since estate and gift taxes represent a negligible portion of total Federal revenues and are a major burden in passing small businesses from one generation to another, it is recommended that Federal estate and gift taxes be repealed.

14. DAVIS-BACON ACT

Issue

The Davis-Bacon Act severely reduces competition in government construction. It eliminates the productive use of labor, the greatest advantage small contractors have, from the competitive bidding process. Small contractors cannot afford to pay the prevailing wage rate from the closest SMSA (Standard Metropolitan Statistical Area). Currently, Davis-Bacon does not allow for the inclusion of non-union labor in the determination of the prevailing wage. Therefore, small businesses do not bid on Davis-Bacon covered contracts; this eliminates smaller contractors from government construction and drives up the cost of contruction to government.

Proposed action

The Davis-Bacon Act should be repealed as well as those provisions in program statutes which refer to the Davis-Bacon Act in establishing prevailing wage standards. Until the Davis-Bacon Act is repealed, legislation should be enacted providing for an increase in the Act's contract threshold to at least $5,000,000.

15. INCREASING SMALL BUSINESS ACCESS TO EQUITY CAPITAL

Issue

Existing small businesses and start-up entrepreneurs seeking less than $500,000 continue to have major difficulty getting capital. This problem must be alleviated within the private sector without creating or expanding government programs.

Proposed action

Support a concept which would allow depository institutions to establish restricted funds to invest in qualifying small business equities with certain protections for the business to control ownership and decision-making authority. Investment appreciation would be taxed as a long-term capital gain; dividends on bank-held stock would be tax-exempt; and net losses would be allowable as deductions. The Congress should work for prompt introduction and passage of this enabling legislation.

16. TAX DEFERRAL ON REINVESTMENT OF CAPITAL GAINS IN QUALIFYING SMALL BUSINESSES

Issue

Lack of long-term investment capital remains a concern for small business owners who are unable to attract financing to expand. Tax incentives are directed so that capital leaves small business investments for big business investments. An incentive to arrest the flight of capital from small business and which would also attract new capital to small business is the capital gains rollover proposal. The rollover proposal would allow an individual a deferral on capital gains taxes from the sale of any capital asset if the proceeds from the sale of the asset were to be reinvested in the common stock of a small business.

Proposed action

Legislation should be enacted to allow for a deferral of capital gains taxes on the sale of any capital asset or investment, if the proceeds are reinvested in the common stock of a small business.

17. JOBS CREATION CREDIT

Issue

The majority of small businesses are labor intensive and do not benefit proportionally from the investment tax credit. They need capital for growth, but do not have the same access to the capital markets as do big businesses. A jobs creation credit, based on employee growth, would direct capital to growing small businesses and provide additional working capital, thus providing new opportunities for employment and vocational jobs retraining.

Proposed action

It is proposed that a jobs creation credit based on employee growth be instituted to assist labor intensive small businesses. The tax credit should be applied against income tax liability.

18. SMALL BUSINESS REPRESENTATION

Issue

The influence and impact of small business operations affect every facet of American life at least as much as do big business and big labor. Despite this, small business interests are inadequately represented on Government policy and advisory boards.

Proposed action

It is recommended that representatives of the small business community be appointed to all policy-making, regulatory and advisory bodies of the executive and legislative branches of the federal government, such as Federal Reserve Board, Internal Revenue Service, or Department of Defense, and Department of Energy.

19. INTERNATIONAL TRADE POLICY

Issue

As the primary international currency, the U.S. dollar is subject to numerous market forces that have caused a significant misalignment of the U.S. dollar versus other world currencies and consequent disruptions in the free flow of international trade.

Proposed action

The Federal government must develop and implement domestic and international policies that will result in a more equitable and stable international currency exchange rate environment and oppose any efforts to restrict free and equal trade opportunities in the world marketplace, including any protectionist measure, such as the domestic content legislation, that may affect the United States' ability to promote and support its interests in world markets.

20. HEALTH CARE COST CONTAINMENT

Issue

There has been a persistent, rapid increase in health care costs in recent years. These increases in costs have affected government programs, insurance coverage purchased by employers for their employees, by individuals for themselves, and by the self-insured. A great many small firms do not provide health insurance for their employees due to excessive costs.

Annual health insurance premiums are currently increasing at rates which range from 15% to 30%, depending on the size and location of the business. These increases are

ultimately shared by employers, employees and consumers and adversely affect the health of American industry.

Proposed action

Employee health care costs can be monitored, moderated, and competition strengthened among the health care providers and private insurers by:

A. Encouraging states to enact legislation requiring hospitals and health care providers to charge all patients on the same equitable basis.

B. Forbidding cost shifting from one group to another.

21. MAINTAIN CURRENT LAWS GOVERNING THE USE OF INDUSTRIAL REVENUE BONDS

Issue

Industrial Revenue Bonds (IRBs) are productive instruments for promoting small business development by making saving and investment more attractive to individuals and businesses.

Congress enacted reasonable and responsible reforms to the IRB Program in 1982 to address criticisms armed at marginal activities being financed by IRBs. These reforms should be given an opportunity to work. Further limitations of IRBs will severly hamper the economic recovery by preventing many smaller businesses from realizing their expansion potential. Not only will this decrease productivity, but it will also defeat efforts to reduce unemployment.

Proposed action

Small issue IRBs and the pooling of IRBs should be preserved and expanded. Any new limitations or restrictions on IRBs should be opposed. Any restrictions on the volume of IRBs financing should be based not on state quotas but on a maximum size limitation on issues for any specific company and project.

22. UTILITY RATEMAKING AND TELECOMMUNICATIONS

Issue

Small business subsidizes other users of energy and telecommunications. Further, the relative amount of that subsidy appears to be increasing. The issue, therefore, involves the distribution of costs among rate-paying classes, rather than the absolute cost of energy and telecommunications to all consumers. Possible actions must recognize that small businesses and their organizations simply do not have the resources to intervene in every rate hearing as the process is now structured.

Proposed action

Realistic alternatives require means to simplify or consolidate small business participation. These actions should include:

A. State Legislatures or the Public Utility Commissions (PUCs) should require that the utilities provide a small business cost-of-service analysis in every rate increase request.

B. Utility commissions should address issues of competition and adverse effects on small business; and

C. The $6.00 telephone access charge for businesses with more than one line should be postponed until a uniform system of charges is adopted for all users.

D. When rate-based financed intervenors exist to enter rate cases on behalf of groups other than small business, similar treatment should be accorded small firms.

23. UNEMPLOYMENT COMPENSATION (T)

Issue

Unemployment compensation cost must be controlled, while setting the level of unemployment benefits to provide subsistence, not maintenance level of income.

Proposed action

A. Proposed legislation to defer or forgive repayment of federal loans should be opposed.

B. Changes intended to provide extensions of benefits during periods of lower unemployment, to reduce qualifying requirements, or otherwise make unemployment compensation more expensive, should be opposed.

C. The Federal Supplemental Compensation program should be allowed to expire on March 31, 1985.

D. Cost burdens should be fairly levied on those businesses, large and small, which have had adverse experience. States should take action to control cost increases by improving experience rating and targeting of benefits, rather than raising taxes.

E. The duration of benefits should be minimized to encourage job seeking.

F. Unemployed persons who are found to be below a subsistence level after normal payments terminate should be transferred into other public assistence programs.

G. The small business community supports the current state-by-state system of unemployment compensation.

H. Congress should enact legislation to exempt employers from paying unemployment compensation taxes for employees who are never eligible for benefits (i.e. corporate officer-employees).

24. PERMIT POOLING OF SBA GUARANTEED LOANS FOR SALE IN SECONDARY MONEY MARKETS (T)

Issue

Participation of financial institutions in the U.S. Small Business Administration (SBA) guaranteed loan program is inadequate and can be increased by allowing the sale of SBA guaranteed loans in the secondary market.

Proposed action

Increase the participation of financial institutions in the SBA guaranteed loan program by the following actions:

A. Give statutory authority for the sale of loans in the secondary market.

B. Permit pooling of SBA guaranteed loans.

C. Mandate administrative reforms to ensure greater efficiency in the secondary market.

There is a need to develop broad-based support in the business and banking community for prompt passage of enabling legislation.

25. SMALL BUSINESS INVESTMENT INCENTIVE (T)

Issue

Most small business people today do not have access to financing vehicles such as the public sale of equity securities, the issuance of bonds and venture capital markets. Most of the capital available for small business comes for personal savings, friends, relatives and business associates. The investment in small business is generally considered a high risk venture, thus many people with available capital are discouraged from making this kind of risk investment. This is also compounded by present tax laws which make this kind of venture unattractive, including double taxation on corporate dividends, capital loss limitations on the sale of stock, and the treatment of loans to small business as nonbusiness loans.

Proposed action

Permit a qualified small business to raise up to $250,000 for operations and expansion through the sale of stock, while allowing individual investors a deduction of up to $15,000 on their tax returns ($30,000 on a joint return) for stock purchased in that small business.

ADDITIONAL ISSUES

26. INCREASING PENSION FUND INVESTMENTS IN SMALL BUSINESS

Issue

Public and private pension funds should be used better to promote the goals of a maximum return consistent with security for the beneficiaries along with targeted economic development to finance small businesses.

Proposed action

A. A legislative or administrative rule allowing for an effective class exemption requiring appropriate safeguards from the prohibited transaction rule under ERISA and allowing a small firm to borrow up to 25% of its plan assets should be supported.

B. The establishment of a market in targeted small business funds should be supported. Some of these would be privately insured, set up as mutual funds, or in a similar manner, and marketed to pension managers.

27. SMALL BUSINESS ADMINISTRATION

Issue

The Small Business Administration was formed under a broad general mandate to protect and promote the interests of small business in the American economy. For more than 30 years, SBA has stood as the sole government advocate for the small business community.

Unfortunately, SBA's programs have become increasingly too diverse, and conducted to serve constituencies beyond the small business community.

Proposed action

The Small Business Administration *must* maintain its status as an autonomous agency whose sole mission should be to advocate for and assist the small business community, with the private sector having a stronger partnership role.

To ensure that SBA's mission remains focused on areas of greatest need:

A. The independent role of the Office of Advocacy must be maintained and strengthened.

B. The Congress should mandate a comprehensive review of all SBA programs to assess their efficiency and their appropriateness to the broad needs of the small business community. That review should be conducted under the direction of the private sector, with the leadership of the small business constituency.

C. In the delivery of lending and management assistance services, SBA should be directed to increase its reliance on the local resources in the private business sector which have expertise in its program area.

D. To increase small business' role in policy-making, the SBA Administrator should be a member of all Cabinet Councils affecting commerce, trade and the economy.

28. BANKING DEREGULATION

Issue

The small business community favors competition and deregulation, including a balanced and orderly deregulation of the financial sector. Unfortunately, a haphazard deregulation of the banking and financial services industries has been proceeding by use of legal loopholes and regulatory action. This haphazard development could injure small business and has the potential of seri-

ously interrupting the flow of debt financing available to small business.

Proposed action

Small business favor deregulation of the financial services industry. This should be done in an orderly and equitable manner, and Congress is urged to deal with it quickly.

Until the development of a fair and comprehensive program, Congress should act immediately to stabilize an increasingly chaotic situation and close the non-bank bank loophole, while preventing banks from entering commercial activities such as real estate and insurance.

29. YOUTH AND ENTRY-LEVEL EMPLOYMENT OPPORTUNITY WAGE

Issue

The number of jobs for the least employable must be increased.

Proposed action

A. Legislation should be enacted providing for a youth employment opportunity wage program less than the present Federal minimum wage to provide more entry-level jobs and training for America's youth.

B. Legislation should be enacted to broaden the small business exemption to at least $1 million to reflect inflation and to provide more entry-level jobs for youth, the handicapped, and others entering the labor force.

30. SUNSET PROVISIONS IN GOVERNMENT

Issue

Too many government regulations, programs and instrumentalities are created or promulgated without any stipulated provisions for review of their efficacy/effectiveness at a future date ("sunset provision"). This has led to a proliferation of these facets of government, many of which are of questionable value or applicability years after they were initiated. Since no formal procedure is extant to prompt the comprehensive review necessary, few if any are eliminated once they come into being.

Proposed action

All Federal regulations, agencies, departments, and spending programs should be automatically terminated, unless they are specifically reauthorized by Congress or repromulgated by the cognizant agency at least every ten (10) years.

31. EXPANDING THE SOURCES OF EQUITY CAPITAL FOR SMALL GROWTH COMPANIES

Issue

New and expanding small growth firms have a significant impact on our economy in terms of job creation, product innovations and generation of tax revenues. Yet, many of these firms are unable to secure capital from traditional venture capital sources. SBICs, MESBICs and publicy-owned BDCs provide equity capital and long-term subordinated debt to these small growth companies, but their capacity is restricted for a variety of reasons.

Proposed action

To expand the capacity of SBICs, MESBICs, and BDCs so they can be a major source of equity capital for small growth companies, the following actions should be taken:

A. A privately-owned, Congressionally chartered corporation for small business investment should be established; it would act as a financial intermediary between the capital markets and the SBIC industry (similar to FNMA). This new institution would channel billions of dollars into small growth companies through SBICs and MESBICs.

B. The statutory and regulatory impediments to full development of BDCs should be removed, including the granting of "pass-through" tax treatment to these publicly-owned investment firms. These changes will expand the opportunity for public investment in small growth firms through this new investment medium.

32. ANTITRUST ENFORCEMENT

Issue

Open and fair competition is the essence of the American free enterprise system. The success of a small, independent business depends upon its ability to compete; and competition is dependent upon the vigorous enforcement of the laws that govern activities that restrain trade. The enforcement of these laws is sporadic and varies from year to year and from administration to administration.

Proposed action

The antitrust laws should be vigorously enforced, including those dealing with merger activity. All current exemptions to the antitrust laws should be reviewed and the granting of new exemptions should be strictly limited. The role the FTC plays in preventing restraint of trade in the marketplace should be strongly reaffirmed. Further, new mechanisms should be enacted to limit mergers and acquisitions involving a substantial drain on credit resources.

33. IMPROVED DATA AND STATISTICS

Issue

Because most of our national economic aggregates were devised in the 1930's and have not been updated since, flawed and out-of-date national data negatively influence policy with great frequency, including small business policy. Peter Drucker estimates that our gross national economic aggregates are distorted 25 to 40 percent, when they should be plus or minus only 5 percent.

Proposed action

Accelerate the revisions of the Standard Industrial Classification codes so that we can track the economy as it is and as it is becoming, and make the revisions far-reaching enough to provide the same detailed classification of the fast-growing services sector as now covers manufacturing and agriculture.

34. CONGRESSIONAL OVERSIGHT OF FEDERAL REGULATION

Issue

In enacting regulatory laws, Congress as unfortunately provided regulatory agencies with overly broad delegations of authority to regulate the business community without adequate guidance as to Congressional intent and statutory authority.

Proposed action

Congress should enact regulatory laws which clearly provide statutory guidance and authority for regulatory agencies and which require Congress, on a timely basis, to approve proposed major regulations before they take effect, and which give Congress the opportunity to disapprove all other proposed regulations before they take effect.

35. FRINGE BENEFIT EQUITY

Issue

Small business owners are discriminated against by federal tax laws which provide tax deductible statutory fringe benefits to incorporated businesses, but do not allow similar tax deductible fringe benefits to the owners of unincorporated businesses. In cases where tax deductible fringe benefits are allowed to types of businesses, unfair restrictions are placed on small businesses.

Proposed action

A. Legislation should be enacted providing fringe benefit equity in small business. As an example, partners and proprietors should be included as "employees" as being eligible for participation in Accident Health Plans, group Term Life Insurance, Employee Death Benefit, etc., for the purpose of having these benefits provided as a normal business expense.

B. Internal Revenue Code provisions relating to top-heavy pension plans should be reviewed for their effect and impact on small business.

36. ENTREPRENEURSHIP AND INDEPENDENT BUSINESS OWNERSHIP

Issue

Development of entrepreneurship and independent business ownership must be encouraged.

Proposed action

A. Government can aid the entrepreneurial process best by balancing the budget, keeping interest rates in line, and curbing inflation.

B. Within the education process, from the primary grades onward, independent business ownership should be offered as a viable career choice.

C. The Federal government should explore ways in which the expansion of independent business ownership can be used as an economic development tool.

D. Independent business development information and resources should be integrated into public assistance programs and job training programs.

37. ERISA REFORMS

Issue

Inequities in the ERISA provisions for multi-employer and single employer pension plans should be eliminated.

Proposed solution

Appropriate legislation should be enacted to:

A. Eliminate coercion to join multi-employer pension plans.

B. An employer should have flexibility in choosing how to terminate a pension plan, i.e., to purchase annuities or to renegotiate benefits previously committed for his employees.

C. Employers should only be liable for their own obligations under a retirement plan and should not be forced to undertake pension liabilities for employees of other employers.

38. BANKRUPTCY REFORM

Issue

Small businesses are facing large losses of working capital from individuals or businesses filing bankruptcy to escape debt. Many of these same "bankrupt" individuals continue to live better and maintain far more individual wealth than those small business owners filed against. Future earning ability is not considered. Also frequently, debtors who are contemplating bankruptcy front-end load debt against unsuspecting creditors.

Proposed action

The bankruptcy code should be amended to make bankruptcy a less attractive alternative and to allow the court to consider a debtor's income in determining whether the debtor qualifies for straight bankruptcy.

39. FREEDOM OF INFORMATION ACT REFORM

Issue

In accordance with various Federal regulations and procedures, companies are required to convey to the Government confidential, proprietary, and competitive-sensitive information. Small businesses have been, and continue to be, injured by the release of this information by the Government to third parties which request access to the data under the FOIA. Under the Act, the Government can do so without notifying the originator of the data, or over its objection, should the originator be notified of the request.

Proposed action

The FOIA should be amended to contain provisions which would require:

A. Notice to the originator of the information that a request for its release has been received.

B. Adequate time for the originator to make known any objections it has to such release (with the rationale for this position).

C. Notice to the originator that the Government agrees or disagrees with the originator's position and its intended disposition of the data.

D. Should the judgment be for release, the opportunity for a prompt *de novo* review by an unbiased tribunal to hear the arguments for and against release and determine the ultimate disposition.

40. FEDERALIZATION OF WORKERS' COMPENSATION STANDARDS

Issue

The Federal government should not be involved in setting state workers' compensation standards.

Proposed action

The current state-by-state system of workers' compensation should be maintained. The states should ensure that this is the sole remedy.

41. OSHA REFORM BILL

Issue

Reasonable worker safety should be ensured without police state type of enforcement activities. A change in the thrust away from punitive to ensure and encourage constructive administration and enforcement of the Act in line with most recent experience is needed.

Proposed action

To maintain the recent improvement in the reduction of the number of worker injuries, the occupational safety and health legislation should be changed to promote an employer-governmental cooperative approach, rather than adversarial and punitive approach.●

THE GENOCIDE CONVENTION AND COMMUNISM

● Mr. GOLDWATER. Mr. President, I approach the subject of the Genocide Convention with torn emotions. On the one hand, I condemn the practice of genocide as the worst abomination any government can commit against humankind. If the Genocide Convention was actually focused on that horrible practice, which I would call the attempted annihilation of an entire people, religion, or race, I would be the first to stand here and favor the convention. But it is not limited to genocide as most persons understand that term.

For example, most people would think of genocide as being the attempted mass murder of an entire people, but that is not what the convention says. It defines genocide as an action intended to injure only individual members of a group.

Second, I would point out that the convention applies not alone to physical injury, but to mental harm, a phrase that might mean the effect caused by racial prejudice, something our country has been attempting to eliminate since the Civil War. Is the United States guilty of genocide because some remnants of discrimination may remain in our society that cause mental anguish to those who are discriminated against?

Also, the convention does not clearly protect American citizens against being dragged into foreign courts on charges of committing genocide. For example, under the convention, U.S. men and women who served in the Armed Forces in Vietnam might have been subject to prosecution for the alleged crime of genocide against a part of the Vietnamese people. All these problems must be corrected before the United States agrees to ratification of the convention.

Today, I wish to raise a different issue. I want to know whether the atrocities being committed by Communist and Communist supported regimes will escape the convention?

For example, I might ask about the genocide committed by the Soviet Union against Ukraine. Is that covered by the convention? The historical record provides overwhelming evidence that the Soviets have ruthlessly persecuted all independent religious groups in Ukraine.

Church leaders and the faithful have been arrested at random and executed as "enemies of the people" in Ukraine. Soviet post offices refuse to accept church literature. Church schools have been closed. Many churches were torn down. Others were transformed into antireligious museums. One became a state hog breeding farm.

In the 1940's, all Ukrainian Catholic bishops were sentenced to concentration camps and all members of Ukrainian Catholic orders and nuns were arrested. By 1950 the Catholic Church was liquidated in Ukraine.

Or, what about the Soviet invasion of Afghanistan? The Soviets are systematically eliminating significant parts of the Afghanistan nation. There were 15 million Afghans when Russians invaded in 1979. One-third of that number has been killed or forced to flee their country as refugees into Pakistan and Iran. Is this forced exodus and terror a crime under the Gencide Convention?

Now, let me turn to Communist China. I wonder how many of my colleagues know that Red China has been officially condemned for committing genocide. In 1960 the International Commission of Jurists found Red China guilty of genocide. The commission concluded that Communist China had systematically intended to destroy religious groups in Tibet.

Among the documented evidence reported to the legal inquiry committee was proof that newborn children were taken away from their mothers at birth, being literally ripped out of their arms, and sent into the interior of China in order to prevent them from having a religious upbringing. Buddhist monks were flogged, starved, and subjected to cruel physical abuse. One abbot of a monastery was made to eat grass and harnessed like a horse. People of the village were forced to ride him and beat him as if he were an animal.

But this is not all. What about the enormous loss of life suffered in mainland China during the so-called "Great Leap Forward" from 1958 through 1961. Thirty million Chinese people died and 37 million births were prevented because of the widespread starvation and malnutrition of the entire population resulting from official policies of the Communist regime.

Mr. President, I regret that the answer to these questions is, "No." The murder and brutality committed by Communist governments is not covered by the convention. There is an exception for political crimes.

When the original U.S. declaration against genocide was adopted in December 1946, it specifically referred to genocide committed on political grounds. But the Soviet Union and other Communist governments objected so strongly to the inclusion of this category of crimes that it was stripped from the convention.

Since the governments in Communist nations treat every act of independent behavior and every sign of dissent or resistence, as a crime against the state, the massive crimes against occupied peoples being committed every day by Communist regimes are exempt from the genocide convention.

Mr. President, there is no way the convention, as presently written, could be applied even handedly against Communist governments. The worst criminals of all will escape free of any prosecutions, while it will be a strong club in the hands of our enemies for use in criticizing the United States and nations friendly to us. For this reason alone, I must oppose the convention unless and until it is restored to its original form so that it will have meaning in the real world.

If the Genocide Convention is to have significance in the 1980's, it must

reach the atrocities committed by Lennist-Marxist totalitarian governments. They are the primary source of genocide in the second half of the 20th century, not the democracies. Our Nation need not ratify the Genocide Convention to demonstrate its total opposition to genocide. Our record speaks for itself.

Go back to the negotiating table and bring us a document that is aimed against the real culprits. Then I can support it.●

HEALTH CARE IN THE 1990'S

● Mr. BAUCUS. Mr. President, the American College of Hospital Administrators [ACHA] has recently completed an interesting report which I would like to bring to the attention of my colleagues.

The ACHA is a professional society of 19,000 health care executives from across the Nation. They have a long history of providing education and training for health care professionals. The ACHA recently surveyed 1,000 experts throughout the health care field including hospital leaders, physicians, other providers, legislators, regulators, suppliers, and payors. The objective of these surveys, and the resulting report, was to determine what consensus there was about changes which were likely to take place over the next 20 years. The ACHA prepared this report, entitled "Health Care in the 1990's," in coopration with Arthur Andersen & Co.

The survey presents a number of important observations about trends which will be shaping our health care system. A surprising degree of consensus emerged among the experts on several important issues dealing with payment systems, marketing and corporate structure, and financing of health care.

The ACHA found that the experts surveyed believe that the prospective payment system based on diagnostic related groups will prevail through the 1990's. Also expected is an increased market share for health maintenance organizations, and declines in physicians' income and job satisfaction. Another interesting result is that the experts believe commercial payors will push actively for State of federally mandated all-payor systems in the coming years.

In terms of competition and marketing, the experts see physicians playing a key role in patients' choice of hospitals. However, more outpatient and urgent care centers are expected to provide greater competition for traditional hospitals. And, by the mid nineties a greater need is projected for nonacute care facilities.

Investor-owned hospitals are expected to increase 60 percent by 1995, and multihospital systems are projected to grow significantly. Corporate organizations and new business ventures will also increase.

In the area of financing, the report sees medicare's share of health expenditures growing by 19 percent over the next 20 years and hospitals' share of health care markets decreasing. Unfortunately, the experts also project that medical and hospital cost inflation will exceed the overall consumer price index inflation rate through the 1990's. And while multihospital hospital systems are expected to expand, we are also told to expect more hospital financial failures.

Mr. President, I don't agree with all the conclusions reached in this report. However, I feel the American College of Hospital Administrators' study provides important insights on changes which may be taking place in our health care system. There are the trends and problems the Congress will have to confront in the near future. I commend the ACHA study to my colleagues and I ask that selected portions of the report be included at this point in the RECORD.

The material follows:

1. PAYMENT SYSTEMS

Over the past thirty years, insurance has been viewed as the best way to protect the majority of the public from the high costs of health care.

It was with the advent of Medicare and Medicaid that our social philosophy of health care swung furthest, making services available to the two groups who needed it most but could least afford to pay—the elderly and the poor. These programs employed payment systems with incentives for hosptials and physicians to provide services to the program beneficiaries; the cost-based reimbursement system was geared to expansion of the system and access to it.

It was not long before the first signs appeared indicating that there were few controls against the potential for over-utilization of the Medicare and Medicaid programs. When the federal government introduced changes designed to limit its financial outlay for health care, providers often were able to make up for payment shortfalls by shifting unmet costs to nongovernemnt payors.

Prospective pricing, as implemented by Medicare in 1983, now provides incentive to hold down costs through tighter utilization of inpatient facilities and services. Other health care payors are redesigning the incentives in their plans as one way of ending their exposure to cost shifting, thus protecting themselves and their subscribers from escalating rates.

Prospective payment/DRG's will prevail by 1990

The DRG prospective payment system will continue to be utilized by Medicare over the next five years, according to 85% of the panelists. Only half of the panelists, however, think that it will still be in use by 1995. Many panelists predict that Medicare will base its prospective payment system on something other than DRGs by that time.

The use of a DRG system by other payors is expected as well. Three-quarters of the respondents see Medicaid using DRGs by 1990; slightly fewer believe that Blue Cross plans will adopt DRGs and two-thirds of the respondents predict that commercial insurance companies will adopt DRGs. Panelists speculate that Blue Cross and the commercial payors will drop the DRG methodology before 1995 and put their prospective payment systems on some other basis.

Negotiated payment rates will be the primary method used by preferred provider organizations (PPOs) and HMOs through 1995, according to a large majority of the study participants. By 1990 and through 1995, say two-thirds of the panelists, only self-pay patients will be paying full charges.

PO's and HMO's will increase market share fivefold

The panels predict that PPOs and HMOs will account for approximately 10% of all hospital revenues by 1995, five times their 1982 percentage. This growth, to some degree, will be at the expense of Blue Cross and commercial insurance, which will experience a decline to 27% of hospital patient revenues by 1995, down from 33% in 1982. Some of the shift, however, will be attributable to commercial payors starting PPOs and HMOs themselves in order to protect their market shares and to guard against cost shifting.

Physicians will be pressured to control costs

As a result of the Medicare DRG program, nearly all physician and hospital panelists anticipate that hospital management will exert significant pressure on medical staff members to reduce patient length of stay and the number of diagnostic tests performed for Medicare patients. Both panels also are in complete agreement that there will be a trend toward prescribed diagnostic and treatment standards or protocols in the future.

Hospital (58%) and physician panelists (77%) see a significant increase in competition and conflict among physicians. The DRG system will also result in increased consolidation of physicians' practices as they attempt to develop larger referral bases, according to 93% of the combined panels and 85% of the physicians. Virtually all agree that there will be an increase in the formation of joint ventures between hospitals and physicians.

As a result of the expected competition, conflict, prescribed standards and decreased autonomy, physician and hospital panelists believe that physicians will derive less personal satisfaction from their medical practices. Eight of ten of these same panelists predict a decline in physician compensation levels.

Medicare prospective payments will expand to all inpatient services

Almost all Medicare inpatient-related health care services will be covered under a prospective payment methodology by 1990. Most of the panelists also believe that it is likely that capital costs, physicians' professional and nonprofessional charges, skilled nursing care, home care, rehabilitative care, psychiatric/substance abuse care and durable medical equipment for home use will be paid by Medicare on a prospective payment basis. The panelists are not as certain about the inclusion of medical education, ambulance service and return-on-equity in the prospective payment program.

Cost shifting will be attacked

In addition to launching their own PPOs and HMOs as vehicles through which to negotiate lower rates and remain competitive, the commercial payors are expected to push actively for state or federally mandated "all-payor" systems under which all insurers pay

according to the same methodology but can negotiate their own rates or discounts. Panelists also expect these insurers to encourage or require their policy holders to use alternative delivery systems.

2. COMPETITION AND MARKETING

The notion of competition is not new to the health care market. It has always existed in the form of institutional pride and a desire to be viewed as the facility of choice. The prestige of the medical staff and the availability of the most modern equipment and facilities have been competitive factors for decades.

Competition in the next ten years will be redefined. It will now be based more on financial criteria and the ability to survive in a market structured on financial factors. Many of the traditional factors of competition will continue as institutions vie for the largest share of the patient population.

What will be different is that the cost of care will be a competitive factor along with quality. Sensitivity to cost will lead patients to seek care at alternative sites that are less expensive and more convenient than inpatient facilities. Many new providers will enter the market and there will be intense competition among them.

Physicians determine choice of hospital

All panels agree that a physician's recommendation currently is the most influential factor in the patient's choice of a hospital. They also concur that the institution's reputation in the community is the second strongest factor in this decision. Physicians, payors and suppliers believe that the next most important consideration is the location of the facility, while hospital management believes it to be the patient's previous use of the facility.

For 1990, there is less agreement as to what will be the deciding factors. All concur that the physician's recommendation will still be the most influential factor but the hospital, supplier and payor respondents believe that HMO or PPO affiliation will rank second; physicians predict that the facility's reputation in the community will continue to be second. All panels agree that hospital location will become less important as more patient groups will be tied to specific hospitals through HMO, PPO or other contractual arrangements.

More outpatient and urgent care centers will compete with hospitals

Panelists predict that hospitals will face stiff competition from alternative providers during the next five years. Outpatient clinics, diagnostic centers, minor emergency centers, surgery centers, home health agencies and hospices are predictd by over nine out of ten panelists to be successful in their competition with hospitals for patients.

Free-standing outpatient centers will be very successful in competing with hospitals in 1990, predict over half of the panelists. Forty-six percent of all panelists predict that minor emergency centers also will be very successful competitors against hospitals, while home health care agencies (42%) and surgery centers (31%) are viewed as the next most successful in the future. Panelists see dialysis centers as the least likely to be successful competitors.

The push for shorter lengths of stay in hospitals and the increase in the aged population will create the need for more extended care facilities through 1995, predict 98% of the panelists.

There also will be more need for rehabilitation facilities, in the opinion of 86% of the respondents. The panelists hold the same view for substance abuse facilities, with 80% predicting an increase in need.

Over half of the combined panelists predict a greater need for psychiatric facilities through 1995, but there are wide variations among individual panels on this point. Hospital panelists (75%) feel strongest about this need, and the legislator/regulator (70%) and other providers panels (68%) agree. Only 37% of the physicians, 27% of the supplies and 15% of the payors foresee an increased need for psychiatric facilities.

Patients will become prudent buyers

As patients become responsible for a greater share of their health care expenditures, their price awareness will increase, according to 99% of the study participants.

Almost all think that this development also will increase competition among providers. Panelists believe that self-diagnosis and treatment will increase slightly as patients become more responsible for a share of their medical costs.

The respondents do not believe the quality of care will change as people have greater financial responsibility for their care. They do believe, however, that there will be a slight decrease in the availability of health services, which coincides with the position of 89% of the combined panelists who feel that there will be decreased patient demand for services.

Patients, in conjunction with their physician, will continue to make their own selection of a hospital when inpatient care is needed, the panelists predict. However, with the growth of HMOs and PPO, more patient groups will be tied to specific hospitals.

Future marketing efforts will be directed toward the price-conscious consumer as well as the admitting physician. Patients more often will consider where their physician has staff privileges when they are choosing a new physician.

Patients will be more inclined to question and reject physician recommendations for testing and treatment. Panelists believe second opinions for major interventions will be the rule, rather than the exception, by 1990.

3. CORPORATE STRUCTURE

Until the late 1970s, the corporate structure of hospitals had been simple in design and stable over the years. Because most hospitals operated as single entity organizations, including those in religiously sponsored systems, a basic corporate structure served its purpose well.

It was not until the burdens of regulated payment systems were felt that hospital executives began to look upon new corporate structures as strategic vehicles. Multihospital systems were among the first to emerge because they offered a way of sharing expertise and services. The need to increase philanthropic support and to protect these funds gave rise to separate foundations within the corporate structure. In recent years, many institutions have begun to restructure extensively as the potential benefits of vertical integration and diversification in the coming competitive environment began to surface.

The next decade will witness a proliferation of new corporate designs as providers maneuver for position in a highly competitive marketplace filled with increased risks. Greater consolidation of hospitals will occur as multihospital systems expand through acquisitions and mergers. Nonhospital providers will invade the hospital marketplace and hospitals will respond by expanding their own production lines. Hospitals also will offer new and traditional services at locations away from their main campuses and convenient to the patient. In doing so, many will find that their existing corporate structures do not meet their needs and will form holding companies, subsidiaries, partnerships and joint ventures. These business vehicles will enable them to reach new capital markets, quickly adapt to new laws and regulations, offer patient services in innovative ways and limit liability to their existing operations.

Investor-owned hospitals will increase 60 percent by 1995

Investor-owned hospitals will constitute 19% of the nation's hospitals by 1990 and 23% by 1995, up from 14% in 1982, according to combined responses from all panelists; executives of investor-owned facilities share this prediction for 60% total growth in this hospital sector by 1995.

Government hospitals will lose 6 percentage points of their share and constitute 29% of acute care hospitals by 1995. Not-for-profit hospitals will fall to 48% in ten years, down 3 percentage points from their 1982 position, according to the respondents.

Multihospital systems will grow significantly

The combined panels forecast that over 40% of nongovernmental hospitals will be owned, leased or controlled by multihospital systems by 1995, an increase of one-third over their 1982 position. Projections of executives of hospitals currently associated with these systems are in line with the combined panel responses, predicting a 40% market share by 1995. Much of the growth in these systems is expected in the investor-owned sector, but not-for-profit systems will be growing as well.

Mergers and acquisitions will be based on the need to protect or expand market areas and to achieve economies of scale by spreading the high costs of personnel and technology.

In addition to this growth in multihospital systems, the percentage of hospitals managed by systems will more than double by 1995, increasing to 13% from 6% in 1982, the combined panels believe. Payors see a somewhat greater increase in contract management of hospitals, predicting that 15% of the nation's hospitals will be managed by such systems in 1995.

Corporate reorganization activity will increase

Corporate and/or structural reorganizations completed in the last ten years have provided hospitals the flexibility to respond to a changing environment, according to nearly all of the panelists. They also believe hospital reorganizations have facilitated greater access to capital, increased reimbursement from cost-based payors, reduced regulatory constraints and, to a lesser degree, limited liability to certain operations within the hospital organization.

There is unanimity among responding hospital executives, trustees, and legislators and regulators on the prediction that corporate reorganization activity will increase between now and 1990, with two-thirds believing it will be a significant increase.

Business ventures will increase greatly

Many health care providers already are entering into cooperative business ventures to expand their revenue bases, protect or expand their service areas, increase their access to capital and/or enter nontraditional markets. Panelists expect this trend to accelerate during the balance of 1980s. The

most prevalent ventures will be between hospitals and physicians, in the eyes of virtually all respondents. These ventures will come in a variety of legal structures and will be formed so that the parties can acquire and operate different medically related enterprises on a joint basis.

The following is a summary of environmental characteristics that will exist in the next ten years and some of the benefits expected to be derived from cooperative business ventures.

Environmental characteristics: Declining patient census, Greater competition, Limited capital resoruces, Patient demand for convenient delivery points, Physician oversupply, and Rapidly changing regulations.

Business venture benefits: Share risks, Expand access to capital, More cost-effective patient care, Tax advantages, Expand/protect markets, Expand/diversify revenues, and Share management talent.

4. FINANCE

Lower patient census, payment limitations on government programs, new payment systems, tighter capital and outright competition add up to greater financial risks for health care providers in the years ahead. Many providers will venture into new alliances or seek new ways to generate revenue, but most will find that attention to managing costs will make the greatest difference between success and failure.

In the past, financial success has been often tied to volume increases, often aided by recruitment of new physicians. One panelist predicts, "Most business managers for hospitals and physicians have focused on maximizing revenues. They will have trouble and will probably resist change to increasing efficiency and reducing costs."

Continued financial viability is CEO's top concern

Hospital executive panelists agree that the number one management concern over the next ten years will be the continued financial viability of their institutions.

Ranked second is access to and availability of capital, and number three is their concern over decreasing inpatient census. Concerns over competition and reimbursement/payment systems are ranked fourth and fifth, respectively.

Medicare's share of health expenditures will go up 19 percent

Panelists predict that Medicare's percentage of the total U.S. expenditures for health care will increase from 16% in 1982, to 18% in 1990, and rise to 19% by 1995.

This represents a 19% total increase during the period. The aging population is the driving factor; population forecasts project that, by 1995, persons 65 + years of age will make up 13% of the population, up from 11% in 1980. The U.S. government, therefore, will continue to be the single largest purchaser of health care.

Little, if any, change is forecast in the share represented by Medicaid (11%). Other state and federal programs will drop in share slightly, from 16% in 1982 to 15% for 1990 and 1995. Private insurers and other third party payors are expected to increase their percentage of total expenditures by one percentage point to 30% through 1995. Direct patient payments will decline two percentage points by 1990 and another percentage point by 1995, dropping to 25%.

Hospitals' share of health care market will decrease

The growth experienced by hospitals in their share of total health expenditures is predicted to have peaked in 1982 at 42%. Panelists project that it will decrease to 40% in 1990 and drop to 38% by 1995, the latter share equaling that which was experienced in the late 1960s.

Nursing homes are expected to undergo the greatest percentage increase, rising from a share of 9% in 1982, to 11% in 1990 and to 13% in 1955, a 44% increase between 1982 and 1995. Physician services will remain constant at 19–20% through 1995, as will other personal services (dental, drugs, eyeglasses, etc.) which also command a 19–20% share.

Medical and hospital inflation will exceed overall CPI

The hospital and medical care components will continue to exceed the overall CPI under the new prospective payment system, according to nine out of ten respondents. Unless some form of all-payor system is implemented, cost shifting will continue because providers will not be able to cut costs sufficiently to keep within the Medicare prices, thus driving up hospital price inflation.

Greater competition for capital anticipated

Competition for capital will be a key financial issue facing hospitals in the next ten years. The need to finance the federal deficit and investors' likely tendency to shy away from hospital securities (debt and equity) until the full effects of prospective payment can be evaluated are two prominent reasons driving up the cost of money to hospitals.

Panelists, however, do not see significant shifts through 1995 in the percentage of hospital capital provided by the current sources. What will change are the ways in which hospitals will compete for capital. Providers and their investment bankers and financial consultants will develop creative investment strategies and vehicles.

More nonhospital providers will compete for capital

The anticipated increase in the number of nonhospital health care providers will mean more competition for capital. Outpatient diagnostic centers, surgicenters, urgicenters, birthing centers and other such facilities will require start-up capital. Panelists rank the following capital sources as the ones most likely to provide these funds:

(1) Individual investors, (2) Loans from banks and insurance companies, (3) Public sale of debt and equity securities, (4) Venture capitalists, (5) Tax exempt financing, and (6) Advances from hospitals.

Hospitalization will decrease

Annual admissions to acute care hospitals will decrease from 170 per thousand population in 1982 to 165 in 1990 and to 160 in 1995, the panelists believe. They also envision average lengths of stay at these facilities to drop from the 1982 level of 7.6 days to 7.0 in 1990 and to 6.5 days five years later. The combined effect of these reductions will mean a 20% decrease in hospital patient days per 1,000 population between 1982 and 1995. With the U.S. population expected to grow less than 12% during the same period, the net result would be an absolute decrease in hospitalization in the next ten years.

Outpatient services will expand substantially

In 1982, outpatient revenues comprised 13% of total hospital patient care revenue. The panelists predict that, by 1990, they will constitute 20% and will grow to 25% of patient revenues by 1995. The physician panel projects an even greater trend in th direction, forecasting 22% by 1990 and 29 five years later. Conversely, legislators a regulators see less movement in this are projecting that this revenue source will ri to 17% in the next five years and to 21% 1995.

Panelists expect hospitals to expand a bulatory services to counter the intrusion new providers in this traditional hospit market. Other forces affecting the tren toward ambulatory care will be changes the payment system and technology th allows more patient conditions to be treate on an ambulatory basis.

Some new technologies expected to recove costs

Over three-fourths of the respondents b lieve health care providers can recover th cost of acquiring equipment and renderin patient care through the use of ultrasoun lasers, CT scanners, and drug therapy a immunization. Over half believe that ang oplasty and magnetic resonance imaging a procedures which can recover their cos through utilization. Less than one-third the panelists, however, believe that genet engineering can recover its costs while eve fewer (approximately one-fourth) feel tha organ transplantation and artificial orga implantation can recover their underlyin costs through patient revenues.

Productivity is a key to hospital financial success

Improved productivity is seen as a ke strategy for countering the negative effect that many of the changes discussed thus fa will have on the hospital's bottom line. Im provements in operating revenues will be in creasingly difficult to effect through eithe volume or price increases. Attention to cost will be imperative. Because well over half o typical hospital's costs are related to person nel, productivity improvements hold th most potential for substantially affectin operating expenses.

The panelists believe that the areas o most promise for improving productivity are: compensation tied to productivity, im proved productivity measurement and moni toring, and improved automated informa tion systems.

Ambulatory care will be more profitable

The study participants expect that inpa tient and emergency room services will b less profitable for hospitals in 1990 than they are today. With the changes in pay ment incentives, panelists envision ambula tory services, including home care, hospice care and outpatients surgery, as well as ex tended care, physical therapy and rehabili tation, to become more profitable.

Multihospital systems will show greater profits

Eighty-five percent of the respondents expect investor-owned multihospital systems to be more profitable in 1990 than they are today. Not-for-profit systems also will be more profitable, according to 79% of the panelists.

Panelists are not as decisive regarding the trend in profitability of free-standing investor-owned facilities, with 23% forecasting increased profits, 23% predicting no change and 54% believing there will be a decrease in their profitability.

Free-standing not-for-profit hospitals represent the group in greatest danger of falling profits, according to the forecasts of 86% of the panelists.

Hospital financial failures will increase

Financial failures among hospitals in the next decade will be most prevalent among small free-standing institutions.

Not-for-profit hospitals under 50 beds are expected to experience the greatest increase in failures, according to 89% of the panel. Those with between 50 and 200 beds also will experience increased failures, say 72% of the respondents. Likewise, increased failures by free-standing investor-owned facilities with less than 50 beds are predicted by 69% of the panelists.

The participants see the hospitals best positioned for survival as those over 200 beds and associated with systems; for those in investor-owned systems, increased failures are predicted by only 6% of the panelists, and for those associated with not-for-profit systems, only 10% see increased failures.●

ARMY AIRCRAFT READINESS

● Mr. GOLDWATER. Mr. President, appearing in the Armed Forces Journal for October is a report on Army aircraft readiness that, once again, puts the lie to those people who stoutly maintain that our Armed Forces are not ready for anything. I ask that the report be printed in the RECORD.

The report follows.

ARMY AIRCRAFT READINESS

[October 1980 vs April 1984; in percent]

	AH–1		CH–47		UH–1H		UH–60		Total helicopters (worldwide)	
	October 1980	April 1984	October 1980	April 1984	October 1980	April 1984	October 1980	April 1984	October 1980	April 1984
Not mission-capable (supply)	8.0	7.0	10	8.0	6.0	6.0	15.0	6.0	8.0	6.0
Not mission-capable (maintenance)	19.0	14.0	27	27.0	21.0	19.0	13.0	11.0	20.0	18.0
Mission-capable	73.0	79.0	63	65.0	73.0	75.0	72.0	83.0	72.0	76.0
Fully mission-capable	64.0	73.0	58	59.0	62.0	72.0	71.0	80.0	64.0	72.0
Average flying hours	10.3	9.6	12	10.2	19.1	16.8	26.1	12.6	15.5	13.8

Note.—The data illustrated above seem to verify the Army's contention that aircraft readiness has improved on the whole since the Reagan administration took office. Fully-mission-capable helicopter rates worldwide improved by 8 percent since October 1980, for instance, while not-mission-capable (supplies and maintenance) helicopter rates decreased by 2 percent. The Army tells AFJ that no single factor contributed to the improved rate, but that it was a combination of improved maintenance, increased parts, and reduced flying hours.●

RHODE ISLAND'S MINORITY SMALL BUSINESS PERSON

● Mr. PELL. Mr. President, I would like to salute an outstanding citizen of my State, Ms. Barbara L. DuBois, who has been selected as "Minority Small Business Person of the Year" by the Small Business Administration's Providence district office.

Ms. DuBois is chief operating and chief executive officer of Barbara's Office Products, Inc., a company she founded in August 1977 with the assistance of SBA financing guarantees. The company has grown and flourished and is now fully competitive in its field, with a professional staff and a loyal list of customers.

Barbara's Office Products is notable for its commitment to expanding the role of women in business. Six of the seven-person staff are women, and a concerted effort is made to patronize other businesses owned and operated by women. Female high school students are brought into the company for business training during the summer months, and Ms. DuBois also counsels female accounting majors at Bryant College.

Ms. DuBois is prominent in community affairs, serving on the Board of Directors of the Greater Providence Chamber of Commerce, on the Board of Governors of the Rhode Island Urban Project, and as president of WTP Inc., a community development organization. She has also served as a commissioner of the Providence Human Relations Commission.

Ms. DuBois studied at Ohio State University and Temple University, majoring in business administration and accounting. She is a licensed real estate broker, a notary public and a certified scuba diver.

She was invited to sit on the White House Advisory Committee on Small Business chaired by Mrs. Rosalyn Carter, and she was nominated by the Greater Providence Chamber of Commerce for the SBA's 1984 Women in Business Advocacy Award. Her designation as the Providence district's "Minority Small Business Person of the Year" is being made in conjunction with the observance of Minority Enterprise Development Week October 7 through 13.

Mr. President, Barbara DuBois exemplifies the vitality and commitment that underlies the strength of small businesses everywhere and of our national economy as a whole. I congratulate her for the recognition which she has won so deservedly and wish her well in her endeavors.●

ENHANCEMENT OF MILITARY CAPABILITIES

● Mr. GOLDWATER. Mr. President, during the last convention of the Air Force Association, it was the pleasure of all of us attending to hear an exceptionally interesting address by Dr. G.A. Keyworth, Science Adviser to the President and Director of the Office of Science and Technology Policy, Executive Office of the President.

I ask that this interesting discussion be printed in the RECORD.

The discussion follows.

REMARKS OF DR. G.A. KEYWORTH II

"TODAY'S BIG STICK: TECHNOLOGY"

Those of you who have heard me speak at other Air Force Association events know that I'm a strong, even perhaps abrasive, proponent of the value of using technology to enhance our military capabilities. Specifically, I'm firmly convinced that the strongest lever the United States can use in assuring its national security is to take full advantage of our tremendous scientific and technical capabilities. And I would add that I do generally find a strongly positive reaction to that idea when I meet with this organization.

Today I'd like to explore the impacts of technology on national security in a fairly broad sense—you might say even in a philosophical sense. And rather than discuss, as I have before, the payoffs of new technology in specific weapons systems, I want to look instead at the impact that a wise use of technology can have on what may be people's most fundamental concerns—nuclear stability.

Now, frankly, I find it puzzling that with all the public attention given to concern over nuclear stability, almost all the attention is focused on strategic nuclear arms—and very little on tactical nuclear weapons. I find that surprising, because the challenges to long-term nuclear stability decidedly include both kinds of nuclear weapons—strategic and tactical. In fact, the reluctance to face up to the full impact of this situation sometimes extends to what I consider to be alarming extremes.

Sometimes, when people are discussing tactical nuclear weapons, we hear them say there's little real difference between a small nuclear explosive and a large conventional one. Well, I worked in nuclear weapons research for many years, and I don't believe that for a minute. Nuclear weapons are a different class of animal, and crossing the line between conventional and nuclear is probably the most dangerous step I can imagine in a battlefield scenario. They call that boundary the nuclear threshold for very good reason, because once crossed it becomes very difficult to control the escalation toward the use of more and larger nuclear weapons.

But tactical nuclear weapons have one undeniable attribute: They're an effective and economical way to counter the massive Soviet and Warsaw Pact deployments of men and machines. For the West, those tactical nuclear weapons are a way to have the

defensive strength of mobilization without really mobilizing. The question we have to ask ourselves is whether we're willing to accept the inherent instability of that situation.

My own answer is that we shouldn't be. The presence—or even worse, the reliance—on those weapons creates an unacceptably low-nuclear threshold. I recently had a conversation with General Rogers, the Supreme Allied Commander in Europe, in which he pointed out the difference between tactical nuclear weapons as deterrents and as actual war-fighting tools. As deterrents they're very effective—and to an intelligent adversary they loom very large. But the history of the world reminds us that it's not necessarily expected events and rational people who start wars—and that's the unpredictable factor that could lead to a resort of ultimate weapons.

Well, we do have a choice, a choice and can make well in advance of a crisis. That choice is to take the high road, to use our technology to develop far more effective conventional tactical weapons—weapons to displace the need for nuclear weapons and, consequently, start raising that nuclear threshold.

Let me call in some higher authority to back me up on this statement. In a speech last year the President addressed this same issue when he said, and I quote:

". . . we must take steps to reduce the risk of a conventional military conflict escalating to nuclear war by improving our nonnuclear capabilities. America does possess—now—the technologies to attain very significant improvements in the effectiveness of our conventional nonnuclear forces. Proceeding boldly with these new technologies, we can significantly reduce any incentive that the Soviet Union may have to threaten attack against the United States or its allies."

If you encounter anyone who still wonders how strongly committed President Reagan is to developing and taking advantage of technology in improving our national security, you can refer them to that statement. And I'll let you in on something else. That strong support for the use of technology to enhance our conventional forces was a key part of the President's famous 1983 "Star Wars" speech—a speech that in fact laid out an often-overlooked broad vision about national security.

The President's position is that conventional weapons are a key to the transition away from dependence on those tactical nuclear weapons deployed in the field near potential battlegrounds. That position reflects the many ways in which technology enables us to exchange our current dependence on the brute force of nuclear munitions for the surgical precision of super-smart conventional munitions.

But moving in this direction really involves two different debates—and both involve money. I said earlier that tactical nuclear weapons were economical. Such a statement provokes expressions of disbelief from many people who assume, because nuclear weapons seem to get the most attention in the press, that the high cost of defense can be attributed to them. But as most of you know, the persistence of tactical nuclear weapons in the NATO alliance stems from their low-cost relative to the two alternatives. One alternative is to match the Soviets in terms of men and machines—which would mean for the Western nations to go on the kind of quasi-war footing that characterizes totalitarian countries. In today's world that's highly unlikely.

The other alternative is to spend the money necessary to gain the kind of leverage that technology can give. Frankly, the costs of incorporating revolutionary technological advances into weapons systems cannot be ignored. There's no free lunch in this department, but there are tremendous payoffs in terms of the security of the free world—security both against the threat of physical incursion across borders and against the grave fear that a relatively small argument could grow to deadly proportions.

The challenge before us is to convert the free world's remarkable scientific and industrial strengths into a meaningful military capability. This is obviously a major task, because an enhanced technological capability has to be well enough integrated into the military structure to permit displacement of our present dependence on those nuclear weapons.

That's a big and intimidating transition. The only way we can get to that point is through a coordinated effort. It's not enough for the people in the lab to come up with a great idea. Just as the military will have to rethink their missions, the scientists and engineers in industry will have to show they can provide the military with the kind of operational flexibility and reliability that high-tech systems all-too-often fail to deliver. But in many ways these are the kinds of steps that our industrial scientists and engineers are taking today in their competition with the Japanese in the commercial marketplace. The battlefield requires the same ingenuity—both to avoid a resort to armed confrontation with an adversary in the first place, or to be successful in the unavoidable situation where conflict occurs.

The potential is there, no question about it. Our industrial and military R&D programs already offer a host of new technologies and opportunities. These include, but aren't limited to, stealth technology, precision munitions, advanced radars, improved reconnaissance, and advances in fundamental technologies such as data processing, new materials, and communications.

The primary reason that the Soviets have been able to build their immense—and increasingly modern—military force has been because of their doggedness in making incremental and steady improvements in their weapons systems. But the West has an overwhelming advantage over the Soviets in its industrial and technical base, as well as in the free enterprise system that fuels it. If we could link that resource with the kind of resolve and steady effort the Soviets manage to sustain, I think it would be no contest—just as there's no contest in the industrial arena.

Now it's an interesting, almost pathological, phenomenon that although almost everyone is enthusiastic about using technology to reduce reliance on tactical nuclear weapons, many of those same people run in the other direction if it's suggested that we can use technology to reduce our reliance on strategic nuclear weapons.

The reason, I think, for this reaction has little to do with technology, but a lot to do with a kind of theology—that is, a set of beliefs that have become deeply ingrained and resistant to questioning. The real challenge today is to step back from that dogma and become more willing to rethink the role of strategic nuclear arms in assuring national security—and to explore unconventional actions that offer new hope for a peaceful future.

I'm going to ask your indulgence to present a brief chronology about nuclear arms, because it helps to understand how that theology developed.

For most of the past 40 years the world has seen a steady buildup of nuclear arsenals. In that buildup the United States retained a significant military advantage for many years, some think until the late 1960s. But since the early 1970s there's been essential parity between the Soviet Union and us in terms of the technologies of strategic systems, though each country has chosen quite different mixes of weapons to deploy. In any case, for the past twenty years we've both been basing our national securities on the threat of massive nuclear retaliation if the other side should attack first. There are many who conclude that for all practical purposes we've entered a kind of suicide pact to which most people in the world, willing or not, are signatories.

But there still remains a sizable body of public opinion that asserts that this mutual standoff provides a high degree of protection. People who subscribe to that belief view with great suspicion any proposals that threaten to alter the relative balances of weapons. They point out that balanced offensive forces, even though they've grown immensely over the years, have maintained the nuclear peace. In truth, the history of the modern nuclear arms race has, ironically, been a peaceful history.

However, there are compelling reasons that warn us not to live in the past. History consists of epochs, and the convergence of several independent trends at some point can suddenly transform history's course. I have little confidence in the view that what has worked so far will continue to work into the future, because that view ignores those converging trends. In reality, each year more people are sensing that the stability of this standoff is diminishing and that sooner or later we'll have to move to some other means of self-protection.

I really do believe there's an inevitability about this transition. To me the question is not if but when we're going to modify the current posture—which the President has likened to two people holding pistols at each others' heads. Somewhere on our path there's a crossroad. Maybe 1984 is the year we turn off, maybe later. But I'm sure we will in time.

Let me offer some reasons why I think we're near a major shift in the way we think about strategic nuclear weapons. First, we're coming to see that our continuing difficulties over the decades in achieving meaningful arms reductions don't stem from lack of effort or from lack of desire to succeed. The fact is that the central stumbling block is the difficulty of coming up with a formula that suits both sides. Everyone—Soviets, Americans, Democrats, and Republicans—wants to reduce stockpiles of strategic arms. But I think most people have grown weary and suspicious of the naive assertion that if we really wanted to reduce arms we could simply sit down at the table and do so. People are beginning to realize that there are fundamental problems to overcome on the path to successful negotiations—problems that are rooted in the differing military objectives that each side has for its nuclear forces. So there's an increasing public awareness that we need some bold departure from the past several decades to break out of that arms control stalemate.

A second reason that the future won't simply be an extension of the past is the relentless march of technology. Our nuclear deterrent—by which I mean our threat of massive retaliation should the Soviets

ttack us first—is effective only if it remains argely invulnerable to that first strike. Fifeen years ago our triad of deterrents—airplanes, land-based ballistic missiles, and submarine-based ballistic missiles—provided us with triple insurance against a pre-emptive ttack. Each could deliver a crippling retalitory blow.

That was fifteen years ago. Today the Soviet Union has concentrated its nuclear firepower in a massive, modern ICBM force hat's optimized for use in a pre-emptive trike against us. In fact, if we were struck without warning by a Soviet pre-emptive ttack it's possible that 90 percent of our own ICBMs would be destroyed, that most, f not all, or our bombers would be gone, and that more than half of our strategic submarine fleet would be sunk in port. That means that today, under worst-case circumstances, we already rely to an inordinate degree on a single arm of that deterrent triad—the ability of our remaining submarines to stay hidden at sea.

It was new technology that compromised our formerly secure ICBMs and bombers. And who's to say how many more years it will take to compromise submarines as well? I'm not saying we have a problem with submarines today, but I'm describing a consistent trend away from the stability of invulnerable nuclear deterrents and towards an instability that confers increasing advantage on the side that strikes first. So that's another important factor that's forcing us to reconsider traditional strategy.

The third reason I think change will occur is the other side of that technology coin. Forty years ago technology, in the form of the nuclear explosive, completely rewrote the book on strategic war. Today, after four decades of post-war scientific and technological upheavals, it appears that we have the possibility of bringing about similarly farreaching changes in how we view national and world security.

The reason is not so profound. After all, notwithstanding the technical brilliance that they embody, nuclear weapons are the world's best example of the brute force approach to war—and to preventing war. But modern technologies point toward the day when we can achieve comparable strategic and tactical military objectives using nonnuclear weapons. Is it possible, then, that just as new technology put us on the nuclear treadmill two generations ago, newer technology can get us off that treadmill in the future? Or is there an inevitability to our current course, one that will resist all attempts to change direction?

I, for one, believe that the option to change from today's massive nuclear standoff is not only possible, not only inevitable, but that it is already being offered to us.

Obviously that statement needs some substantiation. Because of the constraints on our time, I can't go into great detail here, but let me try to outline my rationale.

When the President took office nearly four years ago he inherited a situation in which the Soviet Union had made startling military progress through the 1970's—far more than we had. First of all, they had produced highly effective conventional weapons system—such as aircraft and air defense systems, tanks and other battlefield armaments, and surface ships and submarines. It was clear that if we were ever forced into conflict, we and our allies would have our hands full.

Even worse, the seventies were a time for vast expansion and improvement in the Soviet's strategic arsenal. As I said earlier, they built and deployed a huge force of land-based ICBM's—the reason, incidentally, for NATO's decision to deploy new missiles—and they moved boldly as well into the development of new submarines. The technical ability of their land-based ICBM's to deliver warheads now virtually equals ours. But in addition, their land-based ICBM's outnumber ours by a margin of more than three-to-one. And while their submarines are still less capable than ours, they've closed that gap substantially as well.

In 1981 the President's initial response to this situation was to embark on the strategic modernization program. That was an overdue response to the near-obsolescence that overtook many of our strategic weapons during the 1970s. But the President also realized that while making up for those years of neglect was essential to restoring short-term balance and to pressuring the Soviets to take our arms reductions proposals seriously, it didn't really address the problem of long-term strategic stability.

Now don't misunderstand; in no way am I saying that we don't still have a strong deterrent. But Presidents, if they're true leaders, have to think about more than just today. They have to consider how their actions are going to affect the options they prepare for their successors. They have to consider the legacy they'll leave for future Presidents. It was with that perspective that Ronald Reagan addressed the Nation on March 23 of last year.

He proposed that we should re-examine our fundamental strategic doctrine. He proposed that we shouldn't tactily accept the likelihood that our different forces would become increasingly vulnerable, that we shouldn't thoughtlessly drift or blunder into a future less stable than today. In particular, he asked if emerging technologies could support a transition to a lessened dependence on offensive forces for retaliation and to an increased dependence on defensive measures.

Let me emphasize this point—the President has essentially asked that we examine the tools we'll need and the tools we can develop to affect future strategic stability. He has made no recommendation yet for deployment of defenses, and the technologies we might some day deploy will probably be considerably changed from what we have available today. But he has made it clear that our responsibility to the future is to develop the technical knowledge that will permit an intelligent assessment of future options.

Today, and for the foreseeable future, the Soviets' massive force of land-based ICBM's constitutes the most destabilizing military capability on earth. Our goal, broadly, would be a defensive system capable of stopping ballistic missiles from being successfully used against us or our allies. Under this goal, even the initial stages of an anti-ballistic missile defense could drastically reduce, if not eliminate, any ICBM first-strike capability. The reason is that a first strike, or a pre-emptive strike, is an all-or-nothing military gamble. It can't partly succeed, because unless it essentially annihilates the other side's ability to retaliate, a first strike opens the door to terrible retribution upon the attacker. So even a partial ballistic missile defense would create great uncertainty that a first strike could succeed. And no military planner would seriously contemplate a first-strike unless he had a very high confidence that his opponent would be crippled by it—that is, unable to retaliate.

For that reason, even the short-term returns from an anti-ballistic missile defense would have extremely important consequences for long-term stability. Such a defense would effectively change the strategic value of the ICBM, because it would eliminate its possible use as a first-strike weapon. That's an incredibly important step, because it's been the threat of a first strike on one side—countered by the need to have enough surviving ICMB's on the other side—that's largely driven the arms race in ballistic missiles.

Among the benefits, then, of moving toward a strategic defense system would be the far greater likelihood that we and the Soviets could at last agree on meaningful reductions in ICBM forces, the most fearsome of today's strategic weapons. So strategic defense can be an important catalyst for arms control. Strategic defense can be that bold departure from tradition that I mentioned earlier.

If we had more time I could go into greater detail on the recent technical breakthroughs that make the Strategic Defense Initiative so attractive today, as well as on the high-leverage role it could play in arms reductions. But the point I really want to make is that advanced technology offers us enormous potential for enhancing our national security, whether it's in the area of strategic or tactical weapons.

I've taken advantage of the Air Force Association's kind offer of this platform to offer this overview and to show why I think we're now in a period where great change is possible in the realm of nuclear arms. More than anything I would urge everyone to do some rethinking about how we got to our current situation and how we might break out of it. This is a good time to set aside preconceived ideas and stifle our instincts to protect ideological turf against new approaches. The Strategic Defense Initiative, as well as the extreme leverage we can gain using advanced technologies in conventional arms, are variations on the same theme. Each uses forefront technology defuse the instability of nuclear weapons. The two approaches, taken together, can finally begin to reverse decades of increasing nuclear tensions and point the way to the kind of world we want to pass along to our children.●

TECHNOLOGY AND HEALTH CARE COSTS

● Mr. BAUCUS. Mr. President, health care is one of the basic necessities of life. In recent years, we have witnessed great strides in medical technology, making possible the cure or containment of life-threatening diseases. In the United States, we have also witnessed unprecendented gains in the availability of expert health care to all, almost regardless of the ability of the patient to pay. As a result, people are living longer, healthier lives.

But these improvements in health care have come at a price. The cost of getting sick is becoming a national crisis. In fact, health care costs may be the No. 1 domestic issue during the 1980's.

In 1970, health care comprised 7.5 percent of the gross national product, and Americans paid an average of $358 a year for health care. By 1982, the Nation's medical bill was $32 billion, or 10.5 percent of the gross national

product. And each person paid on average $1,365 for health care, nearly four times the amount paid just 12 years earlier.

It is also important to recognize that high health costs at home are making it more difficult for American businesses to compete in world markets.

Federal, State, and local governments—who pay over 40 percent of the Nation's health care bill—are racking up record budget deficits to meet the soaring costs of medicare and medicaid.

In 1982 alone, Federal outlays for medicare jumped 21.5 percent. Spending on hospital care is growing much more rapidly than the income derived from Federal payroll tax revenues. The Congressional Budget Office has been projecting that the medicare trust fund would bankrupt in the early 1990's. Recently, CBO told the House Ways and Means Health Subcommittee that new estimates show that the medicare trust fund will go bankrupt in 1994.

TECHNOLOGY AND TOUGH CHOICES

There are some who say rising health care costs are the price we must pay for living longer and curing diseases. But the truth of the matter is we don't have unlimited resources. We can't continue to pay such a high price for health care.

But none of us wants to return to the "old days." We should not have to limit the access of Americans of any age or in any part of the country to quality health care. And we shouldn't limit the availability of new lifesaving technology or stop supporting research that can lead to medical breakthroughs.

But new medical technology, drugs, procedures, and devices are responsible for nearly a third of the annual increase in medicare's costs, according to a new study. This study, conducted by the Congressional Office of Technology Assessment, concludes that unless some way is found to bring about more cost-effective use of both existing and new medical technologies, medicare costs will continue to spiral out of control.

Costly examples cited in the study include the Kidney Dialysis Program, which started at about $250 million 10 years ago and now costs $1.8 billion. Also cited are coronary bypass operations. Of the approximately 50,000 performed on medicare patients in 1982, OTA estimates that 15 percent may have been of little medical value.

The findings of the OTA show that Congress needs to modify the medicare program to deal in a more flexible and sophisticated way with modern medical technology. But the challenge of that is to find ways that don't limit access of our senior citizens to affordable, high quality health care.

A recent editorial in the New York Times discussed some of the miraculous technological breakthroughs that have been achieved by American medical researchers. The development of artificial skin offers the hope of finding new ways to treat and replace failing body parts.

But every new breakthrough brings new questions of cost and access. Mr. Frank Samuel, president of the Health Industry Manufacturers Association—an association of 320 companies which manufacture medical devices and diagnostic products—addressed that problem in a letter responding to the Times editorial.

In the letter, Mr. Samuel warns that the pressures of cost control may very well cause a rationing of new ideas in health care—something that could shortchange future generations.

Mr. President, I believe Mr. Samuel has raised a very serious concern. While we must strive to reduce costs, we must not take quality for granted. If we are to avoid rationing new ideas and assure Americans the kind of care they want and deserve, we must not allow cost control to crowd out innovation. This is the nature of the challenge that faces us in the coming decade.

I ask that the editorial and the letter from Mr. Samuel appear in the RECORD.

The editorial follows:

[From the New York Times, Aug. 21, 1984]

THE FUTURE, IN A YARD OF SKIN

One day, people who need new hearts or kidneys or livers won't have to depend on risky transplants or complex machines. A laboratory will grow a new organ out of their own tissue. That's not entirely science fiction; the first step has already been taken. Skin is an organ, and can now be grown outside the body.

The new method, developed by Howard Green at the Harvard Medical School, has helped save the lives of two young boys who lost more than 95 percent of their skin from burns. Stamp-sized patches of skin taken from the armpit yielded a square yard of new skin for each boy.

Growing cells outside the body is a fine art. Only cancer cells proliferate with abandon; ordinary cells must be coaxed to multiply by guessing at the natural signals to which they respond. Skin is grown with the help of cholera toxin, which keeps a balance between skin cells in different phases of development; a related kind of mouse cell, which provides necessary growth factors, and a hormone that promotes skin growth.

Developing that recipe has taken a decade, and there's still a way to go. As yet, only the epidermis or outer layers of skin can be grown. Since the epidermis consists of simple sheets of cells, it forms easily in culture and organizes itself correctly when grafted onto the body. But the dermis beneath is a more complex structure, with blood vessels and collagen fibers, that cannot yet be grown in culture. It remains to be seen if the two boys will regenerate their own dermis, or whether the body can do without it.

Heart cells grown in the test tube will form strands of contracting muscle. But no one knows how to approach the next step, that of persuading the cells to organize themselves into proper three-dimensional form.

Dialysis machines and artificial hearts are makeshift remedies. Transplantable organs are in short supply and must be accompanied by immunosuppressive drugs. The ultimate remedy for bodily damage, once we master the signals that control living fabric, is to regrow the worn-out parts of ourselves. After all, salamanders regenerate limbs, and children sometimes grow back lost fingertips. The yards of epidermis grown in Boston are the first step into a strange realm of medicine.

[From the New York Times, Sept. 8, 1948]

ON RATIONING NEW IDEAS IN HEALTH CARE

To the EDITOR: The Times suggests that the medical world of tomorrow may be characterized by the phenomenon of actually growing new body organs—just as scientists in Boston have grown new skin for two badly burned boys ("The Future, in a Yard of Skin," editorial Aug. 21). This type of medical breakthrough has set the United States apart as a leader in the development of creative new medical technology—products that save and improve life.

But technology costs money to develop and use. And cost control is now the overwhelming influence on American hospital administrators and politicians. This environment sends the wrong signals to the manufacturers who translate today's research into tomorrow's patient care.

In effect, we may see an unfortunate form of health care rationing—rationing at the idea stage. If that happens, the journey from research laboratory to marketplace—that is, to the patient—will no longer be assured.

As we contemplate discovery of artificial skin and the prospect of growing artificial organs, we face an equally difficult challenge. We must recognize that undeniable improvements in patient care and well-being have costs. If we are unwilling to bear those costs, we are in effect denying ourselves and our families improved care.

This is not a vision of the future that any of us, as individuals, is willing to accept.

FRANK E. SAMUEL, Jr.,
President, Health Industry Manufacturers Association.

WASHINGTON.●

ADDRESS OF GEN. CHARLES A. GABRIEL TO THE AIR FORCE ASSOCIATION CONVENTION

● Mr. GOLDWATER. Mr. President, at the recent convention of the Air Force Association, the Chief of Staff of the Air Force, Gen. Charles Gabriel, gave a very interesting address which I think my colleagues would benefit by reading. Therefore, I ask that it appear at this point in my remarks.

The address follows:

GEN. CHARLES A. GABRIEL—AIR FORCE ASSOCIATION, SEPTEMBER 19, 1984

Monday evening the AFA recognized several courageous airmen. Their deeds epitomize the convention theme of global access through aerospace: General Leigh Wade in the Douglas Cruiser, H. Ross Perot, Jr., and J. Coburn in the Bell 206 Longranger, and Major John Durham and Lt. Colonel Bill Thurston in the B-52 can all be proud of

eir achievements in circumnavigating the be.

Yesterday, another pioneering airman, re- ed Air Force Colonel and ex-POW, Joe ttinger, completed the first solo trans-At- ntic balloon flight. Joe holds several cords, not the least of which is the world's ghest parachute jump, 102,800 feet. His cent flight of 84 hours and 3,558 miles is so a record.

Yesterday was also important because the S. Air Force had another birthday. uring 37 years as a separate service we ve matured into the greatest Air Force in e world. And you in this room have played major role as partners in this effort. I'm ppy to report that progress in the last w years has been especially good—morale "Sky-High", our combat readiness is uch better, and because of it we as a tion are safer. A momentum has been es- blished and we as a nation have to keep it oing. Winston Churchill told us why that is nportant. Almost forty years ago he said, I am convinced that there is nothing the oviets admire so much as strength and here's nothing for which they have less re- pect than weakness, especially military eakness." I believe Churchill's insight is as rrect today as it was in 1946.

Fortunately, the American people believe a strong national defense. And thanks to heir backing, the administration and Con- ress have been providing the resources to nsure continued progress toward rebuilding ur military capabilities. Improvements in eadiness, training, recruiting, and retention re continuing and accelerating.

Since 1980, we have made real progress in estoring the military balance and insuring eterrence. Deterrence is the cornerstone of American defense policy—deterrence based n nuclear capabilities both strategic and heater—and conventional capabilities trong enough to convince our enemies that ggression would be foolish.

During the 1960s and 1970s, the Soviets ncreased their capacity for nuclear attack while our ability to respond became less redible. Low defense budgets put deter- rence at risk during these years. However, we are now engaged in a concerted effort, along with our allies, to restore the strategic and theater nuclear force balance. We have seen significant results.

Two weeks ago we rolled out the first B-1B, and development of the advanced tech- nology bomber is on track.

B-52s are being modified to carry air- launched cruise missiles, and new offensive avionics have improved bombing accuracy by 50%. Better defensive avionics are also being added to increase survivability.

Tanker support for our bombers is getting much better—upgraded engines will add re- fueling capability to KC-135's, 20% to the Guard and Reserve and 50% to the active KC-135's.

Our small ICBM program is on solid foot- ing. We have also improved the accuracy of our Minuteman III's by nearly 30% through the guidance upgrade program. Our big ICBM problem area is the Peacekeeper mis- sile—the key element of the Scowcroft Com- mission's recommendations to maintain strong deterrent forces. Lack of support for Peacekeeper sends the wrong message to both adversaries and friends. Without it, we are grossly outgunned in this crucial leg of the triad—and our arms reduction negotiat- ing position is weakened.

Last December we deployed the first ground-launched cruise missiles in Great Britain and the Army began putting Per- shing II's in Germany. In March, our second GLCM base at Comiso, Italy became oper- ational, and last month we established the third base at Florennes, Belgium. NATO's deterrent has been upgraded substantially by these improvements. The dangerous the- ater imbalance in Europe that resulted from the Soviet Union's aggressive SS-20 deploy- ments is finally being redressed, thanks to strong, cohesive action by all NATO na- tions.

We and our allies have also improved our conventional capabilities, on the U.S. side we have increased the daily carrying capac- ity of our strategic airlifters by 28% since 1980—through added capacity, some modifi- cations, and increased spares. We have stretched all the C-141's, giving them 30% more lift capability. The C-5A wing mod in- creases airframe life by 30,000 hours, and two KC-10 squadrons have been activated. We have also equipped five reserve squad- rons with new C-130H's since 1980 and are now moving C-141's and C-5's into the Air Reserve forces.

Last month we rolled out the first C-23—a small intratheater airlift airplane. This system will add 30 percent more combat sor- ties in Europe by expediting parts and en- gines to the bases. All these improvements are tied together by the airlift master plan, which identifies airlift needs and tells how we can best fill them. Clearly brought home is the need for the C-17 in reaching the 66 million ton mile per day goal indentified by the congressionally mandated mobility study. Our plan will move C-17s directly into both the Active and Reserve units.

B-52G's now carry harpoon missiles. This new Air Force maritime operations capabil- ity resulted from the October 1982 Air Force-Navy Memorandum of Agreement.

Four years ago we had about 4,300 fight- ers in the total force—most of them older F-4s, A-7s and F-106s. Today, we have 4,800 fighters, and most are modern F-15s, F-16s and A-10s. We can fly 62 percent more war- time sorties in Europe and our aircrews are getting 23 percent more flying time.

Another key factor in our improved war- fighting posture has been the aggressive de- velopment and procurement of modern mu- nitions. Munitions funding has grown five- fold and bins are being filled with modern, effective munitions.

These improvements mean better trained and more combat-ready forces. New fighters using improved munitions give us a 34 per- cent increase in delivery accuracy. This was demonstrated in our most recent "shoot- out"—The gunsmoke competition. In 1981, the winner flew an A-7 and dropped bombs within 29 feet of the target. Last year an F-16 won the competition with bombs dropped within 5 feet of the target.

Even though we've been flying more and doing it more aggressively, our safety record is the best in history. Last year I told you of our unbelievably low recordsetting 2.33 rate in '82-1983's record was 1.73 accidents per 100,000 hours of flying—realistic training, not just boring holes in the sky. To date, our 1984 record is about the same as last year's. Many of you have helped us achieve this outstanding record. You are the ones designing and building our airplanes with safety, reliability and maintainability in mind.

Secretary Orr told you of our heavy com- mitment to improve readiness and sustain- ability. The Secretary also talked of how we are improving the way we buy spares. Today, I want to stress a couple of points that amplify his comments. We now have strong competition advocacy programs at all air logistics centers—more emphasis on breakout for competition, value engineering in spare parts and repair kits—along with a welcome spirit of cooperation in the con- tractor community. These efforts have al- ready produced savings of nearly $400m in costs of spare parts. We are using these sav- ings to buy more parts at the lower prices. If these trends continue, we can fill our war- time requirement years ahead of our cur- rent schedule.

In the conventional forces arena, some people are suggesting our Air Force is not as ready and capable today as it was four years ago.

Critics have focused on c-ratings in making their arguments. The problem is that c-ratings are a JCS logistic manage- ment tool and offer only a snapshot of a unit's capability against the current goals—they are not an accurate measure of capabil- ity over time. This is because we intention- ally move the goal line. Since 1980, we've ad- justed the rating system several times—by expanding the areas rated and tightening the criteria. For example, in '80 only 67 tac- tical fighter squadrons were committed to deploy and fight for a period of time—either 15 or 30 days. Today 86 squadrons are com- mitted—all of them for 30 days of combat—spare engines and critical parts are now rated—they weren't before, and as I said earlier, we're flying more—crews are more proficient, 62% more combat missions are available in Europe today as well as 28% more airlift to take us to the fight. All this build-up in capability, and the dramatic im- provements in the effectiveness of modern aircraft and munitions are not considered in the c-ratings. We in the military are at fault for not having a rating system that Con- gress and others can use to track our capa- bilities from year to year. The JCS are working on a better way to tell our story. We've got to clear up the confusion being created by the present system.

In September 1947, Tooey Spaatz became the first Air Force Chief of Staff. When he took over, he faced the challenges of an un- certain future. Today's challenges are dif- ferent from those Gen. Spaatz had to face—but we still must deal with an uncertain future. Many challenges lie ahead.

We depend on space systems for strategic warning, command, control, communica- tions and surveillance—and the Soviet threat highlights the need for a unified space command. Just as we employ our land, sea and air forces—through the unified and specified command structure—we should have a unified space command to exercise control of U.S. military space systems.

I mentioned earlier the bombers, missiles and other strategic systems—our challenge is to continue the President's strategic mod- ernization program and to stay on the path charted by the Scowcroft Commission.

As we pursue our strategic program we must continue to be aware of the changing threat, the need to be sensitive to arms re- duction negotiations and the possibility of strategic defensive systems in the future. Our sea-based strategic nuclear forces must also continue to be integrated with bomber and ICBM programs, and all forces must be supported by strategic connectivity.

Another tough challenge will be meeting increasing manpower needs for the Active and Air Reserve Forces. Declining youth population, increased mission demands, and increased competition for available man- power from a robust economy require that we develop a comprehensive manpower plan

for the future. The plan will have to look at all aspects of the recruiting and retention picture, as well as innovative approaches to reduce manpower requirements, such as better designed, more reliable and maintainable weapons systems.

In the past, the key factors in our acquisition process have been cost, schedule and performance. This week Secretary Orr and I signed a policy statement directing that supportability be the fourth leg under the acquisition stool. Improved reliability and maintainability is a vital part of the solution. The Air Force has 490,000 enlisted people today. About one out of every three works in aircraft maintenance. Let me compare some weapons systems in terms of maintenance man hours per flying hour and highlight the importance of improvements we are making in reliability and maintainability.

The F-16 requires about ½ the maintenance manhours per flying hour as the older F-4—and the F-15 requires ⅓ less than the F-4. The C-17 will require about a third that of the C-5A. The B-1B will require 25 percent fewer than the B-52. The reduced workloads translate directly into manpower and cost savings.

We will have to look for new opportunities to increase the Guard and Reserve Force contribution to the total force—as we are doing with strategic airlift C-141's and C-5's in the Reserve Forces. We are pursuing more host nation support, and increasing the use of civilians and outside contracting. This is a big undertaking, but we'll be hard pressed to man the force unless we can manage these and other manpower efficiencies.

Almost 20 years ago, Gen. John McConnell and Army Chief of Staff Harold Johnson signed a landmark MOU for closer Army-Air Force cooperation. It assigned fixed wing aircraft missions to the Air Force and rotary wing to the Army. In May, Gen. John Wickham and I, working with that same spirit, put together a team of our brightest, most objective experts—they started out with a blank sheet of paper, looked at the jobs we had to do in the combat environment, and identified areas where we had duplication and voids. From this list, we identified 31 initiatives. Some commit the Air Force and Army to terminate programs where the need can be filled by other programs. For example, the Air Force has canceled development of its ground-based electronic warfare system, COMFY challenge, because the Army is developing a system that can do that for us. The Army has terminated its program for an airborne radar jamming system—the Air Force will provide this support.

We are also institutionalizing cross-service participation in the development of our annual budgets. Service programmers are actively taking part in the other service's review process. For closer cooperation in areas of mutual interest 7 Army staff officers have been assigned exchange duty to the air staff, while 7 Air Force officers work on the Army staff.

There is still a lot to do. Former Secretary of State Henry Kissinger was once asked how difficult it was to make foreign policy decisions. He answered that making the decisions was nothing compared to getting them implemented. Some of our initiatives are already being implemented. The best example is the recently signed memorandum of agreement to develop the C-18 as the single platform for the joint surveillance and target attack radar system—JSTARS. We will now have a common radar and a common platform. A more controversial initiative that has met some resistance is the proposal to transfer our rotary wing special operations force mission to the Army. Here's the way I see it. The Army operates more than 8,000 helicopters and their troops conduct special operations. The Air Force has only 9 PAVE low helicopters capable of supporting the full range of special operations. This adds up to an Army mission.

As we go along, we will thoroughly monitor each initiative—we're not going to do anything dumb—before we transfer missions the gaining service will be fully prepared and combat ready. But I can assure everyone here that John Wickham and I are committed to the fullest implementation—we won't stand for a "slow roll."

I also see possibilities for greater cooperation with the Navy. In addition to the expanded AF/Navy operations we have managed the last few years—F-15's, AWACS and tankers to extend the outer air battle, and B-52's with Harpoons—the CMO, Admiral Jim Watkins, will in the very near future tell us how the Navy might fit into our project. We are making good progress with these efforts to enhance the Nation's military posture and field the most affordable and effective combined combat capability.

Meeting these challenges—and opportunities—will take a lot of hard work and dedication—as President Reagan has said "a safer world—will not be realized simply through honorable intentions and good will—it requires a dedicated effort to support our friends and defend our interests." We have to do this: the taxpayers deserve it and the Nation's security demands it. The Air Force Association can help and we look to you for continued support.

Thank you.●

IN RECOGNITION OF ALPHA DELTA KAPPA WEEK, OCTOBER 14-20, 1984

● Mr. PELL. Mr. President, it is with great pride that I urge my colleagues to join in celebrating the recognition of Alpha Delta Kappa Week, which will be celebrated worldwide during the week of October 14-20. This special celebration marks the 37th anniversary of this distinguished international sorority for women educators. The sorority has more than 94,000 members in 1,700 local chapters throughout the United States and 8 foreign nations, including a very active chapter in my own home State of Rhode Island.

As the ranking member of the Senate Subcommittee on Education, Arts, and Humanities, I am particularly aware of the excellent objectives to which this fine organization is dedicated. They include promoting high standards of education, building a fraternal fellowship among women in the teaching profession, recognizing and honoring outstanding women educators, and supporting a series of educational and charitable projects, including college scholarship programs.

As Alpha Delta Kappa celebrates another successful year, I want to convey my best wishes for its continued success and my deep appreciation for the fine contributions its members are making to the betterment of education.●

CHEMICAL WARFARE

● Mr. GOLDWATER. Mr. President, several weeks ago, the Senate Select Committee on Intelligence was presented with some extremely uncomfortable and disturbing facts about chemical warfare, disturbing particularly as to our inability at the present time to do a lot about it.

The major thrust of this article, as you will notice in the appended chart, shows that the U.S.S.R. has 85,000 people dedicated to this subject; we have 7,000. When we get into the number of large mobile devices to reconnoiter chemical warfare, the Soviets have 20,000; we have 1,000. Looking quickly at the offensive capabilities of the U.S.S.R. versus United States, and I call attention of my colleagues to the complete inventory listed in the article, we find that in the types of agents, the Soviets have at least 12 and we have 3. So on it goes. Here is an area of our military that we are almost completely defenseless in; our public is not aware at all of the dangers or the possibilities, and our troops are not nearly sufficiently prepared for any onslaught in which the enemy, in this case, the possibility of the Soviets, would use these weapons. Don't sit back and say, "Oh, they won't do that." They are doing it. They are doing it in Afghanistan; they've done it all over the world wherever they or their allies have been engaged in offensive action.

This most interesting and informative article appears in an excellent magazine, Journal of Defense and Diplomacy, and I ask that it be printed in the RECORD.

The article follows.

LAND WAR No. 3: Chemical Warfare

(By Theodore S. Gold)

Chemical weapons are not a pleasant subject. Emotions run high, and facts become obscured. In spite of the clearly identified and widely shared goal of eliminating the threat of chemical warfare, abhorrence of this subject makes public discussion of means to achieve U.S. objectives extremely difficult. It is not sufficient to accuse the military of an irrational desire for new and more terrible weapons. They share the public's loathing of chemical warfare and desire for an effective chemical arms ban. They do not want to be threatened or attacked with chemical weapons. It is not sufficient to say "do nothing" or "wait a little longer" on the retaliatory component.

The issue is not one of being for or against chemical weapons. The issue is how best to assure that chemical weapons are not used against the men and women of the U.S. armed forces, are not used against U.S. allies and, indeed, are not used against people anywhere. The historical evidence, particularly the absence of chemical warfare in World War II, indicates that possession of a credible retaliatory capability in

conjunction with protective measures is an effective deterrent.

The United States has not produced any chemical weapons for 15 years; consequently, largely due to obsolescence of delivery means, current stocks of aging weapons have little military value today. During this same period, the Soviet Union continued to produce chemical weapons and expanded its capabilities to wage chemical warfare. Congress, in spite of the efforts and recommendations of the House Armed Services Subcommittee on Procurement and Military Nuclear Systems, did not provide the funds requested the past two years to reestablish an effective retaliatory capability.

The U.S. lack of such a capability today is increasingly dangerous. It would allow Soviet forces to operate largely unencumbered by protective equipment and posture while imposing these severe restrictions of U.S. and allied forces. The effect of such one-sided use can be devastating, severely hampering U.S. ability to defend positions, resupply, treat casualties, lead troops, generate and fly air sorties, repair equipment and perform other critical wartime tasks. Thus, the current chemical weapons asymmetry can offset efforts to improve U.S. conventional forces. By negating these improvements, it will increase U.S. reliance on threatening a nuclear response to deter nonnuclear conflict. This is the wrong direction. I believe all Americans want to decrease, not increase, such reliance.

Finally, U.S. lack of a credible retaliatory capability provides no incentive for the Soviets to conclude a chemical arms ban. The Soviet leaders are practical men, who will not give something away for nothing. For years the United States has tried to achieve an effective chemical arms ban while unilaterally freezing production and allowing its capabilities to erode. This has not worked.

Last year the administration provided an alternative approach offering greater possibility for successfully obtaining an effective ban. This year's budget provisions for the retaliatory element of the program follows the path taken last year. The administration is not asking for monies to produce chemical weapons. It is requesting funds to prepare for production. Production could not occur without subsequent congressional approval and additional funding.

An alternative approach, in which the United States expresses its resolve by preparing for production, provides a balance between restraint and resolve and offers a sound path toward eliminating the threat of chemical warfare. It reflects the U.S. desire for an arms control solution to the chemical threat and allows an opportunity to achieve a treaty before any weapons are produced. At the same time, it provides an incentive to the Soviets to negotiate seriously, by signaling U.S. resolve to take steps necessary to emininate the current Soviet advantage. It also provides insurance to the West in case an effective treaty cannot be achieved.

The need for the United States to act to eliminate the threat of chemical warfare is unfortunately illustrated by the proliferation of chemical weapons use in the world. Militarily, proliferation underlines the need to deter chemical weapons use against the United States and its allies in areas other than NATO. Of equal importance, proliferation shows that lack of world concern and resulting lack of concerted action by the international community in response to chemical and toxin use engenders that spread of such use. The United States has demonstrated its opposition to chemical warfare by drawing worldwide attention to the use of chemical and toxin weapons in Southeast Asia and Afghanistan. Regrettably, the world is once again faced with chemical weapons use in the Iran-Iraq conflict.

The best solution to chemical weapons proliferation is a complete, worldwide ban on these weapons. The United States has shown its restraint through its 15-year unilateral freeze on chemical weapons production. However, U.S. restraint by itself has not eliminated the threat of chemical warfare. It has not brought about a chemical arms ban. It has become apparent that, by itself, U.S. restraint will not induce the Soviets to conclude a treaty, to cease their production, to destroy their weapons.

U.S. policy continues to be to seek an arms control solution to the chemical threat and, in accordance with international treaty, not to possess any biological or toxin weapons. Further, and again in accordance with international agreement, U.S. policy for many years has been to possess chemical weapons for deterrence until a complete and verifiable ban can be achieved. Finally, it is U.S. policy never to use chemical weapons first. Rather, use would be considered only if they were first used against the United States or its allies and then only in a proportionate manner for the sole purpose of discouraging further use.

The issue, therefore, is not whether to have a chemical weapons stockpile, but what kind of stockpile to have. The current stockpile of aging munitions and agent is hazardous to handle and move, and it lacks essential military capabilities. This stockpile can be replaced with one that is smaller, safer and much more militarily effective. Taking steps now to prepare for such replacement would provide necessary support for ongoing U.S. chemical arms control initiatives.

CHEMICAL ARMS CONTROL

The United States continues to be extremely active on the chemical arms control front. In February 1983, Vice President George Bush addressed the Committee on Disarmament (CD) in Geneva. He reaffirmed the U.S. commitment to a complete and verifiable chemical weapons ban and exhorted member nations to accelerate their efforts toward this goal. At that time, the United States also submitted to the CD a paper providing detailed views of the contents of a verifiable ban.

These efforts were followed with another major paper on verification of stockpile destruction during the 1983 summer session of the CD. Then in November, the United States hosted an international workshop on this subject at the Tooele Army Depot in Utah, attended by 50 delegates from 29 nations. From the Soviet bloc, only Romania participated. The highlight of this extraordinary event was the destruction of chemical munitions, along with a demonstration of the types of measures believed necessary for verification of destruction, including permanent presence of a small number of international inspectors as well as sensors and other instruments.

Finally, in January of this year, Secretary of State George Shultz announced U.S intent to submit a draft treaty at the CD in the coming months of a complete ban on chemical weapons. The Soviets have yet to match U.S. enthusiasm or initiatives for a chemical arms ban. There are, however, some recent signs of possible movement on their part. In August 1983, they indicated acceptance of the principle of international on-site inspection (albeit only for one of the several critical verification issues—stockpile destruction—and only on a quota system that the U.S. government views as inadequate). More recently, the Soviet Union has announced a willingness to consider the concept of the permanent presence of inspectors during stockpile destruction.

If these are indeed signs of Soviet seriousness to conclude a verifiable chemical arms ban, they are most welcome. Formidable obstacles and differences remain. An effective treaty not only requires verification of destruction of declared stocks but also verified destruction of declared production facilities, verification that permitted activities are not used to violate the treaty and, finally and most difficult, verification that there are no clandestine stocks or facilities. There must be a high confidence that no party to a chemical weapons ban could achieve a chemical weapons monopoly without detection.

CHEMICAL PROTECTION

Although not sufficient by itself, chemical protection is an essential element of deterrence. To reestablish a credible deterrent, the United States has made major investments in protection. U.S. efforts first concentrated on fielding a basic survival capability. This objective is nearly accomplished, although the navy is still working on its initial issue of protective suits. Efforts are now directed at reducing the problems caused by the protective equipment itself and improving U.S. ability to sustain operations in a chemical environment.

When assessing the current situation in chemical warfare programs, it is important to remember recent history. This nation intentionally deemphasized chemical warfare during most of the 1970s in the belief that the problem could be negotiated away. The research, development and acquisition base, the training and doctrinal base and the management base for the chemical program were essentially dismantled. When it was apparent that the Soviets had not shared U.S. restraint and that U.S. forces faced a threat they were unprepared to handle, it became necessary to redress the most severe deficiencies quickly. To illustrate the severity of the problem, as late as 1977, the U.S. Air Force could not launch a single combat aircraft under chemical attack conditions. Clearly, the United States could not wait the years necessary to reestablish an adequate technical and management structure before taking action. Certainly mistakes were made. However, today, U.S. forces can at least survive a chemical attack and have some, although limited, capability to fight in a chemical environment. That is an enormous improvement over the situation in the 1970s.

The administration is not satisfied with the current situation and is continuing to take steps to improve it. There are now established chemical warfare focal points in the Office of the Secretary of Defense, the Joint Chiefs of Staff, the services, the joint commands and the major subordinate service commands. There is an established DOD Chemical Weapons Steering Committee, as well as interagency groups. Objectives and guidance have been clarified for the military, and their budgets and programs have been reviewed. Several special reviews are under way on subjects such as Bigeye, the current stockpile, demilitarization and the development and acquisition process. At my request, the American Defense Preparedness Association (ADPA) sponsored a work-

ing conference in June 1983 on ways to improve chemical materiel acquisition management. The Defense Department is now working to implement its recommendations. The services have been working together and are nearing completion of a new joint service agreement on chemical research and development designed to increase cooperation and make the system more responsive. The army has undertaken a cooperative effort by their users and developers to examine ways of fielding chemical defense materiel quickly. Also, the joint logistics commanders, the four-star generals from each service reponsible for development and acquisition, are working together to find ways to improve the process. Although much remains to be done, the Defense Department is making progress in reestablishing a sound managerial, technical and doctrinal basis for chemical programs and expects these to lead to greater efficiency and military capability.

RETALIATORY PROGRAM

In the chemical weapons area, the U.S. proposals before congress differ significantly from last year's. Last year, the administration wanted to fund all the facilities needed for initial production of the 155mm binary artillery projectile, the Bigeye bomb and for initial production of 155mm artillery projectiles. This was in accordance with the normal Defense Department practice of fully funding procurement programs—particularly ammunition programs. Chemical weapons modernization has been an extremely difficult issue for several years, and last year, after intense debate, the program was authorized but not funded.

This year's authorization act, while authorizing the program, imposes a number of restrictions. It precludes stockpile growth by requiring that a serviceable artillery projectile be rendered useless for each new binary munition produced. It also emphasizes a concern for arms control by imposing delays on the execution of the program. It allows preparations for production (facilities and acquisition of munitions components), but the act specifically prohibits the final assembly of any weapons until Oct. 1, 1985. Even then, assembly cannot begin until the president certifies to congress that production remains in the national interest. The funds for the final assembly—what we call load, assemble and pack—would have had to be held until we were allowed to proceed.

The fiscal year 1984 authorization act struck a sound and effective balance between the need to redress a critical military deficiency and the desire to achieve what we all hope for—a complete, verifiable ban on these weapons. The act placed teeth in U.S. resolve by getting ready to produce and by establishing a specific time frame. On the other hand, it demonstrated restraint by delaying production and allowing time to achieve a treaty if the Soviets were to become willing.

In the 1985 retaliatory modernization program, the request for funds matches the intent of the 1984 authorization act. The government has asked only for those funds necessary to get ready to start initial production at some future time. The request includes time-sensitive munitions components and portions of the facility projects. It is an intentional deviation from the normal full-funding practice, a deviation that was the intent of the 1984 act. The request does not include funds for complete facilities or for all the component parts, nor for the load, assemble and pack of munitions. Before any munitions could be produced, congress would have to authorize and appropriate additional funds for critical component parts, the assembly process and for the remaining facilities.

The United States's most critical stockpile deficiency remains a lack of capability against targets beyond artillery range. Thus, it is faced with a situation in which the Soviets can attack, contaminate and severely degrade (or halt) operations at U.S. and allied airfields, ports, supply and maintenance centers, command and control facilities and other vital combat support and supply functions while the United States has no capability to impose similiar restrictions on them. This asymmetry can be decisive by negating current and planned U.S. conventional force improvements and thus encouraging the Soviets to employ chemical weapons. The Bigeye binary bomb is needed to redress this imbalance.

THE BIGEYE PROGRAM

The Bigeye program, from a technical standpoint, is in better shape this year. The problem that delayed the program (pressure buildup in the event the bomb could not be dropped after mixing) has been addressed and the solution (not mixing until after the bomb is dropped) demonstrated. The problem arose in the fall of 1982. The program was reviewed; at that time, the program was declared solvable, but as it was unlikely that the changes could be made and validated in time to obligate procurement funds in 1984, they were deleted from the budget request.

Based on testing to date, DOD expects that the Bigeye will perform as required and add an essential capability to U.S. chemical deterrence posture. Consequently, DOD is requesting funds for a portion of the Bigeye production facilities and for munitions components.

The retaliatory component of U.S. chemical deterrent must have both effective long- and short-range systems. Thus, in addition to the Bigeye, the administration is requesting funding for M-687 binary 155mm artillery projectile components. The M-687 is fully compatible with modern artillery pieces, has greater range than the existing items and is much easier and safer to handle throughout its life cycle.

The present inventory of artillery projectiles is inadequate in type and capability. The potentially useful portion of the stockpile consists of 155mm and 8-inch nerve agent projectiles. More than half of these are filled with the persistent agent VX, which is tactically unsuited to the U.S. Army's highly mobile, aggressive defense doctrine. Further, the 155mm shells cannot withstand the higher propellant charges used with the modern howitzers and, thus, have a shorter range than high-explosive shells or the new M-687 as it will be produced—of approximately 5 kilometers less. Also, the current stockpile of artillery projectiles was produced between 1955 and 1968. The agent itself was produced even earlier. During this long life, the agent fill has deteriorated, and it is expected to continue to do so.

CHEMICAL WARFARE PROTECTIVE CAPABILITIES U.S.-U.S.S.R.

	U.S.S.R.	United States
As of January 1, 1984:		
Number of dedicated personnel	85,000	7,000
Number of large, mobile, decon and recon devices	20,000	1,000
Individual protection	Yes	Yes

CHEMICAL WARFARE PROTECTIVE CAPABILITIES U.S.-U.S.S.R.—Continued

	U.S.S.R.	United States
Collective protection:		
Vehicles, ships	Yes	Few
Key facilities	Yes	Few
Detection and warning:		
Automatic alarms and detector kits	Yes	Yes
Reconnaissance vehicles	Yes	No
Education and training:		
Military chemical schools	4	1
Length of longest course	5 yrs	6 mos
Conducts chemical training:	Yes	Yes
Field training areas	78	0
Formal training (hrs/yr)	100–400	16–100
Use of live agents	Yes	No
GW defense exercises	Yes	Yes

CHEMICAL OFFENSIVE/RETALIATORY CAPABILITIES U.S.-U.S.S.R.

	U.S.S.R.	United States
As of January 1, 1984:		
Types of agents:		
Nerve	4	2
Blister	6	1
Blood	1	0
Incapacitant	Probable	0
Toxins	1+	0
Types of delivery systems:		
Aerial rockets	Probable	No
Tactical Rockets	Yes	No
Ballistic missiles	Yes	No
Multiple rocket launchers	Yes	No
Artillery and mortars	Yes	Yes
Spray tanks	Yes	Yes
Bulk fill tanks	Yes	Yes [1]
Cluster bombs	Yes	No
Mines	Yes	Yes
Production facilities	Many	0

[1] U.S. nonpersistent nerve only.

To help better understand the impact of deterioration, a distinguished group of experts in chemistry, metallurgy and explosives was asked to provide an assessment of the present and future physical condition of U.S. artillery projectiles. Some of these findings were reassuring (munition components appear to be in good shape today; there is no evidence of metallurgical degradation) while others were not (there is the possibility of catastrophic agent decomposition that would render the munitions almost useless by 1990, and there are concerns over flashing; i.e., agent burning during dispersal, which reduces or eliminates its effectiveness). On the key issue of the future condition of the munitions, the panel stated that there is insufficient evidence to predict reliably their condition in 1990. The experts' best estimate was that at least 50 percent of the agent, plus or minus 10 percent, should still be present by 1990. Neither the uncertainty nor the best estimate is reassuring, particularly when combined with the previously mentioned flashing and catastrophic decomposition concerns.

Additional laboratory testing and analyses are in progress that would sharpen predictive capabilities, and the panel's recommendation for field testing is being considered. On balance, the panel's findings, with the existing deficiencies of improper agent mix, inadequate range and logistical and operational safety, support the need to at least take steps to prepare to replace these rounds.

DEMILITARIZATION PROGRAM

The U.S. program also provides for the disposal of chemical munitions and agents. This is a formidable task because of agent toxicity, presence of explosives and the need

to destroy or decontaminate metal parts and other components that may have been in contact with the chemical agent. If a verifiable ban is achieved, the United States will, of course, dispose of its entire chemical stockpile. The technology is in hand to acomplish this safely. In the absence of such a ban, and independent of decisions regarding new munitions procurement, the government plans to dispose of its unserviceable and obsolete munitions. Indeed, since 1972, the United States has safely demilitarized over 7,000 tons of chemical agent in munitions or in bulk containers.

The demilitarization program continues as planned to eliminate that portion of the stockpile with potential safety risks, while performing research and development to find less expensive technology to dispose of the remainder of the stockpile. The program will first eliminate all BZ (an obsolete incapacitating agent), all rockets (obsolete and potentially hazardous combinations of munition, agent, explosive and propellant) and defective munitions. The pace of additional demilitarization will depend upon continuing safety studies, technical developments in cost reduction and progress in arms control efforts.

The development program has been successful in reducing cost estimates and continues to promise further cost reductions. Cost estimates for destroying the rockets and other obsolete munitions on Johnston Island have decreased from $575 million in October 1981 to $262 million. The overall estimates for complete demilitarization of all stocks (from 1984 on) has decreased from over $3 billion (1981) to $1.8 billion (current), with substantial further reduction expected from ongoing research and development. Finally, and perhaps most significantly, the program has begun to take an explicit and important role in supporting U.S. arms control efforts. As mentioned earlier, a major U.S. Initiative of last year was efforts on demilitarization verification highlighted by the Tooele international workshop last fall. The workshop was both a technical and diplomatic success, contributing to arms control efforts, and surely a factor in the Soviet willingness to discuss permanent onsite verification of stockpile destruction.

ALTERNATIVES?

A 15-year unilateral freeze has not brought an elimination of the chemical threat; rather, it has brought us to a dangerous situation. How do we deter chemical warfare without effective chemical weapons? How do we motivate the Soviets to negotiate away an unchallenged superiority? The administration's proposals couple an aggressive pursuit of a chemical arms ban with a restrained program to reestablish a credible retaliatory deterrent. Those who do not accept this course need to offer realistic, pragmatic alternatives.●

RESIGNATION OF DR. JOHN BYRNE AS ADMINISTRATOR OF THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

● Mr. WEICKER. Mr. President, I would like to pay tribute today to my friend and colleague, Dr. John Byrne, who is leaving his position as the Administrator of the National Oceanic and Atmospheric Administration [NOAA]. I have enjoyed working with John, who has shared my commitment to developing and protecting our Nation's oceans' resources.

I have always been a believer of this Nation's ocean potential to meet the growing needs of our economy. Recent scientific and technological advances have rapidly expanded our use of the oceans to encompass such diverse activities as oil and gas exploration and development, exploration and research with deep-sea submersible vessels, fisheries and acquaculture research and development, and increased use of satellites in our weather forecasting activities. Developing sound policies to deal with these diverse uses has been one of my highest priorities as a Member of this Senate. Dr. John Byrne, as the Administrator of NOAA, has played a key role in the development of these policies.

In the past few years the Federal budget has come under increased pressure. This pressure has been felt most acutely by the Nation's oceanic and atmospheric programs. As a member of the Senate Appropriations Subcommittee on Commerce, Justice, State, and the Judiciary, I have been particularly aware of the stresses that budget stringencies have placed on environmental research. These circumstances have resulted in difficult choices for John, and I deeply appreciate his cooperation in directing and maintaining sound oceans and atmospheric research programs within NOAA. Under the leadership of Dr. Byrne, NOAA has seen the expansion of its undersea research programs, the upgrading of atmospheric programs to enhance the Nation's ability to predict weather, and the advancement of a sound satellite program. Under his leadership we have seen improvements in fisheries and coastal management, new developments in acquaculture, and the introduction of Ocean Service Centers to distribute atmospheric and marine scientific data throughout the country.

John Byrne's new position as president of Oregon State University serves him well: he originally came to NOAA from OSU, bringing with him the scientific expertise necessary to run the agency. Oregon State is gaining a great asset, and I know that John will continue to contribute to the Nation's marine research efforts by maintaining OSU's fine tradition of marine scientific research and education. I think that it is critical for an agency such as NOAA to be directed by an individual who has expertise in the natural sciences. John's experience as a geologist, educator, and administrator gave him much of the background needed to direct NOAA. Furthermore, NOAA has a longstanding tradition of maintaining a strong liaison with educational institutions throughout the country. It has been one of the stimuli for States, territories, and the Federal Government to have education, management, and research project that provide the foundation for a sound oceans policy. I look forward to working with John in the future to further NOAA—university relations so that the broader goals of ocean scientific research can be served.

I am sure my colleagues all share my appreciation of the services John has performed in his tenure with NOAA, and join me in wishing him the best of luck in his new position.●

B-1 PROGRAM CONTINUES 2½ MONTHS AHEAD OF SCHEDULE

● Mr. GOLDWATER. Mr. President, it's very difficult to pick up a paper or to listen to any form of media where one is not told of the terrible deficiencies of our military. It's getting to be almost a joke among those of us who follow the military closely, and to keep my readers of the CONGRESSIONAL RECORD aware of these incidents, I intend, whenever it is possible, to put in refuting material.

Appearing in the magazine, Defense Systems Review, in September, is an article on the B-1 program and how it continues to stay 2½ months ahead of schedule and under cost estimates. I ask that the article be printed in the RECORD.

The article follows:

[From Defense Systems Review, September 1984]

B-1B PROGRAM CONTINUES 2½ MONTHS AHEAD OF SCHEDULE

(By Mike Mathews)

Effective management by members of a large, exceptionally talented aeronautical team is the dominant characteristic of the U.S. Air Force B-1B program. Encompassing the efforts of four major and diverse associate contractors, combined with the contributions of a network of more than 5,200 subcontractors and suppliers nationwide, the B-B1 program remains on cost and ahead of schedule in its thrid year since production go-ahead. This is a tribute to the professional competence of America's advanced technology, aerospace industry, and enlightened U.S. Air Force management.

Taking the leads in the program are Rockwell International's North American Aircraft Operations—systems contractor; General Electric—engines; The Boeing Company—offensive avionics; and Eaton's AIL Division—defensive avionics. All associate contractors are under contract to the U.S. Air Force, which directs the program through the B-1B System Program Office at Wright-Patterson Air Force Base, Ohio.

The performance of the organizations and people involved is particularly noteworthy in view of the almost unprecedented challenges of the program. Not the least of these challenges is the collective responsibility by all concerned for the strict cost and schedule management of the program. The cost of $20.5 billion in fiscal 1981 dollars for 100 aircraft has been formally certified to Congress by the President; and since the beginning of full-scale development in January 1982, Secretary of Defense Caspar Weinberger has received bi-weekly briefings from the Air Force on the overall status of the program.

In addition to the program management challenges there are significant technical challenges. The multirole B-1B is expanding the frontiers of military aircraft technology as the most advanced long range combat aircraft in the Free World.

Another key factor is that the B-1B has a rich inheritance which augments its credibility. The airplane is the direct descendant of the very successful B-1A development program.

The basic capabilities of the B-1B long range combat aircraft are: (1) survivability, (2) mission flexibility, (3) payload diversity, (4) large payload capacity, and (5) tanker-independence.

Ensuring the survivability and effectiveness of the B-1B against potential threat system—which are growing in numbers, deployment, sophistication, and effectiveness—is a major design driver. Solutions to this challenging threat environment included such requirements as:

Hardening against nuclear effects, including overpressure, gust, thermal, electromagnetic pulse (EMP), and transient radiation effects on electonics (TREE).

Self-sufficiency, including self-test capability, speed and ease of refueling, rapid replacement of expendables, auxiliary power units, and a high flotation landing gear system.

Rapid alert reaction and base escape, provided by quick engine start, short takeoff distance, fast acceleration, a high-lift aerodynamic configuration, and reduced navigation system alignment time required.

High speed, low altitude terrain following/terrain avoidance (TF/TA) penetration (with "soft-ride" capability to alleviate crew fatigue).

A high degree of penetrativity assured by low observables and the most sophisticated electronic countermeasures suite ever installed in any aircraft.

Accurate enroute navigation and weapon delivery systems.

Damage tolerant/durable structure, tested and verified utilizing fracture mechanics technology, to assure a 30-year operational lifetime.

The basic penetration mission, at low altitude, dictated variable sweep wings. The B-1B wings sweep from 15 degrees in the full forward position to 67.5 degrees in the full aft position for best performance through the envelope of all speed and altitude conditions. Forward-position sweep produces the high aerodynamic lift required for short takeoff and landing, loiter, best cruise conditions, and aerial refueling.

Conversely, aft wing sweep is required for high speed-low altitude penetration, supersonic high altitude flight, minimized frontal area and drag, sensitivity to gusts, and reduced radar cross section. Design trade studies were performed to optimize wing pivot location. An inboard pivot increases pivot loads (and weight), but total wetted area and frontal area are reduced. While the swing-wing design for the B-1B increases complexity, the penalties are offset by reduced structural weight.

Before termination of the original B-1A production program, the design challenge was met in providing the B-1 with significant improvements over the B-52. This included half again the sea-level penetrating speed, up to twice the payload, and comparable range.

In the current program, because of design enhancements and the advance of technology, the B-1B is significantly improved over the B-1A:

In range—The B-1B allowable gross takeoff weight has been increased from 395,000 pounds to 477,000 pounds. This translates into added payload and fuel-carrying capacity, which gives the airplane intercontinental, multi-mission performance capability without the need for refueling.

For weapons-carrying versatility—The B-1B has three weapon bays, but a movable bulkhead has been designed between the two forward bays, which permits longer advanced weapons, such as the air-launched cruise missile, to be carried internally.

In reduced radar cross section—The B-1A radar signature is 10 times smaller than that of the B-52. The B-1B signature is more than 10 times smaller than that of the B-1A—or 100 times smaller than the B-52.

In improved offensive and defensive avionic systems—The interim between the 1977 termination of the B-1A production program and the 1982 start of the B-1B, Boeing, and Eaton have expanded and improved the aircraft's avionic systems capabilities. Though most of these capabilities are classified, they are designed to insure the B-1B's ability to penetrate sophisticated defenses anywhere in the world for many years to come.

In improved engines—General Electric's F101-GE-102 turbofan powerplants for the B-1B have significant versatility, durability, and reliability advantages over the F101's GE-100 engines that were manufactured for the B-1A. The new engines include a simplified exhaust nozzle with fewer parts, and a neutral airframe system, so that the engines can be installed in any of the four nacelle bays. In the B-1A, two sets of engines were designed to be used only on either the left or right-hand side of the airplane, which would have been an undesirable operational feature.

In mission versatility—the B-1A was optimized for low-level penetration capability; the B-1B is a true multi-mission aircraft. Its low-level capability remains the same, but it is designed to perform a wide range of conventional, nuclear, and standoff cruise missile missions.

The challenges of B-1 production are being met through the close cooperation and coordinated effort of the program's team members located throughout the nation.

From the beginning, and with USAF concurrence, agreement was reached among Rockwell, General Electric, Boeing and Eaton to work to an accelerated schedule that has put the program approximately two and a half months ahead of the contractual schedule with the Air Force. The program is currently running ahead of this enhanced schedule.

The experience of the original four-aircraft B-1A program has given impetus to the B-1B effort. For Rockwell International and the B-1B industry team this has resulted in outstanding progress on all fronts since the production go-ahead on January 20, 1982.

Only hours after the contract was signed, virtually all of Rockwell's major subcontractors were turned on to production effort. Tooling and approximately two and a half shipsets of material were taken out of storage and put into work. Stored numerical machining tapes were reemployed, permitting the first B-1B machined part to be produced and inspected only 10 days after production began.

Significant accomplishments on the program at Rockwell include:

Manpower. Approximately 17,000 Rockwell employees have been hired at the four principal sites where B-1B work is being performed—El Segundo, California (Program management, administration, engineering, and detail parts fabrication); Columbus, Ohio (forward intermediate fuselage, wing carry-through structure, and engine nacelles fabrication); Tusla, Oklahoma (composite structures); and Palmdale, California (forward fuselage fabrication and final assembly operations).

Facilities. More than seven million square feet of facilities are dedicated to B-1B production at the North American Aircraft Operations. This includes construction of an $83 million, one-million-square foot aircraft final assembly complex at Palmdale.

Equipment. Of the more than $400 million in capital investments Rockwell has committed to the B-1B program, more than $40 million was used to order 22 five-axis, Cincinnati Milacron profilers now in operation in the El Segundo and Columbus heavy machining centers. Other equipment additions include automatic riviting machines, tube bending machines, CAD/CAM capability expansion, and establishment of extensive avionics facilities at Lakewood, California.

Flight testing. Employing the No. 2 G-1A prototype that was modified with the B-1B flight control system, the B-1B flight test program got underway ahead of schedule in March 1983 at the Air Force Flight Test Center, Edwards Air Force Base. A second B-1A prototype, the No. 4 aircraft, is outfitted with the advanced offensive and defensive avionics components from Boeing and Eaton and began flight tests in July 1984.

Cost and Schedule. Outstanding performance in both cost and schedule by all four associate contractors has marked the program's progress from the beginning. The first B-1B was completed at Rockwell's aircraft assembly plant at Palmdale. The first set of production engines plus two spares were available at the final assembly site. Despite the crash of a B-1A bomber a week earlier, rollout and first flight was accomplished on schedule early in September.

When the B-1B enters the flight test program at Edwards Air Force Base the aircraft will be well on its way to demonstrating that the program's design challenges have been met through the outstanding performance of the U.S. Air Force and team members at all levels of effort. It will be well on its way to demonstrating that as an advanced technology aircraft it is ready to accept the challenging role as a mainline Triad weapon system replacing the venerable B-52 for the Strategic Air Command during the rest of this century and beyond.●

QUORUM CALL

Mr. MATHIAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for

the transaction of routine morning business be extended until 9 p.m., under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

TARIFF TREATMENT OF CERTAIN ARTICLES—CONFERENCE REPORT

Mr. BAKER Mr. President, I submit a report of the committee of conference on H.R. 3398 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3398) to change the tariff treatment with respect to certain articles, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 5, 1984.)

Mr. DOLE. Mr. President, the agreement of the conferees on the trade bill, H.R. 3398, represents a remarkable achievement. The conferees faced substantial editorial opposition, threats of Presidential veto, strong expressions of opposition from many domestic groups and foreign governments, and extreme time pressure. Despite significant differences among the conferees on many issues, the result of 2 days of hard bargaining is a good bill by almost everyone's standards.

MISCELLANEOUS TARIFF AMENDMENTS

Titles I and II of H.R. 3398 contain 95 miscellaneous tariff and customs matters of importance to a great many Senators, as well as a few related matters; almost all of these are duty reductions and suspensions that will make many U.S. firms more highly competitive. While I would prefer for the President to negotiate these reductions in return for concessions from the beneficiary countries, the President has had no authority to do so, and I am satisfied that these measures benefit the U.S. economy.

RECIPROCITY

Title III of the bill contains the International Trade and Investment Act, a matter that Senators DANFORTH and BENTSEN have worked on for 2 years now to refine and to improve. The act contains several changes to title III of the 1974 Trade Act that will strengthen the hand of the President in responding to foreign unfair trade practices and in his efforts to seek to reduce barriers to U.S. services trade. Over half of the Members of the Senate cosponsored this act; it is now time that we bring it to fruition.

U.S.-ISRAEL TRADE

Title IV of the bill contains authority for which I am especially pleased—the authorization for the President to negotiate a free-trade area with Israel. This proposal, initiated by Israel, holds great opportunities for U.S. exporters, and has been the subject of discussions between our two governments for several months now. With the passage of this bill, final negotiations may be completed quickly.

I must emphasize that this bill simply authorizes the President to negotiate an agreement with Israel within the existing framework of U.S. trade negotiating objectives, although he now will be enabled to address tariff as well as nontariff barriers; compliance with the requirements of the Trade Act of 1974 requires the President to submit the agreement for expedited consideration by the Congress. In this regard, the House bill simply would have allowed the President to proclaim the tariff reductions without further congressional review. I am pleased that the Senate position on final approval prevailed, given the strong sensitivity of many domestic groups to the proposed arrangement.

Although we compromised by agreeing to waive the period of prior notice and review that normally applies to such agreements, the bottom line is that the Congress will have final say over approval of the agreement. We have Ambassador Brock's commitment for full consultations with the Congress prior to submission of the implementing bill despite this waiver, and I am confident that we can ensure that any agreement that is completed will be in the best interest of the United States.

I ask unanimous consent to have printed in the RECORD a letter from Ambassador Brock confirming this commitment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE U.S. TRADE REPRESENTATIVE,
Washington, October 9, 1984.

Hon. ROBERT DOLE,
U.S. Senate,
Washington, DC.

DEAR BOB: I appreciate your concern regarding the waiver of the Section 102(e) Notice requirement as it relates to the proposed agreement with Israel. However, I assure you that such a waiver would neither be used to limit the opportunity for Congress to review fully any proposed agreement with Israel, nor to circumvent the intended purpose of the statute.

From the beginning of our negotiations with Israel last January, the Administration has scrupulously followed the procedures in section 102 that serve as the basis for obtaining expedited Congressional consideration of trade agreements. We have followed these procedures in order to obtain the information and advice from the International Trade Commission and our private sector advisors. In addition, frequent consultations have been held with the Congress on issues related to the proposed United States-Israel Free Trade Area.

Therefore, consistent with our past actions, even though the notice requirement will not technically be in effect, I assure you that the Congress will be notified immediately if any agreement is signed with Israel. In addition, following the conclusion of an agreement with Israel, the Administration will not submit to the Congress an implementing bill, as provided for in section 102(e)(2), until it is determined after consultation with the Committee on Finance in the Senate and the Committee on Ways and Means in the House of Representatives that it is an appropriate moment to do so. In these ways we can make certain that Congress will have a full opportunity to review the agreement between the United States and Israel and give final approval to it through the necessary implementing legislation.

Very truly yours,

WILLIAM E. BROCK.

GSP

Mr. DOLE. Mr. President, the bill achieves another principal goal of the Senate: To renew the generalized system of preferences, the authority for which would otherwise expire on January 3, 1985. This trade preference program for developing countries has proven to be a good development tool for the poorer nations of the world, without creating any threat of injury to U.S. industries competing with GSP-eligible imports. The authority to renew the program contains some amendments that will strengthen its effect in encouraging developing countries to assume greater responsibilities in the world trading system. In particular, the authority would contain significant incentives for such countries to develop adequate and effective means of recognizing U.S. intellectual property rights. Thus, those interested in the fight against counterfeiting will be pleased over the conference agreement.

The House and Senate conferees differed strongly on several points regarding new authority for the GSP program. Nevertheless, hard work and a willingness to compromise again produced a bill that will please most Senators. The principal idea urged by our conferees—nondiscriminatory eligibility criteria for beneficiary countries—is preserved in the final bill. Yet, the bill also incorporates House ideas for more specificity regarding the graduation of the major beneficiary countries from full benefits under the GSP, and further, the bill introduced new country eligibility criteria that will require the President to review what steps countries are taking to promote internationally recognized workers' rights. The conferees agreed to extend the GSP for 8½ years, and I believe all will be satisfied with this outcome.

TRADE REMEDY AMENDMENTS

Both the Senate and House bills contained numerous provisions intended to improve the operation of the trade remedy laws. Certain of these excited fears of a trade war, and were the basis on which many urged the conferees to sink the bill. Again, I am pleased that the conferees proved these fears unfounded.

One of the noncontroversial provisions is the creation of a Small Business Assistance Office, contained in title II. Senators COHEN and MITCHELL deserve particular thanks for leading efforts to provide better access to trade remedies for small business.

Title VI of the bill contains 23 provisions that will, for the most part, streamline the administration of the antidumping and countervailing duty laws, as well as codify existing administrative practice in this area so that certainty will be brought into these procedures for relief. Several controversial items must be reviewed in the next Congress, but I believe the conferees' work will satisfy most for now.

I wish to comment specifically on one provision, section 613, which relates to the notion of "upstream subsidies" as a practice to which the countervailing duty laws apply. The conferees adopted compromise language intended to clarify this area of the law. Section 613 would add at the end of section 771 of the 1930 Tariff Act a paragraph defining upstream subsidies as subsidies on significant inputs or components of the finished product which bestow a competitive benefit on that product—some or all of the subsidy bestowed on the input producer is passed through to the producer of the finished product. The provision does not affect the basic definition of subsidy in any way. The potential for an upstream subsidy exists only when a sector-specific benefit meeting all other criteria for being a subsidy is provided to the input producer.

The amount of any upstream subsidy will be included in the amount of subsidy found with respect to the finished product. Normally, the administering authority will find a competitive benefit when the price actually paid for the input is lower than the price the exporter would otherwise pay for the product in obtaining it from another seller in an arms-length transaction. However, where the administering authority has made a prior finding of a subsidy on the input that is used for comparison purposes, it will adjust the price or select a price from another source. Whenever there is an investigation of upstream subsidization, the time periods for making preliminary and final determinations may be extended. Further, the provision is limited to subsidies bestowed by the country in which the final product is manufactured, except that a customs union shall be treated as one country if the subsidy or subsidies are provided by the customs union.

The section on upstream subsidies was revised in conference. As originally drafted, both the Senate and House provisions contained ambiguities that might have led to interpretations inconsistent with our intent. As redrafted, the provision clearly and unambiguously manifests our intent generally to codify current Commerce Department practice in the area. That practice was and will be consistent with U.S. international obligations.

CUSTOMS SERVICE, ITC, AND USTR AUTHORIZATIONS

Title VII of the bill contains the authorization of appropriations for fiscal year 1985 for the Customs Service, the International Trade Commssion, and the U.S. Trade Representative's Office. These authorizations were not part of H.R. 3398 as passed by the Senate, but are almost identical in amount to those contained in H.R. 5188, an authorizations bill reported by the Finance Committee. I therefore am pleased that the authorizations are included in this bill.

STEEL AGREEMENTS' ENFORCEMENT

Title VIII contains another major feature of the bill—authority to enforce the import restraint agreements that will be the backbone of the President's recently announced program to provide the steel industry with relief from the massive unfair practices that pervade trade in that sector. While the Senate bill contained a simple grant of import licensing authority, the House bill went much further: it called for extensive Government review of individual companies' performances as a condition of the authority. The conferees agreed to the concept of conditionality of relief, and to a specific commitment by the major companies to funding for worker retraining; nevertheless, the Senate's insistence on minimizing the Government's monitoring of the companies also is reflected in the scope of the final conditions for relief, and the waiver included on the training commitment. The resulting compromise is one of those about which I am least enthusiastic, but given the success of the Senate on other matters in the bill, I believe the steel provisions are a small price to pay for what otherwise is a very good bill.

WINE EQUITY

Finally, title IX of the bill incorporates the bulk of the "Wine Equity Act" so effectively promoted by Senator WILSON and others. I believe these provisions will enable the President to address with more force the many unfair foreign barriers to U.S. wine exports. In addition, a related provision, which will give grape growers the ability to be included in ITC injury investigations involving imported wine, was approved and is contained in section 612 of the bill. Although this provision will terminate in 2 years, the inclusion of it in the bill will at least temporarily rectify an anomaly of ITC administrative practice that has denied grape growers the opportunity to be heard on the injurious effects of subsidized wine imports. I congratulate Senator WILSON for his work on this matter.

CONCLUSION

Mr. President, the shepherding to a successful conclusion of an omnibus trade bill such as H.R. 3398—provisions of which over two-thirds of the Members have either sponsored or cosponsored—is an enormously complex and time-consuming task. In closing, I want to acknowledge the great leadership and perseverance of Senator DANFORTH as he presents the final product to us today. Without the efforts of the Senator from Missouri, we would not have a hundred tariff bills, enhanced authority to address unfair trade practices, a renewal of the GSP, the authority to negotiate a trade agreement with Israel, or many other important segments of this package. H.R. 3398 is a good bill for U.S. trading interests, and I wish to pay tribute to the efforts of the chairman of the Subcommittee on International Trade for bringing us to this point of success.

Mr. LONG. Mr. President, I have not signed the report of managers of this bill.

There are some worthy provisions in this bill, such as the free trade area for Israel. But the conferees rejected a provision that should be in this bill. This is the House provision on natural resource subsidies.

This provision was added to H.R. 3398 by the House after the Senate passed its version of the bill. Therefore, there was no Senate provision on natural resources subsidies. Notwithstanding the lack of a Senate provision, however, the conference should have accepted the House provision in any event. My two Senate Democratic colleagues on the conference voted with me for an amended version of the House natural resources provision. But since no Republican conferee voted for the amended provision, it was not accepted by the conference.

The result is to risk losing tens of thousands of petrochemical industry jobs in this country and billions of dollars of investment to an unfair trade practice. In my State alone, there is a $35 billion investment in the petrochemical industry. Failure to adopt the amendment also means jobs lost in other U.S. industries, such as the cement industry, which is also competing with imports that receive natural resources subsidies.

Under the House provision as I proposed to amend it, the United States could assess offsetting duties against imports from non-GATT and non-Communist countries, in which a natu-

ral resources subsidy resulted in discounting a significant portion of the cost of that import. A natural resources subsidy is the difference between the price at which a foreign government sells a natural resource to its own nationals and the fair market value of that resource, measured by the free, uncontrolled price of the natural resource in the world market. There is no U.S. remedy for U.S. industries threatened by such subsidies under current law.

Assessing such an offsetting duty is a limited, effective, GATT-legal remedy to a problem that, absent such action, will eventually drive the U.S. petrochemical industry out of business, as well as dozens of other U.S. industries.

In light of the growing use of natural resources subsidies, and the danger they present to vital U.S. industries, I cannot support a conference result that allowed the chance to slip by of taking action to offset this subsidy.

Mr. DANFORTH. Mr. President, today the Senate is considering the conference report to accompany H.R. 3398, the Trade and Tariff Act of 1984. The Senate originally approved H.R. 3398 on September 20, and went to conference with the House on October 4. Measures subject to the conference included H.R. 3398. as passed by both the House and Senate, along with legislation approved by the House pertaining to trade remedies, steel, wine trade, customs forfeiture, authorizations, and various tariff measures.

Today I am proud to present to the Senate the product of that House-Senate conference. As reported by the conference committee, the Trade and Tariff Act contains nine separate titles. I would like to summarize these briefly for the Senate.

Title I contains some 68 changes in the tariff schedules of the United States, primarily tariff suspension or elimination provisions. Of these, more than a dozen are extensions of existing duty suspensions which expired in 1983 and 1984. Others, such as those involving telecommunications products, when protein and laminated textile fabrics are tariff reclassifications—designed to improve the collection of trade statistics or close loopholes in the tariff schedules.

Title II contains almost 30 amendments to customs and trade laws. Some of these simply relate to entry requirements, others represent significant changes in U.S. trade law and U.S. trade policy. One key provision would amend section 201 of the Trade Act of 1974 to clarify the law as it relates to criteria in the determination of injury. These changes are being made by the Congress in response to the recent decision of the International Trade Commission that imports of nonrubber footwear are not injurious to the domestic industry. American shoe manufacturers will now be in a position to have the ITC consider elements related to injury which were apparently disregarded in the recent shoe investigation and decision. Other important title II provisions include the establishment of a Small Business Trade Assistance Office in the ITC; authority for the President to retaliate against discriminatory Canadian tax practices involving border broadcasting; and a statement of the sense of Congress on possible action by the EEC on corn gluten feed and soybean products.

Among the more routine provisions of title II is section 207, relating to certain country of orgin marking requirements. In implementing section 207 of this bill with respect to certain pipes and fittings, we would expect the Secretary of the Treasury to prescribe a reasonable method of marking under section 304(a)(1) that does not preclude imported pipe and fittings from meeting industry technical specifications, such as those of the American Petroleum Institute.

Title III is the International Trade and Investment Act, the so-called Danforth-Bentsen reciprocity bill. First, it provides for an annual accounting of major foreign barriers to U.S. exports of goods, services and foreign direct investment. Second, the bill broadens and strengthens section 301 of the Trade Act, particularly as it relates to foreign investment barriers and intellectual property righs, and as it relates to retaliatory authority with respect to services and investment performance requirements. Finally, it provides negotiating mandates and authority for trade agreements in services, investment, and high technology—including authority for the reduction of certain tariffs on semiconductor imports in the context of comparable reductions by our trading partners.

Title IV provides authority to the President for 3 years to negotiate a reciprocal free trade arrangement with Israel. Similar authority could be used by the President to negotiate trade agreements with other countries to reduce tariff and nontariff bariers—subject to the approval of the Finance and Ways and Means Committees. All such agreements would have to be submitted to the Congress for approval under the "fast-track" legislative procedures set out in sections 102 and 151 of the 1974 Trade Act.

Title V would reauthorize the Generalized System of Preferences [GSP] Program, which expires on January 3, 1985, for another 8½ years. Key changes have been incorporated in the legislation which are designed to improve the program's graduation mechanism for the more advanced developing countries and to enable the United States to enhance our export objectives in GSP-beneficiary countries. Among the changes are provisions which would require consideration of a beneficiary country's treatment of U.S. exports, intellectual property rights, and investment, in determining country and product eligibility, along with authority to reduce by half the current competitive need limits on GSP benefits. It is my expectation and that of the others involved in the reformulation of this program, that the USTR will enforce vigorously the new graduation and conditionality provisions contained in this legislation.

Title VI contains various measures that would reform U.S. trade laws with respect to the treatment of unfairly dumped or subsidized products. Many of these changes, such as those pertaining to "upstream subsidies," are in response to concerns expressed by American business about unfair import competition. Other provisions are designed to streamline our unfair trade practice laws to render them less cumbersome and thereby increase their availability to small business and others with limited redources. Finally, this title would require the administration to undertake a major study on foreign industrial trageting practices.

Section 612 of the bill pertains to the definition of industry for the purpose of bringing a case under our antidumping or subsidy/countervailing duty statutes. The provision is based on a measure passed by the House which limits the change in the industry definition for processed agricultural products to wine and grape products. The conferees agreed to limit this change to 2 years and it was the understanding of the Senate conferees that the International Trade Commission, in interpreting this statute, will continue to conform to current practice in attempting to define the affected industry as those segments of production that are closely integrated with one another. In this regard, it was further the understanding of the Senate conferees that in such a case the International Trade Commission will focus on that portion of the grape producing industry that specifically produces grapes used or to be used for the production of wine.

Title VII consists of authorization measures for the U.S. Customs Service, the International Trade Commission and the Office of the U.S. Trade Representative for fiscal year 1985.

Title VIII pertains to U.S. trade and competitiveness in steel. Entitled the "Steel Import Stabilization Act," it includes enforcement authority for the President's steel program and for the United States-European Communities' arrangement on steel pipes and tubes. This title also contains measures designed to encourage the American steel industry to reinvest, modernize plant and equipment, hold down costs of production, and provide for the retraining of steelworkers. While the

Senate receded to the House on its proposal for enforcement authority, a number of changes were made to reduce governmental intrusion into the operation of the steel companies.

Title IX addresses foreign barriers to trade in wine.

There is no question that H.R. 3398 is the most important trade bill to come before the U.S. Congress since the Trade Agreements Act of 1979. The measures contained in the Trade and Tariff Act are diverse and complex. But in the final analysis, it is a trade-liberalizing bill of substantial economic significance to the United States. It is legislation that encompasses the work of many in Congress, in the administration, and in the private sector, over a period of years. It is a measure in which we can take some pride.

Mr. MATSUNAGA. Mr. President, I am pleased to support the report of the conferees on H.R. 3398, the Omnibus Trade and Tariff Act of 1984. Most of the provisions which the Senate passed by a vote of 96–0 a few weeks ago are retained in the bill.

This legislation contains nine titles, many of major importance. In addition to titles I and II, which contain over 80 miscellaneous and technical tariff changes, the bill—

Authorizes negotiation of a free trade area with Israel;

Extends the life of the generalized system of preferences on a new basis for a period of 8½ years beginning January 3, 1985;

Revises and updates U.S. trade remedy laws, such as the antidumping and countervailing duty and escape clause laws; and

Provides for a steel import program.

Mr. President, many worthwhile and long awaited changes are in this bill. The conferees worked night and day resolving many complex problems.

I am particularly gratified to see the Generalized System of Preferences of GSP reestablished. This program provides zero rates of duty on a limited list of imports from developing countries. Only about 3,000 of the 12,000 line items in the U.S. tariff schedules are eligible for GSP, and they amount to only about 3 percent of U.S. imports. Despite the small size of the program there were those who wanted to discontinue GSP.

Under the provision adopted by the conferees, countries that now make the most frequent use of GSP will be forced over the next 2 years to gradually lose some of their benefits. No one country, however, will lose all benefits under the program. All in all the conference report is in accord with what the Senate adopted by unanimous RECORD vote on September 20. I urge adoption of the conference report.

Mr. HEINZ. Mr. President, I will support this conference report on H.R. 3398 reluctantly because it fails to address some of the major trade policy issues facing the United States today, particularly in the area of long-overdue trade reform legislation.

The conference report deals adequately with a number of the specific issues, including sectoral matters, that have been topics of much discussion in the press. The conference report provides for enforcement authority for the President's steel program, it extends the Generalized System of Preferences Program, and it reconciles the differing House and Senate versions of the Israel free trade area proposal. In addition, it enacts the reciprocity legislation which Senator DANFORTH and I first introduced in 1981, and it disposes of a large number of minor tariff items.

There is nothing wrong with these items, but taken together they do not make much of a trade policy. In particular they do little to stimulate the creation of a freer international trading system.

By that I mean a system where free-market principles are the rule rather than the exception, where dumping and subsidizing are not employed, and where performance requirements and barriers to others exports are taken down. With respect to these objectives I suspect I do not differ much with either the administration or the other members of the Finance Committee. Where we do differ, however, is over the means of achieving these objectives. In general, I have maintained for some time that our approach has been too soft and insufficiently assertive or our rights internationally. Instead we have adopted weak policies and discretionary legislation, with the result that policymaking has been captured by the bureaucracy with its traditional "don't rock the boat mentality."

This conference report also fails this test of effectiveness, and I fear that while we may be congratulating ourselves today for passing major trade legislation, 6 months or a year, or 2 years from now things will not be much different than they are today. We have given the bureaucracy some marginal new authority—which is unlikely to be used, and we have avoided addressing some of the most important new problems on the trade front this year.

For example, the conferees dropped any mention of the downstream dumping problem, despite the fact that both House and Senate bills contained provisions on this subject—a decision that probably would have made this report subject to a point of order in the House, had not all such points been conveniently waived. The conferees also dropped the House provision on so-called natural resources subsidies, along with a number of other trade reform provisions that were put in the House bill by Congressman GIBBONS and in the Senate bill by my amendment No. 4266.

Mr. President, some of these issues are large and some of them are small. I would not pretend to have the right answers, or even a firmly fixed view on all of them. They are, however, the issues that will face our trading system in the next decade, and we have just passed up an important opportunity to address them. The whole postwar history of the international trading system has been an effort to structure and institutionalize dispute settlement mechanisms and to regularize principles and rules of international economic conduct. We have made significant progress in that direction, most recently in the multilateral trade negotiations and the numerous codes that emerged from them. Yet for every new rule we write, we seem, both in our law and in international law, to also create a new loophole. As tariffs have been reduced, nontariff barriers have become more intrusive. As we attack the latter one by one, new types develop. That is not an unnatural process, and we must not allow it to discourage us in continuing strong efforts at shutting the door to unfair trade. At the same time, however, we should also be advancing the debate. We should be identifying new forms of subsidies and new unfair practices and should be attacking them. We have done this on occasion—we have launched something of an effort against European Community agricultural subsidies, which are not new, but are certainly a sacred cow in our trade relations. And we have begun an effort to fight performance requirements whenever they are imposed on our businesses. Those are salutary efforts which should be continued, although this bill does not give much hope that any of its discretionary tools will be used in those areas.

Clearly, upstream and downstream and natural resource problems, not to mention the vexing question of measuring unfair trade practices of nonmarket economies, also fall into this growing category of the next generation of market distorting practices. Congressman GIBBONS, the chairman of the Trade Subcommittee in the other body, is ahead of the rest of us in this perception, and he held extensive hearings in 1983 and 1984 to document these problems. I regret the Finance Committee did not do the same. Unfortunately, the Senate's failure to meet its responsibilities prevailed in the conference, an most of the important items in the trade reform areas were dropped. As a result we have missed one of those rare opportunities to advance the debate over free trade in any significant way. I do not have any illusions, Mr. President, that anything we could do in this bill would solve all these problems. Successful

international action is probably years away, but we have nevertheless missed a golden opportunity to put these issues on the table, to identify them as problems, of the future if not the present and to signal our determination that we and our trading partners address them.

It is that missed opportunity in this conference report that I regret the most, Mr. President, and it is the reason for the reluctance of my support. The problem with the bill is not what is in it but rather what is missing from it. I am sure that those who engineered this result are congratulating themselves today for having struck a blow for free trade—I know several newspapers that will take that approach. Unfortunately that analysis is wrong. We may have opened the door to more imports entering this country and done little to promote our exports over the resistance of our trading partners, but real free trade is not that one-way street into this country. Free trade is a collective adherence to market principles and a determination to abjure the neomercantilism that plagues the international economic system. And that is a confrontation we have skillfully but tragically postponed in this bill.

Having said that, Mr. President, I want to alert Senators that these issues will be back next year, and I will be back next year. The Finance Committee thus far has not shown a great deal of enthusiasm for addressing these questions in much detail, even through a modest schedule of hearings. I will announce now, however, that I plan to seek such comprehensive hearings next year, along with committee and floor action. Failing that, I will have no alternative but to take my concerns directly to the floor as appropriate vehicles come along. We seem to have had this tradition of passing significant, trade legislation only at 5-year intervals. This time, however, another 5-year wait is too long—these problems are too large and the trade deficit too big to permit it. And so, Mr. President, I ask those who praise this bill to consider more carefully what they have done—or rather what they have not done—and to prepared themselves for the continuation of this debate in 1985.

Mr. THURMOND. Mr. President, I considered raising a point of order in connection with the conference report on H.R. 3398, the miscellaneous tariff bill.

Specifically my concerns deal with section 12 of the Senate version of this bill. Section 12 of H.R. 3398 deals with downstream dumping. Downstream dumping occurs when a product used in the manufacturing process is purchased at a price below its foreign market value. Section 12 would have given domestic industries the right to obtain countervailing-dumping remedies for this special type of subsidy.

Mr. President, I have clearly noted that the Senate version of H.R. 3398 contained this provision. It is also a fact, that the House version contained very similar language dealing with downstream dumping. Yet, this important language has been totally stripped from the conference report on H.R. 3398.

Mr. President, it is my contention that the conference committee went beyond its scope of authority in removing this language. Both Houses had spoken on this issue. Both Houses had approved versions giving our domestic import sensitive industries an avenue to follow in effort to obtain relief for cheaply produced and subsidized foreign imports.

Mr. President, I would be well within my rights in raising a point of order on this issue, and I am confident that the Parliamentarian would agree that the conferees went beyond their authority in this matter. However, I am also confident that under an appeal the Senator would overturn the ruling of the Chair. There is no point in pressing this issue on this bill. I merely seek to express my displeasure on the decison by the conferees to drop this proposal and to remind my colleagues that we must be willing to take positive steps to preserve our industrial base. If we are not willing to take such actions, then we must simply accept the fact that there will be continued job-loss in import sensitive industries such as steel, textiles, apparel, leather goods and footwear.

Mr. BYRD. Mr. President, the conference report on H.R. 3398 represents the first major piece of completed trade legislation to come before the Senate in several years. This is an unfortunate fact, since the past few years have been witness to an unprecedented decline in this country's position as economic leader of the world. This year we face the prospect of a trade deficit that could exceed $130 billion. Despite a decline in oil prices and a growth in American exports, we continue to experience the largest trade shortfall in our history. None of this has led the current administration to develop a programmatic response to the loss of America's economic leadership.

I commend the Members of the House and Senate who have worked so diligently to craft this legislation. Everyone involved in this effort acknowledges that this bill will not solve our problems. We all understand that government cannot legislate the country into a position that will guarantee a return to American leadership in the world economy. Certainly that is not possible when the current administration pursues policies that result in an artificially overvalued dollar and a Federal budget deficit that undermines the economic health of the Nation. We can only try to address some of the problems that confront American workers and businesses as they try to compete in the world marketplace.

That was my intent in introducing an amendment to the bill in the Senate which would have provided for a breakpoint pricing plan to assure that American ferroalloy producers are not undercut by anti-market pricing and subsidies by foreign producers. I understand that my amandment—along with a host of other meritorious amendments—was dropped without prejudice by the committees in conference. I wish to thank Senator DANFORTH for his commitment to the conferees that the ferroalloy proposal will receive a full hearing in his subcommittee. I am convinced of the merits of this proposal, and believe that the issue is of profound importance to the national security and our defense production base. Accordingly, I am grateful that it will be fully discussed by the subcommittee.

Furthermore, I commend the conferees for their insight in including much of Congressman ROSTENKOWSKI's proposal for the steel industry. Last week, I spoke in support of that legislation. I believe that a commitment to adjust and modernize is an absolute prerequisite for assistance to the steel industry. The men and women who work in America's steel plants need to know that management is committed to regaining the industry's status as a world class steel producer. The President's rejection of the International Trade Commission's recommendation along these lines left open the prospect that the industry would be allowed to continue down the path of involuntary liquidation. The success of Mr. ROSTENKOWSKI's legislation may help to assure that this will not be the case.

Mr. President, I represent a State that ranks third in the Nation in the percent of its manufactured goods which go to the export market. West Virginia's economy and West Virginia jobs are heavily dependent on America's leadership in a changing world marketplace. It is my sincere hope that, when the 99th Congress convenes, we will put even greater emphasis on this issue of trade policy and trade law reform, and that the President—whoever he will be—will join with the Congress in a sincere attempt to assist American workers and companies meet the challenge of that market.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MAKING CERTAIN CORRECTIONS IN THE CONFERENCE REPORT

Mr. BAKER. Mr. President, there is at the desk a House Concurrent Resolution No. 372 making certain corrections in the conference report that was just passed. Is that measure at the desk?

The PRESIDING OFFICER. The measure is at the desk.

Mr. BAKER. Mr. President, I ask that the Chair lay that measure before the Senate.

The PRESIDING OFFICER. The clerk will state the concurrent resolution.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 372) to correct the enrollment of H.R. 3398.

AMENDMENT NO. 7085

Mr. BAKER. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Missouri [Mr. DANFORTH] and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER] for Mr. DANFORTH proposes an amendment numbered 7085.

Mr. BAKER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of H. Con. Res. 372, add the following: In section 806(a): delete "805" and insert in lieu thereof "805(a)".

In section 806(b)(1)(C): delete "905" and insert instead "805(a)".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Tennessee.

The amendment (No. 7085) was agreed to.

Mr. MATSUNAGA. Mr. President, I support the concurrent resolution.

It corrects an inadvertent error made in the conference report itself. It is so that the Members on this side will be fully protected. I concur in the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution as amended.

The concurrent resolution, as amended, was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FURTHER CONTINUING APPROPRIATIONS, 1985

Mr. BAKER. Mr. President, I am advised now that a short continuing resolution just passed by the House of Representatives, that is to say, House Joint Resolution 663, extending the appropriations through Thursday midnight, is at the desk; is that correct?

The PRESIDING OFFICER. The majority leader is correct.

Mr. BAKER. Mr. President, I ask the Chair to now lay this measure before the Senate.

The PRESIDING OFFICER. The clerk will state the joint resolution.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 663) making further continuing appropriations for fiscal year 1985.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, clearance has been granted on this side by our Members and we have no objection to proceeding, and, as far as I am concerned, we may do it by voice vote.

Mr. BAKER. Mr. President, the question pending before the Senate is House Joint Resolution 663; is that correct?

The PRESIDING OFFICER. The majority leader is correct.

The question is on agreeing to the joint resolution.

The joint resolution (H.J. Res. 663) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I have a few things that appear to be routine in nature, if I may present them now to the minority leader and ask his indulgence while I proceed.

BILL PLACED ON CALENDAR—H.R. 4473

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be discharged from further consideration of H.R. 4473, a bill to designate the Federal Archives and Records in San Bruno, CA, as the "Leo J. Ryan Memorial Federal Archives and Records Center" and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

BILL PLACED ON CALENDAR—H.R. 2671

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 2671, for the relief of Edgar Gildardo Herrera, and that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADVISORY COMMISSION INTERGOVERNMENTAL RELATIONS AMENDMENTS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1052.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1052) entitled "An Act to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations", do pass with the following amendment: Strike out all after the enacting clause, and insert:

SECTION 1. This Act may be cited as the "Advisory Commission on Intergovernmental Relations Amendments of 1984".

SEC. 2. Section 3 of the Act entitled "An Act to establish an *Advisory Commission on Intergovernmental Relations*" (42 U.S. 4271 et seq.), hereafter in this Act referred to as the "Act", is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) The Commission shall be composed of thirty-seven members as follows:

"(1) eight appointed by the President of the United States, three of whom shall be officers of the executive branch of the Government, and five private citizens, all of whom shall have had experience or familiarity with relations between the levels of Government;

"(2) four appointed by the President of the Senate, who shall be Members of the Senate;

"(3) four appointed by the Speaker of the House of Representatives, who shall be Members of the House;

"(4) four appointed by the President from a panel of at least eight Governors submitted by the National Governor's Association;

"(5) one appointed by the President either from a panel of at least two elected Indian tribal government officials submitted jointly by the National Congress of American Indians and the National Tribal Chairmen's Association, or from among such other Indian tribal government officials as may be nominated by governing bodies of Indian tribes as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450B);

"(6) four appointed by the President from a panel of at least eight members of State legislative bodies submitted by the National Conference of State Legislatures;

"(7) one appointed by the President from a panel of at least two school officials submitted jointly by the National School Boards Association and the Council of the Great City Schools;

"(8) four appointed by the President from a panel of at least eight mayors submitted jointly by the National League of Cities and the United States Conference of Mayors;

"(9) one appointed by the President from a panel of at least two elected officers of units of local government with a population of less than 75,000 submitted jointly by the National League of cities and the National Association of Towns and Townships;

"(10) four appointed by the President three of whom shall be elected officials from a panel of at least six submitted by the National Association of Counties; and one of whom shall be an elected official from a panel of at least two submitted by the National Association of Regional Councils;

"(11) one appointed by the Chief Justice of the United States, who shall be a judge of the United States Court of Appeals or district court;

"(12) one appointed by the Chief Justice of the United States from a panel of two or more justices or judges of a State court of last resort submitted by the Conference of Chief Justices.

"(b) The members appointed from private life under paragraph (1) of subsection (a) and the members appointed under paragraphs (5), (11), and (12) of such subsection shall be appointed without regard to political affiliation. Of each class of members appointed under paragraphs (2) and (3) of such subsection, two shall be members of the majority party and two shall be members of the minority party of their respective Houses. Of each class of members appointed under paragraphs (4), (6), (8), and (10) of such subsection, not more than two shall be members of the same political party. Of each class of members appointed under paragraphs (6), (8), and (10) of such subsection, not more than one member shall be from any one State. At least one of the members appointed under paragraph (8) of such subsection shall be from cities with a population of less than 500,000 individuals.".

SEC. 3. Section 4 of the Act is amended—

(1) by inserting "or otherwise voluntarily resigns," after "section 3(a)," in subsection (d); and

(2) by striking out subsection (e) and inserting in lieu thereof the following:

"(e) Eighteen members of the Commission shall constitute a quorum, but two or more members shall constitute a quorum for the purpose of conducting hearings. Votes may be cast only by duly appointed members of the Commission. The use of proxies or voting by alternates shall not be permitted by the Commission. No report or recommendation shall be issued by the Commission unless a quorum shall be present and voting at the time of approval by the Commission of such report or recommendation.".

SEC. 4. Section 6 of the Act is amended—

(1) by striking out paragraph (2) of subsection (d) and inserting in lieu thereof the following:

"(2) to procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code."; and

(2) by adding at the end thereof the following new subsection:

"(g) Not later than 120 days after the date of enactment of the Advisory Commission on Intergovernmental Relations Amendments of 1984, the Commission shall issue bylaws governing the operations and procedures of the Commission.".

SEC. 5. Section 8 of the Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 8. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act for each of the fiscal years 1985 through 1989.".

SEC. 6. The amendments made by this Act shall be effective on January 1, 1985, and shall apply to all appointments (and reappointments) made to the *Advisory Commission on Intergovernmental Relations* after that date.

AMENDMENT NO. 7086

(Purpose: To make a substitute)

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment with a further Senate amendment which I send to the desk on behalf of Senator DURENBERGER.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. BAKER], on behalf of Mr. DURENBERGER, proposes an amendment numbered 7086.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Advisory Commission on Intergovernmental Relations Amendments of 1984".

SEC. 2. (a) Section 3(a) of the Act entitled "An Act to establish an Advisory Commission on Intergovernmental Relations", approved September 24, 1959 (73 Stat. 704; 42 U.S.C. 4273(a)), hereafter in this Act referred to as the "Act", is amended—

(1) by striking out "twenty-six members" in the matter preceding paragraph (1) and inserting in lieu thereof "twenty-eight members";

(2) by striking out "Governors' Conference" in paragraph (4) and inserting in lieu thereof "National Governors' Association";

(3) by striking out "board of managers of the Council of State Governments" in paragraph (5) and inserting in lieu thereof "National Conference of State Legislatures";

(4) by striking out "and" at the end of paragraph (6);

(5) by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon; and

(6) by inserting after paragraph (7) the following new paragraphs:

"(8) One appointed by the President from a panel of at least two elected officers of a township submitted by the National Association of Towns and Townships; and

"(9) One appointed by the President from a panel of at least two elected school board members submitted by the National School Boards Association.".

(b) Section 3 of such Act (42 U.S.C. 4273) is further amended by adding at the end thereof the following new subsection:

"(d) For purposes of subsection (a)(8), the term 'township' means a township as described in the Governmental Organization volume of the 'Census of Governments' publication most recently issued by the Bureau of the Census prior to the date on which an appointment is made under such subsection.".

SEC. 3. Section 4 of the Act (73 Stat. 705; 42 U.S.C. 4274) is amended—

(1) in subsection (d), by inserting "or otherwise voluntarily resigns," after "section 3(a),"; and

(2) by striking out subsection (e) and inserting in lieu thereof the following:

"(e) One-half of the members appointed and serving on the Commission shall constitute a quorum, but two or more members shall constitute a quorum for the purpose of conducting hearings. The use of proxies or voting by alternates shall not be permitted by the Commission.".

SEC. 4. Section 6 of the Act (73 Stat. 705; 42 U.S.C. 4276) is amended—

(1) in subsection (d) by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) to procure temporary and intermittent services under section 3109 of title 5, United States Code, as if the Commission were an agency and the Chairman were the head of an agency (as used in subsection (b) of such section)."; and

(2) by adding at the end thereof the following new subsection:

"(g) Not later than 120 days after the effective date of the Advisory Commission on Intergovernmental Relations Amendments of 1984, the Commission shall issue such bylaws governing the operations and procedures of the Commission as the Commission considers appropriate.".

SEC. 5. Section 7(b) of the Act (42 U.S.C. 4277(b)) is amended to read as follows:

"(b) Unless prohibited by State or local law, members of the Commission, other than those to whom subsection (a) of this section applies—

"(1) shall be paid compensation in accordance with the guidelines with respect to uniform rates of pay established for members of advisory committees pursuant to section 7(d)(1) of the Federal Advisory Committee Act (5 U.S.C. App.) for each day they are engaged in the performance of their duties as members of the Commission; and

"(2) shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Commission, as provided in subsection (a) of this section.".

SEC. 6. The amendments made by this Act shall take effect January 1, 1985.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Without objection, the motion is agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR PROXMIRE

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, the distinguished Senator from Wisconsin [Mr. PROXMIRE] be recognized on special order not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR A PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I further ask unanimous consent that after the execution of the special order that there be a time for the transaction of routine morning business until 11:30 a.m. with statements limited therein to 5 minutes each, with the exception of the two leaders, against whom no limitation of time shall apply.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL CONFEREES—H.R. 5504

Mr. BAKER. Mr. President, I ask unanimous consent that the following Senators be added as conferees to the mass transit portion of H.R. 5504: Senators GARN, TOWER, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 10:30 a.m. After the recognition of the two leaders under the standing order, the Senator from Wisconsin [Mr. PROXMIRE] will be recognized on a special order of not to exceed 15 minutes.

After the execution of the special order, there will be a period for the transaction of routine morning business until 11:30 a.m. in which Senators may speak for not more than 5 minutes each.

At 11:30 a.m. tomorrow, the Senate will resume consideration of the debt limit resolution. It is anticipated, Mr. President, that, in addition to the debt limit resolution on tomorrow the Senator will be asked to turn to the consideration of the Genocide Convention and perhaps the continuing resolution making appropriations. It is also anticipated that tomorrow may be a late evening. It is hoped by the leadership on this side that the Senate can complete its business tomorrow and adjourn sine die. There is a possibility, however, that we will be in session beyond that time.

AUTHORITY FOR CERTAIN ACTION

Mr. BAKER. Mr. President, I ask unanimous consent that the President pro tempore or the acting President pro tempore be authorized to sign and the Secretary of the Senate to receive and sign and enroll the short continuing resolution which was just passed by the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, if there are no other Senators seeking recognition—and the minority leader has indicated he has nothing further—I move, in accordance with the order previously entered, that the Senate now stand in recess until the hour of 10:30 a.m. tomorrow.

The motion was agreed to; and, at 8:48 p.m., the Senate recessed until Wednesday, October 10, 1984, at 10:30 a.m.

HOUSE OF REPRESENTATIVES—*Tuesday, October 9, 1984*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore [Mr. WRIGHT].

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Guide us, O God, in the paths of truth and keep our hearts open to knowledge. May we not claim righteousness only for ourselves, but humbly seek the common ground of understanding. Help us to be sensitive to the beliefs of others and enable us to celebrate Your presence in the lives of all people, whatever their background or responsibility. May our land continue to be a haven of tolerance and peace, for in You do we trust. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills, joint resolutions, and a concurrent resolution of the House of the following titles:

H.R. 437. An act for the relief of Patrick Starkie;

H.R. 440. An act for the relief of Fredrick Francisco Akers;

H.R. 932. An act for the relief of Harry Chen Tak Wong;

H.R. 1072. An act for the relief of Margot Hogan;

H.R. 1152. An act for the relief of Tomoko Jessica Kyan;

H.R. 1426. An act for the relief of Phillip Harper;

H.R. 1713. An act for the relief of Elizaveta Fankukhina;

H.R. 1865. An act for the relief of Nery De Maio;

H.R. 1932. An act for the relief of Mireille Laffite;

H.R. 2372. An act to recognize the organization known as the Navy Wives Clubs of America;

H.R. 2418. An act for the relief of Anis Ur Rahmaan;

H.R. 3382. An act for the relief of Dennis L. Dalton;

H.R. 3401. An act to designate the U.S. Post Office and Courthouse located at 245 East Capital Street in Jackson MS, as the "James O. Eastland U.S. Courthouse";

H.R. 3402. An act to designate that hereafter the Federal building at 10 West Capital Street in Jackson, MI will be known as the Dr. A. H. McCoy Federal Building;

H.R. 4025. An act to authorize the administrator of General Services to transfer to the Smithsonian Institution without reimbursement the General Post Office Building and the site thereof located in the District of Columbia, and for other purposes;

H.R. 5691. An act for the relief of Sutu Bungani William Beck;

H.R. 5787. An act to remove an impediment to oil and gas leasing of certain Federal lands in Corpus Christi, TX, and Port Hueneme, CA, and for other purposes;

H.R. 6101. An act to amend the Panama Canal Act of 1979 to authorize quarters allowances for certain employees of the Department of Defense serving in the area formerly known as the Canal Zone;

H.R. 6228. An act providing for an extension until April 21, 1992, of five patents relating to oral hypoglycemic drugs of the sulfonylurea class;

H.R. 6311. An act to combat international terrorism;

H.J. Res. 482. Joint resolution authorizing the Law Enforcement Officers Memorial Fund to establish a memorial in the District of Columbia or its environs;

H.J. Res. 638. Joint resolution designating October 1984 as "National Head Injury Awareness Month";

H.J. Res. 655. Joint resolution designating February 16, 1985, as "Lithuanian Independence Day"; and

H. Con. Res. 369. Concurrent resolution to direct the Clerk of the House of Representatives to make technical corrections in the enrollment of the bill H.R. 5167.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2867), "An act to amend the Solid Waste Disposal Act to authorize appropriations for the fiscal years 1984 through 1986, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1330), "An act to authorize the U.S. Army Corps of Engineers to provide grants to the several States to encourage and foster the construction of necessary public capital investment projects, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the bill (S. 1889), "An act to amend the act authorizing the establishment of the Congaree Swamp National Monument to provide that at such time as the principal visitor center is established, such center shall be designated as the 'Harry R. E. Hampton Visitor Center'."

The message also announced that the Senate disagrees to the amendment of the House to the amendments of the Senate to the bill (H.R. 3398), "An act to change the tariff treatment with respect to certain articles, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. DANFORTH, Mr. LONG, Mr. BENTSEN, and Mr. MATSUNAGA to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendments of the House to the Senate amendments with an amendment to a bill of the Senate of the following title:

H.R. 5479. An act to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to the Senate amendment with amendment to a bill of the Senate of the following title:

H.R. 5946. An act to reform the Residential Conservation Service and to repeal the Commercial and Apartment Conservation Service.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 3331. An act to authorize the exchange of certain lands between the Bureau of Land Management and the city of Los Angeles for purposes of the Santa Monica Mountains National Recreation Area; and

H.R. 6224. An act to provide for the assumption of selected functions, programs, and resources of St. Elizabeths Hospital by the District of Columbia, to provide for the establishment of a comprehensive mental health care system in the District of Columbia, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 2449. An act for the relief of the Sisters of Mercy of the Union, Province of St. Louis, MO;

S. 2526. An act to provide authorization of appropriations for the U.S. Travel and Tourism Administration, and for other purposes; and

S. 2623. An act to implement the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker pro tempore signed the following enrolled bills and joint resolutions on October 5, 1984:

H.J. Res. 659. Joint resolution making further continuing appropriations for fiscal year 1985;

S. 416. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Illinois River in Oregon and the Owyhee River in Oregon as components of the National Wild and Scenic Rivers System, and for other purposes;

S. 1146. An act to amend the Federal Aviation Act of 1958 to provide for the revocation of the airman certificates and for additional penalties for the transportation by aircraft of controlled substances, and for other purposes;

S. 1711. An act providing for a 15-year extension of patent numbered 3,376,198;

S.J. Res. 299. Joint resolution to designate November 1984, as National Diabetes Month; and

S.J. Res. 309. Joint resolution authorizing and requesting the President to designate January 1985 as "National Cerebral Palsy Month."

MONDALE SHOWS HIS TRUE COLORS ON TAX INCREASES

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I have to say that Walter Mondale performed very well Sunday night.

He nearly fooled all the people all the time. And Abe Lincoln said it couldn't be done.

Something Walter Mondale said, however, didn't fool me. He said, and I quote, "I would repeal indexing."

Indexing is the cornerstone of the Reagan tax reforms, indexing protects lower- and middle-income American families from having their taxes raised by bracket creep.

Walter Mondale apparently likes bracket creep.

Repeal of indexing won't affect the rich, but it will hurt the poor and the middle class.

Indexing benefits those earning less than $50,000 a year. Repealing indexing will mean a 22-percent tax increase for those earning between $20,000 and $30,000 a year.

If Walter Mondale becomes President he will have to tax the poor and the middle class to pay for his promises and Sunday night, he finally admitted he's going to do just that.

WHAT A DIFFERENCE A DAY MAKES

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, there is the old song, "What a Difference a Day Makes." Sunday, October 7, will clearly make a significant difference in the outcome of this Presidential election. Walter Mondale illustrated his intelligence and finesse in dealing one on one with President Reagan. The President articulated his previously stated positions, but his performance demolished the existing myth that he is invincible. Two myths were destroyed in the debate: First, that Walter Mondale is weak; and, second, that Ronald Reagan is the great communicator.

More importantly, however, is the need in a free society for the leaders in our two major political parties to engage, head to head, in debate. How a President will govern is based far more on how he reacts under heated pressure in a debate context than in 30-second TV spots. And while I personally believe that the Mondale effort was far superior to the President's effort in the debate, the public interest is well served by matching the Presidential and Vice Presidential candidates against each other. It is indeed healthy for the leader of the strongest Nation in the world to be chosen by people who see how that leader reacts under fire.

THE DEFICIT

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, during the 1960's, the Federal Government only had to borrow 10 percent of net savings to finance the Federal deficit.

During the 1970's, this figure increased to 27 percent.

Currently, the Federal Government must borrow 56 percent of net savings to finance the deficit. This is why we still have record high real interest rates. The Federal Government must borrow more than half of net savings to finance the Federal deficit.

Mr. Speaker, I was, frankly, very alarmed when I heard the President say during the debate that there was not a connection between huge deficits and interest rates. I must join the business leaders, economists, farmers, bankers, and other people all over America who strongly disagree with the President on this point.

I sincerely hope the President's remark was a misstatement during the heat of this debate.

If the President does not believe there is a connection between huge deficits and high interest rates, I question whether we can have the kind of leadership we need from the President on this issue during the next 4 years.

□ 1210

TIME TO STEER A COURSE

(Mr. DORGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN. Mr. Speaker, I have been a little puzzled for a long while by Mr. Reagan's actions on the deficit. He professes to be against Federal deficits and yet he has proposed the highest deficits in the history of America, and I have wondered why.

I think I discovered in the debate the other night one of the reasons. He, along with his Secretary of the Treasury, say, well, deficits do not matter that much; deficits are not that important. President Reagan in the debate said Federal deficits really have nothing at all to do with the level of interest rates.

Now I do not know of any two people in the country that believe that except Ronald Reagan and Donald Regan, the Secretary of the Treasury. The fact is, our Government is hip deep in the credit market, we are crowding out private borrowers, pushing demand for credit upward, and increasing interest rates; it is that simple.

Now the President, when he came to office, spoke at the microphone behind me and he said our debt was a stack of 1,000-dollar bills 67 miles high. But in his first five budgets, this President has added to another stack of 1,000-dollar bills more than 67 miles high to this debt. This from a person who says he does not like deficits; this from a person who says deficits do not matter because they do not affect interest rates.

That is hogwash; this country cannot afford that kind of fiscal policy, and it is time we begin steering a straight course toward an economic future this country deserves—one where we "pay as we go" for what this country needs.

THIS IS THE RONALD REAGAN THAT PEOPLE SAW IN THE PRESIDENTIAL DEBATE

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, and my colleagues, during the Presidential debate, many millions of Americans were greatly surprised at the President's performance: Halting, uncertain, forgetful, confused. Many others were not surprised. Journalists, Members of Congress, top Government officials, those who work with the President in the unscripted give and take of confrontation have understood for 3 years now that this Presi-

dent is woefully unacquainted with the issues.

Unprotected by cue cards, scripts, or teleprompter, this President is the Ronald Reagan that people saw in the first Presidential debate.

PRESIDENT REAGAN'S LEGACY

(Mr. WALGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALGREN. Mr. Speaker, what was said and what was not said in debates is often very revealing. In speaking of deficit spending the other night, President Reagan was careful to say that "there was a trillion-dollar debt when we got here." What was unsaid was that after 4 years of Reaganomics, that debt has almost doubled.

Federal deficits have gone from $27 billion per year in 1979 to $210 billion per year just 4 years later. It took 204 years, from George Washington on through Jimmy Carter for the national debt to reach $1 trillion in 1980. The Reagan administration will go through the second trillion dollars in just one administration.

Many say the size of this deficit doesn't mean much to the public because someone else will pay for it later on. But we must pay the interest to carry these large deficits from year to year, even if paying the debt itself is left to our children and grandchildren. And the increase in government spending just to carry the deficits of just the last 4 years has become astronomical.

The cost of interest for the experiment of Reaganomics is now one of the largest programs in the universe of Federal spending. Next year we will pay $70 billion in interest on just the debt associated with Reaganomics an amount second in size only to Defense and Social Security—an amount of new spending that dwarfs all the "welfare programs of the Federal Government many times over.

Looking back in history, we will see the legacy of several Presidents: Among President Kennedy's legacies is the Medicare program whose value is critical and who's total cost today is something in the range of $60 billion per year. The legacy of President Reagan will involve greater spending—$70 billion, year-after-year in interest payments.

WHAT A FARCE

(Mr. CAMPBELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAMPBELL. Mr. Speaker, there is an old saying that the "proof is in the pudding." In 1976, when Mr. Mondale went into office with Mr. Carter, the prime rate of interest in this country was 6.25 percent; when he left it was 21.5 percent. When Mr. Mondale went into office at that time with Mr. Carter, we had an inflation rate in America of 4.8 percent; when he left, we had an inflation rate of 12.5 percent.

Between 1976 and 1980 the cost of owning a house in this country went up 133 percent. Now, the same man is running again saying, let us go back to the good old days again; let us raise taxes so we can solve your problems.

What a farce.

ASSURANCE OF A SERIOUS PRESIDENTIAL CONTEST

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, the biggest winner of the debate Sunday evening was the American people.

We are now insured that there will be a serious Presidential contest—that on the Republican as well as Democratic side it will have to consist of more than balloons, bands and banter.

Walter Mondale is now the credible candidate he always really was. And the President can no longer hide behind the facade of the present, with its fragile peace and prosperity, but must talk about the genuine domestic and international problems of the immediate and long-term future.

Those who were riding high—smug with their brew of Adam Smith and Jerry Falwell—have been brought down to Earth.

In a word, the radical right—that helped write the Republican platform and whose echoes have been projected into these halls—will not control inner sanctums of the White House, at the very least without a major battle at the polls.

EXACTLY WHAT IS THE PRESIDENT'S RECORD?

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, Sunday's debate suggests that President Reagan is somewhat confused about his record.

Contrary to President Reagan's denial, the record shows that in 1983 he asked Congress to cut $19.4 billion from medicare by increasing premiums and cutting benefits of recipients.

Again, contrary to President Reagan's claim, in 1981 he asked Congress to approve a wide variety of reductions in Social Security including cuts for those retiring at age 62, a one-third reduction for the disabled, and elimination of the minimum benefit and student assistance. Over a 5-year period, these proposals would have cost recipients $82 billion.

President Reagan also was wrong when he claimed that he had slowed the rate of increase in poverty. In fact, the rate of people falling below the poverty line under President Reagan has been nearly twice as fast as in the previous administration. According to an Urban Institute study, President Reagan's budget cuts alone accounted for 560,000 persons falling into poverty—325,000 of them were children.

Mr. Speaker, when President Reagan announced his intention to seek a second term, he said he would run on his record. After Sunday's debate, he would be well advised to find out exactly what his record is.

THE PRESIDENT'S MEMORY IS FAULTY

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, I am proud of Fritz Mondale and his concern for the elderly which he has shown all of his life in legislation and as Vice President of the United States. In the debate Sunday, Walter Mondale told the truth. Ronald Reagan proposed cuts, much of which passed, after he asked the American people to solicit their Congressmember's votes, his budget proposals.

Ronald Reagan's cuts in medicare, which meant more out-of-pocket expenses for the elderly were passed. Ronald Reagan does not remember his Social Security cuts, but the 75- to 90-year-old women who had their minimum benefit cut from $122 a month to $88 a month remember. Mr. Reagan may not remember the cuts he recommended for women who were head of households who had their children's educational benefits cut, but they will.

Ronald Reagan may not know that he cut housing for the elderly astronomically, he cut it in half, but the elderly in this country who are on a waiting list for safe and decent housing will remember.

Mr. Speaker, Walter Mondale was telling the truth and the elderly know this. That is why Vice President Mondale won the debate Sunday.

MAJOR CORPORATIONS PAY LESS IN TAXES THAN AVERAGE FAMILY

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, we are informed that a House-passed bill boosting the Federal Government's borrowing authority by another $250 billion—to $1.823 trillion, enough to cover Government needs through next

September—is stalled in the other body.

Unless the debt limit is raised, the Federal Government will have no authority to continue borrowing the $21 million an hour the Federal Government needs to make up the difference between taxes and spending.

Over the weekend, the Associated Press reported nationwide that 128 large, profitable U.S. corporations paid no Federal income tax in at least 1 of the last 3 years. Those 128 American corporations earned profits of $56.7 billion from U.S. operations during 1981, 1982, and 1983.

In 1983 alone 130 major U.S. corporations earned profits totaling $45 billion, but paid less than the 12 percent paid by the average family.

Many of the companies actually paid less than no tax—legally taking advantage of the Federal tax system to gain refunds totaling $5.7 billion, according to a report by Citizens for Tax Justice.

It's no wonder our taxpaying constituents keep on asking us in Congress to do something to cause the big corporations to pay their fair share of taxes.

DEBATE BRINGS DEMOCRATS BACK TO MONDALE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, at least one thing we can say about the debate, it has brought the Democrats back to Walter Mondale. Before, they were all running away from him. Now they are evidently going to be running with him, and I hope that is true.

Because we ought to have a vote this November on whether you want to raise spending, whether you want to raise taxes, whether you are not concerned about maintaining the strong national defense push that the President embarked on when he got here.

We like to talk about the deficit, evidently that is Mr. Mondale's big line; the big issue he is going to talk about. So let us just look at the National Taxpayers Union rating, which rates every single vote of every single Member that impacts on spending at all and it shows consistently where the big spenders are: In Walter Mondale's camp. In fact, those of the ones who wanted Walter Mondale to run. Those are the ones who wanted Walter Mondale and those are the ones most vociferous in selecing Walter Mondale.

So the election is not going to be based on some debate over who looked best, but on where you stand on the issues.

Mr. Mondale made one thing perfectly clear the other night, and that is his answer is not that we are spending too much but that we are taxing too little. The President has a different approach. In November, we will make the decision. I think the American people will make the proper decision.

POPE JOHN PAUL II TO VISIT PUERTO RICO

(Mr. CORRADA asked and was given permission to address the House for 1 minute.)

Mr. CORRADA. Mr. Speaker, this Friday for the first time in the history of Puerto Rico, His Holiness, Pope John Paul II, will be visiting us.

The entire people of Puerto Rico will welcome him warmly, not just the majority of Catholics on the island but all Christians as well as men of good faith. Pope John Paul II is a champion of justice and peace, and we are honored in the Island of Puerto Rico, a part of the United States, to have this great man visit us on Friday, and we will welcome him wholeheartedly to Puerto Rico.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 5745

Mr. CORRADA. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 5745.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Puerto Rico?

There was no objection.

DEMOCRATS RESIST SPENDING CUTS

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, I continue to be amazed at the concern of my democratic colleagues about the deficit. And yet at every opportunity they have had over the past 2 years to cut spending, they voted to raise it or opposed opportunities for reduced spending. On 18 key amendments, a vast majority of the Democrats voted to raise spending. Whether it was the Science Foundation authorization, where we had a little amendment just to cut $50 milion out of it, 139 Republicans voted to cut it, and only 11 Democrats voted to cut it. Whether it was transportation appropriations; or whether it was opportunities to cut some of these appropriations bills just by 4 percent, or some percent, across the board, the Democrats always voted against reducing spending.

Now, on the matter of Sunday's debate. Mondale has continued to espouse the same old, tired, tried, and failed policies of the Democratic left: Raise taxes and more spending for every conceivable social program. And his campaign manager after the debate said that they would do just that; take those taxes that would be raised and spend them in more programs throughout the country that we really don't need.

PRESIDENT QUESTIONS CBO FIGURES

(Mr. ANTHONY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANTHONY. Mr. Speaker, the other night during the debate, President Reagan denounced and said that he did not believe the figures from CBO, the bipartisan Congressional Budget Office.

I can understand that he would deny that, but the other day David Stockman, his own appointee to OMB, the Office of Management and Budget, testified before the Ways and Means Committee. I asked directly to Mr. Stockman: Can we grow our way out of the deficits by 1989? His response was, Mr. President: "We can grow our way out of poverty. We cannot grow our way out of the deficit."

Mr. President, you cannot do anything about Rudy Penner, but you can fire David Stockman and get somebody in there you can believe.

REAGAN-BUSH ADMINISTRATION DESERVES CREDIT FOR RECOVERY

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, millions of Americans watched the debate Sunday night, as all of here did. We saw the statistics fly back and forth and today we see the House Members again arguing about the numbers.

A lot of questions have been asked this morning. What did Ronald Reagan propose, what was actually enacted? What was Reagan's record, what was Mondale's record? But when all the smoke clears, when all the statistics are put aside, the central question remains: What kind of a Nation were we in 1980, after 4 years of the Carter-Mondale administration, and what kind of Nation are we today in 1984, after 4 years of the Reagan-Bush administration?

In 1980, I saw a nation in deep trouble. We were heading for economic disaster. We were a nation adrift, without traditional values. We had suffered a loss of respect worldwide, and negativism and frustration characterized the American people.

Today in 1984, after 4 years of the Reagan administration, I see a nation undergoing the greatest economic recovery in 40 years. I see a nation that has restored some of its basic values. I see a nation that has gained the re-

spect of the world's nations and I see a people full of hope and optimism and looking forward to the future.

I think the President deserves a great deal of credit for this and that is why the American people will overwhelmingly send him back for another 4 years in the White House.

ROCKY I, II, AND III

(Mr. MARKEY asked and was given permission to address the House for 1 minute.)

Mr. MARKEY. Mr. Speaker, on Sunday we saw Rocky I, as Walter Mondale went toe-to-toe with Ronald Reagan, and the President's men may be correct when they say that Fightin' Fritz did not score a knockout punch but he certainly staggered Mr. Reagan.

This Thursday night we are going to be Rocky II when GERALDINE FERRARO knocks out GEORGE BUSH, and on October 21 in Kansas City we are going to see Rocky III when Walter Mondale finally knocks out the champ.

□ 1230

MONDALE REDUCTION IN MEDICARE

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we have heard Walter Mondale's legislative team out here defending his record and defending the proposals he put forward the other night, I suppose including his deficit reduction proposal, since we heard so much talk about deficits.

In one of the most analyzed exchanges in that debate the other night, Walter Mondale criticized the President for proposing medicare cuts, and guess what? I have here a copy of Walter Mondale's deficit reduction plan, and it calls for a $12 billion reduction in medicare.

How can that be? Wonder of wonders. This man who criticized the President for proposing medicare cuts is proposing medicare cuts himself to the tune of $12 billion?

Is Walter Mondale not even familiar with his own deficit reduction plan?

GOOD NEWS ON EMPLOYMENT

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and exchange his remarks.)

Mr. GEKAS. Mr. Speaker and Members of the House: The gentleman from Indiana quite properly enunciated the good news that the people of the United States have been hearing for the last 4 years. That is underscored when we recognize that the latest statistics that have come out on employment and unemployment show that in the month of September thousands of more Americans went back on the employment rolls or found new jobs. At the same time, unemployment went down.

It was not too long ago, ladies and gentlemen and Members of the House, that people are taking the well of the House to criticize the President of the United States and to blame him for the then climbing unemployment and the lowering of the employment rolls, They laid the blame for that at the President's feet.

In now, in October of 1984, the trend is just the reverse and the economic recovery is growing every minute of the day, so to speak, then it is now to be intellectually honest and give the President credit for the highest number of people ever employed in the history of the United States, unemployment going down, and the cycle of economic growth steadily going up.

THE DIFFERENCE BETWEEN BONDAGE AND FREEDOM

(Mr. HUNTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUNTER. Mr. Speaker, on the 24th and 25th of October, students at many universities around the country will have the opportunity to debate the difference between bondage and freedom, because on the 25th of October, approximately 100 medical students from Grenada will be appearing at colleges and universities across the Nation to let America's students know what it was like to be rescued by President Ronald Reagan.

There will also be a cable documentary followed by a live call-in show on the 24th and 25th of October. We invite universities across the Nation to join with us in celebrating decisive action by a strong President who rescued 599 American citizens.

THE REAGAN PLAN IS WORKING

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, although the debater arguing for high taxes was unable to convince his audience that he has a real plan for the future, some partisans and a couple of newsmen whose bias has been evident for years tried to carry the ball for him after the debate. With their greater experience in molding public opinion, and admitted talent in that dubious activity, they probably enjoyed more success than he.

What they chose to ignore is the fact that the present administration not only has a plan, a good one and possibly the best for all Americans at this time in our history, but one that is already at work.

That plan is not a mix of mishmash and political rhetoric hashed up to promote the ambitions of a poor finisher in past political battle, which attempts to raise longtime complaints about his own policies and to place them at the door of the party in power.

Who did the most to create the specter of deficit? And whose policies of high taxes have failed time and again?

Those elements of today's Democrat philosophy have been proven wrong—by Democrats themselves—as well as by the effective work of this administration.

The Reagan plan, the Republican plan today, is one that is growing and developing with positive force for good—for all Americans and America—a plan for the future, as President Reagan described in the debate: a plan for the future built on the effective action of the past 4 years as well as the foundation of good, common sense which has demonstrated the worth of principles dating back to the founding of this Nation and beyond. That plan calls for lower, not higher taxes; for growth, not stagnation; for the expansion of the job market, instead of the recession the last administration left us with.

I don't want even to seem to be trying to claim all the credit for the Reagan administration. The credit is due the American people who have made the plan work to date. If there is any credit due the administration it is because this administration has the good sense to urge the people to continue counting gains and to build on the benefits of hard won improvement in our growth, not only ourselves, but for the entire world.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following message from the Clerk of the House of Representatives:

WASHINGTON, DC,
October 9, 1984.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit a sealed envelope received from the White House at 3:05 p.m. on Monday, October 8, 1984 and said to contain H.R. 1362, an Act for the relief of Joseph Karel Hasek, and a veto message thereon.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

A BILL FOR THE RELIEF OF JOSEPH KAREL HASEK—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-274)

The SPEAKER pro tempore laid before the House the following veto message from the President of the United States.

To the House of Representatives:

I am returning herewith H.R. 1362, a bill for the relief of Joseph Karel Hasek.

I am sympathetic to the plight of hundreds of thousands of individuals who have fled the tyranny of communist rule imposed after World War II upon countries of eastern Europe and whose property has been confiscated by those governments. The United States government over the years has been successful in providing some measure of relief to some of these individuals by providing for the adjudication of these claims by the Foreign Claims Settlement Commission of the United States and by the negotiation of agreements with the offending governments to obtain funds for at least partial payment for such losses. The most recent example is the claims settlement agreement reached with the Government of Czechoslovakia by this Administration which has provided substantial although not full restitution for American citizens with valid claims against Czechoslovakia under international law. Such agreements have been possible only through adherence by the United States to the rule of international law that a government may only espouse such claims against a foreign government where American-owned property has been expropriated.

In 1958 the Foreign Claims Settlement Commission of the United States was authorized to determine the validity and amount of claims by United States citizens against the Government of Czechoslovakia caused by the confiscation of property owned at the time by United States nationals. Joseph Karel Hasek along with over 4,000 other claimants submitted claims to the Commission. After careful consideration the Commission was required to deny his claim due to the failure of Mr. Hasek to establish that any property owned by him was expropriated at a time when it was owned by a United States national. Mr. Hasek's claim was one of many denied on similar grounds. The Commission completed this program, and in 1962 all of its decisions became final and not subject to further review.

This bill would allow Mr. Hasek, but none of the others in like circumstances, to reopen his claim despite the termination of the program.

This bill directs that Mr. Hasek's claim be considered as valid despite the fact that it is not a valid claim for the United States to espouse under international law and the long-standing policy of the United States government. It seeks to provide special relief for one individual while ignoring the many thousands of United States citizens of Polish, Czechoslovakian, Yugoslavian, Bulgarian, Romanian, Hungarian, and German heritage who have suffered like losses but have been denied relief in a number of claim programs because their property was not expropriated at a time when it was owned by a United States national.

Finally, the bill would require payment to Mr. Hasek, who did not qualify for compensation, through the transfer to him of funds expressly obtained and set aside to compensate those American citizens who were claimants and did establish meritorious claims against Czechoslovakia for the confiscation of American-owned property. These claimants will therefore receive even less by way of restitution for their losses.

This result fails the elemental test of fairness and equity to thousands of American citizens who have suffered losses as egregious as those suffered by Mr. Hasek. I therefore have withheld my approval from H.R. 1362.

If relief is warranted in the case of Mr. Hasek, it centers on the beneficiary's claim that new evidence is available that was not available prior to the statutory expiration of the Czechoslovakian claims review in 1962. Accordingly, I would be willing to consider alternative relief legislation which would afford Mr. Hasek another review of the available evidence. I have directed my Administration to work with the Congress to consider such alternatives.

RONALD REAGAN.

THE WHITE HOUSE, *October 8, 1984.*

The SPEAKER pro tempore. The objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

The Chair recognizes the gentleman from Texas [Mr. SAM B. HALL, JR.].

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the veto message of the President, together with the accompanying bill, H.R. 1362, be referred to the Committee on the Judiciary.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

A WALK DOWN MEMORY LANE

(Mr. KASICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KASICH. Mr. Speaker, maybe we ought to take a walk down memory lane. Let us go back to when Gerry Ford left the Office of the Presidency. Inflation in January of 1977 was 4.[illegible] percent; interest rates were 6.5 per cent; and unemployment was 7.5 per cent.

What were those rates when Ronald Reagan took office? That inflation rate that was 4.8 percent under Gerry Ford became 12.4 percent; the interest rates that were 6.5 percent became 21.5 percent; and the unemployment stayed the same.

Where has it gone under Ronald Reagan? That inflation that reached 12.4 percent under Jimmy Carter is presently about 4 percent; the interest rates which reached 21½ percent are now 12¾ percent; and the unemployment is lower today than it was when Jimmy Carter left office.

The simple fact of the matter is, if you look at the record, the record is clear: Do we go forward and make further gains in this economy or do we go backwards to the Carter-Mondale administration?

AUTHORIZING USE OF ROTUNDA ON JANUARY 21, 1985, BY JOINT CONGRESSIONAL COMMITTEE ON INAUGURAL CEREMONIES

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 144) authorizing the rotunda of the U.S. Capitol to be used on January 21, 1985, in connection with the proceedings and ceremonies for the inauguration of the President-elect and the Vice President-elect of the United States, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 144

Resolved by the Senate (the House of Representatives concurring), That the rotunda of the United States Capitol is hereby authorized to be used on January 21, 1985, by the Joint Congressional Committee on Inaugural Ceremonies in connection with the proceedings and ceremonies conducted for the inauguration of the President-elect and the Vice President-elect of the United States. Such Committee is authorized to utilize appropriate equipment and the services of appropriate personnel of departments and agencies of the Federal Government, under arrangements between such Committee and the heads of such departments and agencies, in connection with such proceedings and ceremonies.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 5121, VIRGINIA NATIONAL FOREST WILDERNESS ACT OF 1984

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 609 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 609

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House, without intervening motion, a motion to take from the Speaker's table the bill (H.R. 5121) to designate certain national forest system lands in the State of Virginia as wilderness, and for other purposes, together with the Senate amendment thereto, and to concur in the Senate amendment. Said amendment shall be considered as having been read, and the previous question shall be considered as ordered on the motion to final adoption, without intervening motion.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], for purposes of debate only, and pending that I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for consideration in the House of a motion to take from the Speaker's table the bill (H.R. 5121), the Virginia National Forest Wilderness Act of 1984, together with the Senate amendment thereto, and to concur in the Senate amendments to the bill.

Mr. Speaker, since the motion to concur in the Senate amendment is offered in the House, it will be considered under the 1-hour rule. Under the precedents, the time is controlled by the gentleman making the motion but, by custom, half of the time is yielded for debate to the minority.

The rule provides that the amendment will be considered as read. The amendment has been available in printed form for at least 3 days. The previous question will be considered as ordered. As a result, at the conclusion of debate, there is an up-or-down vote on the bill, as amended by the Senate, and when passed the measure will be cleared for the President's signature.

Mr. Speaker, H.R. 5121 originally passed the House on May 8, 1984, by a vote of 376 to 20 under suspension of the rules. On October 4, 1984, the Senate passed S. 2805 with an amendment.

Mr. Speaker, the Senate amendment contains additions that are not in the House-passed bill and makes technical changes. S. 2805 would add 40 more acres to the James River Face Wilderness addition for a total of 200 acres. It also provides for the Secretary of Agriculture, in consultation with the Environmental Protection Agency and the State of Virginia, to evaluate and report to Congress within 2 years after enactment of the bill on the effects of air quality of the proposed industrial development site at Covington, VA, and on the locations designated as wilderness study areas.

Finally, Mr. Speaker, the Senate amendment would add a provision to the effect that Congress does not intend that the designation of wilderness areas in Virginia will lead to the creation of protective perimeters or buffer zones around such wilderness areas and the fact that nonwilderness activities or uses can be seen or heard from wilderness areas will not preclude such activities or uses up to the boundary of the wilderness areas.

Mr. Speaker, this is not an unusual procedure for consideration of Senate amendments to a House bill, but the fact that we are nearing the end of this Congress requires that we consider this legislation in this fashion.

□ 1240

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the first of four closed rules the House will consider today. This resolution provides for a motion to take the Virginia wilderness legislation from the Speaker's table and concur in the Senate amendment without intervening motion.

This process will mark the second time the House is being forced to consider the Virginia wilderness legislation without the opportunity for amendments, and the House should not be stampeded in this manner.

Mr. Speaker, this bill was originally considered in the House last May under our suspension of the rules procedure, and various Members were prevented from offering amendments at that time.

Last Friday, the Committee on Rules turned down two requests for open rule. So here we are, on the eve of adjournment, once again preventing Members from offering amendments to the bill.

Mr. Speaker, the Virginia wilderness legislation designates some 55,984 acres as wilderness and sets aside another 25,075 acres as wilderness study areas.

Mr. Speaker, this is a closed rule, pure and simple. It allows for very limited debate, and it prevents Members from offering amendments. I do not think the House should adopt this rule.

Mr. Speaker, I have no requests for time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 6163, FEDERAL DISTRICT COURT ORGANIZATION ACT OF 1984

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 606 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 606

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House, without intervening motion, a motion to take from the Speaker's table the bill (H.R. 6163) to amend title 28, United States Code, with respect to the places where court shall be held in certain judicial districts, and for other purposes, together with the Senate amendments thereto, and to concur in the Senate amendments. Said amendments shall be considered as having been read, and the previous question shall be considered as ordered on the motion to final adoption, without intervening motion.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], for purposes of debate only, and pending that, I yield myself such time as I may use.

Mr. Speaker, the resolution provides for consideration in the House of a motion to take from the Speaker's table the bill (H.R. 6163), the Federal District Court Organization Act of 1984, together with the Senate amendments thereto, and to concur in the Senate amendments to the bill.

Mr. Speaker, since the motion to concur in the Senate amendments is offered in the House, it will be considered under the 1 hour rule. Under the precedents, the time is controlled by the gentleman making the motion but, by custom, half of the time is yielded for debate to the minority.

The rule provides that the amendment will be considered as read. The amendment has been available in printed form for 4 days. The previous question will be considered as ordered. As a result, at the conclusion of debate, there is an up-or-down vote on the bill, as amended by the Senate, and if passed, the bill will be cleared for the President's signature.

Mr. Speaker, the Senate amendments constitute a comprehensive package of patent, trademark, and court bills attached to a technical court bill. This measure incorporates a number of matters, almost all of which have passed the House in other forms.

Mr. Speaker, one dispute in the Rules Committee was on whether or not to permit a separate vote on title 2, the State Justice Institute. Since there has already been a 243-to-176 House vote on that matter, we did not

consider that necessary or appropriate at this stage in the session. However, of course, the House will now make the final determination on our recommendation.

Although I am aware of that concern, I think there is general agreement that matters in this bill are vital and must be considered promptly.

Title 1 is very similar to H.R. 6285, which was passed by the House on a voice vote October 1. This bill, in the words of the able chairman of the subcommittee [Mr. KASTENMEIER], "clarifies the trademark law and acts to reestablish its basic principles * * *." I would commend the gentleman for his prompt action to defend our legislative prerogatives and to reassert existing law over the court decision that prompted this legislation under this rule. The House concurs with the minor change of the Senate, which is entirely consistent with the legislative intent of the House, as ably explained by the gentleman from Wisconsin here last week.

Title 2 is similar to H.R. 4145, the State Justice Institute which was considered by the House on May 22. The vote was 243 to 176. Although that was insufficient under the suspension procedure, it demonstrates the strong bipartisan support for this initiative to improve the State court systems. Most of the opposition to the bill was on fiscal grounds, and the Senate amendment addresses those concerns.

Title 3 is virtually identical to H.R. 5525, the Semiconductor Chip Protection Act, which passed the House 388 to 0. Needless to say, it is an outstanding piece of legislation. I strongly commend the committee for the manner in which this vital matter has been addressed. The gentleman from Wisconsin has exhibited real leadership in addressing this difficult technological and legal issue.

Title 4 includes three court reform measures already passed by the House, H.R. 5645 and H.R. 6163, which passed the House by voice vote, and H.R. 4222, which passed the House by unanimous consent. The second measure makes adjustments in judicial districts and places of sitting. In the Rules Committee hearing, it was the subject of an eloquent plea by the distinguished gentleman from Texas, Mr. DE LA GARZA. The committee is particularly delighted to be able to accommodate the able gentleman in his tireless efforts on behalf of this concern in his district.

Mr. Speaker, title 5 of the bill is a substantial revision of H.R. 5003, a bill reported to the House by the Committee on Science and Technology. The bill, as modified, provides a cautious approach to allow small business and nonprofit institutions to benefit from certain Government patents. I am advised that most of these are in the energy area, and that the Secretary of Energy believes the amendment provides a reasonable framework within which he can balance public interests.

The distinguished chairman of the Committee on Energy and Commerce appeared before the Rules Committee and voiced some concern about this title. After extensive consultation between the appropriate committees. The gentleman from Michigan agreed not to object to the request for a rule.

I would like to commend the gentleman for his diligence and his cooperation. We are at a point in the session which requires considerable vigilance, and the Rules Committee greatly appreciates this kind of guidance on the details of legislation rushing past us.

Mr. Speaker, the rule is not unusual. The committee considers the procedure necessary. However, I want to stress again that the bill is important and virtually every component has been developed in a very fair and open manner, and has been subject to the full legislative process in this Chamber.

Mr. Speaker, I urge adoption of the rule to permit the House to deal with these vital matters.

□ 1250

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman for yielding the customary time.

Mr. Speaker, House Resolution 606 is the rule designed to speed consideration and eventually to pass this package of bills which the other body attached to H.R. 6163, the Federal District Court Organization Act.

The Committee on Rules concocted this rather unique arrangement last Friday and the House is being asked to ratify the rule and the package itself here today. Despite the fact that there are some very important items in this package, I am opposed to the rule and urge the House to defeat the rule.

Mr. Speaker, there are seven apples in this little basket brought to us by the Committee on the Judiciary. Six of them could well be described as Golden Delicious. Nobody objects and everybody just cannot wait to bite down on them.

They make very important changes in the areas of patent and trademark law, patent protections for semiconductor chips, procedural orders for the handling of civil cases, boundary changes for three U.S. district courts, the operation of the U.S. District Court of Appeals for the Federal Circuit, and patent policy toward research and development of science and technology.

All of those titles to the bill, added together by the other body, make it a very nice set of apples. However, there is one spoiled apple in the basket.

Mr. Speaker, last May this House defeated a bill creating something called the State Justice Institute. The idea was to set up a nonprofit organization that would make grants to the States in order to help them improve their State judicial systems. Now, that is at a time when we do not have adequate jail systems. It is at a time when local sheriffs and police departments cannot get assistance to do their jobs in really dealing with crime and preventing crime. And yet, we are going to set up an institute with grants to help State judicial systems. It makes no sense at all and the House spoke on that. The House defeated that bill under the suspension of the rules process and we thought we had heard the last of it; but this spoiled apple is in this basket, Mr. Speaker.

The other body added this bill to the package it has wrapped together around H.R. 6163 and the rule forces the House to take the whole process, the whole package, when it takes the other apples.

I do not believe this is proper legislative procedure, so I am asking that the rule be defeated.

Mr. Speaker, our colleagues know that this is the last day of the session. I guess since these remarks were prepared maybe there have been some changes on that. We may have many more days of this session before it is over, so there is no need to put all these things in this one package. At least some of us hope to wrap this thing up in the next day or two. But when we proceed in this manner, we are abusing the procedures and the rules of the House.

I am not going to insist on a recorded vote because I know there are some Members who are not here and still cannot get back here; but when we create this process where we take a bill that the House defeated on suspension and put it in with some very other deserving pieces of legislation, it is a bad way to do business.

Mr. KASTENMEIER. Mr. Speaker, would the gentleman from Mississippi yield?

Mr. LOTT. Mr. Speaker, I would be glad to yield to the gentleman from Wisconsin for a question or a comment.

Mr. KASTENMEIER. Mr. Speaker, insofar as it would appear that the gentleman has characterized this as brought to the Rules Committee by the Judiciary Committee, that we are imposing this package on the House, we have not. This was passed by the Senate in precisely this form. We would have preferred to deal with each piece of legislation as we did individually, but we are confronted with the present situation. It is not something we of our own volition are imposing on the House of Representatives.

Mr. LOTT. Mr. Speaker, this is one time I am willing to absolve the Judiciary Committee of being responsible

for the problem that we have before us. It was created by the other body. I acknowledged that. I said it in my remarks, and I think we should put it at their doorstep. But, of course, the Rules Committee could have made in order an amendment that would have deleted that State Justice Institute. In fact, it was tried in the Rules Committee and was not made in order. But I accept the gentleman's comments.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 999, AMERICAN CONSERVATION CORPS ACT OF 1983

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 608 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 608

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House, without intervening motion, a motion to take from the Speaker's table the bill (H.R. 999) to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes, together with the Senate amendment thereto, and to concur in the Senate amendment. Said amendment shall be considered as having been read, and the previous question shall be considered as ordered on the motion to final adoption, without intervening motion.

The SPEAKER pro tempore (Mr. ANTHONY). The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], pending which I yield myself such time as I may consume.

Mr. Speaker, the rule before the House provides for the consideration of the bill, H.R. 999, the American Conservation Corps Act of 1983, with a Senate amendment thereto.

Under the procedure provided for in the rule, after the rule's adoption, a motion would be in order to take the bill from the Speaker's table and concur in the Senate amendment. The Senate amendment would be considered as having been read. The motion would be debatable in the House under the hour rule, the time being controlled by the Member who offers the motion. As is customary in such a situation, half the time allotted would be yielded for purposes of debate only to the ranking minority member of the relevant committee. The previous question shall be considered as having been ordered on the motion to final adoption.

The effect of this rule is to give the House the opportunity to take a straight up-or-down vote on the Senate amendment in the nature of a substitute. No amendment to that amendment would be in order.

Mr. Speaker, H.R. 999 was passed by the House on March 1, 1983, by a vote of 301 to 87. The bill was subsequently passed by the Senate last week, on October 3, 1984, with an amendment in the nature of a substitute that would be subjected to a vote of the House under the rule before us.

The bill would establish an American Conservation Corps. American citizens between the ages of 16 and 25 would make up the corps and be charged with carrying out conservation, rehabilitation, and improvement projects on public and Indian lands. I know that all of my colleagues are well aware of the accomplishments which were achieved by the old Civilian Conservation Corps. That program provided employment for more than 2½ million Americans, many of whom would otherwise have been destitute. It resulted in the completion of countless public works projects, the benefits of which are still evident today.

Mr. Speaker, we, again, with this bill have the potential not only to eliminate a substantial backlog of needed conservation, rehabilitation, and improvement projects for our Nation's public lands, but also to provide the opportunity for our Nation's youth to gain work experience that will be a benefit to them for the rest of their lives.

Mr. Speaker, the legislation authorizes the appropriation of $75 million in fiscal year 1985 and $100 million in fiscal year 1986 for the establishment of the program, money which I am sure my colleagues will agree would be well spent and which would produce benefits for our generation and for generations to come.

Mr. Speaker, I yield now 30 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is the third of four closed rules the House will consider today. The rule provides for a motion to take the American Conservation Corps legislation from the Speaker's table and to concur in the Senate amendment without intervening motion.

When the House passed H.R. 999 in early March of last year, it authorized $300 million annually for a youth employment program patterned after the Civilian Conservation Corps of the 1930's.

The other body amended the bill to reduce the funding levels to $50 million in fiscal 1983, $75 million in fiscal 1986, and $100 million in fiscal 1987.

Mr. Speaker, despite the amendments made by the other body, the administration still opposes this bill because:

The 3-year cost of $225 million is unjustifiably high;

The program duplicates other youth employment efforts;

The jobs to be created are not sufficiently targeted to the most needy youth; and

The jobs to be created will not provide adequate skills for the youths to use for other jobs.

Mr. Speaker, under this rule, there will be no opportunity for Members to offer amendments to the bill. It is a take-or-leave-it situation, one that short-circuits the legislative process.

Despite the wide support this bill received when it first passed the House, I ask our colleagues to remember that the House action took place over 19 months ago. Now, we are asked to take what the other body sends us.

□ 1300

Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, we have no requests for time either, and I urge the adoption of the rule.

I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF S. 2565, HUMAN SERVICES REAUTHORIZATION ACT

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 607 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 607

Resolved, That upon the adoption of this resolution it shall be in order to take from the Speaker's table the bill (S. 2565) to extend programs under the Head Start Act, and for other purposes, and to consider the bill in the House, and all points of order against the consideration of the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. The following amendment shall be considered as pending: "Strike out section 502". Debate on the bill and on the amendment shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority members of the Committees on Education and Labor and Energy and Commerce. The previous ques-

tion shall be considered as ordered on the amendment and on the bill to final passage without intervening motion except one motion to commit.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. WHEAT] is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 607 provides for consideration of S. 2565. A bill which extends programs under the Head Start Act. All points of order against the bill for failure to comply with section 402(a) of the Budget Act are waived. Section 402(a) is the rule which prohibits consideration of authorizations which have not been reported by May 15 preceding the beginning of the fiscal year for which the authorization becomes effective. The waiver was considered necessary because S. 2565 was reported in the Senate on May 24 and in addition, several of the authorizations in the bill were not reported in the House by the May 15 deadline.

Upon adoption of the resolution, it shall be in order to take the bill from the Speaker's table and to consider the bill in the House. An amendment which strikes out section 502 of the bill shall be considered as pending when the bill is called up. Section 502 provides authorizations for a research center at the University of Utah which will examine the health effects of nuclear energy and other new energy technologies. Section 502 would normally fall under the jurisdiction of the Committee on Energy and and Commerce, and the amendment to strike was made in order at the request of the distinguished chairman of that committee, Mr. DINGELL.

Debate on the bill and amendment shall continue for a period not to exceed 1 hour. To be equally divided and controlled by the chairmen and ranking minority members of the Committees on Education and Labor and Commerce.

The previous question shall be considered as ordered on the amendment and the bill without intervening motion except one motion to commit.

In effect, this rule simply allows 1 hour of debate in the House followed by a vote on the amendment and then a vote on final passage of the bill. No other amendments or motions would be in order.

Mr. Speaker, S. 2565 extends authorizations for the Head Start Program. Although the House passed H.R. 5885, a measure which would have extended Head Start, the Senate failed to enact an authorization until last Thursday.

In order to reauthorize Head Start programs. The House has to proceed in an expeditious manner. We are expecting the House to adjourn in the next few days and this bill is the only vehicle by which the programs can be extended.

Mr. Speaker, we all understand the importance of extending the Head Start Program. Further, there is a need to consider this measure as quickly as possible. I urge my colleagues to adopt the rule so that we may proceed to consideration of this important measure.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 607 is essentially also a closed rule that provides for consideration of a bill from the other body to authorize a whole series of education and welfare programs and projects, several of which the House has not yet seen before today.

The Committee on Rules did not even have a copy of the bill while we were considering it, and got it at the last minute just before we were asked to vote on this rule for the bill, S. 2565.

We heard this testimony last Friday and in very brief fashion. As I said, we barely even got a chance to look at the copy, let alone go through it and see what all this closed rule provides.

It provides that one amendment and only one amendment shall be considered as pending. Otherwise the bill made in order by this rule is not amendable unless the majority floor manager yields for that purpose.

This rule is a mockery of the legislative process. It presents to the House a bill that contains totally new authorizations which have not undergone the committee hearing and reporting process, and it should be defeated.

The bill reauthorizes for 2 years the Head Start and Follow Through Programs. It reauthorizes the Community Services block grants and the Low Income Energy Assistance and Native American Programs.

Those are all fairly straightforward reauthorizations and they are generally for a shorter period of time and at lower costs than originally approved by the House.

As a supporter of the Head Start and Follow Through Programs I was tempted to sit quietly by and watch 49 pages of legal sized paper sail through this House. Again, we are in a bind here in these last hours of our session to be asking for votes on this rule. But I have to keep reminding the House on each one of them we are abusing the rule of the House and we should not be going forward in his way.

We attempted to find out what else was in this bill during our hearings in the Committee on Rules, but did not do a very good job of it because no one seemed to know for sure.

Now that we have had the weekend to read the bill we find several new grant programs. These include grants to the States for child care services, grants to the States for Federal merit and scholarships for high school students to attend college, and funding for special projects to build a Center for Excellence in Education at Indiana University, and to build a research center at the University of Utah.

How many universities and how many States across this country do you know that would like to have such a research center at their university; and yet they are in Indiana and Utah, and I suspect they are there because of some of my colleagues in the other body. But I do not feel comfortable with that at all. They just have a way of appearing in these bills and we make it impossible to get at them.

Mr. Speaker, given the lack of testimony about these new authorizations during our Rules Committee hearing last Friday I certainly cannot say today that they are indeed worthy ideas. We really may not know. Perhaps they are. But the legislative procedure being employed here does not give us much opportunity to look into them.

This rule says that an amendment to strike section 502 of the bill shall be considered as pending. The time for debate on that amendment is equally divided. So I am looking forward to finding out exactly what section 502 is and why it should be singled out in the bill when several other provisions of the bill have not been before the House during this session, and yet they are not subject to that type of consideration.

The rule prevents any other substantive amendments from being offered. It is a fast track procedure and it is designed to close off debate and hold down the number and type of amendments.

This procedure should not be used in the House and if it were any other day I would be demanding votes on each of these rules.

I oppose this rule and I suspect some of the substance in the bill, but we are not going to have much opportunity to really find out what the substance is.

I have no requests for time.

Mr. WHEAT. Mr. Speaker, I have no requests for time.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

Mr. WHEAT. Mr. Speaker, this is a meritorious program. As the gentleman from Mississippi points out, it is indeed unfortunate that the other body has seen fit to attach several other programs to this Headstart authorization legislation. But, in and of themselves, they are meritorious programs and demonstrably bring back more money to the Federal Government than they cost.

For that reason, I would encourage the adoption of the rule and the passage of the bill.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

FEDERAL DISTRICT COURT ORGANIZATION ACT OF 1984

Mr. KASTENMEIER. Mr. Speaker, pursuant to the provisions of House Resolution 606, I move to take from the Speaker's table the bill (H.R. 6163) to amend title 28, United States Code, with respect to the places where court shall be held in certain judicial districts, and for other purposes, with the Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 606, the Senate amendment is considered as having been read.

The text of the Senate amendments is as follows:

Strike out all after the enacting clause and insert:

TITLE I

SHORT TITLE

SEC. 101. This title may be cited as the "Trademark Clarification Act of 1984".

AMENDMENT TO THE TRADEMARK ACT

SEC. 102. Section 14(c) of the Trademark Act of 1946, commonly known as the Lanham Trademark Act (15 U.S.C. 1064(c)) is amended by adding before the semicolon at the end of such section a period and the following: "A registered mark shall not be deemed to be the common descriptive name of goods or services solely because such mark is also used as a name of or to identify a unique product or service. The primary significance of the registered mark to the relevant public rather than purchaser motivation shall be the test for determining whether the registered mark has become the common descriptive name of goods or services in connection with which it has been used".

DEFINITIONS

SEC. 103. Section 45 of such Act (15 U.S.C. 1127) is amended as follow:

(1) Strike out "The term 'trade-mark' includes any word, name, symbol, or device or any combination thereof adopted and used by a manufacturer or merchant to identify his goods and distinguish them from those manufactured or sold by others." and insert in lieu thereof the following: "The term 'trademark' includes any word, name, symbol, or device or any combination thereof adopted and used by a manufacturer or merchant to identify and distinguish his goods, including a unique product, from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown.".

(2) Strike out "The term 'service mark' means a mark used in the sale or advertising of services to identify the services of one person and distinguish them from the services of others." and insert in lieu thereof the following: "The term 'service mark' means a mark used in the sale or advertising of services to identify and distinguish the services of one person, including a unique service, from the services of others and to indicate the source of the services, even if that source is unknown.".

(3) Add at the end of subparagraph (b) in the paragraph which begins "A mark shall be deemed to be 'abandoned' ", the following new sentence: "Purchaser motivation shall not be a test for determining abandonment under this subparagraph.".

JUDGMENTS

SEC. 104. Nothing in this title shall be construed to provide a basis for reopening of any final judgment entered prior to the date of enactment of this title.

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "State Justice Institute Act of 1984".

DEFINITIONS

SEC. 202. As used in this title, the term—

(1) "Board" means the Board of Directors of the Institute;

(2) "Director" means the Executive Director of the Institute;

(3) "Governor" means the Chief Executive Officer of a State;

(4) "Institute" means the State Justice Institute;

(5) "recipient" means any grantee, contractor, or recipient of financial assistance under this title;

(6) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States; and

(7) "Supreme Court" means the highest appellate court within a State unless, for the purposes of this title, a constitutionally or legislatively established judicial council acts in place of that court.

ESTABLISHMENT OF INSTITUTE; DUTIES

SEC. 203. (a) There is established a private nonprofit corporation which shall be known as the State Justice Institute. The purpose of the Institute shall be to further the development and adoption of improved judicial administration in State courts in the United States. The Institute may be incorporated in any State pursuant to section 204(a)(6) of this title. To the extent consistent with the provisions of this title, the Institute may exercise the powers conferred upon a nonprofit corporation by the laws of the State in which it is incorporated.

(b) The Institute shall—

(1) direct a national program of assistance designed to assure each person ready access to fair and effective system of justice by providing funds to—

(A) State courts;

(B) national organizations which support and are supported by State courts; and

(C) any other nonprofit organization that will support and achieve the purposes of this title;

(2) foster coordination and cooperation with the Federal judiciary in areas of mutual concern;

(3) promote recognition of the importance of the separation of powers doctrine to an independent judiciary; and

(4) encourage education for judges and support personnel of State court systems through national and State organizations, including universities.

(c) The Institute shall not duplicate functions adequately performed by existing nonprofit organizations and shall promote, on the part of agencies of State judicial administration, reponsibility for the success and effectiveness of State court improvement programs supported by Federal funding.

(d) The Institute shall maintain its principal offices in the State in which it is incorporated and shall maintain therein a designated agent to accept service of process for the Institute. Notice to or service upon the agent shall be deemed notice to or service upon the Institute.

(e) The Institute, and any program assisted by the Institute, shall be eligible to be treated as an organization described in section 170(c)(2)(B) of the Internal Revenue Code of 1954 (26 U.S.C. 170(c)(2)(B) and as an organizaton described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) which is exempt form taxation under section 501(a) of such Code (26 U.S.C. 501(a)). If such treatments are conferred in accordance with the provisions of such Code, the Institute, and programs assisted by the Institute, shall be subject to all provisions of such Code relevant to the conduct of organizations exempt from taxation.

(f) The Institute shall afford notice and reasonable opportunity for comment to interested parties prior to issuing rules, regulations, guidelines, and instructions under this title, and it shall publish in the Federal Register, at least thirty days prior to their effective date, all rules, regulations, guidelines, and instructions.

BOARD OF DIRECTORS

SEC. 204. (a)(1) The Institute shall be supervised by a Board of Directors consisting of eleven voting members to be appointed by the President, by and with the advice and consent of the Senate. The Board shall have both judicial and nonjudicial members, and shall, to the extent practicable, have a membership representing a variety of backgrounds and reflecting participation and interest in the administration of justice.

(2) The Board shall consist of—

(A) six judges, to be appointed in the manner provided in paragraph (3);

(B) one State court administrator, to be appointed in the manner provided in paragraph (3); and

(C) four members from the public sector, no more than two of whom shall be of the same political party, to be appointed in the manner provided in paragraph (4).

(3) The President shall appoint six judges and one State court administrator from a list of candidates submitted to the President by the Conference of Chief Justices. The Conference of Chief Justices shall submit a list of at least fourteen individuals, including judges and State court administrators, whom the conference considers best qualified to serve on the Board. Whenever the term of any of the members of the Board described in subparagraphs (A) and (B) terminates and that member is not to be reappointed to a new term, and whenever a vacancy otherwise occurs among those members, the President shall appoint a new member from a list of three qualified individuals submitted to the President by the Conference of Chief Justices. The President may reject any list of individuals submitted by the Conference under this paragraph and, if such a list is so rejected, the President shall request the Conference to submit to him another list of qualified individuals. Prior to consulting with or submitting a list to the President, the Conference of Chief Justices shall obtain and consider the recommendations of all interested organiza-

tions and individuals concerned with the administration of justice and the objectives of this title.

(4) In addition to those members appointed under paragraph (3), the President shall appoint four members from the public sector to serve on the Board.

(5) The President shall make the intitial appointments of members of the Board under this subsection within ninety days after the effective date of this title. In the case of any other appointment of a member, the President shall make the appointment not later than ninety days after the previous term expires or the vacancy occurs, as the case may be. The Conference of Chief Justices shall submit lists of candidates under paragraph (3) in a timely manner so that the appointments can be made within the time periods specified in this paragraph.

(6) The intitial members of the Board of Directors shall be the incorporators of the Institute and shall determine the State in which the Institute is to be incorporated.

(b)(1) Except as provided in paragraph (2), the term of each voting member of the Board shall be three years. Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified.

(2) Five of the members first appointed by the President shall serve for a term of two years. Any member appointed to serve an unexpired term which has arisen by virtue of the death, disability, retirement, or resignation of a member shall be appointed only for such unexpired term, but shall be eligible for reappointment.

(3) The term of initial members shall commence from the date of the first meeting of the Board, and the term of each member other than an initial member shall commence from the date of termination of the preceding term.

(c) No member shall be reappointed to more than two consecutive terms immediately following such member's initial term.

(d) Members of the Board shall serve without compensation, but shall be reimbursed for actual and necessary expenses incurred in the performance of their official duties.

(e) The members of the Board shall not, by reason of such membership, be considered officers or employees of the United States.

(f) Each member of the Board shall be entitled to one vote. A simple majority of the membership shall constitute a quorum for the conduct of business. The Board shall act upon the concurrence of a simple majority of the membership present and voting.

(g) The Board shall select from among the voting members of the Board a chairman, the first of whom shall serve for a term of three years. Thereafter, the Board shall annually elect a chairman from among its voting members.

(h) A member of the Board may be removed by a vote of seven members for malfeasance in office, persistent neglect of, or inability to discharge duties, or for any offense involving moral turpitude, but for no other cause.

(i) Regular meetings of the Board shall be held quarterly. Special meetings shall be held from time to time upon the call of the chairman, acting at his own discretion or pursuant to the petition of any seven members.

(j) All meetings of the Board, any executive committee of the Board, and any council established in connection with this title, shall be open and subject to the requirements and provisions of section 552b of title 5, United States Code, relating to open meetings.

(k) In its direction and supervision of the activities of the Institute, the Board shall—

(1) establish policies and develop such programs for the Institute that will further the achievement of its purpose and performance of its functions;

(2) establish policy and funding priorities and issue rules, regulations, guidelines, and instructions pursuant to such priorities;

(3) appoint and fix the duties of the Executive Director of the Institute, who shall serve at the pleasure of the Board and shall be a nonvoting ex officio member of the Board;

(4) present to other Government departments, agencies, and instrumentalities whose programs or activities relate to the administration of justice in the State judiciaries of the United States, the recommendations of the Institute for the improvement of such programs or activities;

(5) consider and recommend to both public and private agencies aspects of the operation of the State courts of the United States considered worthy of special study; and

(6) award grants and enter into cooperative agreements or contracts pursuant to section 206(a).

OFFICERS AND EMPLOYEES

SEC. 205. (a)(1) The Director, subject to general policies established by the Board, shall supervise the activities of persons employed by the Institute and may appoint and remove such employees as he determines necessary to carry out the purposes of the institute. The Director shall be responsible for the executive and administrative operations of the Institute, and shall perform such duties as are delegated to such Director by the Board and the Institute.

(2) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the Institute, or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this title.

(b) Officers and employees of the Institute shall be compensated at rates determined by the Board, but not in excess of the rate of level V of the Executive Schedule specified in section 5316 of title 5, United States Code.

(c)(1) Except as otherwise specifically provided in this title, the Institute shall not be considered a department, agency, or instrumentality of the Federal Government.

(2) This title does not limit the authority of the Office of Management and Budget to review and submit comments upon the Institute's annual budget request at the time it is transmitted to the Congress.

(d)(1) Except as provided in paragraph (2), officers and employees of the Institute shall not be considered officers or employees of the United States.

(2) Officers and employees of the Institute shall be considered officers and employees of the United States solely for the purposes of the following provisions of title 5, United States Code: Subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civil service retirement); chapter 87 (relating to life insurance; and chapter 89 (relating to health insurance). The Institute shall make contributions under the provisions referred to in this subsection at the same rates applicable to agencies of the Federal Government.

(e) The Institute and its officers and employees shall be subject to the provisions of section 552 of title 5, United States Code, relating to freedom of information.

GRANTS AND CONTRACTS

SEC. 206. (a) The Institute is authorized to award grants and enter into cooperative agreements or contracts, in a manner consistent with subsection (b), in order to—

(1) conduct research, demonstrations, or special projects pertaining to the purposes described in this title, and provide technical assistance and training in support of tests, demonstrations, and special projects;

(2) serve as a clearinghouse and information center, where not otherwise adequately provided, for the preparation, publication, and dissemination of information regarding State judicial systems;

(3) participate in joint projects with other agencies, including the Federal Judicial Center, with respect to the purposes of this title;

(4) evaluate, when appropriate, the programs and projects carried out under this title to determine their impact upon the quality of criminal, civil, and juvenile justice and the extent to which they have met or failed to meet the purposes and policies of this title;

(5) encourage and assist in the furtherance of judicial education;

(6) encourage, assist, and serve in a consulting capacity to State and local justice system agencies in the development, maintenance, and coordination of criminal, civil, and juvenile justice programs and services; and

(7) be responsible for the certification of national programs that are intended to aid and improve State judicial systems.

(b) The Institute is empowered to award grants and enter into cooperative agreements or contracts as follows:

(1) The Institute shall give priority to grants, cooperative agreements, or contracts with—

(A) State and local courts and their agencies;

(B) national nonprofit organizations controlled by, operating in conjunction with, and serving the judicial branches of State governments; and

(C) national nonprofit organizations for the education and training of judges and support personnel of the judicial branch of State governments.

(2) The Institute may, if the objective can better be served thereby, award grants or enter into cooperative agreements or contracts with—

(A) other nonprofit organizations with expertise in judicial administration;

(B) institutions of higher education;

(C) individuals, partnerships, firms, or corporations; and

(D) private agencies with expertise in judicial administration.

(3) Upon application by an appropriate Federal, State, or local agency or institution and if the arrangements to be made by such agency or institution will provide services which could not be provided adequately through nongovernmental arrangements, the Institute may award a grant or enter into a cooperative agreement or contract with a unit of Federal, State, or local government other than a court.

(4) Each application for funding by a State or local court shall be approved, consistent with State law, by the State's su-

preme court, or its designated agency or council, which shall receive, administer, and be accountable for all funds awarded by the Institute to such courts.

(c) Funds available pursuant to grants, cooperative agreements, or contracts awarded under this section may be used—

(1) to assist State and local court systems in establishing appropriate procedures for the selection and removal of judges and other court personnel and in determining appropriate levels of compensation;

(2) to support education and training programs for judges and other court personnel, for the performance of their general duties and for specialized functions, and to support national and regional conferences and seminars for the dissemination of information on new developments and innovative techniques;

(3) to conduct research on alternative means for using nonjudicial personnel in court decisionmaking activities, to implement demonstration programs to test innovative approaches, and to conduct evaluations of their effectiveness;

(4) to assist State and local courts in meeting requirements of Federal law applicable to recipients of Federal funds;

(5) to support studies of the appropriateness and efficacy of court organizations and financing structures in particular States, and to enable States to implement plans for improved court organization and finance;

(6) to support State court planning and budgeting staffs and to provide technical assistance in resource allocation and service forecasting techniques;

(7) to support studies of the adequacy of court management systems in State and local courts and to implement and evaluate innovative responses to problems of record management, data processing, court personnel management, reporting and transcription of court proceedings, and juror utilization and management;

(8) to collect and compile statistical data and other information on the work of the courts and on the work of other agencies which relate to and effect the work of courts;

(9) to conduct studies of the causes of trial and appellate court delay in resolving cases, and to establish and evaluate experimental programs for reducing case processing time;

(10) to develop and test methods for measuring the performance of judges and courts and to conduct experiments in the use of such measures to improve the functioning of such judges and courts;

(11) to support studies of court rules and procedures, discovery devices, and evidentiary standards, to identify problems with the operation of such rules, procedures, devices, and standards, to devise alternative approaches to better reconcile the requirements of due process with the need for swift and certain justice, and to test the utility of those alternative approaches;

(12) to support studies of the outcomes of cases in selected subject matter areas to identify instances in which the substance of justice meted out by the courts diverges from public expectations of fairness, consistency, or equity, to propose alternative approaches to the resolving of cases in problem areas, and to test and evaluate those alternatives;

(13) to support programs to increase court responsiveness to the needs of citizens through citizen education, improvement of court treatment of witnesses, victims, and jurors, and development of procedures for obtaining and using measures of public satisfaction with court processes to improve court performance;

(14) to test and evaluate experimental approaches to providing increased citizen access to justice, including processes which reduce the cost of litigating common grievances and alternative techniques and mechanisms for resolving disputes between citizens; and

(15) to carry out such other programs, consistent with the purposes of this title, as may be deemed appropriate by the Institute.

(d) The Institute shall incorporate in any grant, cooperative agreement, or contract awarded under this section in which a State or local judicial system is the recipient, the requirement that the recipient provide a match, from private or public sources, not less than 50 per centum of the total cost of such grant, cooperative agreement, or contract, except that such requirement may be waived in exceptionally rare circumstances upon the approval of the chief justice of the highest court of the State and a majority of the Board of Directors.

(e) The Institute shall monitor and evaluate, or provide for independent evaluations of, programs supported in whole or in part under this title to ensure that the provisions of this title, the bylaws of the Institute, and the applicable rules, regulations, and guidelines promulgated pursuant to this title, are carried out.

(f) The Institute shall provide for an independent study of the financial and technical assistance programs under this title.

LIMITATIONS ON GRANTS AND CONTRACTS

SEC. 207. (a) With respect to grants made and contracts or cooperative agreements entered into under this title, the Institute shall—

(1) ensure that no funds made available to recipients by the Institute shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any Executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation or constitutional amendment by the Congress of the United States, or by any State or local legislative body, or any State proposal by initiative petition, or of any referendum, unless a governmental agency, legislative body, a committee, or a member thereof—

(A) requests personnel of the recipients to testify, draft, or review measures or to make representations to such agency, body, committee, or member; or

(B) is considering a measure directly affecting the activities under this title of the recipient or the Institute;

(2) ensure all personnel engaged in grant, cooperative agreement or contract assistance activities supported in whole or part by the Institute refrain, while so engaged, from any partisan political activity; and

(3) ensure that such recipient that files with the Institute a timely application for refunding is provided interim funding necessary to maintain its current level of activities until—

(A) the application for refunding has been approved and funds pursuant thereto received; or

(B) the application for refunding has been finally denied in accordance with section 9 of this title.

(b) No funds made available by the Institute under this title, either by grant, cooperative agreement, or contract, may be used to support or conduct training programs for the purpose of advocating particular training programs for the purpose of advocating particular nonjudicial public policies or encouraging nonjudicial political activities.

(c) The authorization to enter into cooperative agreements, contracts or any other obligation under this title shall be effective only to the extent, and in such amounts, as are provided in advance in appropriation Acts.

(d) To ensure that funds made available under this Act are used to supplement and improve the operation of State courts, rather than to support basic court services, funds shall not be used—

(1) to supplant State or local funds currently supporting a program or activity; or

(2) to construct court facilities or structures, except to remodel existing facilities to demonstrate new architectural or technological techniques, or to provide temporary facilities for new personnel or for personnel involved in a demonstration or experimental program.

RESTRICTIONS ON ACTIVITIES OF THE INSTITUTE

SEC. 208. (a) The Institute shall not—

(1) participate in litigation unless the Institute or a recipient of the Institute is a party, and shall not participate on behalf of any client other than itself;

(2) interfere with the independent nature of any State judicial system or allow financial assistance to be used for the funding of regular judicial and administrative activities of any State judicial system other than pursuant to the terms of any grant, cooperative agreement, or contract with the Institute, consistent with the requirements of this title; or

(3) undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative body, except that personnel of the Institute may testify or make other appropriate communication—

(A) when formally requested to do so by a legislative body, committee, or a member thereof;

(B) in connection with legislation or appropriations directly affecting the activities of the Institute; or

(C) in connection with legislation or appropriations dealing with improvements in the State judiciary, consistent with the provisions of this title.

(b)(1) The Institute shall have no power to issue any shares of stock, or to declare or pay any dividends.

(2) No part of the income or assets of the Institute shall enure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) Neither the Institute nor any recipient shall contribute or make available Institute funds or program personnel or equipment to any political party or association, or the campaign of any candidate for public or party office.

(4) The Institute shall not contribute or make available Institute funds or program personnel or equipment for use in advocating or opposing any ballot measure, initiative, or referendum.

(c) Officers and employees of the Institute or of recipients shall not at any time intentionally identify the Institute or the recipient with any partisan or nonpartisan political activity associated with a political party or association, or the campaign of any candidate for public or party office.

SPECIAL PROCEDURES

SEC. 209. The Institute shall prescribe procedures to ensure that—

(1) financial assistance under this title shall not be suspended unless the grantee, contractor, person, or entity receiving financial assistance under this title has been given reasonable notice and opportunity to show cause why such actions should not be taken; and

(2) financial assistance under this title shall not be terminated, an application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the recipient has been afforded reasonable notice and opportunity for a timely, full, and fair hearing, and, when requested, such hearing shall be conducted by an independent hearing examiner. Such hearing shall be held prior to any final decision by the Institute to terminate financial assistance or suspend or deny funding. Hearing examiners shall be appointed by the Institute in accordance with procedures established in regulations promulgated by the Institute.

PRESIDENTIAL COORDINATION

SEC. 210. The President may, to the extent not inconsistant with any other applicable law, direct that appropriate support functions of the Federal Government may be made available to the Institute in carrying out its functions under this title.

RECORDS AND REPORTS

SEC. 211. (a) The Institute is authorized to require such reports as it deems necessary from any recipient with respect to activities carried out pursuant to this title.

(b) The Institute is authorized to prescribe the keeping of records with respect to funds provided by any grant. cooperative agreement, or contract under this title and shall have access to such records at all reasonable times for the purpose of ensuring compliance with such grant, cooperative agreement, or contract or the terms and conditions upon which financial assistance was provided.

(c) Copies of all records pertinent to the evaluation, inspection, or monitoring of any recipient shall be submitted on a timely basis to such recipient, and shall be maintained in the principal office of the Institute for a period of at least five years after such evaluation, inspection, or monitoring. Such reports shall be available for public inspection during regular business hours, and copies shall be furnished, upon request, to interested parties upon payment of such reasonable fees as the Institute may establish.

(d) Non-Federal funds received by the Institute, and funds received for projects funded in part by the Institute or by any recipient from a source other than the Institute, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

AUDITS

SEC. 212. (a)(1) The accounts of the Institute shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(2) The audits shall be conducted at the place or places where the accounts of the Institute are normally kept. All books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audits shall be made available to the person or persons conducting the audits. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to any such person.

(3) The report of the annual audit shall be filed with the General Accounting Office and shall be available for public inspection during business hours at the principal office of the Institute.

(b)(1) In addition to the annual audit, the financial transactions of the Institute for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States.

(2) Any such audit shall be conducted at the place or places where accounts of the Institute are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audit. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to such representatives. All such books, accounts, financial records, reports, files, and other papers or property of the Institute shall remain in the possession and custody of the Institute throughout the period beginning on the date such possession or custody commences and ending three years after such date, but the General Accounting Office may require the retention of such books, accounts, financial records, reports, files, and other papers or property for a longer period under section 3523(c) of title 31, United States Code.

(3) A report of such audit shall be made by the Comptroller General to the Congress and to the Attorney General, together with such recommendations with respect thereto as the Comptroller General deems advisable.

(c)(1) The Institute shall conduct, or require each recipient to provide for, an annual fiscal audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the Institute.

(2) The Institute shall submit to the Comptroller General of the United States copies of such reports, and the Comptroller General may, in addition, inspect the books, accounts, financial records, files, and other papers or property belonging to or in use by such grantee, contractor, person, or entity, which relate to the disposition or use of funds received from the Institute. Such audit reports shall be available for public inspection during regular business hours, at the principal office of the Institute.

REPORT BY ATTORNEY GENERAL

SEC. 213. On October 1, 1987, the Attorney General, in consultation with the Federal Judicial Center, shall transmit to the Committees on the Judiciary of the Senate and the House of Representatives a report on the effectiveness of the Institute in carrying out the duties specified in section 203(b). Such report shall include an assessment of the cost effectiveness of the program as a whole and, to the extent practicable, of individual grants, an assessment of whether the restrictions and limitations specified in sections 207 and 208 have been respected, and such recommendations as the Attorney General, in consultation with the Federal Judicial Center, deems appropriate.

AMENDMENTS TO OTHER LAWS

SEC. 214. Section 620(b) of title 28, United States Code, is amended by—

(1) striking out "and" at the end of paragraph (3);

(2) striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and"; and

(3) inserting the following new paragraph (5) at the end thereof:

"(5) Insofar as may be consistent with the performance of the other functions set forth in this section, to cooperate with the State Justice Institute in the establishment and coordination of research and programs concerning the administration of justice.".

AUTHORIZATIONS

SEC. 215. There are authorized to be appropriated to carry out the purposes of this title, $13,000,000 for fiscal year 1986, $15,000,000 for fiscal year 1987, and $15,000,000 for fiscal year 1988.

EFFECTIVE DATE

SEC. 216. The provisions of this title shall take effect on October 1, 1985.

TITLE III

SHORT TITLE

SEC. 301. This title may be cited as the "Semiconductor Chip Protection Act of 1984".

PROTECTION OF SEMICONDUCTOR CHIP PRODUCTS

SEC. 302. Title 17, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER 9—PROTECTION OF SEMICONDUCTOR CHIP PRODUCTS

"Sec.
"901. Definitions.
"902. Subject matter of protection.
"903. Ownership and transfer.
"904. Duration of protection.
"905. Exclusion rights in mask works.
"906. Limitation on exclusive rights: reverse engineering; first sale.
"907. Limitation on exclusive rights: innocent infringement.
"908. Registration of claims of protection.
"909. Mask work notice.
"910. Enforcement of exclusive rights.
"911. Civil actions.
"912. Relation to other laws.
"913. Transitional provisions.
"914. International transitional provisions.

"§ 901. Definitions

"(a) As used in this chapter—

"(1) a 'semiconductor chip product' is the final or intermediate form of any product—

"(A) having two or more layers of metallic, insulating, or semiconductor material, deposited or otherwise placed on, or etched away or otherwise removed from, a piece of semiconductor material in accordance with a predetermined pattern; and

"(B) intended to perform electronic circuitry functions;

"(2) a 'mask work' is a series of related images, however fixed or encoded—

"(A) having or representing the predetermined, three-dimensional pattern of metallic, insulating, or semiconductor material present or removed from the layers of a semiconductor chip product; and

"(B) in which series the relation of the images to one another is that each image has the pattern of the surface of one form of the semiconductor chip product;

"(3) a mask work is 'fixed' in a semiconductor chip product when its embodiment in the product is sufficiently permanent or

stable to permit the mask work to be perceived or reproduced from the product for a period of more than transitory duration;

"(4) 'distribute' means to sell, or to lease, bail, or otherwise transfer, or to offer to sell, lease, bail, or otherwise transfer;

"(5) to 'commercially exploit' a mask work is to distribute to the public for commercial purposes a semiconductor chip product embodying the mask work; except that such term includes an offer to sell or transfer a semiconductor chip product only when the offer is in writing and occurs after the mask work is fixed in the semiconductor chip product;

"(6) the 'owner' of a mask work is the person who created the mask work, the legal representative of that person if that person is deceased or under a legal incapacity, or a party to whom all the rights under this chapter of such person or representative are transferred in accordance with section 903(b); except that, in the case of a work made within the scope of a person's employment, the owner is the employer for whom the person created the mask work or a party to whom all the rights under this chapter of the employer are transferred in accordance with section 903(b);

"(7) an 'innocent purchaser' is a person who purchases a semiconductor chip product in good faith and without having notice of protection with respect to the semiconductor chip product;

"(8) having 'notice of protection' means having actual knowledge that, or reasonable grounds to believe that, a mask work is protected under this chapter; and

"(9) an 'infringing semiconductor chip product' is a semiconductor chip product which is made, imported, or distributed in violation of the exclusive rights of the owner of a mask work under this chapter.

"(b) For purposes of this chapter, the distribution or importation of a product incorporating a semiconductor chip product as a part thereof is a distribution or importation of that semiconductor chip product.

§ 902. Subject matter of protection

"(a)(1) Subject to the provisions of subsection (b), a mask work fixed in a semiconductor chip product, by or under the authority of the owner of the mask work, is eligible for protection under this chapter if—

"(A) on the date on which the mask work is registered under section 908, or is first commercially exploited anywhere in the world, whichever occurs first, the owner of the mask work is (i) a national or domiciliary of the United States, (ii) a national, domiciliary, or sovereign authority of a foreign nation that is a party to a treaty affording protection to mask works to which the United States is also a party, or (iii) a stateless person, wherever that person may be domiciled;

"(B) the mask work is first commercially exploited in the United States; or

"(C) the mask work comes within the scope of a Presidential proclamation issued under paragraph (2).

"(2) Whenever the President finds that a foreign nation extends, to mask works of owners who are nationals or domiciliaries of the United States protection (A) on substantially the same basis as that on which the foreign nation extends protection to mask works of its own nationals and domiciliaries and mask works first commercially exploited in that nation, or (B) on substantially the same basis as provided in this chapter, the President may by proclamation extend protection under this chapter to mask works (i) of owners who are, on the date on which the mask works are registered under section 908, or the date on which the mask works are first commercially exploited anywhere in the world, whichever occurs first, nationals, domiciliaries, or sovereign authorities of that nation, or (ii) which are first commercially exploited in that nation.

"(b) Protection under this chapter shall not be available for a mask work that—

"(1) is not original; or

"(2) consists of designs that are staple, commonplace, or familiar in the semiconductor industry, or variations of such designs, combined in a way that, considered as a whole, is not original.

"(c) In no case does protection under this chapter for a mask work extend to any idea, procedure, process, system, method of operation, concept, principle, or discovery, regardless of the form in which it is described, explained, illustrated, or embodied in such work.

"§ 903. Ownership, transfer, licensing, and recordation

"(a) The exclusive rights in a mask work subject to protection under this chapter belong to the owner of the mask work.

"(b) The owner of the exclusive rights in a mask work may transfer all of those rights, or license all or less than all of those rights, by any written instrument signed by such owner or a duly authorized agent of the owner. Such rights may be transferred or licensed by operation of law, may be bequeathed by will, and may pass as personal property by the applicable laws of intestate succession.

"(c)(1) Any document pertaining to a mask work may be recorded in the Copyright Office if the document filed for recordation bears the actual signature of the person who executed it, or if it is accompanied by a sworn or official certification that it is a true copy of the original, signed document. The Register of Copyrights shall, upon receipt of the document and the fee specified pursuant to section 908(d), record the document and return it with a certificate of recordation. The recordation of any transfer or license under this paragraph gives all persons constructive notice of the facts stated in the recorded document concerning the transfer or license.

"(2) In any case in which conflicting transfers of the exclusive rights in a mask work are made, the transfer first executed shall be void as against a subsequent transfer which is made for a valuable consideration and without notice of the first transfer, unless the first transfer is recorded in accordance with paragraph (1) within three months after the date on which it is executed, but in no case later than the day before the date of such subsequent transfer.

"(d) Mask works prepared by an officer or employee of the United States Government as part of that person's official duties are not protected under this chapter, but the United States Government is not precluded from receiving and holding exclusive rights in mask works transferred to the Government under subsection (b).

"§ 904. Duration of protection

"(a) The protection provided for a mask work under this chapter shall commence on the date on which the mask work is registered under section 908, or the date on which the mask work is first commercially exploited anywhere in the world, whichever comes first.

"(b) Subject to subsection (c) and the provisions of this chapter, the protection provided under this chapter to a mask work shall end ten years after the date on which such protection commences under subsection (a).

"(c) All terms of protection provided in this section shall run to the end of the calendar year in which they would otherwise expire.

"§ 905. Exclusive rights in mask works

"The owner of a mask work provided protection under this chapter has the exclusive rights to do and to authorize any of the following:

"(1) to reproduce the mask work by optical, electronic, or any other means;

"(2) to import or distribute a semiconductor chip product in which the mask work is embodied; and

"(3) to induce or knowingly to cause another person to do any of the acts described in paragraphs (1) and (2).

"§ 906. Limitation on exclusive rights: reverse engineering; first sale

"(a) Notwithstanding the provisions of section 905, it is not an infringement of the exclusive rights of the owner of a mask work for—

"(1) a person to reproduce the mask work solely for the purpose of teaching, analyzing, or evaluating the concepts or techniques embodied in the mask work or the circuitry, logic flow, or organization of components used in the mask work; or

"(2) a person who performs the analysis or evaluation described in paragraph (1) to incorporate the results of such conduct in an original mask work which is made to be distributed.

"(b) Notwithstanding the provisions of section 905(2), the owner of a particular semiconductor chip product made by the owner of the mask work, or by any person authorized by the owner of the mask work, may import, distribute, or otherwise dispose of or use, but not reproduce, that particular semiconductor chip product without the authority of the owner of the mask work.

"§ 907. Limitation on exclusive rights: innocent infringement

"(a) Notwithstanding any other provision of this chapter, an innocent purchaser of an infringing semiconductor chip product—

"(1) shall incur no liability under this chapter with respect to the importation or distribution of units of the infringing semiconductor chip product that occurs before the innocent purchaser has notice of protection with respect to the mask work embodied in the semiconductor chip product; and

"(2) shall be liable only for a reasonable royalty on each unit of the infringing semiconductor chip product that the innocent purchaser imports or distributes after having notice of protection with respect to the mask work embodied in the semiconductor chip product.

"(b) The amount of the royalty referred to in subsection (a)(2) shall be determined by the court in a civil action for infringement unless the parties resolve the issue by voluntary negotiation, mediation, or binding arbitration.

"(c) The immunity of an innocent purchaser from liability referred to in subsection (a)(1) and the limitation of remedies with respect to an innocent purchaser referred to in subsection (a)(2) shall extend to any person who directly or indirectly purchasers an infringing semiconductor chip product from an innocent purchaser.

"(d) The provisions of subsections (a), (b), and (c) apply only with respect to those

units of an infringing semiconductor chip product that an innocent purchaser purchased before having notice of protection with respect to the mask work embodied in the semiconductor chip product.

"§ 908. Registration of claims of protection

"(a) The owner of a mask work may apply to the Register of Copyrights for registration of a claim of protection in a mask work. Protection of a mask work under this chapter shall terminate if application for registration of a claim of protection in the mask work is not made as provided in this chapter within two years after the date on which the mask work is first commercially exploited anywhere in the world.

"(b) The Register of Copyrights shall be responsible for all administrative functions and duties under this chapter. Except for section 708, the provisions of chapter 7 of this title relating to the general responsibilities, organization, regulatory authority, actions, records, and publications of the Copyright Office shall apply to this chapter, except that the Register of Copyrights may make such changes as may be necessary in applying those provisions to this chapter.

"(c) The application for registration of a mask work shall be made on a form prescribed by the Register of Copyrights. Such form may require any information regarded by the Register as bearing upon the preparation or identification of the mask work, the existence or duration of protection of the mask work under this chapter, or ownership of the mask work. The application shall be accompanied by the fee set pursuant to subsection (d) and the identifying material specified pursuant to such subsection.

"(d) The Register of Copyrights shall by regulation set reasonable fees for the filing of applications to register claims of protection in mask works under this chapter, and for other services relating to the administration of this chapter or the rights under this chapter, taking into consideration the cost of providing those services, the benefits of a public record, and statutory fee schedules under this title. The Register shall also specify the identifying material to be deposited in connection with the claim for registration.

"(e) If the Register of Copyrights, after examining an application for registration, determines, in accordance with the provisions of this chapter, that the application relates to a mask work which is entitled to protection under this chapter, then the Register shall register the claim of protection and issue to the applicant a certificate of registration of the claim of protection under the seal of the Copyright Office. The effective date of registration of a claim of protection shall be the date on which an application, deposit of identifying material, and fee, which are determined by the Register of Copyrights or by a court of competent jurisdiction to be acceptable for registration of the claim, have all been received in the Copyright Office.

"(f) In any action for infringement under this chapter, the certificate of registration of a mask work shall constitute prima facie evidence (1) of the facts states in the certificate, and (2) that the applicant issued the certificate has met, the requirements of this chapter, and the regulations issued under this chapter, with respect to the registration of claims.

"(g) Any applicant for registration under this section who is dissatisfied with the refusal of the Register of Copyrights to issue a certificate of registration under this section may seek judicial review of that refusal by bringing an action for such review in an appropriate United States district court not later than sixty days after the refusal. The provisions of chapter 7 of title 5 shall apply to such judicial review. The failure of the Register of Copyrights to issue a certificate of registration within four months after an application for registration is filed shall be deemed to be a refusal to issue a certificate of registration for purposes of this subsection and section 910(b)(2), except that, upon a showing of good cause, the district court may shorten such four-month period.

"§ 909. Mask work notice

"(a) The owner of a mask work provided protection under this chapter may affix notice to the mask work, and to masks and semiconductor chip products embodying the mask work, in such manner and location as to give reasonable notice of such protection. The Register of Copyrights shall prescribe by regulation, as examples, specific methods of affixation and positions of notice for purposes of this section, but these specifications shall not be considered exhaustive. The affixation of such notice is not a condition of protection under this chapter, but shall constitute prima facie evidence of notice of protection.

"(b) The notice referred to in subsection (a) shall consist of—

"(1) the words 'mask work', the symbol *M*, or the symbol M (the letter M in a circle); and

"(2) the name of the owner or owners of the mask work or an abbreviation by which the name is recognized or is generally known.

"§ 910. Enforcement of exclusive rights

"(a) Except as otherwise provided in this chapter, any person who violates any of the exclusive rights of the owner of a mask work under this chapter, by conduct in or affecting commerce, shall be liable as an infringer of such rights.

"(b)(1) The owner of a mask work protected under this chapter, or the exclusive licensee of all rights under this chapter with respect to the mask work, shall, after a certificate of registration of a claim of protection in that mask work has been issued under section 908, be entitled to institute a civil action for any infringement with respect to the mask work which is committed after the commencement of protection of the mask work under section 904(a).

"(2) In any case in which an application for registration of a claim of protection in a mask work and the required deposit of identifying material and fee have been received in the Copyright Office in proper form and registration of the mask work has been refused, the applicant is entitled to institute a civil action for infringement under this chapter with respect to the mask work if notice of the action, together with a copy of the complaint, is served on the Register of Copyrights, in accordance with the Federal Rules of Civil Procedure. The Register may, at his or her option, become a party to the action with respect to the issue of whether the claim of protection is eligible for registration by entering an appearance within sixty days after such service, but the failure of the Register to become a party to the action shall not deprive the court of jurisdiction to determine that issue.

"(c)(1) The Secretary of the Treasury and the United States Postal Service shall separately or jointly issue regulations for the enforcement of the rights set forth in section 905 with respect to importation. These regulations may require, as a condition for the exclusion of articles from the United States, that the person seeking exclusion take any one or more of the following actions:

"(A) Obtain a court order enjoining, or an order of the International Trade Commission under section 337 of the Tariff Act of 1930 excluding, importation of the articles.

"(B) Furnish proof that the mask work involved is protected under this chapter and that the importation of the articles would infringe the rights in the mask work under this chapter.

"(C) Post a surety bond for any injury that may result if the detention or exclusion of the articles proves to be unjustified.

"(2) Articles imported the violation of the rights set forth in section 905 are subject to seizure and forfeiture in the same manner as property imported in violation of the customs laws. Any such forfeited articles shall be destroyed as directed by the Secretary of the Treasury or the court, as the case may be, except that the articles may be returned to the country of export whenever it is shown to the satisfaction of the Secretary of the Treasury that the importer had no reasonable grounds for believing that his or her acts constituted a violation of the law.

"§ 911. Civil actions

"(a) Any court having jurisdiction of a civil action arising under this chapter may grant temporary restraining orders, preliminary injunctions, and permanent injunctions on such terms as the court may deem reasonable to prevent or restrain infringement of the exclusive rights in a mask work under this chapter.

"(b) Upon finding an infringer liable, to a person entitled under section 910(b)(1) to institute a civil action, for an infringement of any exclusive right under this chapter, the court shall award such person actual damages suffered by the person as a result of the infringement. The court shall also award such person the infringer's profits that are attributable to the infringement and are not taken into account in computing the award of actual damages. In establishing the infringer's profits, such person is required to present proof only of the infringer's gross revenue, and the infringer is required to prove his or her deductible expenses and the elements of profit attributable to factors other than the mask work.

"(c) At any time before final judgment is rendered, a person entitled to institute a civil action for infringement may elect, instead of actual damages and profits as provided by subsection (b), an award of statutory damages for all infringements involved in the action, with respect to any one mask work for which any one infringer is liable individually, or for which any two or more infringers are liable jointly and severally, in an amount not more than $250,000 as the court considers just.

"(d) An action for infringement under this chapter shall be barred unless the action is commenced within three years after the claim accrues.

"(e)(1) At any time while an action for infringement of the exclusive rights in a mask work under this chapter is pending, the court may order the impounding, on such terms as it may deem reasonable, of all semiconductor chip products, and any drawings, tapes, masks, or other products by means of which such products may be reproduced, that are claimed to have been made, imported, or used in violation of those exclusive rights. Insofar as practicable, applications for orders under this para-

graph shall be heard and determined in the same manner as an application for a temporary restraining order or preliminary injunction.

"(2) As part of a final judgment or decree, the court may order the destruction or other disposition of any infringing semiconductor chips products, and any masks, tapes, or other articles by means of which such products may be reproduced.

"(f) In any civil action arising under this chapter, the court in its discretion may allow the recovery of full costs, including reasonable attorneys' fees, to the prevailing party.

"§ 912. Relation to other laws

"(a) Nothing in this chapter shall affect any right or remedy held by any person under chapters 1 through 8 of this title, or under title 35.

"(b) Except as provided in section 908(b) of this title, references to 'this title' or 'title 17' in chapters 1 through 8 of this title shall be deemed not to apply to this chapter.

"(c) The provisions of this chapter shall preempt the laws of any State to the extent those laws provide any rights or remedies with respect to a mask work which are equivalent to those rights or remedies provided by this chapter, except that such preemption shall be effective only with respect to actions filed on or after January 1, 1986.

"(d) The provisions of sections 1338, 1400(a) and 1498 (b) and (c) of title 28 shall apply with respect to exclusive rights in mask works under this chapter.

"(e) Notwithstanding subsection (c), nothing in this chapter shall detract from any rights of a mask work owner, whether under Federal law (exclusive of this chapter) or under the common law or the statutes of a State, heretofore or hereafter declared or enacted, with respect to any mask work first commercially exploited before July 1, 1983.

"§ 913. Transitional provisions

"(a) No application for registration under section 908 may be filed, and no civil action under section 910 or other enforcement proceeding under this chapter may be instituted, until sixty days after the date of the enactment of this chapter.

"(b) No monetary relief under section 911 may be granted with respect to any conduct that occurred before the date of the enactment of this chapter, except as provided in subsection (d).

"(c) Subject to subsection (a), the provisions of this chapter apply to all mask works that are first commercially exploited or are registered under this chapter, or both, on or after the date of the enactment of this chapter.

"(d)(1) Subject to subsection (a), protection is available under this chapter to any mask work that was first commercially exploited on or after July 1, 1983, and before the date of the enactment of this chapter, if a claim of protection in the mask work is registered in the Copyright Office before July 1, 1985, under section 908.

"(2) In the case of any mask work described in paragraph (1) that is provided protection under this chapter, infringing semiconductor chip product units manufactured before the date of the enactment of this chapter may, without liability under sections 910 and 911, be imported into or distributed in the United States, or both, until two years after the date of registration of the mask work under section 908, but only if the importer or distributor, as the case may be, first pays or offers to pay the reasonable royalty referred to in section 907(a)(2) to the mask work owner, on all such units imported or distributed, or both, after the date of the enactment of this chapter.

"(3) In the event that a person imports or distributes infringing semiconductor chip product units described in paragraph (2) of this subsection without first paying or offering to pay the reasonable royalty specified in such paragraph, or if the person refuses or fails to make such payment, the mask work owner shall be entitled to the relief provided in sectons 910 and 911.

"§ 914. International transitional provisions

"(a) Notwithstanding the conditions set forth in subparagraphs (A) and (C) of section 902(a)(1) with respect to the availability of protection under this chapter to nationals, domiciliaries, and sovereign authorities of a foreign nation, the Secretary of Commerce may, upon the petition of any person, or upon the Secretary's own motion, issue an order extending protection under this chapter to such foreign nationals, domiciliaries, and sovereign authorities if the Secretary finds—

"(1) that the foreign nation is making good faith efforts and reasonable progress toward—

"(A) entering into a treaty described in section 902(a)(1)(A); or

"(B) enacting legislation that would be in compliance with subparagraphs (A) or (B) of section 902(a)(2); and

"(2) that the nationals, domiciliaries, and sovereign authorities of the foreign nation, and persons controlled by them, are not engaged in the misappropriation, or unauthorized distribution or commercial exploitation, of mask works; and

"(3) that issuing the order would promote the purposes of this chapter and international comity with respect to the protection of mask works.

"(b) While an order under subsection (a) is in effect with respect to a foreign nation, no application for registration of a claim for protection in a mask work under this chapter may be denied solely because the owner of the mask work is a national, domiciliary, or sovereign authority of that foreign nation, or solely because the mask work was first commercially exploited in that foreign nation.

"(c) Any order issued by the Secretary of Commerce under subsection (a) shall be effective for such period as the Secretary designates in the order, except that no such order may be effective after the date on which the authority of the Secretary of Commerce terminates under subsection (e). The effective date of any such order shall also be designated in the order. In the case of an order issued upon the petition of a person, such effective date may be no earlier than the date on which the Secretary receives such petition.

"(d)(1) Any order issued under this section shall terminate if—

"(A) the Secretary of Commerce finds that any of the conditions set forth in paragraphs (1), (2), and (3) of subsection (a) no longer exist; or

"(B) mask works of nationals, domiciliaries, and sovereign authorities of that foreign nation or mask works first commercially exploited in that foreign nation become eligible for protection under subparagraphs (A) or (C) of section 902(a)(1).

"(2) Upon the termination or expiration of an order issued under this section, registrations of claims of protection in mask works made pursuant to that order shall remain valid for the period specified in section 904.

"(e) The authority of the Secretary of Commerce under this section shall commence on the date of the enactment of this chapter, and shall terminate three years after such date of enactment.

"(f)(1) The Secretary of Commerce shall promptly notify the Register of Copyrights and the Committees on the Judiciary of the Senate and the House of Representatives of the issuance or termination of any order under this section, together with a statement of the reasons for such action. The Secretary shall also publish such notification and statement of reasons in the Federal Register.

"(2) Two years after the date of the enactment of this chapter, the Secretary of Commerce, in consultation with the Register of Copyrights, shall transmit to the Committees on the Judiciary of the Senate and the House of Representatives a report on the actions taken under this section and on the current status of international recognition of mask work protection. The report shall include such recommendations for modifications of the protection accorded under this chapter to mask works owned by nationals, domiciliaries, or sovereign authorities of foreign nations as the Secretary, in consultation with the Register of Copyrights, considers would promote the purposes of this chapter and international comity with respect to mask work protection.".

TECHNICAL AMENDMENT

SEC. 303. The table of chapters at the beginning of title 17, United States Code, is amended by adding at the end thereof the following new item:

"9. Protection of Semiconductor Chip Products..... 901".

AUTHORIZATION OF APPROPRIATIONS

SEC. 304. There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this title and the amendments made by this title.

TITLE IV—FEDERAL COURTS IMPROVEMENTS

Subtitle A—Civil Priorities

ESTABLISHMENT OF PRIORITY OF CIVIL ACTIONS

SEC. 401. (a) Chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1657. Priority of civil actions

"(a) Notwithstanding any other provision of law, each court of the United States shall determine the order in which civil actions are heard and determined, except that the court shall expedite the consideration of any action brought under chapter 153 or section 1826 of this title, any action for temporary or preliminary injunctive relief, or any other action if good cause therefor is shown. For purposes of this subsection, 'good cause' is shown if a right under the Constitution of the United States or a Federal Statute (including rights under section 552 of title 5) would be maintained in a factual context that indicates that a request for expedited consideration has merit.

"(b) The Judicial Conference of the United States may modify the rules adopted by the courts to determine the order in which civil actions are heard and determined, in order to establish consistency among the judicial circuits.".

(b) The section analysis of chapter 111 of title 28, United States Code, is amended by

adding at the end thereof the following new item:

"1657. Priority of civil actions.".

AMENDMENTS TO OTHER LAWS

SEC. 402. The following provisions of law are amended—

(1)(A) Section 309(a)(10) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437g(a)(10)) is repealed.

(B) Section 310(c) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437h(c)), is repealed.

(2) Section 552(a)(4)(D) of title 5, United States Code, is repealed.

(3) Section 6(a) of the Commodity Exchange Act (7 U.S.C. 8(a)) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(4)(A) Section 6(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(c)(4)) is amended by striking out the second sentence.

(B) Section 10(d)(3) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136h(d)(3)) is amended by striking out "The court shall give expedited consideration to any such action.".

(C) Section 16(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136n(b)) is amended by striking out the last sentence.

(D) Section 25(a)(4)(E)(iii) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w(a)(4)(E)(iii)) is repealed.

(5) Section 204(d) of the Packers and Stockyards Act, 1921 (7 U.S.C. 194(d)), is amended by striking out the second sentence.

(6) Section 366 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1366) is amended in the fourth sentence by striking out "At the earliest convenient time, the court, in term time or vacation," and inserting in lieu thereof "The court".

(7)(A) Section 410 of the Federal Seed Act (7 U.S.C. 1600) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(B) Section 411 of the Federal Seed Act (7 U.S.C. 1601) is amended by striking out "The proceedings in such cases shall be made a preferred cause and shall be expedited in every way.".

(8) Section 816(c)(4) of the Act of October 7, 1975, commonly known as the Department of Defense Appropriation Authorization Act of 1976 (10 U.S.C. 2304 note) is amended by striking out the last sentence.

(9) Section 5(d)(6)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(6)(A)) is amended by striking out "Such proceedings shall be given precedence over other cases pending in such courts, and shall be in every way expedited.".

(10)(A) Section 7A(f)(2) of the Clayton Act (15 U.S.C. 18a(f)(2)) is amended to read as follows: "(2) certifies to the United States district court for the judicial district within which the respondent resides or carries on business, or in which the action is brought, that it or he believes that the public interest requires relief pendente lite pursuant to this subsection, then upon the filing of such motion and certification, the chief judge of such district court shall immediately notify the chief judge of the United States court of appeals for the circuit in which such district court is located, who shall designate a United States district judge to whom such action shall be assigned for all purposes.".

(B) Section 11(e) of Clayton Act (15 U.S.C. 21(e)) is amended by striking out the first sentence.

(11) Section 1 of the Act of February 11, 1903, commonly known as the Expediting Act (15 U.S.C. 28) is repealed.

(12) Section 5(e) of the Federal Trade Commission Act (15 U.S.C. 45(3)) is amended by striking out the first sentence.

(13) Section 21(f)(3) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(f)(3)) is repealed.

(14) Section 11A(c)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78k-1(c)(4)) is amended—

(A) by striking out "(A)" after "(4)"; and

(B) by striking out subparagraph (B).

(15(A) Section 309(e) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(e)) is amended by striking out the sixth sentence.

(B) Section 309(f) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(f)) is amended by striking out the last sentence.

(C) Section 311(a) of the Small Business Investment Act of 1958 (15 U.S.C. 687c(a)) is amended by striking out the last sentence.

(16) Section 10(c)(2) of the Alaska Natural Gas Transportation Act (15 U.S.C. 719h(c)(2)) is repealed.

(17) Section 155(a) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1415(a)) is amended be striking out "(1)" and by striking out paragraph (2).

(18) Section 503(b)(3)(E) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2003(b)(3)(E)) is amended by striking out clause (ii) and redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

(19) Section 23(d) of the Toxic Substances Control Act (15 U.S.C. 2622(d)) is amended by striking out the last sentence.

"(c) The second sentence of subsection (b) of section 93 of title 28, United States Code, is amended by inserting 'Champaign/Urbana,' before 'Danville'."

SEC. 407. (a) Subsection (b) of section 124 of title 26, United States Code, is amended—

(1) by striking out "six divisions" and inserting in lieu thereof "seven divisions";

(2) In paragraph (4) by striking out ", Hidalgo, Starr"; and

(3) by adding at the end thereof the following:

"(7) The McAllen Division comprises the counties of Hidalgo and Starr.

"Court for the McAllen Division shall be held at McAllen.".

(b) The amendments made by subsection (a) of this section shall apply to any action commenced in the United States District Court for the Southern District of Texas on or after the effective date of this subtitle, and shall not affect any action pending in such court on such effective date.

SEC. 408. (a) Paragraph (1) of section 90 (a) of title 28, United States Code, is amended—

(1) by inserting "Fannin," after "Dawson,";

(2) by inserting "Gilmer," after "Forsyth,"; and

(3) by inserting "Pickens," after "Lumpkin,".

(b) Paragraph (2) of section 90(a) of title 28, United States Code, is amended by striking out "Fannin,", "Gilmer,", and "Pickens,".

(c) Paragraph (6) of section 90(c) of title 28, United States Code, is amended by striking out "Swainsboro" each place it appears and inserting in lieu thereof "Statesboro".

(d) The amendments made by this section shall apply to any action commenced in the United States District Court for the Northern District of Georgia on or after the effective date of this subtitle, and shall not affect any action pending in such court on such effective date.

SEC. 409. Section 85 of title 28, United States Code, is amended by inserting "Boulder," before "Denver".

SEC. 410. The second sentence of section 126 of title 28, United States Code, is amended by inserting "Bennington," before "Brattleboro".

SEC. 411. (a) The amendments made by this subtitle shall take effect on January 1, 1985.

(b) The amendments made by this subtitle shall not affect the composition, or preclude the service, of any grand or petit jury summoned, impaneled, or actually serving on the effective date of this subtitle.

"SUBTITLE C—AMENDMENTS TO THE FEDERAL COURTS IMPROVEMENTS ACT OF 1982"

This subtitle may be cited as the "Technical Amendments to the Federal Courts Improvement Act of 1982".

SEC. 412. (a) Section 1292(b) of title 28, United States Code, is amended by inserting "which would have jurisdiction of an appeal of such action" after "The Court of Appeals".

(b) Section 1292(c)(1) of title 28, United States Code, is amended by inserting "or (b)" after "(a)".

SEC. 413. Section 337(c) of the Tariff Act of 1930 (19 U.S.C. 1337(c)) is amended in the fourth sentence by inserting ", within 60 days after the determination becomes final," after "appeal such determination".

SEC. 414. (a) Sections 142, 143, and 144 of title 35, United States Code, are amended to read as follows:

"§ 142. Notice of appeal

"When an appeal is taken to the United States Court of Appeals for the Federal Circuit, the appellant shall file in the Patent and Trademark Office a written notice of appeal directed to the Commissioner, within such time after the date of the decision from which the appeal is taken as the Commissioner prescribes, but in no case less than 60 days after that date.

"§ 143. Proceedings on appeal

"With respect to an appeal described in section 142 of this title, the Commissioner shall transmit to the United States Court of Appeals for the Federal Circuit a certified list of the documents comprising the record in the Patent and Trademark Office. The court may request that the Commissioner forward the original or certified copies of such documents during pendency of the appeal. In an ex parte case, the Commissioner shall submit to the court in writing the grounds for the decision of the Patent and Trademark Office, addressing all the issues involved in the appeal. The court shall, before hearing an appeal, give notice of the time and place of the hearing to the Commissioner and the parties in the appeal.

"§ 144. Decision on appeal

"The United States Court of Appeals for the Federal Circuit shall review the decision from which an appeal is taken on the record before the Patent and Trademark Office. Upon its determination the court shall issue to the Commissioner its mandate and opinion, which shall be entered of record in the Patent and Trademark Office and shall govern the further proceedings in the case.".

(b) Paragraphs (2), (3), and (4) of subsection (a) of section 21 of the Act entitled "An Act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes",

approved July 5, 1946 (15 U.S.C. 1071(a) (2), (3), and (4)), are amended to read as follows:

"(2) When an appeal is taken to the United States Court of Appeals for the Federal Circuit, the appellant shall file in the Patent and Trademark Office a written notice of appeal directed to the Commissioner, within such time after the date of the decision from which the appeal is taken as the Commissioner prescribes, but in no case less than 60 days after that date.

"(3) The Commissioner shall transmit to the United States Court of Appeals for the Federal Circuit a certified list of the documents comprising the record in the Patent and Trademark Office. The court may request that the Commissioner forward the original or certified copies of such documents during pendency of the appeal. In an ex parte case, the Commissioner shall submit to that court a brief explaining the grounds for the decision of the Patent and Trademark Office, addressing all the issues involved in the appeal. The court shall, before hearing an appeal, give notice of the time and place of the hearing to the Commissioner and the parties in the appeal.

"(4) The United States Court of Appeals for the Federal Circuit shall review the decision from which the appeal is taken on the record before the Patent and Trademark Office. Upon its determination the court shall issue its mandate and opinion to the Commissioner, which shall be entered of record in the Patent and Trademark Office and shall govern the further proceedings in the case.".

(c) The amendments made by this section shall apply to proceedings pending in the Patent and Trademark Office on the date of the enactment of this Act and to appeals pending in the United States Court of Appeals for the Federal Circuit on such date.

SEC. 415. Any individual who, on the date of the enactment of the Federal Courts Improvement Act of 1982, was serving as marshal for the Court of Appeals for the District of Columbia under section 713(c) of title 28, United States Code, may, after the date of the enactment of this Act, so serve under that section as in effect on the date of the enactment of the Federal Courts Improvement Act of 1982. While such individual so serves, the provisions of section 714(a) of title 28, United States Code, shall not apply to the Court of Appeals for the District of Columbia.

SEC. 416. Title 28, United States Code, is amended in the following respects:

(a) There shall be inserted, after section 797 thereof, in chapter 51 thereof, the following new section 798, which shall read as follows:

"798. PLACES OF HOLDING COURT; APPOINTMENT OF SPECIAL MASTERS.

"a. The United States Claims Court is hereby authorized to utilize facilities and hold court in Washington, D.C., and in four locations outside of the Washington, D.C., metropolitan area, for the purpose of conducting trials and such other proceedings as may be appropriate to executing the court's functions. The Director of the Administrative Office of the United States Courts shall designate such locations and provide for such facilities.

"b. The Chief Judge of the Claims Court may appoint special masters to assist the count in carrying out its functions. Any special masters so appointed shall carry out their responsibilities and be compensated in accordance with procedures set forth in the rules of the court."

(b) The caption of chapter 51, title 28 shall be amended to include the following item:

"798. PLACES OF HOLDING COURT; APPOINTMENT OF SPECIAL MASTERS.".

TITLE V—GOVERNMENT RESEARCH AND DEVELOPMENT PATENT POLICY

SEC. 501. Chapter 18 of title 35, United States Code, is amended—

(1) by adding "or any novel variety of plant which is or may be protectable under the Plant Variety Protection Act (7 U.S.C. 2321 et seq.)" immediately after "title" in section 201(d);

(2) by adding ": *Provided*, That in the case of a variety of plant, the date of determination (as defined in section 41(d) of the Plant Variety Protection Act (7 U.S.C. 2401(d))) must also occur during the period of contract performance" immediately after "agreement" in section 201(e);

(3) in section 202(a), by amending clause (i) to read as follows: "(i) when the contractor is not located in the United States or does not have a place of business located in the United States or is subject to the control of a foreign government,"; by striking the word "or" before "iii", and by adding, after the words "security of such activities" in the first sentence of such paragraph, the following: "or, iv) when the funding agreement includes the operation of a Government-owned, contractor-operated facility of the Department of Energy primarily dedicated to that Department's naval nuclear propulsion or weapons related programs and all funding agreement limitations under this subparagraph on the contractor's right to elect title to a subject invention are limited to inventions occurring under the above two programs of the Department of Energy.".

(4) by amending paragraphs (1) and (2) of section 202(b) to read as follows:

"(b) The rights of the Government under subsection (a) shall not be exercised by a Federal agency unless it first determines that at least one of the conditions identified in clauses (i) through (iii) of subsection (a) exists. Except in the case of subsection (a)(iii), the agency shall file with the Secretary of Commerce, within thirty days after the award of the applicable funding agreement, a copy of such determination. In the case of a determination under subsection (a)(ii), the statement shall include an analysis justifying the determination. In the case of determinations applicable to funding agreements with small business firms, copies shall also be sent to the Chief Counsel for Advocacy of the Small Business Administration. If the Secretary of Commerce believes that any individual determination or pattern of determinations is contrary to the policies and objectives of this chapter or otherwise not in conformance with this chapter, the Secretary shall so advise the head of the agency concerned and the Administrator of the Office of Federal Procurement Policy, and recommend corrective actions.

"(2) Whenever the Administrator of the Office of Federal Procurement Policy has determined that one or more Federal agencies are utilizing the authority of clause (i) or (ii) of subsection (a) of this section in a manner that is contrary to the policies and objectives of this chapter, the Administrator is authorized to issue regulations describing classes of situations in which agencies may not exercise the authorities of those clauses.";

(4A) By adding at the end of section 202(b) the following new paragraph:

"(4) If the contractor believes that a determination is contrary to the policies and objectives of this chapter or constitutes an abuse of discretion by the agency, the determination shall be subject to the last paragraph of section 203(2)."

(5) by amending paragraphs (1), (2), (3), and (4) of section 202(c) to read as follows:

"(1) That the contractor disclose each subject invention to the Federal agency within a reasonable time after it becomes known to contractor personnel responsible for the administration of patent matters, and that the Federal Government may receive title to any subject invention not disclosed to it within such time.

"(2) That the contractor make a written election within two years after disclosure to the Federal agency (or such additional time as may be approved by the Federal agency) whether the contractor will retain title to a subject invention: *Provided*, That in any case where publication, on sale, or public use, has initiated the one year statutory period in which valid patent protection can still be obtained in the United States, the period for election may be shortened by the Federal agency to a date that is not more than sixty days prior to the end of the statutory period: *And provided further*, That the Federal Government may receive title to any subject invention in which the contractor does not elect to retain rights or fails to elect rights within such times.

"(3) That a contractor electing rights in a subject invention agrees to file a patent application prior to any statutory bar date that may occur under this title due to publication, on sale, or public use, and shall thereafter file corresponding patent applications in other countries in which it wishes to retain title within reasonable times, and that the Federal Government may receive title to any subject inventions in the United States or other countries in which the contractor has not filed patent applications on the subject invention within such times.

"(4) With respect to any invention in which the contractor elects rights, the Federal agency shall have a nonexclusive, nontransferrable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any subject invention throughout the world: *Provided*, That the funding agreement may provide for such additional rights; including the right to assign or have assigned foreign patent rights in the subject invention, as are determined by the agency as necessary for meeting the obligations of the United States under any treaty, international agreement, arrangement of cooperation, memorandum of understanding, or similar arrangement, including military agreements relating to weapons development and production.".

(6) by striking out "may" in section 202(c)(5) and inserting in lieu thereof "as well as any information on utilization or efforts at obtaining utilization obtained as part of a proceeding under section 203 of this chapter shall";

(7) by striking out "and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sales of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention" in clause (A) of section 202(c)(7);

(8) by amending clause (B)–(D) of section 202(c)(7) to read as follows: "(B) a requirement that the contractor share royalties with the inventor; "(C) except with respect to a funding agreement for the operation of

a Government-owned-contractor-operated facility, a requirement that the balance of any royalties or income earned by the contractor with respect to subject inventions, after payment of expenses; (including payments to inventors) incidental to the administration of subject inventions", be utilized for the support of scientific research; or education; (D) a requirement that, except where it proves infeasible after a reasonable inquiry, in the licensing of subject inventions shall be given to small business firms; and (E) with respect to a funding agreement for the operation of a Government-owned-contractor-operated facility, requirements (i) that after payment of patenting costs, licensing costs, payments to inventors, and other expenses incidental to the administration of subject inventions, 100 percent of the balance of any royalties or income earned and retained by the contractor during any fiscal year, up to an amount equal to five percent of the annual budget of the facility, shall be used by the contractor for scientific research, development, and education consistent with the research and development mission and objectives of the facility, including activities that increase the licensing potential of other inventions of the facility; provided that if said balance exceeds five percent of the annual budget of the facility, that 75 percent of such excess shall be payed to the Treasury of the United States and the remaining 25 percent shall be used for the same purposes as described above in this clause (D) and (ii) that, to the extent it provides the most effective technology transfer, the licensing of subject inventions shall be administered by contractor employees on location at the facility."

(9) By adding "(1.) before the word "With" in the first line of section 203, and by adding at the end of section 203 the following: "(2) A determination pursuant to this section or section 202(b)(4) shall not be subject to the Contract Disputes Act (41 U.S.C. s. 601 et seq.). An administrative appeals procedure shall be established by regulations promulgated in accordance with section 206. Additionally, any contractor, inventor, assignee, or exclusive licensee adversely affected by a determination under this section may, at any time within sixty days after the determination is issued, file a petition in the United States Claims Court, which shall have jurisdiction to determine the "appeal on the record and to affirm, reverse, remand or modify, ", as appropriate, the determination of the Federal agency. In cases described in paragraphs (a) and (c), the agency's determination shall be held in abeyance pending the exhaustion of appeals or petitions filed under the preceding sentence.";

(10) by amending section 206 to read as follows:

"§ 206. Uniform clauses and regulations

"The Secretary of Commerce may issue regulations which may be made applicable to Federal agencies implementing the provisions of sections 202 through 204 of this chapter and shall establish standard funding agreement provisions required under this chapter. The regulations and the standard funding agreement shall be subject to public comment before their issuance.";

(11) in section 207 by inserting "(a)" before "Each Federal" and by adding the following new subsection at the end thereof:

"(b) For the purpose of assuring the effective management of Government-owned inventions, the Secretary of Commerce authorized to—

"(1) assist Federal agency efforts to promote the licensing and utilization of Government-owned inventions;

"(2) assist Federal agencies in seeking protection and maintaining inventions in foreign countries, including the payment of fees and costs connected therewith; and

"(3) consult with and advise Federal agencies as to areas of science and technology research and development with potential for commercial utilization."; and

(12) in section 208 by striking out "Administrator of General Services" and inserting in lieu thereof "Secretary of Commerce".

(13) By deleting from the first sentence of section 210(c), "August 23, 1971 (36 Fed. Reg. 16887)" and inserting in lieu there of "February 18, 1983", and by inserting the following before the period at the end of the first sentence of section 210(c) "except that all funding agreements, including those with other than small business firms and nonprofit organizations, shall include the requirements established in paragraph 202(c)(4) and section 203 of this title."

(14) by adding at the end thereof the following new section:

"Sec. 212. Disposition of rights in educational awards

"No scholarship, fellowship, training grant, or other funding agreement made by a Federal agency primarily to an awardee for educational purposes will contain any provision giving the Federal agency any right to inventions made by the awardee." and

(15) by adding at the end of the table of sections for the chapter the following new items:

"212. Disposition of rights in education awards.".

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. KASTENMEIER] is recognized for 1 hour.

□ 1310

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me state at the outset that I will yield for purposes of debate only.

Mr. Speaker, I rise in not only strong support of H.R. 6163, as amended by the Senate, but in urgent support of it.

H.R. 6163 is entitled a bill to amend title 28, United States Code, "with respect to the places where court shall be held in certain judicial districts." Looking at the length and complexity of the Senate amendment, however, the amended bill bears little resemblance to the bill that we passed unanimously under suspension of the rules of September 24, 1984. A clear and concise four-page bill has become a 65-page bill with five titles.

What has the Senate wrought? Is it trying to jam down the House's throat a long list of special interest projects? Is the Senate sending us the residue of certain ill-fated legislative projects? Or has the Senate simply used its finite time in the waning days of the 98th Congress to refashion into an omnibus package a number of House-passed initiatives that have broad-based support in the House and Senate or have become high priorities with the administration?

In all candor, there may have been a little bargaining in the other body; it nonetheless is my contention that the Senate has sent us a responsible package: a package that we should pass. In my capacity as chairman of the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, I feel qualified to make this statement. An examination of the Senate amendment shows that every section in it falls within my subcommittee's jurisdiction, either in the court reform area or as relates to copyright, patents and trademarks. I and my staff have reviewed the bill in its entirety. As to substance, the amendment's provisions satisfy the high standards necessary for enactment of a public law. There are no special interest provisions, no private patent or trademark bills, no water projects. There is not a single section in the bill that has not received the attention of my subcommittee.

The Federal budgetary implications for the package are minimal. It is estimated that the increased tax revenues, both corporate and employee, resulting from title III of the bill (semiconductor chip protection), standing alone, will more than offset the cost impact of title II (State Justice Institute).

With two exceptions, the Senate amendment to H.R. 6163 is a collection of bills passed unanimously by the House either under suspension of the rules or by consent. The two exceptions were both reported by House Committees: One of these—the State Justice bill—was given a strong majority vote on the House floor but failed on suspension. The other was reported by voice vote by the House Science and Technology Committee.

I should state at the outset that the package was not my idea. I did confer with several Senators, however, and made it abundantly clear that certain items—that previously had received no treatment or had substantial opposition in the House—should not be added to the bill. In addition, I worked very closly with my counterpart Senate subcommittee chairman, the senior Senator from Maryland [CHARLES MCC. MATHIAS, JR.] to reach agreement of the semiconductor chip and trademark improvement bills. I would like to single him out for his efforts.

I would also like to thank Senators THURMOND, DOLE, HATCH, LEAHY, and METZENBAUM for their cooperation and assistance. Senate staff is also recognized for its efforts. I additionally would like to express appreciation to the members of my subcommittee. [Mr. BROOKS, Mr. MAZZOLI, Mr. SYNAR, Mrs. SCHROEDER, Mr. GLICKMAN, Mr. FRANK, Mr. MORRISON of Connecticut, Mr. BERMAN, Mr. MOORHEAD, Mr. HYDE, Mr. DEWINE, Mr. KINDNESS, and Mr.

SAWYER] for their unwavering support on this package. I have to admit that being chairman of a 14-member subcommittee is a bit of a burden. However, having 13 highly-qualified and experienced lawyers as members certainly provides me the necessary ingredients for a great team effort.

Now, Mr. Speaker, I would like to inform the Members about the Senate amendment in some detail. Under my discussion of each title, I will highlight previous House action on the proposed legislation. At the end of my remarks, I will submit into the record further analysis of several changes to House bills made by the Senate amendment in order to supplement the legislative history. This latter analysis will primarily focus on the semiconductor chip legislation, the most important provision in the package, but may touch briefly on other elements in the package.

TITLE I: TRADEMARK IMPROVEMENTS

Title I of the Senate amendment clarifies the circumstances under which a trademark may be canceled or considered abandoned. Originally presented to the House as H.R. 6285, this title passed on October 1, 1984, unanimously by voice vote.

Title I of this bill includes provisions which clarify the circumstances under which a trademark can be found to have become generic. The language in the bill before us is derived from the version reported by the Senate Judiciary Committee in S. 1990, with an amendment. The House passed a bill with the identical purpose on October 1, 1984, as H.R. 6285. The substance of the two bills is identical. The only difference between the two bills related to the effective date section. The measure before us includes an effective date section which uses the language not found in the House-passed bill. The informal negotiations on this measure produced both the effective date amendment and the following statement of explanation.

This act does not overrule the Anti-Monopoly decision as to the parties in that case. *Anti-Monopoly, Inc.* v. *General Mills Fun Group, Inc.*, 684 F.2d 1316 (9th Cir. 1982), cert. denied, 103 S.Ct. 1234 (1983). The bill merely overturns certain elements in the reasoning in that case. In addition, this act also does not say whether or not monopoly is a valid trademark. This Congress is not in a position to make a decision on the validity of that mark.

Section 104 does not forbid the reopening of judgments on grounds other than the passage of this legislation, such as on the basis of newly discovered evidence. It does, however, clearly forbid the reopening of any judgment entered prior to the date of enactment of this act based on the provisions of this legislation.

By virtue of this act, Congress does not intend to alter accepted principles of collateral estoppel and res judicata. These are judicial doctrines of continuing validity, and should be applied by the courts in accordance with all appropriate equitable considerations.

In section 104, the phrase "final judgment" is used in the same sense as "judgment" is used in the Federal Rules of Civil and Appellate Procedure to include a decree and any order from which an appeal lies. (See rule 54, Fed. R. Civ.P.)

Any student interested in the legislative history of section 104 will note that my explanatory language is virtually identical to that presented on the Senate floor by my counterpart subcommittee chair Senator CHARLES MCC. MATHIAS, JR. Our joint language, in the absence of a conference report, represents the official legislative history of section 104.

In construing the meaning of this provision the courts should, of course, be guided by the plain language of the statute. To the extent that there is any ambiguity, the courts will primarily look to the floor statements of the bill's sponsors. See *Turpin* v. *Burgess*, 117 U.S. 504, 505-506 (1886); *National Small Shipments Conference* v. *Civil Aeronautics Board*, 618 F.2d 819, 828 (D.C. Cir. 1980).

I insert in the RECORD a letter to me from Senator MATHIAS that clarifies our understanding:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, DC, October 9, 1984.

Hon. ROBERT W. KASTENMEIER,
Chairman, Subcommittee on Courts, Civil Liberties, and the Administration of Justice, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR CHAIRMAN KASTENMEIER: I am writing in my capacity as Chairman of the Senate Subcommittee on Patents, Copyrights, and Trademarks, to clarify the legislative intent of the Trademark Clarification Act of 1984, which passed the Senate on October 3, 1984 as Title I of H.R. 6163. As you know, this bill is a compromise between S. 1990, a bill reported out of the Subcommittee on Patents, Copyrights, and Trademarks, and H.R. 6285, a bill reported out of the House Subcommittee on Courts, Civil Liberties, and the Administration of Justice.

I want to confirm at this time our mutual understanding about section 4 of this Act, which is adapted from section 4 of H.R. 6285. As you know, it is possible that there might be future litigation about trademarks whose validity has previously been adjudicated under the test of the *Anti-Monopoly* case. Should such litigation arise, the courts should apply accepted principles of *res judicata* and collateral estoppel. These are complex, multi-factor doctrines developed by the courts, and there is a large body of decisions applying these doctrines. The citation of any particular court decisions in any of the legislative history of this measure should not be construed as an indication that such cases are to be given any greater weight than other cases applying these complex doctrines.

With best wishes,
Sincerely,
CHARLES MCC. MATHIAS, JR.,
U.S. Senator.

TITLE II: STATE JUSTICE INSTITUTE

Title II of the Senate amendment is designed to aid State and local governments in strengthening their judicial systems and improving the fight against crime through the creation of a State Justice Institute. This title was brought to the House in the form of H.R. 4145 on May 22, 1984. It had over 40 cosponsors from both sides of the aisle. Although H.R. 4145 received a strong majority vote of 243 to 176, it failed to achieve the necessary two-thirds for passage on the suspension calendar. Parenthetically, I should note that the Senate amendment changed the funding of the Institute from $20,000,000 (fiscal year 1985), $25,000,000 (fiscal year 1986), and $25,000,000 (fiscal year 1987) to $13,000,000 (fiscal 1986), $15,000,000 (fiscal 1987), and $15,000,000 (fiscal 1988). This reduction represents a total saving to the Federal Government of $28,000,000. In addition, the Senate amendment increases the State matching grant requirement from 25 to 50 percent. Last, the amendment gives the Attorney General of the United States responsibility to report to Congress on whether the Institute is being cost effective, is meeting its statutory purposes, and is respecting the limitations and restrictions placed on it by the Congress. Thus, from an opponent's perspective, the bill before us today is a better bill than we voted on several months ago.

In all other respects, the Senate passed bill is the same as H.R. 4145.

Mr. Speaker, since we last considered the issue of a State Justice Institute, one issue has arisen that I want to clarify for the legislative history. Fear has been expressed that the statutory provision relating to "grants and contracts" may be construed to exclude, on a noncompetitive basis, entities other than those listed in section 206(b)(1) of the Senate amendment to H.R. 6163.

I would like to emphasize that what is contemplated is that research and experimentation will be conducted by a diversity of institutions. The proposed institute is specifically designed to be administered in keeping with the doctrines of federalism and separation of powers. This means that the State Chief Justices and the State courts themselves will play a key role in determining the nature and recipient of the institute's funds. Further, the institute is designed to be a small developmental and coordinating agency rather than a large operating agency with a centralized bureaucracy. This is to ensure that different kinds of research could be carried out by those institutions best equipped to do research, without wasteful duplication of facilities. The same holds true for judicial education.

In order to achieve the legislation's research mandate, which admittedly is only one aspect of the institute's overall charge, it will be necessary to call upon the strengths of our academic centers as well as the research operations of our judicial institutions.

I, therefore, contemplate a mix of research by institutions connected to the judiciary and by independent academic centers with a proven capacity for high quality research of this Nation's justice system. I also envision the possibility of major law schools working together with their State supreme court on an experiment designed to improve the judiciary of their respective State.

My own State of Wisconsin has a highly respected law school; members of the faculty has commented on and assisted in the drafting of this legislation. The University of Wisconsin Law School, through its legal assistance to inmates program and its disputes processing research program, has established itself as a center for high quality work in both the civil and criminal justice areas. Other law schools have similar fine programs. There certainly is every intention of utilizing in the public interest the resources of law schools such as my own.

In short, the priority treatment accorded State courts in section 206 of the Senate amendment will not serve to preclude law schools from engaging in any endeavor designed to improve the functioning of our State judicial systems. On the contrary, this Nation's legal institutions are encouraged to come forward and to engage in a mutually stimulating exchange between academic centers, research institutions attached to the judiciary, and State judges and court administrators.

TYPE III: SEMICONDUCTOR CHIP PROTECTION

Without question, title III of the Senate amendment is the most important section in the bill. It amends the Copyright Act to protect semiconductor chip products in such a manner as to reward creativity, encourage innovation, research, and investment in the semiconductor industry, and prevent piracy. The Senate amendment is a 95 percent recession to the measure that was brought before the House on June 11, 1984 (see H.R. 5525) and that passed by a recorded vote of 388 to 0. Title III is an opportunity to create the first new form of intellectual property since passage of the Lanham Act in the 1870's. I know that the administration places a great deal of emphasis on passage of the semiconductor chip legislation.

Before discussing the next title, I would like to pause and note the efforts of two respected colleagues from California, Mr. EDWARDS and Mr. MINETA, who as chief sponsors of the semiconductor chip legislation, have worked without fatigue over the past 6 years to achieve what we are voting on today: intellectual property protection for semiconductor chip products.

Title III of H.R. 6163 is the culmination of extensive negotiations between my subcommittee, the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, and the Senate Judiciary Subcommittee on Patents, Trademarks, and Copyrights. Lengthy negotiations were necessary for several reasons. First, there was a fundamental difference in the drafting of the House and Senate bills: the Senate accorded protection for chip products under copyright law and the House established a new sui generis form of protection. In addition, the truly technical characteristics of the property deserving of protection—mask works to semiconductor chip products; the chip, of course, being smaller than a thumbnail—made statutory drafting almost as difficult as understanding the property itself. Last, the House and Senate had different positions on the initial date for commercial exploitation of chip products to be set legislatively in order to qualify for protection under the act. The Senate used January 1, 1980 as the qualifying date and the House set January 1, 1984 as the date.

In any event, we have resolved these and other issues.

In addition to recognizing the efforts of Mr. EDWARDS and Mr. MINETA I again thank my Senate counterparts, the Senator from Maryland, CHARLES MCC. MATHIAS, JR., and the Senator from Vermont, PAT LEAHY, ranking minority member, and their staffs for their hard work. I would be remiss if I did not mention the unwavering cooperation and support that I have received from my own subcommittee members and especially my ranking minority member [Mr. MOORHEAD] on title III.

The measure that I bring before the House today is good legislation. It is a better measure than the one we passed in June by a unanimous vote, and that was a well drafted bill.

The measure before us today is essentially the House-passed version. The Senate amendment contains clarifying and drafting changes which are discussed at length in an "Explanatory Memorandum of the Senate Amendment to S. 1201 (as Considered by the House of Representatives)" which I will insert in the hearing record at the end of my statement, thereby making it part of the legislative history of the act.

Mr. Speaker, this legislation is the first new intellectual property law—as opposed to recodifications—passed by Congress in nearly 100 years. The fundamental import of title III is that it recognizes industrial property as a right.

I am very pleased to report that the House prevailed on the sui generis approach, as opposed to copyright, for protection of semiconductor chip products. The approach that was incorporated in H.R. 5525, and that now has been accepted by the Senate, is that a free-standing form of protection is uniquely suited to the protection of mask works, which represent a unique form of industrial intellectual property.

This new form of industrial property should be contrasted with so-called author's copyright in literary and artistic works protected under traditional copyright principles.

Quite clearly, a mask work is not a book. The measure before us today, therefore, does not engage in the fatal flaw of treating books and mask works similarly.

By not suffering from a "fallacy of analogy"—the words of Judge Stephen Breyer—the act will do no harm to the integrity and substance of copyright law. To the contrary, it may even strengthen traditional copyright principles.

Establishment of general principles of law and consistent application of the law are matters of great import. As observed by Prof. Lyman Patterson, Emory University Law School, before my subcommittee,

> While consistency for its own sake is a virtue of small consequence, consistent principles for a body of law are essential for integrity in the interpretation and administration of that law.

The House therefore prevailed on what I considered to be the most important difference between the House and Senate bills.

I have to admit, however, that the compromise before us incorporates several changes that probably led the Senate at the outset to choose a copyright solution to the problem of chip piracy. Senators MATHIAS and LEAHY have so stated in their floor statements, and I can summarize their thoughts by observing that the compromise before us today is stronger in three regards. First, the House report and the explanatory memoranda introduced during this and Senate floor debate assuage fears of uncertainty in the law, leading possibly to years of litigation while a new body of judicial precedent is established. Without question, litigation will result; but no more or less than arises from any legislative enactment.

Second, the effective date provisions of the act have been strengthened. The Senate amendment provides that the act become effective on the date of enactment, thereby allowing and encouraging commercial exploitation of several chips that have been held off the market awaiting passage of this act. The Copyright Office will have 60 days to prepare for administration. Last, chips commercially exploited on or after July 1, 1983, will receive protection under the act, subject to a 2-

year compulsory license that allows infringers to continue to sell and distribute their inventory of chip products in existence on the date of enactment if they agree to pay reasonable royalties. I am not aware of any infringing chips that presently fall within the category—July 1, 1983 to the present—covered by the act.

Third, I have agreed to clarify that the House-Senate amendment is based on an understanding that Congress does not take a position on the legality, under current law, of chip copying prior to the effective date of this act. There is some language to this effect in the House report. Whether under Federal law—including copyright law—State law, or common law, this act is not intended to affect any legal rights available to chip products commercially exploited prior to July 1, 1983.

An element in the Senate amendment that the House can take some credit for is an international transition provision. Under H.R. 5525 it was possible for foreign concerns to obtain mask work protection in the United States by transferring all rights under the proposed legislation to a U.S. national or domiciliary before the mask work is commercially exploited, or alternatively by first commercially exploiting the mask work in the United States. The Senate bill (S. 1201)—based of course on copyright—was somewhat ambiguous on what protection was to be accorded foreign chips.

The Senate amendment is a dramatic improvement over both bills. It preserves the option contained in the House bill, but also creates a transition period during which multilateral and bilateral cooperation directed toward creation an international order of chip protection is encouraged. The Secretary of Commerce is authorized to extend the right to obtain chip protection under the act to nationals of foreign countries if three conditions are met: That country is making progress in the direction of mask work protection; nationals of that country or persons controlled by them are not pirating or have not in the recent past been engaged in the piracy of semiconductor chip products or the sale of pirated chips; and the entry of an interim order would promote the purposes of the act and achieve international comity with respect to the protection of mask works.

The Secretary's authority is sunset after 3 years. Two years after the date of enactment of this act he will report, after having consulted with the Register of Copyrights, to the House and Senate Judiciary Committees.

Among the stimuli that led to creation of an international transition period was a letter that I, along with Senator MATHIAS, received from the Honorable Akio Morita, president of the Electronics Industries Association of Japan [EIAJ] and chairman and chief executive officer of the Sony Corp. Mr. Morita referred to the joint recommendations of the United States-Japan Work Group on High Technology Industries, made in November 1983:

> Both governments should recognize that some form of protection to semiconductor producers for their intellectual property is desirable to provide the necessary incentives for them to develop new semiconductor products. And both governments should take their own appropriate steps to discourage the unfair copying of semiconductor products and the manufacturing and distribution of the unfairly copied semiconductor products.

Mr. Morita further observed that passage of legislation is "* * * highly desirable, both of itself and as an indication of the proper direction for the international protection of such intellectual property." He concluded by stating that EIAJ will ask the Government of Japan to provide a form of semiconductor protection, as expeditiously as possible, through a legislative framework.

Other countries have also expressed interest in the legislation before us today.

So, in the spirit of international comity and mutual respect among nations, the Senate amendment allows foreign countries with domiciliaries that produce semiconductor chips to benefit from the protection of our laws during a 3-year window and only if they respect the rights of American chip companies.

I am excited about this innovative provision of law; I hope it works, because it may serve as a useful precedent in other areas of law; and I look forward to working with the Secretary of Commerce, and the Register of Copyrights, on the international aspects of the act.

The Senate receded to the House approach of not having criminal penalties in the act. It seems that every day we are creating a new panel statute of some sort with little thought given to investigative and evidentiary problems, to the burdens on judges and juries, and to the goals of and pressures on the correctional system. I am pleased to state that we have not so erred in this act. I am confident that the strong civil penalty section in the act will serve as adequate deterrence to theft of industrial property.

With these thoughts in mind, I commend title III of the Senate amendment to H.R. 6163 to the House of Representatives.

TITLE IV: FEDERAL COURTS IMPROVEMENTS

Title IV of the Senate amendment is composed of three subtitles, each improves the functioning of the Federal judicial branch of Government. Title IV is supported by the administration and the Judicial Conference.

SUBTITLE A: CIVIL PRIORITIES

Subtitle A permits the courts of the United States to establish the order of hearing for certain civil matters. It attains this objective by repealing the 80 or so calendar priorities and by creating a general rule that expedited treatment can be obtained for good cause shown or cases involving temporary or preliminary injunctions. A virtually identical measure passed the House unanimously by voice vote on September 11, 1984, as H.R. 5645.

Title IV (subtitle A) of the bill, relating to civil priorities, was amended by the Senate to strike out the repeal of certain expediting provisions relating to civil rights cases. In my view this change was unnecessary. In all cases involving applications for temporary or preliminary injunctions, such cases would receive a priority status anyway under the provisions of proposed section 1657 of title 28, United States Code. Moreover, any other civil rights cases involving money damages alone can, in appropriate cases, be granted expedited treatment under the good cause provisions.

It should also be noted that the amendment adopted by the Senate and before us today technically does not accomplish its alleged purpose. Proposed section 1657 provides that notwithstanding any other provision of law there are no civil priorities except the general rules set forth in section 1657 of title 28.

SUBTITLE B: PLACES OF HOLDING COURT

Subtitle B amends the judicial code to create four new places of holding court, to realign the boundaries of divisions in three judicial districts, and to change the place of holding court in one judicial district. This subtitle passed the House unanimously by voice vote on September 24, 1984 (see H.R. 6163).

The Senate amendment in this regard is identical to H.R. 6163.

For pertinent legislative history, see House Report 98-1062 and the House debate that occurs at 129 CONGRESSIONAL RECORD (daily edition September 24, 1984).

SUBTITLE C: TECHNICAL AMENDMENTS TO PUBLIC LAW 97-164

Subtitle C makes technical amendments with respect to the Federal Courts Improvement Act of 1982 (see Public Law 97-164). These technical amendments passed the House on the Consent Calendar on August 6, 1984.

Subtitle C of title IV contains identical language to that found in H.R. 4222, the House-passed bill.

The Senate amendment, however, adds two further technical amendments, both relating to the U.S. Claims Court. The first change authorizes the Claims Court to utilize facilities and hold court not only in Washington, DC, but also in four locations outside of the Washington, DC,

metropolitan area. The Claims Court must use these facilities for the purpose of holding trials and for such other proceedings as are appropriate to execute the court's functions. The Director of the Administrative Office of the U.S. Courts, with direction from the Judicial Conference of the United States, shall designate such locations and provide for such facilities. The second change allows the chief judge of the Claims Court to appoint special masters to assist the court in carrying out its functions. Special masters shall carry out such duties as are assigned; they are to be compensated in accordance with procedures set forth by the rules of the Claims Court. It was not necessary to state in statutory language that the Federal Rules of Civil Procedure apply to special masters serving the Claims Courts.

Both additions made by the Senate qualify as technical amendments to Public Law 97-164. Furthermore, the need for both changes is found in Senate hearings relating to oversight of the Claims Court.

TITLE V: GOVERNMENT RESEARCH AND DEVELOPMENT PATENT POLICY

Title V of the Senate amendment relates to Government research and development policy. This provision had its origin in an executive communication from the U.S. Department of Commerce that took the form of H.R. 5003 and S. 2171. Hearings were held in the House Committee on Science and Technology and the Senate Judiciary Committee. The House committee reported H.R. 5003; the Senate Judiciary Committee reported an extremely diluted version of the original bill—a version that only amended Public Law 96-517, thereby only affecting universities and small businesses. As chief sponsor of the legislation that led to enactment of Public Law 96-517, I greatly appreciate the efforts of the Science and Technology Committee not only in the oversight area but also as relates to processing legislation necessary to effectuate the act's original purposes. In this regard, I shortly will yield time to Chairman FUQUA and Subcommittee Chairman WALGREN to discuss in further detail title V of the Senate amendment. These two Members will generally speak to their ongoing attempts to achieve a more uniform Government patent policy. They, I am sure, will indicate that title V of the Senate amendment is a watered down version of what started out as an administration effort to assist big business. Title V, which now only applies to universities and small businesses, still has substantial merit.

Mr. Speaker, I would like my colleagues to be aware of three points which relate to title V. First, my subcommittee held no hearings this Congess on its contents. Second, I have agreed to hold hearings next Congress on not only title V, but also on the broader issue of Government patent policy. I therefore have assured Members that the Judiciary Committee will review the bill that we are voting on today and reopen it for amendment if it is defective in policy implications or drafting. I do note that there are several drafting problems in the bill. For example, in section 501(4) the reference to "clause (i) through (iii)" should read "clause (i) through (iv)." Today we are only in a position of deferring to Senate judgment. Early next year we will assess the merits of the Senate's decisions and reverse or modify them, as is necessary. I have received assurances from Senator DOLE, author of title V, that he will assist in this process. Third, and last, I would like to make it clear that nothing in title V extends the authority of the Secretary of Commerce beyond the provisions of Public Law 96-517, as we are amending it today. We are not extending the authority of the Secretary of Commerce to make systemwide pronouncements and decisions, binding on other agencies, that relate to Government patent policy.

This concludes my discussion of the five titles of H.R. 6163, as amended by the Senate.

I can confidently state that on balance the package is a very good deal for the House. Five unanimously approved House bills are in the Senate amendment. A title of the bill received a 70-vote majority in the House. The final title was approved in part by the House Science and Technology Committee.

More importantly, the contents of H.R. 6163 are sound public policy; they are legislative ideas whose time has come to the fore; we should vote for them and send them on to the President for his signature. Not only will the semiconductor industry, trademark owners, the Federal and State courts, all benefit form this legislation, but citizens across this country will be better off as a result of its enactment.

In conclusion, I ask for an aye vote on H.R. 6163, as amended by the U.S. Senate.

EXPLANATORY MEMORANDUM OF THE SENATE AMENDMENT TO H.R. 6163, TITLE III, AS CONSIDERED BY THE HOUSE OF REPRESENTATIVES

This memorandum essentially follows the format of the "Explanatory Memorandum of Mathias-Leahy Amendment to S. 1201" introduced during the Senate floor debate on H.R. 6163 (Federal District Court Organization Act) to which the amendment was attached as Title III). See 129 CONGRESSIONAL RECORD S12912 (daily ed. Oct. 3, 1984).

Indeed, since the House and Senate worked together and agreed in advance on the amendment to the semiconductor legislation, this memorandum coupled with the Senate's document represent an informal "conference report."

However, to the extent that the Senate emphasizes changes to its original bill (S. 1201), this memorandum counters this emphasis by highlighting changes to the House's original bill (H.R. 5525).

The House-Senate compromise makes thirteen changes to H.R. 5525. Several of these changes are clarifying and technical; these latter modifications are nonetheless discussed in this memorandum in order to present a clear and concise legislative history in the House of Representatives.

I. DEFINITION OF COMMERCIAL EXPLOITATION: SEC. 901(a)(5)

The amendment to section 901(a)(5) sharpens the definition of "commercially exploit," a concept that is important in determining when protection commences under the Act, and when it expires. In this clarified definition, the amendment substitutes the words "for commercial purposes" for the phrase "for profit." Many non-profit organizations, such as universities, engage in research and development in the semiconductor chip product field. If such an organization distributes a new chip to others for commercial purposes, its not-for-profit status should not place it in a different position than an ordinary commercial business undertaking the same conduct. The ten-year term of protection should commence, and the clock should begin to run on the two-year registration requirement.

Although H.R. 5525 used the phrase "for profit" in a broad sense and would not have barred non-profit organizations from receiving protection for their mask works, this clarifying change improves the legislation.

II. ORIGINALITY: SECTION 902(b)

The Senate amendment follows the House bill by including, in section 902(b), a provision that makes mask works unprotectable under the Act if they are made up of "designs that are staple, familiar, or commonplace in the semiconductor industry or variations of such designs, combined in a way that, considered as a whole, is not original." The phrase "considered as a whole" is added by the Senate amendment to insure that the subject matter of a mask work must be original, when considered in its totality, even though, if the individual elements of the mask work were removed away from the whole they may appear familiar or commonplace (see H. Rep. 98-781 (Star Print) at 19).

III. RECORDATION OF OWNERSHIP TRANSFER AND LICENSING: SECTION 903(c)

Although S. 1201 did not have a specific recordation section for ownership, transfer and licensing, a recordation procedure similar to that found in the copyright Act (see 17 U.S.C. § 205) would have been authorized. H.R. 5525 lacked a recordation section altogether. The Senate amendment, by inserting a recordation provision, entitles mask work owners and other concerned parties to record transfers and licenses relating to mask works in the Copyright Office. Recordation constitutes constructive notice of the transfer or license. In this regard, a security interest under the Uniform Commercial Code or other state law may also be recorded as a transfer.

IV. DURATION OF PROTECTION: SECTION 904

S. 1201 provided mask work protection from the initial fixation of a mask work, such as in a drawing. Section 904(a) of H.R. 5525 began protection for mask works only when they are registered (after fixation of the work in a semiconductor chip product) or upon their first commercial exploitation, whichever occurs first. The Senate amendment basically adopts the House language.

The Senate amendment adds two refinements to section 904. First, the words "anywhere in the world" are added to clarify and carry forward the original intent of that section. Second, a change is made to clarify how long mask work protection continues after its commencement. All terms of mask work protection continue until the end of the calendar year of the tenth year after registration or first commercial exploitation, whichever is first. To accomplish this latter end, a new section 904(c) is added to make this section conform to 17 U.S.C. § 305, a provision of the Copyright Act previously incorporated by S. 1201 by implication.

The Senate amendment therefore results in slightly larger protection of mask works, depending of course on when registration or first commercial exploitation occurred during the calendar year.

V. REVERSE ENGINEERING: SECTION 906(a)

Although the reverse engineering provisions of S. 1201 and H.R. 5525 were almost identical, the Senate amendment includes a provision (see section 906(a)(2)) to clarify the intent of both chambers that competitors are permitted not only to study protected mask works, but also to use the results of that study to design, distribute and import semiconductor chip products embodying their own original mask words. While this intent appears indisputable from the legislative history in both Houses, it seems prudent to spell in out in the bill itself.

The end product of the reverse engineering process is not an infringement, and itself qualifies for protection under this Act, if it is an original mask work, as contrasted with a substantial copy. If the resulting semiconductor chip product is not substantially identical to the original, and its design involved significant toil and investment so that it is not a mere plagiarism, it does not infringe the original chip, even if the layout of the two chips is, in part, similar. As noted in the House Report (p. 21), the courts are not likely, as a practical matter, to find it unduly difficult to draw the line between reverse engineering and infringement, because the additional work required to come within the privilege established by section 906(a) will ordinarily leave a "paper trail."

Of course, apart from the foregoing, the Senate amendment, like both bills, incorporates the familiar copyright principle of substantial similarity. Although, as a practical matter, copying of an insubstantial portion of a chip and independent design of the remainder is not likely, copying of a material portion nevertheless constitutes infringement. This concept is particularly important in the semiconductor ship industry, where it may be economical, for example, to copy 75 percent of a mask work from one chip and combine that with 25 percent of another mask work, if the copied parts are transferable modules, such as units from a cell library.

The reverse engineering section, as amended, strikes the appropriate balance between the rights of the creator and the needs of the public. Courts, in reviewing whether a given reproduction qualifies for a reverse engineeriong exception, will do so on a case-by-case basis, as they do for the copyright doctrine of "fair use."

VI. FIRST SALE: SECTION 906(b)

Section 906(b) of the Senate amendment simply clarifies the intent of H.R. 5525 as relates o aplication of the first sale doctrine to mask works. It is made clear that a customer is free to use a semiconductor chip product unit as he chooses, after becoming its owner by buying it from the mask work owner or its licensee. However, the customer's permissible use does not include reproducing the semiconductor chip product (except in the course of reverse engineering, which is separately governed under section 906(A)).

VII. REGISTRATION OF CLAIMS OF PROTECTION: SECTION 908

In general, the Senate amendment follows the pattern of H.R. 5525, which in turn largely replicates the corresponding provisions of the Copyright Act.

Some technical changes were necessary, however, to clarify the intent of the House Bill. The Senate amendment therefore revises section 908(a) to set forth a procedure pursuant to which mask work owners file applications for registration under the Act. Also, section 908(c) is modified to require applicants to pay a fee, and to submit identifying materials prescribed by the Copyright Office. Applicants should not, of course, be required to deposit material that would disclose trade secrets or would facilitate domestic or foreign chip piracy; it is anticipated that the Copyright Office's implementing regulations should reflect this principle to the greatest extent possible, while keeping in mind the necessity of benefitting the public by keeping a public record.

Further, section 908(g) permits applicants to go immediately to court in emergency situations, when the Register of Copyrights refuses or fails to issue a certificate of registration within a specific time frame. Failure to issue a certificate after four months (as opposed to three months as was provided in H.R. 5525) shall be deemed a refusal to issue for purposes of being able to bring a civil cause of action. Also, the Senate amendment authorizes a reviewing district court, upon a showing of good cause, to shorten such four-month period.

VIII. NOTICE: SECTION 909

H.R. 5525 created a new, M-in-a-circle symbol for its nonmandatory or discretionary notice, and also allowed use of the words "Mask Work." Since printers do not usually carry M-in-a-circle symbols in stock, and most typewriters and word processing equipment also lack them, the Senate amendment provides an alternative abbreviation: "*M*". The Senate amendment also eliminates the notice requirement found in H.R. 5525 for the year in which the mask work was first fixed in a semiconductor chip product.

IX. COMMERCE: SECTION 910(a)

In order to avoid any constitutional questions on the issue of whether, as both Houses found, mask works can be protected as "writings" within the meaning of the Constitution's intellectual property clause, section 910(a) of the Senate amendment includes a commerce limitation, so that it reaches only conduct in or affecting commerce.

This modification, found to be unnecessary in the House (see H. Rep. 98-781 at 16, n. 36), limits somewhat the scope of the bill.

X. ENFORCEMENT OF EXCLUSIVE RIGHTS AND CIVIL ACTIONS: SECTIONS 910 AND 911

Clarifying changes to the House bill are also made in other parts of section 910. In section 910(b), a clause is added to make it clear that a timely registrant may sue for pre-registration damages (as well as for post-registration damages) so long as they occur as a result of conduct during the ten-year term. Additional clarification of section 910(b) permits the exclusive licensee of all rights in a mask work to sue, as an owner may. A change in section 910(c) permits the Customs Service to exclude not only infringing copies but also products used for purposes of contributory infringement in violation of the rights of mask work owners.

The Senate amendment authorizes Federal district courts to issue impounding orders against infringing chip products. S. 1201 authorized exercise of this judicial remedial power based on the Copyright Act, but H.R. 5525 omitted it. Like temporary restraining orders and preliminary injunctions, impounding orders are a useful and important remedy, if not abused. To prevent such abuse, the Senate amendment provides that applications for impounding orders should be heard, where practicable, in the same manner as applications for temporary restraining orders and preliminary injunctions: that is, not ex parte, and with customary procedural safeguards.

XI. RELATION TO OTHER LAWS: SECTION 912

The relationship of the Semiconductor Chip Protection Act to other laws is made somewhat complicated by the uncertainty of the application of those laws to mask works—the very predicament that motivated this legislation in the first place.

Enactment of this bill will provide an explicit Federal remedy for misappropriation and unauthorized copying of mask works. Within the carefully defined ambit of the reach of this legislation, the remedy it provides is intended to be exclusive. However, four factors limit the effect of this principle.

First, as expressed in section 912(e), nothing in the bill affects rights in mask works first commercially exploited prior to July 1, 1983. The rights that remain untouched by this bill include claims arising under the Copyright Act. As is evident in the legislative history, the availability of copyright protection for mask works was "sufficiently doubtful" to discourage investment and inovation; but this amendment should clarify that Congress does not find that such protection is available. The decision not to provide relief under this Act for future misappropriations of mask works that come to market before July 1, 1983 should not be misinterpreted as a conclusion that no such protection ought to be accorded.

With respect to state law, the same principles apply. The states are permitted to regulate these older chips as they see fit, so long as the state enactment does not directly conflict with some other Federal law. Of course, since state contract law is not affected by this Act, existing license agreements with respect to pre-July 1, 1983 mask works may still be enforced. Nor are future enactments, or future decisions of state or Federal courts barred from this field. As to chips first commercially exploited prior to July 1, 1983, this legislation simply has no preemptive effect.

Second, with respect to mask works first commercially exploited after July 1, 1983, the preemption of "equivalent" state law remedies is ineffective until January 1, 1986. This provision of the Senate amendment, section 912(c), conforms with the House bill.

The third limiting principle is that state law remedies which are not "equivalent" are not preempted, even after January 1, 1986, unless they directly conflict with the Federal act. As the House Report recognized (at page 29), "state trade secret law is a necessary adjunct to this Act, and provides a needed protection during a time period

when this law provides none," referring to the period prior to commercial exploitation or registration.

Finally, enactment of the bill has no preemptive or superseding effect upon other, more general legislation which may affect the semiconductor industry, e.g., unfair trade practice laws or patent laws.

Subject to these limiting principles, the Act is intended to provide an exclusive remedy. Congress does not intend to provide protection which is (as to post-July 1, 1983 chips) cumulative to the protections that may be claimed under the Copyright Act; as to these chips, the Act will replace copyright protection. Similarly, the privileges created by this Act, such as the reverse engineering right, may not be restricted by reference to the narrower privileges that obtain under copyright, such as fair use. The legislative history of this bill includes repeated assurances that mask work protection in no way erodes copyright protection for subject matter such as computer programs or data bases, even if that subject matter is embodied in a semiconductor chip. The converse is also true; assertions of copyright in mask works masquerading as copyright subject matter should not be permitted to detract from the integrity and exclusivity of the protection scheme created by this Act.

In short, the failure of this Act to provide mask work infringement remedies against the piracy of pre-July 1, 1983 semiconductor chip products should not be interpreted as a legislative declaration condoning such unfair competition or stating a Federal policy against state or Federal law enforcement activity to prohibit or remedy such piracy. To the contrary, absent declarations to the contrary, Congress generally takes the view that works produced prior to a legislative act should not be stripped of existing protection that they have under pre-existing law. When Congress intervenes in an area of new technology, it should not weaken any existing rights unless it is necessary to replace them with other rights and remedies with which the prior rights would interfere. That is not the case here for pre-July 1, 1983 semiconductor chip products. The decision to leave chips commercially exploited prior to July 1, 1983, simply reflects a decision to leave them subject to the more general laws that would remain in effect absent this legislation. In other words, pre-July 1, 1983 chips are left no better or worse off by this legislation.

XII. TRANSITIONAL PROVISIONS: SECTION 913

The Senate amendment follows the confines of H.R. 5525, with some changes and clarifications.

The amendment makes the Semiconductor Chip Protection Act fully effective upon enactment, as opposed to January 1, 1985, as is provided in H.R. 5525. However, section 913(a) holds the registration and enforcement mechanisms in abeyance for sixty days, to allow adequate time for the Copyright Office to prepare to receive applications for registration. The Copyright Office, not only during its preparation period, but also thereafter, will keep the House and Senate Judiciary Committees apprised of its problems and experiences with the Act.

Section 913(b) clarifies that the bill has no retroactive effect. No act of chip piracy that occurred prior to the date of enactment is an actionable infringement under the Act. The disposition of semiconductor chip products that result from such pre-enactment unauthorized copying is governed by section 913(d).

Subsection (d) deals with protection of mask works first commercially exploited between July 1, 1983 and the date of enactment. Unauthorized copies of chips embodying these mask works may be imported or distributed, subject to a compulsory license that includes two important conditions, both found in H.R. 5525. First, the importation and distribution privilege applies only to semiconductor chip product units that were in existence on the date of enactment. In other words, existing inventory may be disposed of, but further manufacture must cease upon enactment. Second, the importer or distributor must agree to pay a reasonable royalty to the mask work owner. If he does not agree, or if he fails to make such payments, the importer or distributor forfeits the compulsory license privilege, and the mask work owner may make use of the remedies provided for post-enactment mask works, including injunctions and exclusion orders.

The owner of a mask work first commercially exploited after July 1, 1983 but before enactment may obtain protection (subject to the compulsory license just described) by registering the mask work with the Copyright Office before July 1, 1985. The license terminates two years after such registration. Thus, by July 1, 1987, all privileges will have expired, and the pre-enactment mask work will be treated identically to one first commercially exploited after enactment. The two-year period provides ample time to dispose of inventory of unauthorized copies of chips, and removes from litigation within a reasonable time the potentially contentious factual issue of when a particular semiconductor chip product unit was manufactured.

In short, section 913 remains essentially as found in H.R. 5525. The major change is a six-month recession to the Senate—from January 1, 1984 back to July 1, 1983—relating to the time period of first commercial exploitation in order to qualify for protection under this Act.

XIII. INTERNATIONAL TRANSITION: SECTION 914

H.R. 5525 denies protection to foreign owners of mask works unless the works were first commercially exploited in the United States. While it was contemplated that foreign countries would eventually obtain full protection by concluding treaties or enacting chip protection legislation, no protection was available in the interim other than by transferring rights to a U.S. national or domiciliary before first commercial exploitation. In order to encourage such steps toward a regime of international comity in mask work protection, the Senate amendment includes important international transitional provisions, contained in Section 914.

Section 914(a) provides that the Secretary of Commerce may extend the privilege of interim protection under the Semiconductor Chip Act to nationals of foreign nations under certain conditions. These are: (1) that the foreign nation in question is making progress (either by treaty negotiation or legislative enactment) toward a regime of mask work protection generally similar to that under the Act; (2) that its nationals and persons controlled by them (such as subsidiaries or affiliated companies) are not engaging and have not in the recent past engaged in chip piracy or the sale of products containing infringing semiconduct components; and (3) that entry of the Secretary's order would promote the purposes of the Act and of achieving international comity toward mask work protection.

The Secretary is particularly well situated to make these determinations because of the Department's broad ranging intellectual property, trade, and foreign relations responsibilities. The Assistant Secretary of Commerce and Commissioner of Patents and Trademarks is in a position to evaluate the legal adequacy of proposed foreign legislation and, as well, can advise the Secretary on the international intellectual property law aspects of foreign chip protection. The International Trade Administration with its worldwide network of Foreign Commercial Service Officers in the United States Embassies is in a position to provide input on commercial activities in foreign countries where they may be concern with actual or potential misappropriation of United States semiconductor chip products. The Secretary thus will have the benefit of balanced consideration of legal and trade issues to draw upon in making the determination to extend, deny, or withdraw the interim protection provided under section 914.

In making determinations of good faith efforts and progress (section 914(a)(1)), the Secretary should take into account the attitudes and efforts of the foreign nation's private sector, as well as its government. If the private sector encourages and supports action toward chip protection, that progress is much more likely to continue. See, e.g., letters dated July 18, 1984, to Hon. ROBERT W. KASTENMEIER and CHARLES MCC. MATHIAS, Jr., from Akio Morita (President, Electronic Industries Association of Japan.) With respect to the participation of foreign nationals and those controlled by them in chip piracy, the Secretary should consider whether any chip designs, not simply those provided full protection under the Act, are subjected to misappropriation. The degree to which a foreign concern that distributes products containing misappropriated chips knows or should have known that it is selling infringing chips is a relevant factor in making a finding under section 914(a)(2). Finally, under section 914(a)(3), the Secretary should bear in mind the role that issuance of the order itself may have in promoting the purposes of this chapter and international comity.

The Secretary's order is to be made in an informal rule-making proceeding, reviewable in an appropriate district court under the Administrative Procedures Act for abuse of discretion or want of substantial evidence. If the privilege of interim protection is abused, or if the conditions that led to its issuance appear to the Secretary no longer to exist, the Secretary may rescind the order in a further informal rule-making proceeding (or simply allow it to expire). Proceedings may be initiated by the Secretary upon his own motion or at the request of a foreign nation, or other interested party. The Secretary may begin any such proceeding and may issue an appropriate order at any time after the enactment of this Act. In the case of those countries already having a system allowing mask work protection, or having substantial semiconductor industries (such as Japan), expedited action may be particularly appropriate to encourage and facilitate efforts to establish international comity. Also, the Secretary has discretion to make his order effective as of the date he receives a request to initiate a proceeding under section 914.

The Secretary may set the expiration date of the order. A short-term order may be appropriate where progress is not substantial enough to justify a longer order. As a consequence, a foreign nation might be unable actually to introduce any proposed law for the protection of semiconductor chip products,

because its parliament is out of session. Yet, it might be able to announce its intention to propose such a law, and then appoint a study group to draft appropriate legislation that would be consistent with stated general principles. In such circumstances, it would be appropriate that the Secretary enter a short-term order, and subsequently re-evaluate the situation. If reasonable progress was being made, the Secretary would then issue a further order for an additional appropriate period.

The interim protection would permit citizens of the relevant foreign nation to apply for mask work registration under section 908, to sue for infringement of mask work rights under section 910(b), and to secure legal and equitable remedies under section 911, as United States citizens may, during the ten-year terms of their mask work registrations. If a Secretarial order were rescinded, the effect would be to withdraw the privilege of further registrations, but not the ten-year period of rights under those registrations previously issued. It would be unfair to punish those foreign nationals and domiciliaries who choose to participate in this legislative scheme for the actions of others, outside their control.

The Secretary's power under this section is limited to three years, and all orders issued will expire at that time. In close consultation with the Register of Copyrights (whose office, of course, will have principal administrative responsibility for the Act but who also is extemely well-qualified in the area of international intellectual property law), the Secretary is to report to the Congress one year before the expiration of his authority, as to the progress being made toward international comity in mask work protection, and as to the further steps, if any, that are believed appropriate. The Secretary's report undoubtedly will become the subject of a hearing before the House and Senate Judiciary Committees.

Of course, aside from the interim order procedure created by section 914, it remains possible for a foreign concern to obtain mask work protection in the United States by transferring all rights under the Act to a U.S. national or domiciliary before the mask work is commercially exploited, or by commercially exploiting the mask work first in the United States. This was the scheme originally envisioned by H.R. 5525 and this option is unchanged by the Senate amendment. As noted above, a transferee of all rights (under this Act) in the mask work is an "owner," and the nationality of ownership on the date of registration or first commercial exploitation (whichever occurs first) governs eligibility for protection under section 902(a)(1)(A). As a consequence, if a foreign subsidiary of a U.S. company owns a mask work that has not been commercially exploited, it may transfer all rights under this act to its U.S. parent. The parent would then be entitled to obtain protection under this Act by registering the mask work or commercially exploiting it. By the same token, a U.S. subsidiary of a foreign company would be entitled to claim protection under the bill for a mask work created by its foreign parent by securing a transfer of all rights under this act from the parent prior to first commercial exploitation. Finally, both under the original terms of H.R. 5525 and the Senate amendment (see section 902(a)(1)(B)), a mask work that is first commercially exploited in the United states is eligible for protection, regardless of the nationality of its owner.

LEGISLATIVE ANALYSIS OF THE SENATE AMENDMENT TO H.R. 6163, TITLE V, AS CONSIDERED BY THE HOUSE OF REPRESENTATIVES

As a general proposition, Title V of H.R. 6163 contains a number of improvements to the university-small business patent bill (P.L. 96-517) that this body approved unanimously in 1980. Title V of H.R. 6163 makes the following changes to that law.

First, this measure allows agencies to limit patent ownership by small business or nonprofit organizations that are not located or do not have a place of business in the United States.

Second, the exception authority in 96-517 which allows agencies to retain ownership of inventions produced by nonprofit organizations that operate Government-owned laboratories or facilities is repealed by Title V. This Act provides for uniform treatment of all domestic nonprofit organizations regardless of where they perform their federally-funded work. Title V contains specific authority for the Department of Energy to own inventions relating to its naval nuclear propulsion or weapons-related programs made by the nonprofit operators of its Government-owned labs.

Third, Title V imposes a limit on the amount of royalties that the contract operator of a Government-owned laboratory is entitled to retain after paying patent administrative expenses and a share of the royalties to the inventor. The limit is based on five percent of the annual budget of the laboratory, but includes an incentive provision rather than a simple cap to stimulate continued efforts to transfer technology if royalties ever reach the five percent limit.

Fourth, Title V codifies the current invention reporting and ownership election procedures established administratively by OMB Circular A-124. The procedures have been proven to work and small business and nonprofit organizations should be assured of their continuance. The OMB Circular will sunset in February, 1985, and it is important that there be no discontinuity in the instructions to agencies on what terms to include in R & D contracts.

Fifth, the bill removes the provision in 96-517 that limits the time period for which nonprofit organizations can grant exclusive licenses without funding agency agreement. This solves a serious problem that occurs when products require a long development or testing period after the initial licensing.

Sixth, the authority to issue regulations under 96-517 is consolidated from the General Services Administration and the Office of Management and Budget into the Department of Commerce. The Secretary's authority is limited to the provisions of this Act.

In conclusion, these provisions are of great importance to the university community that perform so much of the country's basic research with Federal funding. The inventions that result from this work are frequently the foundation of whole new lines of technology and industry. It is vital to the economic future of the country that the universities have the ability to manage these inventions properly and the contents of Title V are designed to help improve their ability.

□ 1320

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6163, and the Senate amendments thereto. H.R. 6163 represents a compromise package of Judiciary Committee initiatives dealing with copyright, patent, trademark, and court reform measures.

Title I of H.R. 6163 embodies the Trademark Amendments Act of 1984 which passed the House unanimously by voice vote on October 1, 1984, as H.R. 6285. This proposal would clarify the standard courts use to determine when a trademark may be canceled or considered abandoned because the term has become generic. It does to propose a new standard for genericness, but reiterates the basic test for maintaining a trademark, which is whether the public recognizes the name as a trademark.

Title II of H.R. 6163 contains the State Justice Institute Act of 1983 which, although rejected by the House on the Suspension Calendar on May 22, 1984, did receive a strong majority vote of 243 to 176. Members who have had reservations about this proposal in the past should note that the current version of State Justice Institute, incorporated in the package, contains authorized funding levels that are substantially reduced from earlier versions of the bill acted upon by the House. In addition, the Department of Justice is given a stronger oversight role, and the State matching fund requirement has been increased from 25 to 50 percent.

The Semiconductor Chip Protection Act of 1984 which passed the House by a recorded vote of 388 to 0 on June 11, 1984, As H.R. 5525 comprises title III of H.R. 6163. Recently, the Cabinet Council on Commerce and Trade directed its Working Group on Intellectual Property which is chaired by the Commissioner of Patents and Trademarks, Jerry Mossinghoff, to consider the need to protect semiconductor chip designs. It found that while the United States dominates this important market, it faces a serious challenge from foreign competition. It also found that the R&D costs for a single complex chip could reach $4 million, while the costs of copying such a chip could be less than $100,000. The Semiconductor Chip Protection Act addresses this situation by providing significant and needed protection for the semiconductor industry in a manner that will allow it to retain its competitive edge in this important field of high technology.

Title IV of H.R. 6163, is comprised of three parts, all dealing with the Federal courts system. The first part of title IV is the Civil Priorities Act of 1984 which passed the House unanimously by voice vote on September 11, 1984, as H.R. 5645. This important court reform initiative eliminates most of the existing civil priorities with certain narrow exceptions, thereby allowing the courts to establish the order of hearing for certain civil matters. While I am happy that the other body

saw fit to include this proposal as part of H.R. 6163, I am disappointed at their lack of action on the Supreme Court Mandatory Appellate Jurisdiction Act of 1984, which passed the House unanimously by voice vote on September 11, 1984. I hope that the other body will see fit to consider this important legislation in a timely manner next Congress.

Part 2 of title IV is the Federal District Court Organization Act of 1984 which passed the House unanimously by voice vote as H.R. 6163 on September 24, 1984. This proposal creates three new places of holding court, realigns the boundaries of divisions of three districts and changes the place of holding court in one district. All of these changes, which will help keep the Federal judicial system up to date with demographic, economic, and societal changes in several of its districts, have been approved by the Judicial Conference of the United States and U.S. Department of Justice.

The third part of title IV is the Technical Amendments to the Federal Courts Improvements Act which passed the House on the consent calendar on August 6, 1984, as H.R. 4222. This amendment makes technical amendments with respect to the Court of Appeals for the Federal circuit.

Finally, title V of H.R. 6163 is comprised of the Uniform Science and Technology Research Development Utilization Act which was reported by the House Science and Technology Committee by voice vote as H.R. 5003. This amendment improves upon the principles of the law passed in 1980, which allowed universities and small businesses to retain ownership of inventions made under Government grants and contracts. The bill before us creates even greater flexibility in university licensing practices by improving the ability of the university to license its technology. In addition these improvements assure university ownership of inventions made while functioning as the contractor for a Government-owned laboratory subject to certain exceptions. This provision is strongly supported by the administration.

On balance this package contains major and for the most part noncontroversial legislation. I would like to commend Mr. KASTENMEIER, the chairman of the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, as well as my colleagues on the subcommittee, Messrs. BROOKS, MAZZOLI, SYNAR, Mrs. SCHROEDER, Messrs. GLICKMAN, FRANK, MORRISON of Connecticut, BERMAN, HYDE, DEWINE, KINDNESS, and SAWYER, who were responsible for processing six of the seven proposals contained in this package, five of which the House has overwhelmingly endorsed on previous occasions. Accordingly, I urge my colleagues' strong support for the passage of H.R. 6163.

□ 1330

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I rise in support of the package, as has my colleague, the gentleman from California.

Most of these matters have been overwhelmingly adopted by this body before this. I appreciate my colleague stressing the importance of the semiconductor chip title to this package, and also I underscore his remarks with respect to the State Justice Institute.

Whatever reservations Members on our side might have had previously, this is a scaled-down version that is before us today that I think everybody in this House can accept.

Mr. KASTENMEIER. Mr. Speaker, I yield 2 minutes, for the purpose of debate only, to the author of the bill on semiconductor chips, the gentleman from California [Mr. EDWARDS].

Mr. EDWARDS of California. Mr. Speaker, I rise in strong support of H.R. 6163 and I heartily commend the chairman, Congressman KASTENMEIER, Mr. MOORHEAD, the distinguished members of the Judiciary Committee's Subcommittee on Courts, Civil Liberties, and the Administration of Justice, and the staff, for bringing this package to us today. They have worked long and hard to bring these important measures to fruition and I congratulate them on their successful endeavors to date.

While I support passage of the entire package, in the interest of time I will limit my remarks to a few particularly addressed to title III of the bill, which is the Semiconductor Chip Protection Act of 1984. Back in 1978, I and my colleague from the South Bay, Congressman NORMAN MINETA, introduced our first bill on this issue. It's been a long haul and much work that brings us here today for this final vote; and this vote occurs not a moment too soon. The piracy of the creative work of innovating semiconductor chip firms threatens the economic health of our semiconductor industry and it has only worsened over time. With this measure, innovating firms finally will be able to combat the unfair chip piracy that is sapping their strength and destroying their incentive to continue to invest in the crucial, but very expensive, creative endeavors necessary to maintain American leadership in this field.

I urge my colleagues to support this final report on the Semiconductor Chip Protection Act of 1984 today, as they did on June 11, 1984, when the House passed the bill 388 to 0. I urge my colleagues to support the entire package contained in H.R. 6163 which is before us today.

Mr. KASTENMEIER. Mr. Speaker, before I yield to the gentleman from California [Mr. MINETA] I will say that the semiconductor chip intellectual property protection is the most important part of the bill. Over the past 6 years there has been no industry that has had a greater champion than the gentleman from California [Mr. EDWARDS] and the gentleman from California [Mr. MINETA] in support of what we are able ultimately to pass here today, and I compliment them both.

Mr. Speaker, I now yield 2 minutes, for purposes of debate only to the gentleman from California [Mr. MINETA].

Mr. MINETA. I thank the gentleman for yielding time.

Mr. Speaker, I rise to express my support for the Federal District Court Organization Act. It is my firm belief that all aspects of this legislation are worthy of favorable consideration by my colleagues. I do, however, wish to speak in particular about the Semiconductor Chip Protection Act which is embodied in this package.

The Semiconductor Protection Act is a bill that my outstanding colleague, Mr. EDWARDS, and I have been working on since 1978. I am very gratified that our efforts have come to fruition and I wish to thank my colleagues, Mr. KASTENMEIER, Mr. EDWARDS, and Mr. MOORHEAD and the many fine members of the Judiciary Committee for producing such an outstanding bill.

This legislation is indeed a solution to a problem—how best to make copyright protection responsive to technological change. After wrestling for some time about the best way to approach this problem, we have ultimately come up with a means to protect designers and producers of semiconductor chips from unauthorized copying and pirating of semiconductor chip designs. Like books and records and any other product of individual design, the financial and creative investment in a new semiconductor chip design are enormous and the product is worthy of protection from any infringements.

To semiconductor manufacturers, millions of dollars and thousands of man-hours are at stake. Therefore, in these closing hours of this Congress, I am particularly proud that we are extending protections to this industry that are much needed and, I can promise you, will be much welcomed by one of this country's most outstanding and promising industries.

Again, I thank my colleagues and urge a favorable vote on this very worthy legislation.

Mr. KASTENMEIER. Mr. Speaker, I have one further request. I yield 4 minutes to the gentleman from Florida [Mr. FUQUA], the distinguished chairman of the Science and Technology Committee, who has made really

an enormous contribution, particularly to the last title of this bill.

Mr. FUQUA. Mr. Speaker, I rise in support of title V, Government Research and Development Patent Policy, much of which originated in H.R. 5003 as reported from the Committee on Science and Technology to the House, on August 8 with bipartisan support. I would like to assure my colleagues that almost every provision contained in this title was considered and favorably approved by the committee I chair. I would refer my colleagues to House Report 98-983, Part 1 for an explanation of these provisions. Those provisions, added by the Senate, tend to be minor in comparison and clarifying in nature.

I am certain the gentleman from Wisconsin [Mr. KASTENMEIER] recalls our colloquy of November 21, 1980, upon the passage of Public Law 96-517 where we agreed to try to achieve a more uniform Government patent policy. I consider this bill to be another major step forward towards that objective.

Title V is a series of amendments to Public Law 96-517 which established a uniform government patent policy for inventions arising under contracts between the Government and small business and nonprofit organizations including universities. Public Law 96-517 which was passed because of the leadership of BOB KASTENMEIER was a landmark bill replacing a wide variety of agency practices with a uniform Government-wide policy of giving those rights to the contractor except in specified situations. This approach has worked well and has contributed to the explosion of new products and companies at and around university communities. We now have the benefit of over 3 years of experience using these provisions and the desirability of certain improvements has become obvious. I would like to point out to my colleagues that with the exception of Government-owned, contractor-operated [GO-CO] facilities this legislation does not extend beyond the limits of Public Law 96-517. Clearly, there is much remaining work to be done on the broader public policy considerations of Government-wide patent policy, but such deliberations will have to wait until the 99th Congress. Since there is a qualitative difference between major Government contracts with larger businesses and smaller grants and cooperative agreements with universities and nonprofit organizations, it should not be assumed that the specific provisions of Public Law 96-517 will be those that are applied to larger businesses in next Congress' legislation. The section by section analysis which follows compares the pertinent provisions of H.R. 5003 with the Senate-passed language.

SECTION-BY-SECTION ANALYSIS COMPARING PERTINENT PROVISIONS OF H.R. 5003 WITH SENATE-PASSED LANGUAGE

H.R. 5003 as reported	Senate-passed title V	Comments
(1) Sec. 402(15) (B) and (C)	Sec. 501 (1) and (2)	These two provisions are identical in both bills except for a reference in the House version to sexually propagated variety of plants. These words were added as a clarifying amendment; therefore, the omission of the reference in the Senate version does not change the scope of this definition.
(2) Sec. 402(15)(D)	Sec. 501(3)	This section originated in H.R. 5003 as reported. A contractor which is subject to the control of a foreign government is one in which at least 50 percent of the voting stock is controlled by that government. The new code Section 202(a)(iv) is identical to the wording of Sec. 301(a)(5) of H.R. 5003 which is described on pages 18 and 19 of House Report 98-983 Part I. While those laboratories such as Oak Ridge National Laboratory which are run for the government by large companies are not formally covered by this section, it is hoped that the Department of Energy, using its Federal Non-nuclear Act authority will develop a standard patent policy consistent with this Title for all its GOCO facilities.
(3) Sec. 402(15)(E)	Sec. 501(4)	There is no provision in H.R. 5003 comparable to code Sec. 202(b)(1) in the Senate version. Code sec. 202(b)(2) of the Senate version is identical to H.R. 5003's code sec. 202(b)(5) except that the authority to act under this section rested with the Director of OMB rather than with his subordinate. The Administrator of OFPP; since the Director of OMB presumably would have delegated this authority to OFPP, the change is not viewed as significant. The new code section 202(b)(4) originated in H.R. 5003 as reported. Its intent is to give an aggrieved contractor the right to an immediate appeal of a contractual decision not to grant him patent rights rather than forcing the contractor to wait to appeal such a decision until an invention arises under the contract. The word "provisions" was substituted for "policies and objectives" in the Senate version to avoid any possibility of tying this section to a set of findings and purposes.
(4) Sec. 402(15)(F)	Sec. 501(5)	Paragraphs 202(c)(1) through (3) are virtually identical in both versions. Their intent is to codify existing regulations. Paragraph (4) of the Senate version has no comparable House provision, although its intent is clearly consistent with the House intent.
(5) Sec. 402(15)(G)	Sec. 501(6)	This provision is identical in both bills and strengthens Freedom of Information Act protections for a contractor subjected to code Sec. 203's march-in procedures.
(6) Sec. 402(15) (H) and (I)	Sec. 501 (7) and (8)	The House struck code section 202(c)(7)(A) while the Senate struck the second half of this provision; the result of the Senate's action is to retain a requirement that a non-profit organization get agency approval before assigning title to an invention to a commercial invention management firm while at the same time to allow all such firms to be treated on an equal basis. Both bills strike code paragraph (B) which places limits on the ability of contractors to grant exclusive licenses. The Senate moved what was code section 202(c)(9) in the House version to code section 202 (c)(7)(D) and changed slightly the formula for distribution of royalty revenues found in that code section. This important section, originated in the House version and is explained in the first paragraph of House Report 98-983 Part 1 page 21. The formula for distribution of royalty revenues, should not be applied to contracts for third party sponsored research at GOCOs between operators of GOCO facilities and private sector persons where the private sector is paying for the research through collaborative arrangements or work for others agreements. Such arrangements should be treated as an agreement between two private entities and patent rights should be assigned as provided in that agreement. GOCO subcontracts, funded by the government, are covered by the section.
(7) Sec. 402(15)(J)	Sec. 501(9)	The Senate-passed version's new code section (203)(2) is taken almost in its entirety from H.R. 5003 as reported. It includes the administrative appeals procedure added by the House Science and Technology Committee as an alternative to judicial review. It also contains the provision from H.R. 5003 which requires an agency determination to be held in abeyance pending the exhaustion of appeals; this will prevent the agency from granting third parties licenses or disseminating the technical information to the public in a manner that could make a victory on appeal by the contractor meaningless. The one substantive Senate change was to require judicial review to be on the administrative record.
(8) Sec. 402(15)(L) (code Sec. 206)	Sec. 501(10)	The Senate-passed version authorizes the Secretary of Commerce, subject to public comment, to issue implementing regulations for this Title. H.R. 5003 as reported had the Secretary of Commerce initiating these regulations with the Director of the Office of Management and Budget promulgating after full consideration of agency and public comment. The Commerce Department is expected to consult with affected agencies in the regulation-drafting process.

SECTION-BY-SECTION ANALYSIS COMPARING PERTINENT PROVISIONS OF H.R. 5003 WITH SENATE-PASSED LANGUAGE—Continued

H.R. 5003 as reported	Senate-passed title V	Comments
(9) Sec. 202	Sec. 501(11)	The Senate moved three discretionary functions granted to the Secretary of Commerce by Section 202 of H.R. 5003 as reported, to a new code section 207(B). These functions are described on page 17 of House Report 98-983 Part 1. Commerce's role in each case is advisory, not managerial, and it is anticipated that most activities will be performed at the request of the client agency.
(10) No House provision	Sec. 501(12)	The Senate has substituted the Secretary of Commerce for the Administrator of General Services as the promulgator of the terms and conditions under which any federally-owned invention may be licensed on a non-exclusive, partially exclusive, or exclusive basis. The Secretary is expected to consult with affected agencies in the drafting of such regulations and to promulgate only after opportunity for full consideration of public comments.
(11) No House provision	Sec. 501(13)	The Senate extended the applicability of code section 202(c)(4) (retention of non-exclusive license by the government) and code section 203 (march-in rights and related appeals) to all contractors.
(12) Sec. 402(15)(L) (code Sec. 213)	Sec. 501 (14) and (15).	The Senate redesignated as code sec. 212, the new code sec. 213 from H.R. 5003 as reported. This section is described on pages 24 and 25 of House Report 98-983, Part 1. This provision prohibits the practice of government retention of patent rights arising under financial aid agreements; these clauses have made it difficult for students receiving federal financial aid also to work on privately-funded university research projects.

I would like to thank the gentleman from Wisconsin, [Mr. KASTENMEIER] for his critical leadership in working with me to assure that the House provisions which assist the university research community were added to the Senate bill. These provisions involving disposition of intellectual property rights in educational awards and of royalties from inventions under university and nonprofit GO-CO contracts solve a number of long-standing problems in the university community.

In closing, I would like to commend the gentleman from Pennsylvania [Mr. WALGREN] and the gentleman from New Hampshire [Mr. GREGG] for their hard work in developing this legislation at the subcommittee level. Without their bipartisan efforts, it is unlikely that we would be able to vote on this legislation today.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I yield to my friend, the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I want to congratulate the gentleman and join him in support of this legislation, but I do have some questions that I would like to refer to the gentleman, if I possibly could.

Is my understanding correct that this bill will not prevent the Department of Energy from determining that exceptional circumstances exist for other technologies than those listed in the new section 202(a)(iv)?

Mr. FUQUA. Yes. That Department can still request exceptional circumstances treatment when appropriate. Several such circumstances are mentioned on page 18 of House Report 98-983 part 1 which the Committee on Science and Technology filed on the bill H.R. 5003.

Mr. LUJAN. Will the gentleman give further examples of exceptional circumstances where this section may be appropriate?

Mr. FUQUA. Yes, appropriate circumstances may occur regarding technologies related to intelligence and national security, classified technologies, and defense programs work not covered by section 202(a)(iv). The fact that a facility falls within section 202(a)(iv) does not preclude the exceptional circumstances provisions applying to other work done at that facility. Technologies that are under or may be under agreements with foreign interests may also need exceptional circumstances coverage to permit the U.S. Government to protect these technologies for U.S. industry. Various agencies are also involved extensively in international collaborative agreements in which patent and data rights are at issue. This bill is not intended to impair the ability of these agencies to enter into and carry out existing or future international agreements.

Mr. LUJAN. Regarding the provision which modifies section 203, must a party adversely affected by a decision under section 203 or section 202(b)(4) exhaust all remedies under the administrative appeals procedure to be established under this act prior to initiating a petition for review by the U.S. Claims Court?

Mr. FUQUA. Yes, a party adversely affected must exhaust his administrative remedies prior to seeking judicial review by the U.S. Claims Court. Further, the determination to be issued under this section prior to a U.S. Claims Court appeal is to be a final determination on the administrative record.

Mr. LUJAN. Would the gentleman please clarify the provision under proposed section 202(b)(2) that permits the Office of Federal Procurement Policy [OFPP] to issue regulations describing classes of situations in which agencies may not exercise the authorities under section 202?

Mr. FUQUA. It is envisioned that the OFPP would confer with and work with the affected agencies to ensure that any regulations or guidelines issued in accordance with this section do not impair these agencies' ability to accomplish agency missions.

Mr. LUJAN. Would the gentleman please clarify the regulation drafting procedures under section 206 and the effect that these new regulations will have on funding agreements excepted from the act under section 202(a)(i) through (iv)?

Mr. FUQUA. The Department of Commerce is expected to consider the views and special circumstances of the various affected agencies because of their long experience in their respective high-technology fields both in the drafting of these regulations and in their interpretation. For agencies that have patent policies prescribed by statute such as the DOE and NASA, these agencies are not precluded from using provisions required by such statutes and regulations promulgated pursuant to these statutes to govern inventions falling within section 202(a) (i) through (iv).

Mr. OBERSTAR. Mr. Speaker, I support the trademark law provisions of H.R. 6163 because it provides us the opportunity to reaffirm the long-established, effective test for determining whether a registered trademark has remained a trademark or whether it has become merely a generic term, without significant market value.

Prior to a 1982 decision by the Ninth Circuit Court of Appeals, the test was whether the public considered a trademark something special—unique—or only a general term. If the latter, then the name was no longer a trademark.

The ninth circuit decision added the further requirement that the consumer also know the name of the producer. Such a test is unrealistic. It will make it far more difficult for a business to retain its trademark. Trademarks, which have served to guide consumers in their purchases of long known, reliable goods and services, will no longer serve such a function.

Imitators will use the former trademarks to sell their inferior goods. They will use the trademarks of the best American products and services. Moreover, the manufacturers and providers of the best products and services will suffer the most as the result of attempts to unload shoddy, less desirable goods and services on an unsuspecting public.

We should be particularly concerned about foreign manufacturers who would attempt to unload imitation goods on the market to compete with higher quality, higher cost, American goods no longer uniquely labeled by the trademarks so carefully developed over the years, and which are developed at considerable capital investment by the manufacturer.

The legislation now before the House will provide incentives for quality producers to continue to offer the level of quality associated with their trademarked goods. If we do not pass this legislation, those producers will be hurt financially, and ultimately, so will be the consumers who have relied upon trademarks to guide their purchases.

The legislation before the House will insure consumers more and better information than they would receive as the result of the ninth circuit decision. It will also protect American jobs against unfair, predatory competition from cheap, imitation foreign imports taking a free ride on American ingenuity, investment, worker productivity, and consumer trust in a trademark, trust founded upon years of experience with a particular product.

The House passed title I of H.R. 6163 as separate legislation last week. I urge the House to approve it again as part of the larger legislative package of H.R. 6163 because the trademark standard contained in the legislation is long-established, sensible, and straightforward. If we act today, we can send this legislation to the White House for prompt action by the President. American consumers and businesses will be better for it.

● Mr. FRENZEL. Mr. Speaker, I support the conference report on H.R. 6163. It was good when it left the House and is better now.

The other body has improved our original H.R. 6285, the Trademark Clarification Act of 1984, by the addition of some worthy hitchhikers, notably the semiconductor title. All of them, especially the semiconductor bill, are important and necessary.

But the original Trademark Act is also important and necessary to overturn a regrettable decision of the Ninth Circuit Court. Title I of H.R. 6163 does, in my judgment overturn

this unusual decision, and restores the traditional Lanham Act protection of trademarks that has been the standard for a half a century.

Passage of this conference report will restore needed certainty to our trademark laws.●

● Mr. WALGREN. Mr. Speaker, I rise in support of title V of H.R. 6163, which is entitled "Government Research and Development Patent Policy." As chairman of the Committee on Science and Technology's Science, Research and Technology Subcommittee where most of the provisions of this title originated, I want to recommend these provisions to the House. These provisions were developed over a period of several months in a bipartisan effort involving discussions with all affected parties.

Title V contains a variety of amendments to Public Law 96-517, more commonly known as the Bayh-Dole Act, a law that for a first time established a uniform policy for allocation of intellectual property rights arising under contracts between the Government and nonprofit organizations or small businesses. This law is generally credited with beginning the commercialization of a much higher percentage of inventions occurring under Government contract. The amendments to the Bayh-Dole Act we have before us today reflect our experience under that act.

The first two amendments deal with the definition of "invention" and "subject invention" as used in the act and borrow the definition of "plant" as used in the Plant Variety Protection Act. That act is not amended by this title and the record should clearly state that there is no intention of attempting to do so.

These amendments also change the treatment of Government-owned, contractor-operated [GO-CO] facilities under the Bayh-Dole Act. Currently an agency has the right to exempt Government-owned, contractor-operated facilities from operation of the Act. After enactment of this legislation, an exemption for the Department of Energy's defense programs and naval reactors programs will remain covering such work done by these programs at DOE labs, but a new GO-CO provision will apply to other GO-CO laboratories and programs. The contractors who operate these labs will be able to retain title to inventions occuring under their operating contracts in order to handle the licensing of the inventions.

Royalties from this licensing activity will be divided in the following manner. First, they will be used to cover licensing costs and payments to inventors. Second, an amount equal to 5-percent of the lab's annual budget may be retained by the contractor for use in research and development or educational programs in furtherance of the mission of the laboratory. Finally, funds in excess of the 5-percent level will be split between the lab and the U.S. Treasury on a 25/75-percent basis with the Treasury getting the larger share. This should give everyone concerned the incentive to get the inventions of these laboratories into the commerical marketplace. This approach has been endorsed by the Department of Energy and by many of the other affected parties.

Other amendments contained in this title include codification of regulations promulgated under the Bayh-Dole Act, clarification of invention rights under financial aid agreements, and a variety of other provisions clarifying responsibilities among executive branch agencies and clarifying ambiguities in the present text of the Bayh-Dole Act.

The changes have a wide base of support in the university community and elsewhere. I therefore, urge my colleagues to support this package because it is a major step forward in Government patent policy.●

● Mr. MOAKLEY. Mr. Speaker, as manager for the Committee on Rules on the resolution providing for the consideration of this matter, I have previously discussed the procedure under which we are operating.

However, I would like to take the opportunity to discuss one aspect of this legislation in more detail and, again, to commend the bipartisan leadership of the Committee on the Judiciary for their handling of this matter. The able subcommittee chairman, the gentleman from Wisconsin [Mr. KASTENMEIER], and his distinguished ranking minority member, the gentleman from California [Mr. MOORHEAD], have done an outstanding job in handling this matter.

The Senate amendments constitute a comprehensive package of patent, trademark, and court bill attached to a technical court bill. This measure incorporates a number of matters, most of which are noncontroversial, and almost all of which have passed the House in other forms:

Mr. Speaker, title I of the Senate amendment is very similar to the bill (H.R. 6285) to clarify the circumstances under which a trademark may be canceled or considered abandoned, which was passed by the House on a voice vote on October 1, 1984. I would commend the gentleman for his prompt action to defend our legislative prerogatives and to reassert existing law over the one aberrant court decision that prompted this legislation.

Under the pending motion, Mr. Speaker, the House recedes to the minor changes of the Senate, which are entirely consistent with the legislative intent of the House, as ably explained by the gentleman from Wisconsin here last week.

Mr. Speaker, I want to take a few moments to address some new language that appears in section 104 of H.R. 6163, which is quite different in form from its counterpart section 4 of H.R. 6285, approved by the House on October 1 of this year. Section 104 says that "Nothing in this title shall be construed to provide a basis for reopening of any final judgment entered prior to the date of enactment of this title." In light of some of the controversies we have seen when Congress has endeavored to enact retroactive legislation, this section deserves some elaboration.

First, the Trademark Clarification Act of 1984 is not retroactive in application to any cases completed before the enactment of that act. Therefore, where any final judgment has been entered—and I use "final judgment" in the sense that the Federal Rules of Civil Procedure uses it—the parties to that litigation may not reopen the case on the basis of this new legislation. Rule 54 defines "judgment" as including a decree or order from which an appeal lies; rule 60(b) refers to "final judgment" in such a way as to make clear that it is a judgment from which no appeal lies. That is obviously what section 104 is referring to.

Thus the statement of the law of trademark genericism set out in the legislation will, and is intended to, apply to ongoing cases. That is not a form of retroactivity, since the entire legislative history of the legislation emphasizes that it is intended to clarify and clearly restate the law of trademark genericism as it stands throughout most of the country, as it has stood for almost 40 years, and as it should stand in every Federal court in the land.

Second, the new law quite plainly will not let General Mills reopen its litigation with Anti-Monopoly, Inc. Even though that litigation gave rise to the ninth circuit opinions, the reasoning of which this legislation is intended to overturn, it also gave rise to a final judgment entered by the district court in the northern district of California in August 1983. That final judgment will not be disturbed by this new act, just as section 104 states.

Third, and finally, it is important to note that this legislation will in no way interfere with the ability and right of General Mills to litigate the validity of its valuable "Monopoly" trademark in Federal courts in the future. The district court in the Anti-Monopoly litigation did not rule on the validity of the "Monopoly" mark, so the language of the court of appeals could well have been challenged even without this legislation. Since title I of H.R. 6163 speaks to the errors in the ninth circuit's opinion, I would not at all be surprised to see that opinion

challenged in that circuit and in others after this bill is signed into law.

That point is entirely consistent with the various statements in the Senate that this title is not intended to alter established principles of collateral estoppel. Under those principles, judicial holdings in one case may be used to estop relitigation of the same issues in later cases involving a party to the earlier litigation. That assuredly does not mean that the second court must reach the same result as the first when the first court applied erroneous principles of law. So, even without this legislation, General Mills would be perfectly free to litigate the validity of its "Monopoly" mark in 11 other circuits, and could even try to persuade the ninth circuit that its trademark was valid as against some party other than Anti-Monopoly, Inc. (whose judgment would be protected by the doctrine of res judicata). With this legislation—which essentially declares that the ninth circuit's reasoning in the General Mills litigation was erroneous on a number of distinct grounds—application of the "principles" of collateral estoppel will facilitate, rather than hinder, that company's ability to establish the validity of its "Monopoly" trademark. For the courts have long recognized that a modification of the controlling legal principles of a case, such as this legislation brings about, gives rise to a recognized exception to the doctrine of collateral estoppel.

Mr. Speaker, Judge Helen Nies, who testified before the House subcommittee considering an earlier version of this bill, wrote a Customs and Patent Appeals Court decision in which she observed that General Mills "has built up an enormous goodwill in the mark MONOPOLY, which has been used since 1935 for a board game" and that "MONOPOLY may properly be termed a 'famous' mark." (*Tuxedo Monopoly, Inc.* v. *General Mills Fun Group, Inc.*, 648 F.2d 1335, 1336 (CCPA 1981).) While the decision whether "Monopoly" remains a valid trademark in the ninth circuit and elsewhere is one for the courts, and not the Congress, this legislation will make sure that the courthouse doors remain open to determine that question. And it will make sure that the rational of the ninth circuit's 1982 decision will not be applied at that time.●

□ 1340

Mr. KASTENMEIER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 606, the previous question is considered as ordered on the motion.

The question is on the motion offered by the gentleman from Wisconsin [Mr. KASTENMEIER].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 363, nays 0, not voting 69, as follows:

□ 1400

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous ma-

terial, on H.R. 6163, the bill just passed.

The SPEAKER pro tempore (Mr. ANTHONY). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

COLORADO RIVER BASIN SALINITY CONTROL ACT AMENDMENTS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2790) to amend the Colorado River Basin Salinity Control Act to authorize certain additional measures to assure accomplishment of the objective of title II of such Act, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 10, after line 12, insert:

"(F) in entering into contracts or agreements pursuant to section 202(c)(2)(C), require a minimum of 30 per centum cost-sharing contribution from individuals or groups of owners and operators of farms, ranches, and other lands as well as from local governmental and nongovernmental entities such as irrigation districts and canal companies, unless the Secretary finds in his discretion that such cost-sharing requirement would result in a failure to proceed with needed on-farm measures.".

Page 13, strike out lines 6 to 12, inclusive, and insert:

(b) Section 205(a)(1) of such act is amended by inserting before "shall be nonreimbursable." the words "authorized by section 202(a) (1), (2), and (3), including 75 per centum of the total costs of construction, operation, and maintenance of the associated measures to replace incidental fish and wildlife values foregone, 70 per centum of the total costs of construction, operation, maintenance, and replacement of each unit or separable feature thereof authorized by section 202(a) (4) and (5), including 70 per centum of the total costs of construction, operation, and maintenance of the associated measures to replace incidental fish and wildlife values foregone, and 70 per centum of the total costs of implementation of the on-farm measures authorized by section 202(c), including 70 per centum of the total costs of the associated measures to replace incidental fish and wildlife values foregone,". Section 205(a)(1) of such act is further amended by adding at the end thereof "The total costs remaining after these allocations shall be reimbursable as provided for in paragraphs (2), (3), (4), and (5), of section 205(a)".

(c) Section 205(a)(2) of such act is amended by striking "Twenty-five per centum" and inserting in lieu thereof "The reimbursable portion".

Page 13, line 13, strike out "(c)" and insert "(d)".

Page 14, line 2, strike out "(d)" and insert "(e)".

Page 16, line 24, strike out "(f)" and insert "(g)".

Page 17, line 5, strike out "(g)" and insert "(h)".

Page 17, line 10, strike out "(h)" and insert "(i)".

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so for the purpose of asking the gentleman from Ohio [Mr. SEIBERLING] if he would explain the contents of the legislation to us.

Mr. SEIBERLING. Mr. Speaker, if the gentleman would yield, this is a bill which Chairman UDALL was going to handle, but he had to step out for a few minutes because of a prior commitment.

Mr. Speaker, early last week the House passed H.R. 2790, the Colorado River Salinity Control Act. Last Friday the Senate took up that legislation and passed it with two amendments. Those amendments go to the cost-sharing requirements for the Bureau of Reclamation salinity control units and the on-farm salinity control measures to be instituted by the Department of Agriculture.

Mr. Speaker, I see that Chairman UDALL is here, so perhaps he would like to explain the Senate amendments.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, the first amendment increases the cost-sharing requirement for the Bureau of Reclamation units from 25 to 30 percent. Those costs to be paid by the Upper Basin States will be repaid over time, with interest. Those costs to be paid by the Lower Basin States will be paid up front, as the construction costs are incurred.

The second amendment directs the Secretary of Agriculture to require a minimum of 30 percent cost sharing from farmers, irrigation districts or other non-Federal entities for the costs of on-farm salinity control measures. The Secretary may, in his discretion, adjust the requirement if he finds that it would result in a failure to proceed with needed on-farm measures.

These amendments were worked out by the Colorado River Salinity Control Forum with Senator METZENBAUM. Although they impose a tougher cost sharing requirement on the seven Basin States, I believe the Salinity Control Program is essential to the continued well-being of the States, and I support the compromise.

Mr. LUJAN. Mr. Speaker, I thank the gentleman for his explanation.

Mr. Speaker, I rise in support of H.R. 2790. H.R. 2790 provides for control of the salinity of the Colorado River.

The increased levels of salinity, or total dissolved solids, in the Colorado River are an important concern to the seven Colorado River Basin States. Heightened salinity, or worsened water quality levels can damage crop growth and make water unpotable, thus increasing water treatment costs. Colorado River salinity is also an important concern of the Federal Government, since the Federal Government owns 70 percent of the lands in the Colorado River Basin. In fact, half of the salinity from natural sources in the Colorado River comes from Federal lands. And the Federal Government has agreed by treaty with the Government of Mexico to certain controls on the salinity of water coming to Mexico from the Colorado River.

The committee amendment which is being offered today represents a series of compromises between supporters of the legislation and the environmental community. In particular:

The bill was revised to make it acceptable on wildlife mitigation and environmental review issues.

The bill was revised to drop certain projects, and impose limits on certain others, where objections were raised on environmental grounds.

The bill was changed to limit the involvement of the Federal Government in certain aspects of project implementation, for both fiscal and environmental reasons.

The bill was changed to sharply increase the effective levels of local cost-sharing required.

Let me stress that at this point, there is agreement on almost every aspect of this bill. This means that there is agreement on the following issues:

First, salinity is an important water quality problem in a major area of the West;

Second, the projects proposed in this bill are a sensible means of dealing with this problem;

Third, the projects proposed will be subject to proper environmental review and control.

The administration was willing, as I understand it, to accept 25 percent cost sharing. To my knowledge, this would be just about the highest cost-sharing percentage in a generic program such as this that we have authorized. Some people have suggested that this is not high enough. In response, I would point out that:

First, the Federal Government is a major pollution contributor in the Colorado;

Second, Colorado River salinity control helps to maintain the structure of our Federal treaty commitment;

Third, the Colorado is a multistage resource, and this level of cost sharing is one which guarantees contributions from all of the States involved.

For these reasons, I believe the House should follow the committee's judgment and support the bill as amended by the committee.

● Mr. DE LA GARZA. Mr. Speaker, I rise in support of the Senate amendment to H.R. 2790, a bill designed to strengthen water salinity control programs in the Colorado River Basin.

One portion of the Senate amendment relates to a matter within the jurisdiction of the House Agriculture Committee. The provisions that I refer to would authorize the Secretary of Agriculture to set up a cost-sharing cooperative program with Colorado River Basin landowners to improve farm management and reduce erosion. These are identical, with one exception, to provision contained in the House-passed bill and have their origin in H.R. 3903, the Colorado River Basin Agricultural Conservation Program, which the Agriculture Committee favorably reported last November and which the House passed and sent to the Senate a week later, on November 16, 1983.

The goal of the cost-sharing program is to improve current efforts to control salinity in the region where high salt content in water has become an increasingly serious problem for downstream farmers and urban residents. To carry out this program, the bill would authorize the Secretary of Agriculture to: First, identify salt source areas and salt loading resulting from irrigation; second, develop plans for implementing actions to reduce salt loads; third, provide technical and cost-sharing assistance for voluntary water management and salinity control measures on private and public nonfederal lands; and fourth, provide for related education, research, and monitoring programs.

The Senate amendment would add a new provision to this program that would limit the Federal share of costs to 70 percent, but at the same time would authorize the Secretary to exceed this limit in individual cases if that is necessary to carry out on-farm conservation measures.

This legislation would be an important and useful step in our overall national efforts for soil and water conservation.●

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2790, the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AUTHORIZING THE CLERK TO MAKE CORRECTION IN ENGROSSMENT OF H.R. 2790, COLORADO RIVER BASIN SALINITY CONTROL ACT AMENDMENTS

Mr. UDALL. Mr. Speaker, I have a concurrent resolution (H. Con. Res. 371) at the desk, and I ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the concurrent resolution.

The Clerk read the concurrent resolution, as follows:

H. CON RES. 371

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill (H.R. 2790), to amend the Colorado River Basin Salinity Control Act to authorize certain additional measures to assure accomplishment of the objectives of title II of such Act, and for other purposes, the Clerk of the House of Representatives shall make the following correction in the first sentence in section 1:

Change "the Act (15 U.S.C. 1591(b))" to read: "the Colorado River Basin Salinity Control Act, (43 U.S.C. 1591(b)), hereinafter referred to as the 'Act',".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so simply to ask the gentleman from Arizona [Mr. UDALL] if this is the concurrent resolution to correct an error in the citation in the bill?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, that is correct. It is a statutory citation that was incorrectly referred to. This makes that change.

Mr. LUJAN. It is my understanding that it is purely a technical correction.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 371, the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

□ 1410

AUTHORIZING EXCHANGE OF CERTAIN LANDS BETWEEN BUREAU OF LAND MANAGEMENT AND CITY OF LOS ANGELES

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3331) to authorize the exchange of certain lands between the Bureau of Land Management and the city of Los Angeles for purposes of the Santa Monica Mountains National Recreation Area, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 2, line 1, strike out "subparagraph" and insert "subparagraphs".

Page 2, lines 3 and 4, strike out "(acting through the Bureau of Land Management)".

Page 3, line 2, strike out "1976."." and insert "1976.".

Page 3, after line 2, insert:

"(C) The city shall assume full responsibility for the protection of cultural resources and shall develop a cultural resource management program for the public lands to be transferred to the city in the vicinity of the Haiwee Reservoir. The program shall be developed in consultation with the Secretary of the Interior, the California State Historic Preservation Officer, and the Advisory Council on Historic Preservation.".

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I would just make the reservation at this time to inquire, are we on the Santa Monica bill, H.R. 3331?

Mr. SEIBERLING. Yes, we are, Mr. Speaker.

Mr. LUJAN. In that event, Mr. Speaker, under my reservation I yield to the gentleman from Ohio [Mr. SEIBERLING] to explain the purposes of the bill.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman from New Mexico for yielding.

Mr. Speaker, H.R. 3331, as passed by the House on August 2, 1984, would provide for an equal value land exchange between the Department of the Interior and the city of Los Angeles.

The Santa Monica Mountains National Recreation Area [SMMNRA], established in 1978 (Public Law 95-625) has within its boundary lands owned by the city of Los Angeles. The act provides for donation of such lands to the National Park Service, at the discretion of the city, but does not permit exchange for other Federal land. H.R. 3331, would allow a specific exception to that general prohibition.

The city operates the Haiwee Reservoir in Inyo County, CA, which is located partially on Federal lands administered by the Bureau of Land Management. The city desires to obtain ownership of the lands around Haiwee Reservoir and favors an equal value exchange for city lands within the boundary of the Santa Monica Mountains NRA.

The Senate amendments to H.R. 3331 are technical, except for an added requirement that the city of Los Angeles will develop a cultural resource management plan for all lands at Haiwee Reservoir transferred to their jurisdiction by this act.

Mr. Speaker, I urge that we accept these amendments and pass H.R. 3331.

Mr. LUJAN. Mr. Speaker, I thank the gentleman for his explanation, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the matter just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

VIRGINIA NATIONAL FOREST WILDERNESS ACT OF 1984

Mr. SEIBERLING. Mr. Speaker, pursuant to the provisions of House Resolution 609, I move to take from the Speaker's table the bill (H.R. 5121) to designate certain National Forest System lands in the State of Virginia as wilderness, and for other purposes, with the Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 609, the Senate amendment is considered as having been read.

The text of the Senate amendment is as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited the "Virginia Wilderness Act of 1984".

DESIGNATION OF WILDERNESS AREAS

SEC. 2. In furtherance of the purposes of the Wilderness Act (16 U.S.C. 1131-1136), the following lands in the State of Virginia are hereby designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) certain lands in the Jefferson National Forest, Virginia, which comprise approximately six thousand three hundred and seventy-five acres, as generally depicted on a map entitled "Beartown Wilderness—Proposed", dated February 1984, and which shall be known as the Beartown Wilderness;

(2) certain lands in the Jefferson National Forest, Virginia, which comprise approximately five thousand five hundred and eighty acres, as generally depicted on a map entitled "Kimberling Creek Wilderness—Proposed", dated February 1984, and which shall be known as the Kimberling Creek Wilderness;

(3) certain lands in the Jefferson National Forest, Virginia, which comprise approximately five thousand seven hundred and thirty acres, as generally depicted on a map entitled "Lewis Fork Wilderness—Proposed", dated February 1984, and which shall be known as the Lewis Fork Wilderness;

(4) certain lands in the Jefferson National Forest, Virginia, which comprise approximately three thousand four hundred acres, as generally depicted on a map entitled "Little Dry Run Wilderness—Proposed", dated February 1984, and which shall be known as the Little Dry Run Wilderness;

(5) certain lands in the Jefferson National Forest, Virginia, which comprise approximately three thousand eight hundred and fifty-five acres, as generally depicted on a map entitled "Little Wilson Creek Wilderness—Proposed", dated February 1984, and which shall be known as the Little Wilson Creek Wilderness;

(6) certain lands in the Jefferson National Forest, Virginia, which comprise approximately eight thousand two hundred and fifty-three acres, as generally depicted on a map entitled "Mountain Lake Wilderness—Proposed", dated February 1984, and which shall be known as the Mountain Lake Wilderness;

(7) certain lands in the Jefferson National Forest, Virginia, which comprise approximately three thousand three hundred and twenty-six acres, as generally depicted on a map entitled "Peters Mountain Wilderness—Proposed", dated February 1984, and which shall be known as the Peters Mountain Wilderness;

(8) certain lands in the Jefferson National Forest, Virginia, which comprise approximately two thousand four hundred and fifty acres, as generally depicted on a map entitled "Thunder Ridge Wilderness—Proposed", dated February 1984, and which shall be known as the Thunder Ridge Wilderness;

(9) certain lands in the Jefferson National Forest, Virginia, which comprise approximately two hundred acres, as generally depicted on a map entitled "James River Face Wilderness Addition—Proposed", dated September 1984, and which are hereby incorporated in, and shall be deemed to be part of, the James River Face Wilderness as designated by Public Law 93-622;

(10) certain lands in the George Washington National Forest, Virginia, which comprise approximately six thousand seven hundred and twenty-five acres, as generally depicted on a map entitled "Ramseys Draft Wilderness—Proposed", dated January 1984, and which shall be known as the Ramseys Draft Wilderness; and

(11) certain lands in the George Washington National Forest, Virginia, which comprise approximately ten thousand and ninety acres, as generally depicted on a map entitled "Saint Mary's Wilderness—Proposed", dated January 1984, and which shall be known as the Saint Mary's Wilderness.

MAPS AND DESCRIPTIONS

SEC. 3. As soon as practicable after enactment of this Act, the Secretary of Agriculture shall file a map and a legal description of each wilderness area designated by this Act with the Committee on Interior and Insular Affairs and the Committee on Agriculture of the United States House of Representatives and with the Committee on Agriculture, Nutrition, and Forestry of the United States Senate. Each such map and description shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in each such map and description may be made by the Secretary. Each such map and description shall be on file and available for public inspection in the Office of the Chief of the Forest Service, Department of Agriculture.

ADMINISTRATION OF WILDERNESS

SEC. 4. Subject to valid existing rights, each wilderness area designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

EFFECT OF RARE II

SEC. 5. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Virginia and of the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II final environmental statement (dated January 1979) with respect to National Forest System lands in States other than Virginia, such statement shall not be subject to judicial review with respect to National Forest System lands in the State of Virginia;

(2) with respect to the National Forest System lands in the State of Virginia which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II) and those lands referred to in subsection (d), except those lands designated for wilderness study upon enactment of this Act, that review and evaluation or reference shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest management Act of 1976, to be an

adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revisions of the plans, but shall review the wilderness option when the plans are revised, which revisions will ordinarily occur on a ten-year cycle, or at least every fifteen years, unless prior to such time the Secretary of Agriculture finds that conditions in a unit have significantly changed;

(3) areas in the State of Virginia reviewed in such final environmental statement or referenced in subsection (d) and not designated as wilderness or for wilderness study upon enactment of this Act shall be managed for multiple use in accordance with land management plans pursuant to section of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976: *Provided*, That such areas need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of the initial land management plans;

(4) in the event that revised land management plans in the State of Virginia are implemented pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, and other applicable law, areas not recommended for wilderness designation need not be managed for the purpose of protecting their suitability for wilderness designation prior to or during revision of such plans, and areas recommended for wilderness designation shall be managed for the purpose of protecting their suitability for wilderness designation as may be required by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, and other applicable law; and

(5) unless expressly authorized by Congress, the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of National Forest System lands in the State of Virginia for the purposes of determining their suitability for inclusion in the National Wilderness Preservation System.

(c) As used in this section, and as provided in section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, the term "revision" shall not include an "amendment" to a plan.

(d) The provisions of this section shall also apply to National Forest System roadless lands in the State of Virginia which are less than five thousand acres in size.

DESIGNATION OF WILDERNESS STUDY AREAS

SEC. 6. (a) In furtherance of the purposes of the Wilderness Act, the Secretary of Agriculture shall review, as to their suitability for preservation as wilderness, the following lands in the State of Virginia:

(1) certain lands in the George Washington National Forest, which comprise approximately nine thousand three hundred acres, as generally depicted on a map entitled "Rough Mountain Wilderness Study Area—Proposed", dated February 1984, and which shall be known as the Rough Mountain Wilderness Study Area;

(2) certain lands in the George Washington National Forest, which comprise approximately five thousand six hundred acres, as generally depicted on a map entitled "Rich Hole Wilderness Study Area—Proposed", dated January 1984, and which shall be known as the Rich Hole Wilderness Study Area;

(3) certain lands in the Jefferson National Forest, which comprise approximately five thousand eight hundred and seventy-five acres, as generally depicited on a map entitled "Barbours Creek Wilderness Study Area—Proposed", dated February 1984, and which shall be known as the Barbours Creek Wilderness Study Area; and

(4) certain lands in the Jefferson National Forest, which comprise approximately four thousand three hundred acres, as generally depicted on a map entitled "Shawvers Run Wilderness Study Area—Proposed", dated February 1984, and which shall be known as the Shawvers Run Wilderness Study Area.

(b) In carrying out the review required under this section, the Secretary shall give public notice at least sixty days in advance of any hearing or other public meeting concerning a study area.

(c) Subject to valid existing rights, the wilderness study areas designated by this section shall, until Congress determines otherwise, be administered by the Secretary so as to maintain their presently existing wilderness character and potential for inclusion in the National Wilderness Preservation System.

(d) The Secretary, in consultation with the Environmental Protection Agency and the State of Virginia, shall evaluate and report to Congress no later than two years after the date of enactment of this Act on the effects of the proposed industrial development site at Covington, Virginia, on air quality on the areas designated for wilderness study by this Act. The Secretary shall provide an interim report to the appropriate committees of Congress no later than one year after the date of enactment of this Act.

BUFFER ZONES

SEC. 7. Congress does not intend that designation of wilderness areas in the State of Virginia lead to the creation of protective perimeters or buffer zones around each wilderness area. The fact that nonwilderness activities or uses can be seen or heard from areas within the wilderness shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. SEIBERLING] is recognized for 1 hour.

Mr. SEIBERLING. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from New Mexico [Mr. LUJAN] and reserve 30 minutes for myself. I now yield myself 4 minutes.

Mr. Speaker, I rise in strong support of H.R. 5121, the Virginia Wilderness Act of 1984. With three relatively minor exceptions, the bill is identical to the one which passed the House on May 8 of this year by a vote of 376 to 20. I regret having to consume the House's time to reconfirm a measure which received only 20 negative votes the last time around, but our efforts to bring the bill up by unanimous consent last week were objected to, and there will not be another Suspension Calendar this year.

The facts concerning this legislation are very simple. The bill designates 10 new national forest wilderness areas in Virginia, totaling approximately 55,784 acres, and adds 200 acres to the existing James River Face Wilderness. Four other areas, which were originally considered for wilderness, have been, as will be discussed in a minute, designated as wilderness study areas. The bill also provides for the release of some 134,000 acres of roadless land not designated as wilderness or wilderness study, so that the released land can continue to be available for nonwilderness types of uses. I should note that the bill is strongly supported by both Senators from Virginia and passed the Senate unanimously last week. It also has the endorsement and strong backing of: Congressmen BOUCHER and OLIN, in whose congressional districts the wilderness proposals lie; Governor Robb; and numerous organizations and individuals throughout the State of Virginia.

Indeed, the only real opposition to this bill comes from the Westvaco Corp., which despite overwhelming evidence against their case, and several concessions made to accommodate them, still persists in opposing the bill. Westvaco's complaint with the bill is based on the proposition that even though the new wilderness proposals will not, under current law, impair their planned expansion of their bleached board manufacturing facility at Covington, VA, some future Congress, might change the law and upgrade wilderness areas near Covington to class 1 air quality status, and that class 1 status might somehow inhibit their planned expansion. Despite the tenuous basis for these concerns, Congressmen OLIN and BOUCHER agreed to accommodate them by downgrading the four wilderness proposals within 20 miles of Covington to wilderness study proposals. Senators WARNER and TRIBLE further amended the House bill to provide for a special study to determine whether class 1 status might harm the planned expansion, and also added language to insure that the designation of wilderness would not be construed to require the creation of protective buffer zones around the wilderness areas. In addition, both our committee and Senator HELMS' Committee on Agriculture, to whom the bill was referred in the Senate, carefully examined the wilderness/clean air relationship and concluded that the possibility of class 1 designation was virtually nil. As Senator HELMS' committee report notes:

> The committee believes, with the addition of this comprehensive study (air quality) study, that the legitimate concerns of industry in southwestern Virginia will be met . . . (Senate Report 98-612, pg. 9)

I would also point out that to further allay Westvaco's concerns, Congressmen BOUCHER and OLIN asked the Virginia conservation groups which pushed for H.R. 5121 whether they would ever seek class 1 designation for the new wilderness. In response, the

major groups involved sent us the following letter, which was reprinted in our committee report on the legislation. The key phrase in that letter reads:

> We therefore wish it to be known that we can foresee no set of circumstances under which we would either initiate or support any effort to reclassify wilderness areas in Virginia to air quality class 1. We believe that any such effort would be unnecessary and ill-advised.

While such a letter cannot, of course, absolutely bind future Congresses or conservation groups, it stands as testimony to the clear intent of all concerned and constitutes a printed record of that intent.

Mr. Speaker, as I have already mentioned, our committee and Senator HELMS' committee conducted a thorough investigation into the wildeness/clean air ramifications of this legislation. Four full pages of our committee report are devoted to the issue and the matter was discussed at length during floor debate of the bill last May. Senator HELMS' committee report devotes two full pages to the issue and reaches the exact same conclusion as we did. Namely, that Westvaco's concerns with this bill are not legitimate, and their fears of being adversely impacted by the action of some future Congress are not well founded. I would be happy to discuss the wilderness/clean air issue in further detail if Members so desire, but I believe enough has been said at this point.

I urge approval of H.R. 5121 as amended by the Senate.

Mr. LUJAN. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I rise in support of H.R. 5121, the Virginia Wilderness bill.

The Senate-passed version is essentially the same as that which passed the House on May 8 with only 20 votes against it. I supported it then and intend to do so today.

There is some opposition from the gentleman from Virginia [Mr. BLILEY] and the gentleman from Kentucky [Mr. HUBBARD] and I respect their concerns. I believe they are responding to the concerns of the employees of Westvaco Corp., and I commend them for doing so.

However, I do not believe the company's fears are founded. Perhaps the debate will help reassure them.

As the chairman [Mr. SEIBERLING] has explained, the issue involves the Clean Air Act and the proximity of Westvaco's Covington Mill to the proposed wilderness areas. Wilderness areas are class 2 and the mill meets the class 2 requirements but they intend to expand their operations and hesitate to do so with the remotest possibility that one of the wilderness areas could be reclassified as a class 1 area.

The important point is that to be reclassified, the Governor of Virginia would have to request it. It is not likely that a Governor would move to put his own industry out of business.

Despite the unlikelihood of such an event, our committee and the other body left the areas closest to the mill in wilderness study and the other body went even further by requiring a study by the Forest Service, in consultation with EPA and the State of Virginia, to determine the impact of the increased emissions on the wilderness study areas. The company is invited to participate fully in the study.

The company has requested that five additional areas be left in study rather then designated wilderness by the bill.

I do not believe that this degree of caution is necessary. With the assurances we have from the State, the delegation, and the groups involved, I do not believe the areas will ever be reclassified or even considered for such designation.

We cannot bind a future Congress but I believe we have put provisions in this bill which come as close to that as possible.

I intend to support the bill and urge my colleagues to do so.

□ 1420

Mr. WHITEHURST. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman.

Mr. WHITEHURST. Mr. Speaker, I just rise in support of the bill and thank my colleague for yielding to me.

I commend him for this statement. It is significant that both the Senators of our State are in favor of this bill.

The record on behalf of the legislation has already been established and I think in view of that, the sentiment of the House already having been measured, that this bill deserves passage.

Mr. LUJAN. Mr. Speaker, I thank the gentleman.

Mr. SEIBERLING. Mr. Speaker, I yield 4 minutes to one of the distinguished authors of this legislation, the gentleman from Virginia [Mr. OLIN].

Mr. OLIN. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I rise in support of the Senate amendments to H.R. 5121, the Virginia Wilderness Act, and urge their adoption. Three of the areas designated for wilderness, the addition to the existing James River Face Wilderness Area, and two of the areas designated for wilderness-study under this bill are in the Sixth Congressional District of Virginia which I have the honor of representing in Congress. The others sites contained in the bill are in the congressional district of my colleague from Virginia, Congressman BOUCHER.

The amendments added by the Senate to H.R. 5121 are modest and do not change the basic provisions of this bill as passed by the House on May 8 of this year. As you will recall, the vote on this bill at that time was 376 to 20. The other body added language clarifying that it is not the intent of Congress that buffer zones be created around these wilderness areas. It also added 40 acres of wilderness to the existing James River Face Wilderness Area. This addition was made at the request of the U.S. Forest Service. Finally, language was added to the bill calling upon the Forest Service, in consultation with the EPA and the State of Virginia, to prepare a study on the effects of wilderness designations on economic growth in western Virginia. Other than these changes, the bill is the same as passed the House earlier this year. I support the amendments.

Mr. Speaker, I would also like to take this opportunity to thank the Virginia Senators for their valuable contributions to this legislation and for their fine work in guiding this bill through the other body. In addition, I would like to thank the chairman of the subcommittee, Mr. SEIBERLING, for all of his help in bringing this legislation to this point. His guidance and assistance has been invaluable.

Adoption of this legislation will be a tribute to the tireless work of countless Virginians who have testified on this legislation, written letters, circulated petitions, and generally worked to heighten attention to the need for this legislation. I will not attempt to name all of these people, but I would like to give a special tnanks to Mr. Ernest Dickerman of Swoope, VA. Ernie has been working on this for as long as anyone can remember.

Finally, Mr. Speaker, I would like to emphasize as strongly as I can that the adoption of this legislation, and the designation of these sites as wilderness areas will not threaten jobs or economic development. This has been a crucial consideration of mine throughout this process. If I believed that there was any realistic possibility that this bill would jeopardize jobs, I would not be enthusiastically supporting it as I am. Further, once again, I pledge to vigorously oppose any efforts in the future to redesignate air quality standards. These wilderness areas will be class 2 and I am committed to the making sure they remain class 2.

Mr. Speaker, this is a well-balanced and carefully drafted bill. The Senate amendments clarify our intentions and should be adopted. I urge my colleagues to join me in supporting this legislation and clearing the measure for the President.

Mr. SEIBERLING. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Virginia [Mr. BOUCHER], who is also one of the authors of this bill.

Mr. BOUCHER. Mr. Speaker, I want to thank the gentleman from Ohio for yielding time to me. I also want to commend him for his outstanding leadership in helping to bring this measure forward. We in Virginia very much appreciate his assistance.

Mr. Speaker, I rise in strong support of H.R. 5121, the Virginia National Forest Wilderness Preservation Act of 1984. The gentleman from Virginia [Mr. OLIN] and I, joined in sponsorship by Mr. WHITEHURST, introduced this bill which the House approved in May by a margin of 376 to 20. The version of H.R. 5121 before us now reflects three changes made by the other body; I fully support these changes.

H.R. 5121 represents a balance of diverse interests which was developed through many months of debate and discussion. My colleague from Virginia, Mr. OLIN, and I worked closely with the Forest Service field representatives who are most familiar with the RARE II study areas, and our bill reflects their advice. We also attempted to work with as many of the Forest users as possible. H.R. 5121 was drafted after careful consideration of the interests of those to whom the Forest is a means of livelihood, a recreational resource, an avenue of learning and scientific study, or a provider of drinking water. The selection of areas for wilderness protection and the recommendations for the boundaries of each of these areas evolved from the suggestions of thousands of Virginia citizens.

H.R. 5121 designates as wilderness for hunting, fishing, camping, hiking, and other compatible uses approximately 56,000 acres, comprising somewhat less than 4 percent of Virginia's national forest lands. It places approximately 25,000 acres in further study, and it releases to multiple use 157,000 acres which have been studied and restudied for possible wilderness designation.

I would like to address briefly the three changes which the other body has made to the bill. First, 40 acres are added to the James River Face existing wilderness area. The Forest Service requested this addition so that adequate access to the area is assured. I support this addition, which increases the size of this area to 200 acres.

Second, language has been added prohibiting the establishment of buffer zones around the wilderness areas. Although I believe that the bill is clear in its sole applicability to designated wilderness and not to adjoining areas, I have no objection to this provision.

Third, language has been added recognizing concerns which have been raised by a very important employer in Virginia, Westvaco Corp. Westvaco has expressed concern that the designation of areas as wilderness may at some point in the future be followed by their redesignation as class 1 regions for purposes of the Clean Air Act. Westvaco has recently announced an important expansion of its Covington, VA plant and is concerned that such a redesignation might impair the expansion.

To address these concerns, Mr. OLIN and I left in place the current class 2 air standards for each of the proposed wilderness areas in H.R. 5121. We also included letters in the bill's House Committee report from national environmental groups stating that they have no plans to recommend new class 1 designations in Virginia and from key environmental groups in Virginia stating that they will not seek or support redesignation of these areas to class 1.

Additionally, Mr. OLIN and I chose not to make wilderness recommendations for the four areas which are closest to Westvaco's plant at this time. Because of the strong citizen interest in the preservation of these areas and the value of their wilderness resources, however, we designated the areas as wilderness study areas rather than releasing them to mutliple use.

Finally, as mentioned earlier, the other body also added a provision to the bill to allay Westvaco's concerns. The U.S. Forest Service, in conjunction with the Environmental Protection Agency and the Commonwealth of Virginia, is directed to study the effects of air quality standards in the areas adjacent to the four wilderness study areas. This study is to be completed no later than 2 years after the date of the bill's enactment. This provision parallels a similar request Mr. OLIN and I have made to the EPA. I support this provision, and I look forward to reviewing the study 2 years hence to determine whether the designation of these four areas as wilderness is appropriate.

In summary, I fully support H.R. 5121 with the three provisions which the other body has added regarding additional wilderness acreage, buffer zones, and the air quality study, and I believe that it deserves the favorable consideration of the House.

Mr. LUJAN. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia [Mr. BLILEY].

Mr. BLILEY. Mr. Speaker, I rise in opposition to the bill. Mr. Speaker, I am as concerned about the preservation of Virginia's natural beauty as any of my colleagues in this House. This is my home and I am proud of it. I want to know that my grandchildren will be able to know the beauty of this great State. However, I am also concerned about something else—something that I think we should all be concerned about now, and that is: Jobs. I don't understand why the preservation of jobs isn't as important to my colleagues as is the preservation of wilderness.

It is not my desire to try and destroy this legislation. I am simply seeking an opportunity to amend it so that I and my colleagues from neighboring States can support it. I want to make sure the facts are in before Congress makes its decision.

If this bill passes today, it will do so without benefit of the facts—facts which will have potentially serious effects on industries in Virginia and neighboring States. I was hoping to have any opportunity to offer an amendment which, I believe, addresses our concerns. The rule that was just passed prevents me from doing so, however. My amendment would have shifted four areas designated as wilderness to wilderness study status. In addition, after completion of the 2-year study period, the Secretary of Agriculture would be required to report findings to the President so as to enable him to make recommendations to Congress regarding future designation of all study areas.

Why is that so frightening? Are we afraid of what we will find out in such a study? If the proponents are so certain that wilderness designation will not adversely affect the industrial community, why are they afraid to prove it? What possible difference will 2 years of study make to the wilderness area? I don't believe the land is going to disappear in 2 years. The land will still be there and we will know with more certainty the impact that a wilderness designation will have on the surrounding area.

Let's be sure of the facts before we make such a serious decision. If we are going to make a mistake, let's at least do it with our eyes open and all of the facts before us.

□ 1430

Mr. SEIBERLING. Mr. Speaker, I yield 1 minute to the distinguished chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Speaker, Virginia is a place of unusual and diverse beauty, from the Chesapeake Bay to the ocean beaches, to the estuaries of the James River, to the special part of that State that lies in the Piedmont country where the streams rise and move on to the ocean. It always tests the statesmanship of a congressional delegation when a wilderness proposal or a national park proposal is made in your district or your State.

But I want to commend the members of the Virginia delegation, both the House and Senate, for the responsible way in which they have worked with our committee and the Agriculture Committee, and with Chairman SEIBERLING, to produce a fine piece of legislation. Against the bill we find

today really only one company which mistakenly believes that this bill will cost jobs and economic growth, and I think the facts are clearly otherwise.

On the side of passage are the Members or most of the Members of the House delegation, including the two who represent the areas involved, both Members of the Senate delegation, the Governor, and other groups and individuals who have been mentioned here.

We passed the bill 317 to 20 just a few months ago. I think we ought to do about as good today, and I urge adoption of the motion.

● Mr. DE LA GARZA. Mr. Speaker, I rise in support of H.R. 5121, as amended, a bill designating wilderness areas in national forests in the State of Virginia. The bill, which was referred jointly to the Committee on Agriculture and the Committee on Interior and Insular Affairs, was passed by the House on May 8, 1984. The bill was amended by the Senate to change slightly the acreage for one of the wilderness areas, require the Forest Service, in consultation with the Environmental Protection Agency and the State of Virginia, to conduct a study on the effect of emissions from the Covington, VA, Westvaco paper mill on certain wilderness study areas, and make clear that Congress does not intend that the designation of wilderness areas will lead to the creation of buffer zones around such areas.

Except for the changes described above, H.R. 5121, as passed by the Senate, is substantially the same as the House-passed bill. I am pleased to concur in the Senate amendments and encourage my colleagues to do likewise.●

Mr. SEIBERLING. Mr. Speaker, I simply want again to commend the members of the Virginia delegation and particularly the two gentlemen in whose districts these wilderness areas lie for their outstanding work on this legislation.

I have no further requests for time, and I yield back the balance of my time.

Mr. LUJAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 609, the previous question is considered as ordered on the motion.

The question is on the motion offered by the gentleman from Ohio [Mr. SEIBERLING].

The motion was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the matter just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AMERICAN CONSERVATION CORPS ACT OF 1983

Mr. SEIBERLING. Mr. Speaker, pursuant to the provisions of House Resolution 608, I move to take from the Speaker's table the bill (H.R. 999) to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes, with the Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 608, the Senate amendment is considered as having been read.

The text of the Senate amendment is as follows:

Strike out all after the enacting clause and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "American Conservation Corps Act of 1984".

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress finds that—

(1) conserving or developing natural and cultural resources and enhancing and maintaining environmentally important lands and waters through the use of the Nation's young men and women, is beneficial not only to the youth of the Nation by providing them with education and work opportunities, but is also beneficial for the Nation's economy and its environment; and

(2) through this work experience opportunity, the Nation's youth will further their understanding and appreciation of the natural and cultural resources in addition to learning basic and fundamental work ethics including discipline, cooperation, understanding to live and work with others, and learning the value of a day's work for a day's wages.

(b) PURPOSE.—It is the purpose of this Act to—

(1) enhance and maintain conservation, rehabilitation, and improvement work on Federal and non-Federal publuc lands and Indian lands, improve and restore Federal and non-Federal public lands and Indian lands, resources, and facilities, conserve energy and restore and maintain community lands, resources, and facilities;

(2) establish an American Conservation Corps to carry out a program to improve, restore, maintain, and conserve these lands and resources in the most cost-effective manner;

(3) assist State and local governments in carrying out needed non-Federal public land and resource conservation, rehabilitation, and improvement projects;

(4) provide for implementation of the program in such manner as will foster conservation and the wise use of natural and cultural resources through the establishment of working relationships among the Federal, State, and local governments, Indian tribes, and other public and private organizations; and

(5) increase (by training and other means) employment opportunities for young men and women including, but not limited to, those who are economically, socially, physically, or educationally disadvantaged and who may not otherwise be productively employed.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "Federal public lands" means any lands or waters (or interest therein) owned or administered by the United States.

(2) The term "non-Federal public lands" means any lands or waters (or interest therein) owned or administered by any agency or instrumentality of a State or local government.

(3) The term "program" means the conservation, rehabilitation, and improvement program established by this Act.

(4) The term "program agency" means any Federal agency or instrumentality with responsibility for the management of any public or Indian lands, any State agency designated by the Governor to manage the program in that State, and the governing body of any Indian tribe.

(5) The term "Indian tribe" means any Indian tribe, band, nation, or other group which is recognized as an Indian tribe by the Secretary of the Interior. Such term also includes any Native village corporation, regional corporation, and Native group established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1701 et seq.).

(6) The term "Indian" means a person who is a member of an Indian tribe.

(7) The term "Indian lands" means any real property owned by an Indian tribe, any real property held in trust by the United States for individual Indians or Indian tribes, and any real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States.

(8) The term "employment security service" means the agency in each of the several States with responsibility for the administration of unemployment and employment programs, and the oversight of local labor conditions.

(9) The term "chief administrator" means the head of any program agency as that term is defined in paragraph (4).

(10) The term "enrollee" means any individual enrolled in the American Conservation Corps in accordance with section 5.

(11) The term "crew leader" means an enrollee appointed under authority of this Act for the purpose of supervising other enrollees engaged in work projects pursuant to this Act.

(12) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(13) The term "economically disadvantaged" with respect to youths has the same meaning given such term in section 4 (8) of the Job Training Partnership Act.

PUBLIC LANDS CONSERVATION, REHABILITATION, AND IMPROVEMENT PROGRAM

SEC. 4. (a) ESTABLISHMENT OF PROGRAMS.—There is hereby established within the Department of the Interior and the Department of Agriculture and American Conservation Corps.—

(1) ESTABLISHMENT OF PROGRAM ON FEDERAL PUBLIC LANDS.—Not later than ninety days after the enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture, after consultation with the Secretary of Labor, shall establish and administer a conservation, rehabilitation, and improvement program on Federal public lands and Indian lands to carry out the purposes of this Act.

(2) ESTABLISHMENT OF PROGRAM ON NON-FEDERAL PUBLIC LANDS.—The Secretary of the Interior, after consultation with the Secretary of Agriculture and the Secretary of Labor, shall establish and administer a conservation, rehabilitation, and improvement program on non-Federal public lands to carry out the purposes of this Act.

(b) REGULATIONS AND ASSISTANCE.—The Secretary of the Interior and the Secretary of Agriculture, after consultation with the Secretary of Labor, shall jointly promulgate the regulations necessary to implement the programs established by subsection (a). Within thirty days after the enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall establish procedures to give Federal and non-Federal program agencies and other interested parties, including the public, adequate notice and opportunity to comment upon and participate in the formulation of such regulations. The Secretary of the Interior and the Secretary of Agriculture shall provide assistance, consistent with the terms of this Act, to program agencies for the establishment and operation of residential and nonresidential American Conservation Corps centers and for the implementation by the American Conversation Corps of projects designed to carry out the purposes of this Act.

(c) PROJECTS INCLUDED.—The programs established under this section may include projects such as—

(1) wildlife habitat conservation, rehabilitation, and improvement;

(2) rangeland conservation, rehabilitation, and improvement;

(3) recreational area development, maintenance, and improvement;

(4) urban revitalization;

(5) historical and cultural site preservation and maintenance;

(6) fish culture and habitat maintenance and improvement and other fishery assistance;

(7) road and trail maintenance and improvement;

(8) erosion, flood, drought, and storm damage assistance and control;

(9) stream, lake, and waterfront harbor and port improvement, and pollution control;

(10) insect, disease, rodent, and fire prevention and control;

(11) improvement of abandoned railroad bed and right-of-way;

(12) energy conservation projects and renewable resource enhancement;

(13) recovery of biomass from public lands, particularly forestlands;

(14) reclamation and improvement of strip-mined land; and

(15) forestry, nursery, and silvicultural operations.

(d) PREFERENCE FOR CERTAIN PROJECTS.—The programs shall provide a preference for those projects which—

(1) will provide long-term benefits to the public;

(2) will instill in the enrollee involved a work ethic and a sense of public service;

(3) will be labor intensive; and

(4) can be planned and initiated promptly.

(e) LIMITATION TO FEDERAL AND NON-FEDERAL PUBLIC LANDS.—Projects to be carried out under the program shall be limited to projects on Federal and non-Federal public lands or Indian lands except where a project involving other lands will provide a documented public benefit as determined by the Secretary of the Interior or the Secretary of Agriculture. The regulations promulgated under subsection (b) shall establish the criteria necessary to make such determinations.

(f) CONSISTENCY.—All projects selected and carried out under this Act for conservation, rehabilitation, or improvement of any Federal or non-Federal public lands or Indian lands shall be consistent with the provisions of law and policies relating to the management and administration of such lands, with all other applicable provisions of law, and with all management, operational, and other plans and documents which govern the administration of the area.

(g) CONSERVATION CENTERS.—(1) Each program agency may apply for approval of conservation centers to carry out projects under this Act.

(2) Applications for approval of conservation centers on Federal public lands shall be submitted to the Secretary of the Interior or the Secretary of Agriculture in such manner as is provided for by the regulations promulgated under subsection (b). Applications for the approval of conservation centers on non-Federal public lands or Indian lands shall be submitted to the Secretary of the Interior. No application may be submitted to the Secretary of the Interior or the Secretary of Agriculture before the 30-day period for review and comment by the appropriate State Job Training Coordinating Council (established under the Job Training Partnership Act), if any, which shall consult with the appropriate Private Industry Council, or Councils, in the area in which a project is carried out. Comments of the State Job Training Coordinating Council and Private Industry Council shall be forwarded to the Secretary at the time the grant application is submitted.

(3) No grant or other agreement may be entered into under this section unless an application is submitted to and approved by the Secretary of the Interior or the Secretary of Agriculture, as the case may be. Each application shall contain—

(A) a comprehensive description of the objectives and performance goals for the conservation center and a description of the types of projects to be carried out, including a description of the types and duration of training and work experience to be provided;

(B) a plan to make arrangement for certification of the training skills acquired by enrollees under this Act;

(C) a plan to make arrangements for the award of academic credit by educational institutions and agencies to enrollees for competencies developed under training programs or from work experience under this Act;

(D) an estimate of the number of enrollees and crew leaders necessary for the proposed projects, the length of time for which the services of such personnel will be required and the services which will be required for their support;

(E) a description of the facilities and equipment to be available for use in the center;

(F) a plan for managing the conservation center, supplying the necessary equipment and material, and administering the payroll; and

(G) such other information as the Secretary of the Interior and the Secretary of Agriculture shall prescribe.

(4) In approving the location and type of conservation centers, the Secretary of the Interior and the Secretary of Agriculture shall give due consideration to—

(A) the proximity of the center to the work to be done;

(B) the cost and means of transportation available between the center and the homes of the enrollees who may be assigned to those centers;

(C) the access of economically, socially, physicially, or educationally disadvantaged youths to the centers; and

(D) the cost of establishing the center.

Every effort shall be made to assign youths to residential or nonresidential centers as near to their homes as practicable.

(5)(A) Every conservation center shall have sufficient supervisory staff appointed by the chief administrator which may include enrollees who have displayed exceptional leadership qualities.

(B) No project shall be undertaken without the on-site presence of knowledgeable and competent supervision, and all projects undertaken shall be documented in advance in an approved written project plan.

(h) LOCAL GOVERNMENT PARTICIPATION.—Any State carrying out a program under this Act shall provide a mechanism under which local governments within the State may be approved by the State to participate in the program and to carry out projects in accordance with the requirements of this Act.

(i) AGREEMENTS.—Program agencies may enter into contracts and other appropriate arrangements with local government agencies and nonprofit organizations for the management of conservation centers under the program.

(j) JOINT PROJECTS.—The Secretary of the Interior and the Secretary of Agriculture are authorized to develop jointly with the Secretary of Labor regulations designed to allow, where appropriate, joint projects in which activities supported by funds authorized under this Act are coordinated with activities supported by funds authorized under employment and training statutes administered by the Department of Labor (including the Job Training Partnership Act). Such regulations shall provide standards for approval of joint projects which meet both the purposes of this Act and the purposes of such employment and training statutes under which funds are available to support the activities proposed for approval. Such regulations shall also establish a single mechanism for approval of joint projects developed at the State or local level.

ENROLLMENT, FUNDING, AND MANAGEMENT

SEC. 5. (a)(1)(A) ENROLLMENT IN PROGRAM.—Enrollment in the American Conservation Corps shall be limited to individuals who, at the time of enrollment, are—

(i) unemployed;

(ii) not less than sixteen or more than twenty-five years of age (except that programs limited to the months of June, July, and August may include individuals not less than fifteen years and not more than twenty-one years of age at the time of their enrollment); and

(iii) citizens (including those citizens of the Northern Mariana Islands as defined in Public Law 98-213 (97 Stat. 1459)) or lawful permanent residents of the United States.

(B) Special efforts shall be made to recruit and enroll individuals who, at the time

of enrollment, are economically disadvantaged.

(C) In addition to recruitment and enrollment efforts required in subparagraph (B), the Secretary of the Interior and the Secretary of Agriculture shall make special efforts to recruit enrollees who are socially, physically, and educationally disadvantaged youths.

(D) Notwithstanding subparagraph (A), a limited number of special corps members may be enrolled without regard to their age so that the corps may draw upon their special skills which may contribute to the attainment of the purposes of the Act.

(2) Except in the case of a program limited to the months of June, July, and August, individuals who at the time of applying for enrollment have attained age sixteen but not attained age nineteen, and who are no longer enrolled in any secondary school shall not be enrolled unless they give adequate written assurances, under criteria to be established by the Secretary of the Interior and the Secretary of Agriculture, that they did not leave school for the express purpose of enrolling. The regulations promulgated under section 4(b) shall provide such criteria.

(3) The selection of enrollees to serve in the American Conservation Corps in any conservation center shall be the responsibility of the chief administrator of the program agency. Enrollees shall be selected from those qualified persons who have applied to, or been recruited by, the program agency, a State employment security service, a local school district with an employment referral service, an administrative entity under the Job Training Partnership Act, a community or community-based nonprofit organization, the sponsor of an Indian program, or the sponsor of a migrant or seasonal farmwork program.

(4)(A) Except for a program limited to the months of June, July, and August, any qualified individual selected for enrollment may be enrolled for a period not to exceed twenty-four months. When the term of enrollment does not consist of one continuous twenty-four-month term, the total of shorter terms may not exceed twenty-four months.

(B) No individual may remain enrolled in the American Conservation Corps after that individual has attained the age of twenty-six, except as provided in section 5(a)(1)(B).

(5) Within the American Conservation Corps the directors of centers shall establish and stringently enforce standards of conduct to promote proper moral and disciplinary conditions. Enrollees who violate these standards shall be transferred to other locations, or dismissed, if it is determined that their retention in that particular center, or in the Corps, will jeopardize the enforcement of such standards or diminish the opportunities of other enrollees. Such disciplinary measures will be subject to expeditious appeal to the appropriate Secretary.

(b) SERVICES, FACILITIES, SUPPLIES, ET CETERA.—The program agency shall provide quarters, board, limited and emergency medical care, transportation from conservation centers to work sites, and other services, facilities, supplies, and equipment. Whenever possible, the Secretary of the Interior and the Secretary of Agriculture shall make arrangements with the Secretary of Defense to have such logistical support provided by a military installation near the proposed center, including the provision of temporary tent centers where needed. Basic standards of work requirements, health, nutrition, sanitation, and safety for all conservation centers shall be established and enforced.

(C) REQUIREMENT OF PAYMENT FOR CERTAIN SERVICES.—Enrollees shall be required to pay a reasonable portion of the cost of room and board provided at conservation centers into rollover funds administered by the appropriate Secretary. Such payments and rates are to be established after evaluation of costs of providing the services. The rollover funds established pursuant to this section shall be used solely to defray the costs of room and board for enrollees. The Secretary of the Interior and the Secretary of Agriculture are authorized to make available to program agencies surplus food and equipment as may be available from Federal programs.

FEDERAL AND STATE EMPLOYEE STATUS

SEC. 6. (a) IN GENERAL.—Enrollees, crew leaders, and volunteers are deemed as being responsible to, or the responsibility of, the program agency administering the project on which they work. Non-Federal program agencies shall be required as a minimum to provide tort claims protection and work related injury claim benefits to enrollees and crew leaders. Except as otherwise specifically provided in the following paragraphs, enrollees and crew leaders in Federal projects for which funds have been authorized pursuant to paragraphs (2), (3), (4), and (5) of section 13(a) shall not be deemed Federal employees and should not be subject to the provisions of law relating to Federal employment:

(1) For purposes of subchapter I of chapter 81 of title 5, United States Code, relating to the compensation of Federal employees for work injuries, enrollees and crew leaders serving Federal program agencies shall be deemed civil employees of the United States within the meaning of the term "employee" as defined in section 8101 of title 5, United States Code, and the provisions of that subchapter shall apply, except—

(A) the term "performance of duty" shall not include any act of an enrollee or crew leader while absent from his or her assigned post of duty, except while participating in an activity authorized by or under the direction and supervision of the Secretary of the Interior or the Secretary of Agriculture or the conservation supervisory staff (including an activity while on pass or during travel to or from such post of duty); and

(B) compensation for disability shall not begin to accrue until the day following the date on which the injured enrollee's or crew leader's employment is terminated.

(2) For purposes of chapter 171 of title 28, United States Code, relating to tort claims procedure, enrollees and crew leaders on Federal projects shall be deemed employees of the United States within the meaning of the term "employee of the Government" as defined in section 2671 of title 28, United States Code.

(3) For purposes of section 5911 of title 5, United States Code, relating to allowances for quarters, enrollees and crew leaders shall be deemed employees of the United States within the meaning of the term "employee" as defined in that section.

(b) AMENDMENT OF TITLE 5.—Section 8332(b) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (11);

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof "; and"; and

(3) by adding after paragraph (12) the following new paragraph:

"(13) service as an enrollee or crew leader only if the enrollee or crew leader in the American Conservation Corps later becomes subject to this subchapter.".

USE OF VOLUNTEERS

SEC. 7. Where any program agency has authority to use volunteer services in carrying out functions of the agency, such agency may use volunteer services for purposes of assisting projects related to conservation centers established under this Act and may expend funds made available for those purposes to the agency, including funds made available under this Act, to provide for services or costs incidental to the utilization of such volunteers, including transportation, supplies, lodging subsistence, recruiting, training, and supervision. The use of volunteer services permitted by this section shall be subject to the condition that such use does result in the displacement of any enrollee.

TENNESSEE VALLEY AUTHORITY

SEC. 8. The Board of Directors of the Tennessee Valley Authority may accept the services of volunteers and provide for their incidental expenses to carry out any activity of the Tennessee Valley Authority except policy-making or law or regulatory enforcement. Such volunteers shall not be deemed employees of the United States Government except for the purposes of chapter 81 of title 5 of the United States Code, relating to compensation for work injuries, and shall not be deemed employees of the Tennessee Valley Authority except for the purposes of tort claims to the same extent as a regular employee of the Tennessee Valley Authority would be under identical circumstances.

SPECIAL RESPONSIBILITIES

SEC. 9. (a) PAY.—(1) The rate of pay for enrollees shall be 95 percent of the pay rate for members of the Armed Forces in the enlisted grade E-1 who have served for four months or more on active duty, from which a reasonable charge for enrollee room and board shall be deducted by the program agency.

(2) Enrollees shall receive $50 cash incentive stipends for every three months of enrollment in the program.

(3) The rate of pay for crew leaders shall be at a wage comparable to the compensation in effect for grades GS-3 to GS-7.

(b) COORDINATION.—The Secretary of the Interior and the Secretary of Agriculture and the chief administrators of other program agencies carrying out programs under this Act shall coordinate the programs with related Federal, State, local, and private activities.

(c) CERTIFICATION AND ACADEMIC CREDIT.—Pursuant to the provisions of paragraphs (B) and (C) of section 4 (G)(3), the Secretary of the Interior and the Secretary of Agriculture shall provide guidance and assistance to program agencies in securing certification of training skills or academic credit for competencies developed under this Act.

(d) RESEARCH AND EVALUATION.—The Secretary of the Interior and the Secretary of Agriculture shall provide for research and evaluation to—

(1) determine costs and benefits, tangible and otherwise, of work performed under this Act and of training and employable skills and other benefits gained by enrollees, and

(2) identify options for improving program productivity and youth benefits, including

improved alternatives for: organization, subjects, sponsorship, and funding of work projects; recruitment and personnel policies; siting and functions of conservation centers; work and training regimes for youth of various origins and needs; and cooperative arrangements with programs, persons, and institutions not covered under this Act.

(e) DEMONSTRATIONS.—The Secretary of the Interior and the Secretary of Agriculture may authorize pilot or experimental projects to demonstrate or test new or alternative arrangements or subjects of work and training for programs under this Act, which may include alternatives identified under subsection (d)(2).

(f) CCC SITES.—The Secretary of the Interior, after consultation with the Secretary of Agriculture, shall study sites at which Civilian Conservation Corps activities were undertaken for purposes of determining a suitable location and means to commemorate the Civilian Conservation Corps. Not later than one year after the date of the enactment of this Act, the Secretary of the Interior shall submit a report to the Congress containing the results of the study carried out under this section. The report shall include cost estimates and recommendations for any legislative action.

(g) STUDY.—(1) program agencies shall not use more than 10 per centum of the funds available to them to provide training and educational materials and services for enrollees and may enter into arrangements with academic institutions or education providers, to include local education agencies, community colleges, four-year colleges, area vocational-technical schools and community based organizations, for academic study by enrollees during nonworking hours to upgrade literacy skills, obtain a high school diploma or its equivalency, or college degrees, or enhance employable skills. Enrollees who have not obtained a high school diploma or its equivalency shall have priority to receive services under this subsection. Whenever possible, an enrollee seeking study or training not provided at his or her conservation center shall be offered assignment to a conservation center providing such study or training.

(2) Standards and procedures with respect to the awarding of academic credit and certifying educational attainment in programs conducted under paragraph (1) shall be consistent with the requirement of applicable State and local law and regulations.

(h) GUIDANCE AND PLACEMENT.—Program agencies shall provide such job guidance and placement information and assistance for enrollees as may be necessary. Such assistance shall be provided in coordination with appropriate State, local, and private agencies and organizations.

ANNUAL REPORT

SEC. 10. The Secretary of the Interior and the Secretary of Agriculture shall prepare and submit to the President and to the Congress at least once each year a report detailing the activities carried out under this Act. Such report shall be submitted not later than December 31 of each year following the date of enactment of this Act. The report shall describe (1) conservation work procedures, accomplishments, and benefits; (2) the short-term post-program experience of enrollees, including data on the number of those terminating from the program who are unemployed, employed, have left the labor force, and are enrolled in further education and shall also report on the long-term impacts of the program on the employability of enrollees; (3) other youth benefits; and (4) problems and opportunities encountered in carrying out the act which require attention. The Secretary of the Interior and the Secretary of Agriculture shall include in such report such recommendations as each considers appropriate.

LABOR MARKET INFORMATION

SEC. 11. The Secretary of Labor shall make available to the Secretary of the Interior and the Secretary of Agriculture and to any program agency under this act such labor market information as is appropriate for use in carrying out the purposes of this Act.

EMPLOYEE APPEAL RIGHTS

SEC. 12. (a) In the case of—

(1) the displacement of a Federal employee (as defined in paragraph (1) of section 7511(a) of title 5, United States Code) or the failure to reemploy such a federal employee from a reemployment priority list or return a federal employee from furlough affected under title 5, United States Code, part 351 or part 752, contrary to a certification under section 13(b) (1) or (2), or

(2) the displacement of such a Federal employee by reason of the use of one or more volunteers under section 7 of this act,

such employee is entitled to appeal such action to the Merit Systems Protection Board under section 7701 of title 5, United States Code.

(b) In the case of—

(1) the displacement of any other individual employed (either directly or under contract with any private contractor) by a program agency or grantee, or the failure to reemploy an employee in layoff status, contrary to a certification under section 13(b) (1) or (2), or

(2) the displacement of such individual by reason of the use of one or more volunteers under section 7 of this Act,

the requirements contained in section 144 of the Job Training Partnership Act (Public Law 97-300) shall apply, and such individual shall be deemed an interested person for purposes of the application of such requirements.

(c) for purposes of this section, the term "displacement" includes, but is not limited to, any partial displacement through reduction of nonovertime hours, wages, or employment benefits.

AUTHORIZATION OF APPROPRIATIONS

SEC. 13. (a) DISTRIBUTION OF FUNDS.—Of the sums appropriated pursuant to subsection (f) to carry out this Act for any fiscal year—

(1) not less than 35 per centum shall be made available to the Secretary of the Interior for expenditure by State program agencies;

(2) not less than 25 per centum shall be made available to the Secretary of Agriculture for expenditure by program agencies within the Department of Agriculture;

(3) not less than 25 per centum shall be made available to the Secretary of the Interior for expenditure by program agencies within the Department of the Interior;

(4) not less than 5 per centum shall be made available to the Secretary of the Interior for expenditures by the governing bodies of participating Indian tribes; and

(5) the remaining amount shall be made available to the Secretary of the Interior and the Secretary of Agriculture, under such terms as are provided for in regulations promulgated under section 4(b), for expenditure by other Federal program agencies and for demonstration projects or projects of special merit carried out by any program agency or by any nonprofit organization or local government which is undertaking or proposing to undertake projects consistent with the purposes of this Act.

Fifteen per centum of the amount disbursed to State program agencies under paragraph (1) (or to local governments within the State where subsection (c) applies) shall be divided equally among the States and 85 per centum of such amount shall be distributed among such States proportionately according to the total youth population of such States between the ages of fifteen and twenty-five (as determined on the basis of the most recent census). Any State receiving funds for the operation of any conservation center shall be required to provide not less than 15 per centum of the cost of operation of such center. Any State receiving funds for any fiscal year shall provide not less than 10 per centum of such funds to local governments approved by the State under section (4)(h) to carry out projects under this Act unless no such local government in that State is approved before the end of such fiscal year. In any case where no such local government is approved before the end of such fiscal year, such 10 per centum may be expended by the State in accordance with this Act.

(b) AWARDS OF GRANTS.—The Secretary of the Interior and the Secretary of Agriculture shall not make any grant to, or enter into any agreement with any program agency for the funding of any conservation center under this Act unless such agency certifies that projects carried out by the conservation center will not—

(1) result in the displacement of individuals currently employed (either directly or under contract with any private contractor) by the program agency concerned (including partial displacement through reduction of nonovertime hours, wages, or employment benefits);

(2) result in the employment of any individual when any other person is in a layoff status from the same or substantially equivalent job within the jurisdiction of the program agency concerned; or

(3) impair existing contracts for services.

(c) STATE SHARE TO LOCAL GOVERNMENTS.—If, at the commencement of any fiscal year, any State does not have a program agency designated by the Governor to manage the program in that State, then during such fiscal year each local government within such State may establish a program agency to carry out the program within the political subdivision which is under the jurisdiction of such local government. In any such case, the State share (or a reasonable portion thereof, including amounts authorized to be appropriated pursuant to subsection (f) for such State) may be made available by the Secretary of the Interior for expenditure by such local government program agencies to carry out the program within such political subdivisions. Such local government program agencies shall be in all respects subject to the same requirements as State program agencies. Where more than one local government within a State has established a program agency under this subsection, the Secretary of the Interior shall allocate funds between such agencies in such manner as he deems equitable.

(d) PAYMENT TERMS.—Payments under grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the

Secretary of the Interior or the Secretary of Agriculture, as appropriate, finds necessary.

(e) USE OF FUNDS.—Contract authority under this Act shall be subject to the availability of appropriation. Funds provided under this Act shall only be used for activities which are in addition to those which would otherwise be carried out in the area in the absence of such funds. Not more than 10 per centum of the funds made available to any program agency for projects during each fiscal year may be used for the purchase of major capital equipment.

(f) APPROPRIATION LEVELS.—There is authorized to be appropriated for the purposes of carrying out this Act $50,000,000 for fiscal year 1985, $75,000,000 for fiscal year 1986, and $100,000,000 for fiscal year 1987. Funds appropriated under this Act shall remain available until expended.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. SEIBERLING] is recognized for 1 hour.

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring to the House floor again H.R. 999, the American Conservation Corps Act of 1984. As I noted in my remarks last Wednesday, this will mark the fourth time the House of Representatives will have voted on this legislation. That we are, at last, going to vote on final passage does not attest so much to our tenacity as to the merits of this important legislation.

To summarize, H.R. 999 would establish a youth conservation jobs program to provide meaningful work for our Nation's young people in helping to improve our Nation's public lands and community resources. The program is modeled after previous conservation work programs, but with a number of substantial improvements.

The Senate version of H.R. 999, for the most part, simply fine-tunes the House version. It passed the Senate by unanimous consent. I was pleased to note that the Senate retained the House approach relating to the standards for participation by enrollees. Our intent was to ensure that disadvantaged youth would be major beneficiaries of the program, but not to preclude the opportunity for other young people, especially those in areas of high unemployment, to be served. The Senate language, which I support, states that special efforts will be made to recruit and enroll disadvantaged youth. The Senate further included language to define economically disadvantaged youth as that term is defined in the Job Training Partnership Act. The age requirements and differentiation between the summer and year-round components of the program remain the same.

I also note that the Senate version would include a stronger role for the Secretary of Agriculture in developing regulations for the program, in consultation with the Secretary of Labor and with the participation of other Federal and non-Federal agencies and the public. Both Secretaries, however, would retain authority for administering the programs within their respective departments. Provisions are retained, with only technical changes, for the establishment of both residential and nonresidential conservation centers.

The House bill authorized $300 million a year through fiscal 1989 for an American Conservation Corps program. Appropriations were to be charged against moneys the Federal Government receives from various Federal leasing and permitting activities. The rationale was to take some of the revenues generated by public resources and put them back to work in improving these resources and in helping our Nation's youth.

The Senate version drastically reduces the authorized funding levels to $50 million in fiscal 1985, $75 million in 1986, and $100 million in 1987. The funds would be derived from general revenues and not from the earmarked receipts as in the House bill.

As I noted on Wednesday, a $50 million Federal outlay would fund 18,517 youth jobs; over the 3-year life of the program as provided in the Senate version, less than 85,000 youth would be served. By contrast, the House level of $300 million would have served a total of over 113,000 youth each year, and well over 600,000 youth over the 6 years. This does not include the additional youth that would be served by spin-off programs established by State and local agencies and nonprofit organizations.

There are currently 1.4 million teenagers who are looking for work and who can't find a job. The unemployment rate for black teenagers alone is nearly 42 percent; they and other disadvantaged youth are the most in need of work and least able to find it.

I feel that the funding levels for the program will need to be reevaluated early in the next Congress, particularly if youth unemployment continues at the unacceptably high levels we have been experiencing in the past few years.

I was pleased to see that the Senate version retains the distribution formula for the funding. Specifically, the funds would be distributed as follows: 35 percent for State agencies (to be matched on a 15-percent basis, with 10 percent of the allocation to be shared with local governments); 25 percent for programs of the Department of Agriculture; 25 percent for programs of the Department of the Interior; 5 percent for programs by participating Indian tribes and the remainder for other Federal agencies and demonstration projects or projects of special merit.

The Senate version also retained, and expanded upon, the requirements for providing educational opportunities and for evaluating and reporting on the programs.

In summary, while I regret the low funding levels in the bill, I believe that the legislation represents a good compromise and certainly a good first step in the right direction for this program.

Again, I thank all of the Members on both sides of the aisle and in both the House and the Senate for all their work on this legislation.

Mr. Speaker, I yield 30 minutes to the gentleman from New Mexico [Mr. LUJAN].

Mr. LUJAN. Mr. Speaker, I yield myself 3 minutes.

□ 1440

Mr. Speaker, This legislation would establish an American Conservation Corps, comprised of unemployed youths between the ages of 16 and 25, for authorized improvement programs on Federal, State, and Indian lands. The program is patterned after the Civilian Conservation Corps Program of the 1930's and would replace two terminated Federal youth employment on public lands programs.

H.R. 999 passed the House on March 1, 1983, by a vote of 301 to 87. Authorized at a level of $300 million per year, the ACC program called for in the House bill was opposed by the administration as overly broad and too expensive. As amended in the Senate, H.R. 999 would create an ACC to carry out conservation and rehabilitation projects on Federal, State, local, and Indian lands. Projects will include—but not be limited to—wildlife habitat conservation, rehabilitation, and improvement; recreational area development and maintenance; urban revitalization.

The bill would require the ACC to be comprised of unemployed youths between the ages of 16 and 25 for year-round programs and 15 and 21 for summer programs. The amendment does not contain targeting or employment quotas, but does direct the Secretary of the Interior and the Secretary of Agriculture to employ special efforts to recruit and enroll economically disadvantaged youths. The bill would also allow enrollees to receive the equivalent of the minimum wage plus $50.00 cash bonus incentives, and will pay a reasonable charge for housing.

Finally, H.R. 999 would establish funding authorization levels at $50 million, $75 million, and $100 million for fiscal years 1985, 1986, and 1987, respectively. Funded at $100 million annually, the program will enroll over 37,000 youths in year-round and summer programs.

I urge my colleagues to support this legislation.

Mr. SEIBERLING. Mr Speaker, I yield 3 minutes to one of our most distinguished colleagues in the Commit-

tee on Interior and Insular Affairs, the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I thank the chairman.

First of all I want to commend the chairman Mr. SEIBERLING, for his tenacity in terms of working for the American Conservation Corps. As Rep. SEIBERLING pointed out in his opening comments, this is the fourth time that this matter has been before the House.

Mr. Speaker, I regret this program was not available to serve young adults in 1983 and 1984 when I believe it was very much needed. But I am pleased to note that with the passage anticipated today that it will be available for the future because indeed the problem of youth unemployment persists as a very serious one in our society today.

Mr. Speaker, the American Conservation Corps as has been pointed out by other speakers, had its genesis in the 1930's in the Civilian Conservation Corps. It was a good concept and a good idea and most importantly the CCC worked. Indeed it was an idea that needs to be encouraged with improvements, which have been learned from past experience with the CCC.

From the standpoint of tax dollars spent the American Conservation Corp. will yield a favorable cost benefit in work accomplished or training given. It pays to invest in people. While we are justifiably concerned about our natural resources it is perhaps more important that we do a good job of developing the human resources in our society, and to build in our society a conservation and work ethic which I believe is imperative to the preservation of our natural heritage.

No matter how stringent the environmental and land use laws we write Mr. Speaker, the fact of the matter is that without a proper conservation ethic on the part of the American people, and especially on the part of the American youth, that we will not be successful in attaining the goals that are embodied in the laws of this land developed to protect our great, wonderful natural heritage.

As society changes, more often we find that youth do not have the opportunity to work in close contact with our natural resources, with the land. It is important that we provide opportunities where young adults can learn the lessons that can only be gained by firsthand experience, whether through the planting of trees or constructing a hiking paths in parks or any of the numerous activities related to maintaining our natural resources and environment. These experiences will serve an important purpose.

The legislation before us allows the Congress to address the needed maintenance of our natural resources base and alleviate youth unemployment, giving special emphasis to disadvantaged youth. The American Conservation Corps can show young people that they have a stake in the natural resource heritage of our country. So I urge my colleagues to support this legislation. This is a sound concept which I think will, in terms of the training, and the job opportunities, for youth, be a tremendous benefit, but most importantly it will help in developing a conservation ethic, for the young adults in our society.

Mr. Speaker, I yield back the balance of my time.

Mr. SEIBERLING. Mr. Speaker, I yield 6 minutes to the distinguished gentleman from the State of Washington, Mr. DICKS.

Mr. Speaker, will the gentleman yield?

Mr. DICKS. I yield to the chairman of the subcommittee.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to commend the gentleman [Mr. DICKS] for the effort he has made in the Committee on Appropriations to try to continue the funding for youth corps programs.

With 42 percent of the minority youth unemployed and with widespread youth unemployment throughout this country, it is absolutely essential that we give them an opportunity to have a work experience, earn some money, and feel that they are also contributing in a constructive way to their community and their country.

Mr. Speaker, I thank the gentleman for yielding.

Mr. DICKS. I thank the distinguished chairman, Mr. SEIBERLING, for those very kind remarks. Two of the people whom I have respected most during my service in Congress are Henry M. Jackson of the State of Washington, who originally was the sponsor of the Youth Conservation Corps and Lloyd Meeds, who served on the same committee with the distinguished gentleman from Ohio [Mr. SEIBERLING], they put the YCC program into place.

Mr. Speaker, I have been a stout defender of the program. I might say that there is no one, though, in this Congress who deserves more credit than the gentleman from Ohio [Mr. SEIBERLING], not only for his work in behalf of the American Conservation Corps and the Young Adult Conservation Corps and the Youth Conservation Corps but also for the many wilderness bills that he has passed this year. I do not think there is anyone in the Congress, probably in the history of this Congress who has done more to preserve the natural environment of this country than the distinguished chairman from Ohio.

Mr. Speaker, I would like to take this opportunity to add my strong support for H.R. 999, authorizing the American Conservation Corps. I believe the ACC will be an invaluable program for young people throughout our country, and I strongly urge my colleagues to support this legislation.

For many years, I have been the advocate of a similar program, the Youth Conservation Corps, in the Interior Appropriations Subcommittee. I have fought for funding for the YCC all of these years for one simple reason—I have seen the program in action and I know that it works. Let me give you some examples of its effectiveness:

The YCC has provided meaningful employment to the youth of this Nation—many of whom have never spent a summer working out-of-doors. Since its inception, YCC has given summertime employment and training to over 250,000 high school youths from every State in the country;

The YCC has accomplished useful and needed conservation work on our public lands and national parks, totalling over $282 million in value during the program's first 10 years in operation. In Washington State alone, over 9,000 young people have been deployed by YCC through the years, and they have accomplished over $17 million of conservation work, clearing and rebuilding trails, planting trees, and getting an environmental education that is unequalled in any other Federal or State program;

The Federal portion of YCC funding alone has built more tha 3,600 miles of fence and over 4,600 miles of trails. Over 60,000 acres of trees have been planted, an area 1½ times the size of the District of Columbia. The YCC has picked up enough litter from enough miles of roads and trails to travel the length of the United States-Canada border three times. Enough visitors to public parks and recreation areas have been assisted by the YCC to populate the State of Alabama;

Finally, the YCC program has been cost-effective through its years of operation. For every Federal dollar spent on the YCC State Grants Program, $1.25 of needed work has been returned.

The Youth Conservation Corps has served this country well through the years, offering employment, training and education in an environment which fosters appreciation for conservation and preservation of our Nation's natural resources, all at minimal cost to the Federal Government. This despite the fact that providing funding for the program has been an uphill battle every year, and appropriations bills have included barely enough funds to keep the program alive.

I realize that the American Conservation Corps differs in significant respects from the YCC, but I hope that the YCC's beneficial elements will be preserved, and that we will soon have

a strong youth employment program operating once again.

I thank the Speaker.

□ 1450

The American Conservation Corps is needed because it deals with an unemployment problem that is bigger. It handles kids for a different age bracket than the YCC. We have been only able to get about $10 million a year for the YCC, even though it has been a great program.

This legislation that the gentleman from Ohio brings to the floor today is absolutely essential, in my judgment, to deal with the youth unemployment problem that is so significant in this country. If we are worried about drugs, if we are worried about young people getting in trouble, then why can we not in our national parks, our national recreation areas, our wilderness areas and in our State programs give them meaningful summer work during the entire year?

I think this legislation does that and does it very effectively.

Mrs. BURTON of California. Mr. Speaker, will the gentleman yield?

Mr. DICKS. I yield to the gentlewoman from California.

Mrs. BURTON of California. I thank the gentleman for yielding.

Mr. Speaker, I would like to commend the gentleman for his speech. I would also like to commend the gentleman from Ohio who has done a tremendous job this year.

This particular bill is very important. In San Francisco it will mean a great deal and the gentleman from Washington [Mr. DICKS] just explained what it does for the youth of the country. All races, all creeds work together in the American Conservation Corps.

I do want to commend the chairman again for doing a splendid job for everything that is good for our children and grandchildren.

Mr. DICKS. Again, I appreciate the comments of the gentlewoman from California. I know that in her great State of California we have had a very successful program. We have had a successful program in the State of Washington.

I think the American Conservation Corps offers an opportunity for youth all over this Nation. I would hope that this House would unanimously pass this important piece of legislation.

Mr. LUJAN. Mr. Speaker, I yield 5 minutes to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, I rise in support of H.R. 999.

This legislation is substantially the same bill the House passed on March 1, 1983, with rather broad bipartisan support. At that time, I urged my colleagues to support the bill because it addressed the problem of unemployed youth in a constructive manner. The bill gives special emphasis to disadvantaged youth and to those who live in areas of high unemployment. Programs created under this bill will be labor intensive and will yield positive results toward eliminating the backlog of needed conservation work that we have in this country.

As has been pointed out by others, it is cost effective. For each dollar spent, the Government will get back more than a dollar's worth of value.

I am particularly pleased that the bill recognizes the importance of creating links between education and training, especially for disadvantaged youth. This is a change over the old program. This type of program must have a longer termed effect on its participants beyond their employment in the program.

By reserving a small portion of the funds, the bill encourages program enrollees to participate in educational programs that will upgrade their literacy skills, obtain high school diplomas or enhance their employability skills. Without this critical link to education and training programs I would be skeptical of the program's potential.

Despite the long delay that we in the House have experienced in waiting for the Senate to act on this proposal, I welcome this opportunity to reaffirm my support for the program. I am disappointed that the Senate did not choose to accept more reasonable authorizations for appropriations.

This is important to remember, that the authorization levels in this bill for all 3 years of program operation are less than any 1 year's authorized appropriation level except for the start-up year under the original House bill.

I would point out that the information given out by the administration is incorrect in this regard where they indicate one of the reasons for opposition that there will be a $225 million annual cost. This is incorrect.

The total cost over the 3 years, if total appropriations met authorizations, would be $225 million. Thus, again, I have a difficult time in understanding why the administration should still be against this bill.

Quite frankly establishment of any program of this import at this late date in the session represents an accomplishment for our Nation's youth.

I urge adoption of the bill.

Mr. LUJAN. Mr. Speaker, I yield 3 minutes to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. Mr. Speaker, I urge my colleagues to join me today in once again giving House approval to a laudable bill, the American Conservation Corps Act of 1983 (H.R. 999) as amended by the other body.

A fiscally prudent bill, H.R. 999 would establish a double barreled conservation and youth employment and training program. During fiscal years 1985–87, a minimal $225 million would be used to put approximately 83,300 young people—ages 15–25—to work at minimum wage. While learning vital job skills, these workers will perform essential conservation tasks on Federal, State, local, and Indian tribal lands. Maintenance of roads and trails, emergency rehabilitation services, urban revitalization—these are just some of the Jobs Corps members will do to supplement existing, yet woefully inadequate, Federal, State, and local programs.

The bill before us now is a stripped down version of the measure which passed this House in March 1983, by an overwhelming 301–87 vote margin. Planned funding has been drastically reduced from the initial $300 million per year level contemplated in the House's original bill. That spending level could have provided desperately needed employment to 113,000 enrollees annually. Allocations, however, remain at 35 percent for States; 25 percent each to the Department of Agriculture and the Department of Interior; 10 percent to other Federal agencies—for example, the Tennessee Valley Authority—and 5 percent to Indian tribes. To obtain funds, States must pledge to pay 15 percent of State project costs and to pass on 10 percent of their funds to local governments.

An impressive coalition of national organizations, ranging from the U.S. Conference of Mayors to the National Wildlife Federation to the YMCA of the USA, supports enactment of this legislation. A proven concept, 27 programs in 17 States now expend $98 million annually in similar youth labor. Canada, recognizing the lasting human and environmental value of such a program, already spends $100 million per year on similar endeavors. Invest in America's youth. Give them a chance to work, earn and learn. I urge my colleagues to again give this worthy program a strong bipartisan endorsement.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for the work he has put into this bill and for the support that he has given it. I think that it exemplifies the kind of bipartisan support it has had throughout. The same kind of support was given by the gentleman from New Mexico [Mr. LUJAN], the gentleman from Massachusetts, [Mr. CONTE], the gentleman from Vermont [Mr. JEFFORDS] and many others on that side of the aisle as well as this side.

I think that the spirit of this legislation has really caught on across the board. I want to thank all these many

Members for their tremendous support.

Mr. BEREUTER. I thank the gentleman for his compliments. The gentleman's leadership has been outstanding and I also appreciate very much the support of the gentleman from New Mexico for this laudable legislation.

Mr. LUJAN. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I hate to throw cold water on this love feast, but I think we ought to understand just exactly what it is we are about to do here.

We tried to do this the other evening by unanimous consent and this gentleman decided that we ought to at least have a vote on this bill. I decided we ought to have a vote for a number of reasons. Not because I do not believe that it will pass, I think it will. It is new money. It is a new idea or another idea with the very best of intentions, I have no doubt about that, and we will probably pass the bill based upon its intentions.

However, this is brand new funding. It is new funding to the tune of $225 million over 3 years; $225 million of money that is not now authorized, is not now in the budget, is not now being spent. Any time we hear all these folks out here talking about deficits, this is where they come from.

They come out here bipartisanly. It is very obvious that we have bipartisan support for this bill. OK. The deficits in this sense are bipartisan and that is exactly what we are going to get.

I think we ought to look at this particular bill. The work that is going to be performed under this bill fails to provide adequate skills that can be used for other jobs. So it is not really a training program. The jobs would not be sufficiently targeted toward needy youth. There is no assurance in this program that you are going to really get to needy youth under the program. As a matter of fact, under this program you could get nonneedy young people employed as well as those who are needy.

□ 1500

The program certainly duplicates others that are already serving disadvantaged youth. In other words, what we are doing is piling a new program on top of others that already exist doing similar kinds of things. And there is some question of whether or not that demands $225 million.

But here is the real problem with it: If you break the funding down on this thing, you find out that we are not getting very much of a bargain. Here is the bargain that we are proposing on the floor today: This bill, in its first year of operation under $50 million, will give you one job in every municipality in the country. We are going to spend $50 million here today, authorize it, to give you one job in every municipality in the country.

Now, that is not a very big bargain. I would submit that even when you get up to the $100 million in authorization, you are going to end up with something in the order of three jobs in every municipality in the country, three jobs in every municipality, and we are going to be spending at a rate of $100 million a year to do it.

I would suggest that is not a bargain, that is not cost effective. As a matter of fact, the argument that this program really does not cost anything is the kind of argument we hear all the time.

I have never heard of so many bills that we have had on the floor this year that do not cost anything, that we get more back than we actually spend for them.

Well, the problem is that we are still spending the money, and in spending the money we are ending up with these huge deficits.

Anybody who votes for this bill, I know, will vote for it because they have the very best of intentions in mind, but they also ought to know that they are spending money on a program that will create one job in every municipality at fantastic costs.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for his statement. I think it is about time we told people what this bill really does. We are restoring a program that we had zeroed out previously. And it was never missed.

The tiny amount of good this bill does in the very selective picking of a few young people to do the work. The work is obviously useful and good work, but it could be handled in other ways more cheaply for the taxpayer.

The bill certainly does not do the great social good of employing every kid in America who wants to go out and breathe fresh air. It is a highly selective program and one that simply is going to cost the taxpayers money, for which they will get no return.

I think the gentleman is very brave to have made his statement.

Mr. WALKER. I thank the gentleman, and I would point out to the gentleman that one of the other ways that we could carry out the needed work of employing young people of this country would be to move to a youth opportunity wage that would assure that we would create hundreds of jobs in every municipality in the country. But, of course, we never get those bills out on the floor, because that is not in the liberal welfare state tradition.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I will be glad to yield to the gentleman from Washington.

Mr. DICKS. I appreciate the concern of the gentleman from Washington about overall spending. I serve on the Interior subcommittee that has jurisdiction over the existing program. I can tell the gentleman that if this work is not done by young people, it will be deterred and will cost more later.

This is actually a savings for the taxpayer because these trails are going to be fixed, they are going to have to plant those trees, it is better to do this work now.

I know that the gentleman is always concerned about saving money. I can guarantee him that with this program we are not only going to save money, but also, at the same time, we are going to aid a lot of young people and put them back to work in jobs that they desperately need.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. LUJAN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

I appreciate the point the gentleman makes, but I guess I would feel a little more sanguine about what the gentleman is proposing here if, in fact, what we were doing was actually putting the money in the National Park Service or some of these places for them to employ some young people in the summertime. This is an attempt to create another new bureaucratic mechanism for all of the best of intentions. And that is the problem with it.

It seems to me that the gentleman from Minnesota is absolutely correct, that what we have is a situation here that it is a highly selective kind of program. I have some real concerns about it.

As I say, the real concern is that the American people are being asked to spend $50 million to create one job in every municipality.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Washington.

Mr. DICKS. I understand there will be 18,000 jobs created across the country in the first year.

Mr. WALKER. That is right.

Mr. DICKS. Now, that is a lot of jobs when you look at the cost.

Mr. WALKER. And there are 18,000 municipalities. That is where that figure comes from.

Mr. DICKS. The gentleman, I think, would like to correct his own record; 25 percent of this money would go to the Agriculture Department for the Forest Service, 25 percent will go to the Interior Department, and 35 percent will go to the States for their parks and recreation areas, as well.

Mr. WALKER. And all we would have to do is provide the money and tell them to have a summer program and we would not have to go through the creation of this whole new program with a whole separate funding stream in order to accomplish that goal. That is what this gentleman is arguing about. We are creating a bureaucracy in order to help youth. What we will end up with is more bureaucracy and a lot less jobs for youth.

Mr. SEIBERLING. Mr. Speaker, I yield myself 3 minutes.

Of course, this does not create a single job in every municipality in the country. That is absurd. The money would be divided among the Department of Agriculture for the Forest Service, the Department of the Interior and the States, and with some left over for other Federal agencies and Indian tribes.

I am old enough to remember the Civilian Conservation Corps of the 1930's, and I think probably every Member in this House—even the gentleman from Pennsylvania—has probably gotten letters from people saying, "Why can't we have a new Civilian Conservation Corps and put all of these young people to work?"

The amount that we are spending to fight crime in our inner cities alone—and I might say that crime has also become prevalent in a lot of our rural areas—is far and away in excess of the amount that this program would cost, and this program is an anti-crime program as well as a conservation program.

We had testimony from people who were in the Civilian Conservation Corps, many of them today successful businessmen, who told us that, if it had not been for the CCC, they knew that they were headed for the penitentiary. They testified that the CCC gave them the opportunity to work on the land, to learn a work ethic and to learn to get along with other people, and that that made the difference that turned them from drifting into a life of crime to building a life of constructive contributions to our society.

So, all I can say is that the debate that we have just heard reminds me of the famous remark by Oscar Wilde that some people know the cost of everything and the value of nothing. How much value do you put on saving human lives? Forty-two percent of our minority youth in this country are unemployed; 1,400,000 of all our youth are unemployed. The most recent jump in employment in this country, according to the latest statistics, did not reduce the black youth unemployment one iota. It is still nearly 42 percent.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. WALKER. How does the gentleman feel about the youth opportunity wage? Is the gentleman willing to put some premium on the value of human labor and have a youth opportunity wage that would assuredly employ hundreds of thousands of people, not tens of thousands?

Mr. SEIBERLING. I am not willing to support a program like that which puts adults out of work in order to employ youth.

Mr. WALKER. Well, there is no evidence of that, I would say to the gentleman.

Mr. SEIBERLING. I will not yield further to the gentleman.

Mr. CRAIG. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to my colleague, the gentleman from Idaho.

Mr. CRAIG. Mr. Speaker, in all honesty, I have been struggling with the decision of whether I would vote for or against this legislation. One of the things that has lured me toward it is the concept of trying to recreate the Civilian Conservation Corps concept. I can appreciate the comparison, but I have to dispute the reality.

The reality is we are not creating a new CCC because we cannot under today's laws provide the kind of training and learning experience——

The SPEAKER pro tempore. The time of the gentleman from Ohio [Mr. SEIBERLING] has expired.

Mr. SEIBERLING. Mr. Speaker, I yield myself 1 additional minute, and I yield further to the gentleman from Idaho.

Mr. CRAIG. I appreciate the gentleman yielding.

I think my chairman will agree with me that under today's laws we cannot create the kind of environment under which the old CCC program was operated. We know that it was operated in quasi military format. There was an extensive disciplinary program, there were actual skills taught. Those young men who went into that program were afforded discipline and opportunity and skill that cannot be provided in these programs simply because we know today the courts will not allow us to enforce the disciplinary environment that existed in the old Civilian Conservation Corps.

Now, that is the reality of what we are doing, and I do not believe, although my chairman wishes to accomplish a similar kind of situation, that you can effectively make the comparison between what we are attempting in this legislation today and what existed in the past. The courts will simply not allow it.

Mr. SEIBERLING. Well, I simply say to the gentleman that if you will read the bill you will find that participants who do not comply with the rules of the program can be dismissed. There will be plenty of discipline.

Mr. Speaker, I reserve the balance of my time.

Mr. LUJAN. Mr. Speaker, I have one additional speaker. I yield one minute to the gentleman from Minnesota [Mr. FRENZEL].

□ 1510

Mr. FRENZEL. Mr. Speaker, we have been led to believe by a number of members discussing this program that this is going to take all the young people out of the ghettos of the cities and have them improve all of our national parks.

Obviously, it is not going to do that. It is going to be restricted to 18,000 very selectively chosen youth to do work which might well be done by others more effectively.

The administration indicates that the jobs will not be sufficiently targeted to the most needy, and will not provide adequate skills that can be used in other jobs. That is a persuasive argument against it.

This bill sounds wonderful. It sounds like it is the old CCC brought back to life again. But a cursory inspection reveals it is not. Instead, the American Conservation Corps is a program that we can well do without, that will probably never be funded, and that will perceptibly deficit if ever funded.

Mr. LUJAN. Mr. Speaker, I yield myself 30 seconds to say that it is a wonderful program. Admittedly it is not a social program designed to cure all the ills of youth unemployment. But it is a good conservation program.

These kids will go on out there and do all the work that is necessary that has to be done anyway. We are going to pay for it one way or the other. It is a wonderful program; it is a wonderful way to carry on the business of this country.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. SEIBERLING. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, I would simply invite the attention of the gentleman from Minnesota to the provisions of the bill, and there are several of them that are to the same effect, but I will just read one. It says:

> The Secretary of the Interior and the Secretary of Agriculture shall make special efforts to recruit enrollees who are socially, physically, and educationally disadvantaged youths.

All I can say is that, of course, this does not help as many youths as we would like, because the Senate has radically reduced the funding. But it is a kind of bootstraps, "Catch-22" argument to say that because they reduced the funding, the program does not help enough people. Of course, it will help 18,000 the first year, and it will go up to a total of over 100,000 in the 3 years. It certainly helps, and, if it

works as I believe it will, it gives us a basis for expanding the program some day.

The total cost of this program is less than the cost overrun on one defense contract, a minor fraction of the excess profits of Lockheed Corp. on the C–5 modernization contract. And it will help far more young people and do something of lasting benefit for thousands more.

Mr. Speaker, I yield back the balance of my time.

● Mr. ERLENBORN. Mr. Speaker, I rise in opposition to the bill before us, H.R. 999, the American Conservation Corps Act. As in past discussions of this bill, I do not oppose it on the basis of its intent, but rather whether it should be a funding priority of this Congress. With this bill, we would reauthorize two programs that have essentially been terminated over the past few years. Should we in a time of scarce resources start up a warmed-over version of programs that we already have determined to be of low priority?

We hurriedly considered this bill early in 1983 with the promise that the other body would take immediate action. We are now in the closing days of this Congress. Clearly, the other body did not view this program as much of a priority, to only now be returning it to us. Additionally, in our haste, the Committee on Education and Labor did not hold a single hearing during this Congress on the issue. We are relying on testimony received over 3 years ago as documentation of support for this program. Further, then as now, the administration's support for this program is questionable.

Although past concerns regarding the adminstration and implementation of this program have been touched upon by this bill, I do not believe that they have been resolved satisfactorily. First, the program continues to be established within two separate administrative departments of the Federal Government. Second, when the record of cost and targeting of the previous Conservation Corps programs are compared with other youth employment and training programs, even greater doubt is raised regarding reasons to support this program. With high levels of youth unemployment, support should be focussed on youth programs that combine employment experiences with related education or training components as under the Job Training Partnership Act. In that manner the social gains for the participants are not just the short-term employment provided, but the long-term benefits of additional education and employability skills. Third, although the targeting provisions have been strengthened in this bill, scarce resources should be directed to those most in need—the disadvantaged, unemployed youth.

I do not believe that a vote against this bill, H.R. 999, indicates a lack of concern for the issue of youth unemployment. Instead such a vote calls a halt to duplicative programs and reduces the drain on scarce Federal dollars. It also gives consideration to the fact that if additional dollars were available for youth training programs, those dollars should be directed toward already existing programs to meet the training needs of our disadvantaged youth. I urge my colleagues to vote against this bill.●

● Mr. HAWKINS. Mr. Speaker, I support the motion by Mr. SEIBERLING that the House concur in the Senate-passed substitute amendment to the House-passed text of H.R. 999, the American Conservation Corps Act.

Last year, the Committee on Education and Labor joined the Committee on Interior and Insular Affairs in favorably reporting H.R. 999 to the House, and the bill was passed by suspension on March 1, 1983, by a vote of 301 to 87. Now 1½ years later, after painstaking efforts by a bipartisan group of Senators to reconcile differences in viewpoints on details of the legislation, the Senate has amended the House-passed version in terms reasonably close to the original House-passed bill.

The final version of the legislation before us makes clear that special efforts must be made to recruit and enroll unemployed individuals aged 16 to 25 who are economically disadvantaged or who are socially, physically, or educationally disadvantaged. These requirements are similar to the provisions in the original House-passed legislation.

The problems of unemployment remain severe for our young people 16 to 25 years of age. The American Conservation Corps will at least put some of them to constructive work on a year-round basis in activities conserving and improving our national resources. Compared to the enormous number of unemployed youths, the Senate-passed substitute is extremely modest in terms of its authorized funding levels of $50 million for fiscal year 1985, $75 million for fiscal year 1986, and $100 million for fiscal year 1987.

Last month's official unemployment rate for teenagers 16 to 19 years old which was announced by the Bureau of Labor Statistics last Friday was 19.3 percent—a rise of nine-tenths of 1 percentage point over the previous month. Millions of youths are in dire need of work.

I had hopes that the legislation presented to us would have authorized more satisfactory funding levels. Nevertheless, it is clear that there will be no further opportunity in this Congress to enact legislation to provide greater work opportunities for unemployed youths. I, therefore, urge the House to concur in the Senate-passed amendment to H.R. 999.●

● Mrs. BURTON of California. Mr. Speaker, passage of the American Conservation Corps Act of 1984 could bring youth employment and training funds to San Francisco over the next 3 years. H.R. 999 provides a total of $225 million in funding through 1987 for this program and, under the formula of this legislation, San Francisco would be eligible for a portion of the State's allocation to municipalities.

We in California and San Francisco are especially aware of the value of the Conservation Corps concept. In fact, San Francisco was the first city in the country to create a municipal conservation corps. This effort was due largely to the concerned activists in our community who saw wasted human potential among our youth and who sought to channel these neglected energies into meaningful projects. While this is but a start, and in no way nears the massive effort of the Civilian Conservation Corps of the 1930's, I think the Congress has made a significant beginning to revive one of the Nation's most successful job training programs.

San Francisco provides an ideal situation for implementation of the American Conservation Corps. The opportunities are abundant with facilities such as the Golden Gate National Recreation Area [GGNRA] and other nearby public lands and resources areas where young people can get job training and assist in the improvement of those areas. Both the State version of the CCC and the city's own conservation corps have been quite successful and have provided an avenue of hope for thousands of our young people.

With unemployment remaining at a staggeringly high level for our youth, I believe the American Conservation Corps, even at the modest level approved by the House and Senate, opens the door for many. This is an important Federal boost for our city and for many other urban areas across the Nation to involve inner-city youth who want to do something constructive. This is the kind of investment where the returns are high in allowing the unemployed to develop skills for the future and in preserving and enhancing our parks and recreation areas. I am very pleased to be associated with this important effort for San Francisco and the many other urban beneficiaries throughout our country.●

● Mr. CONTE. Mr. Speaker, I rise in strong support of this legislation to establish an American Conservation Corps.

Mr. Speaker, let me take this opportunity to commend the able work of Representative SEIBERLING. As an original sponsor of H.R. 999, I've worked with the gentleman from Ohio

for over 3 years on this bill, and his leadership in guiding this legislation through his committee and in prying the distinguished other body is commendable.

Mr. Speaker, this bill has a long and successful history in the House of Representatives but a slow and dismal life in the other body.

In the 97th Congress, the House passed the bill by a wide margin but it died in the Senate. In March 1983, the House approved H.R. 999 by an overwhelming margin—301 to 87. Since that time this important conservation and youth employment program has been stalled by a few in the other body.

The legislation now before the House is well balanced and very conservatively funded, maybe even underfunded. The Senate amendments provide $50 million in fiscal year 1986, $75 million the year after and $100 million in fiscal year 1987. This authorization would serve some 18,500 youth in the first year, and 37,000 in the third year. The House authorized funding level would serve as estimated 113,000 young people annually.

Fiscally minded members—as we all are—should also be pleased with the cost effectiveness of this type of program. Do you remember the old CCC of the Depression era of the YACC?

Programs like the ACC have a clear and demonstrated record of success. During the last Congress, administration officials testified before a House subcommittee that for each dollar spent in the YCC program, $1.04 was returned in the value of the work, averaged nationwide. In the case of the YACC, the cost/benefit ratio is even higher. The average return was $1.20 for each $1 spent. In fact, for some individual cases, the value of the work reached over $7 per dollar expended.

Besides addressing the chronic problem of high unemployment among our youth, this program is productive, worthwhile and needed. It's not a make-work program. Some projects undertaken by the ACC would include the conservation of forests and rangelands; the preservation of fish and wildlife habitat; the revitalization of urban areas; the preservation of historic and cultural sites; and so forth.

Mr. Speaker, I urge my colleagues to support this cost-effective program designed to ease youth unemployment and at the same time to address legitimate conservation needs.●

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to speak out of order.)

Mr. WRIGHT. Mr. Speaker, my purpose in seeking this time is to announce to the Members the program for the remainder of the day, and what it looks like for the continuing resolution.

After we have completed action on this bill presently pending, there is one more bill, the Head Start Act, on which we will vote. Then we go to the trade bill conference committee. After that, there are eight bills listed for consideration under suspension of the rules, and we will cluster those votes at the end of the debate on those eight bills. That is the sequence of the recorded program.

We expect the likelihood that the conferees between the two bodies on the continuing resolution may break up in disagreement over one or more items. If that should occur, since it will require some time for their report to be reduced to its proper written form for action in the House, we may seek a recess until perhaps 8 o'clock expecting to come back in at that time and vote on those propositions in disagreement.

The propositions in disagreement, assuming that is what comes to us, will give to Members of the House the opportunity to express themselves as to whether we collectively want to stand by certain positions with which the Senate may be in disagreement, or conversely, to yield from certain positions we have previously held in an effort to obtain agreement with the Senate.

So Members may expect votes of that kind later this evening. Unless the House yields to those matters that the Senate finds most necessary and the converse occurs and the Senate yields on those matters which we find most indispensable, it seems improbable, though still possible, that we might conclude this matter tonight.

It is my disposition and that of the Speaker and the leadership to try to stay in and complete our work if there is any possibility that that might be availing. If not, then we would find it necessary, before midnight tonight, to pass another short continuing resolution permitting the functions of the Government to continue while, yet again tomorrow, the conferees attempt to find that magic compromise that will be acceptable in both the House and Senate.

That is about the extent of all I can tell the Members at the moment. I would be glad to yield to my distinguished friend, the gentleman from Illinois or any other Member if they wish.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman.

Mr. LUJAN. I thank the gentleman for yielding to me.

Mr. Speaker, could the gentleman tell us basically, so that the other Members who might be listening in would know, what those areas of disagreement are likely to be that we might have to vote on?

Mr. WRIGHT. Well, only in somewhat broad and general terms. To do a more specific thing would be to anticipate the actions of the conferees. I think the gentleman from New Mexico is aware, as are other Members, that several matters are in disagreement with the conference at this time, unless agreement can be found.

One of those is the question of Nicaragua; whether to continue funding a covert war in that country. Another is the question of the so-called Star Wars concept, what we do about that. Yet, another has to do with water projects, some of which were authorized in the terms of this bill on the House side. Those are three of the matters that, so far as I am able to determine, have not yet been resolved among the conferees.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the distinguished minority leader.

Mr. MICHEL. I thank the gentleman for yielding.

The gentleman mentioned the possibility of a recess until 8 o'clock or rather going forward with the program and then maybe a recess until 8. That, I gather, is not firmly established? I would gather from what the gentleman has said that conceivably, if we find that there is no legislative matters for us to consider until say 9 or 10, surely that recess would run until we were able to come back here to do something substantive on the continuing resolution. Is that not correct?

Mr. WRIGHT. I am glad the gentleman made that clear. That is the thought I intended to convey, and it would be foolhardy to establish a specific time now and then discover later that time would be utterly unavailing and needless to have us back at a given hour, and just be stuck with a commitment that we were going to do it at that time.

We will try to make a judgment later on, after we have completed our action on the program scheduled as to just when it would be productive for us to come back and then recess until that time.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman.

Mr. WALKER. I thank the gentleman for yielding.

Is there any chance that instead of going into recess that the leadership might consider putting additional legislation on the calendar that should be acted on before we leave Congress this year?

Mr. WRIGHT. There is that chance, but I think it is unlikely because these are things that take a second place always to the continuing resolution, while we try to be as productive as

possible. We have important legislation: The American Conservation Corps Act, which we are debating now, and the Head Start Act, which comes up next, are not matters of insignificance by any means.

I think all of us agree basically, that the one overriding consideration of the moment is to pass a continuing resolution in order that both House and Senate may adjourn sine die and Members may return to their districts.

□ 1520

Mr. WALKER. If the gentleman would yield, the only thing that I was suggesting was that instead of going into recess, would not it be more useful to utilize that time on legislation that at least some of us believe that the American people are very interested in seeing us vote on.

Mr. WRIGHT. Well, I guess if we have to have a survey of 435 Members, we would discover 435 separate ideas of what is the most important thing second to the continuing resolution.

That is what the leadership is for. We are trying to make those judgments based upon what is relatively of greatest significance to the country and has the greatest relative prospect of actually passing and becoming law. And so that is what we will try to do.

If we can be productive, of course we want to be.

The SPEAKER pro tempore. All debate has ended.

Pursuant to the provisions of House Resolution 608, the previous question is considered as ordered on the motion.

The question is on the motion offered by the gentleman from Ohio [Mr. SEIBERLING].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SEIBERLING. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 296, nays 75, not voting 61, as follows:

□ 1530

Mr. JONES of Oklahoma changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 999, the bill just considered.

The SPEAKER pro tempore [Mr. HARRISON]. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PROVIDING FOR CONVEYANCE OF PUBLIC LANDS IN SENECA COUNTY, OH

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the bill (H.R. 5716) providing for the conveyance of public lands, Seneca County, OH, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so only to ask the gentleman from Ohio [Mr. SEIBERLING] to explain the subject matter in-

volved in this bill, and I yield to the gentleman for his explanation.

Mr. SEIBERLING. Mr. Speaker, H.R. 5716 would authorize the Secretary of the Interior to convey specified public lands in Seneca County, OH, to citizens of the United States claiming title in good faith thereto.

The lands in question were part of the lands which the treaty of September 29, 1817, reserved for the Seneca Indians.

Under a subsequent treaty (February 28, 1831), the Seneca Indians ceded the lands covered by the bill to the United States with the provision that the lands be sold and the proceeds be given to the Indians.

However, according to the Department of the Interior, the lands covered by the bill were never sold by the United States and therefore remain in Federal ownership.

In 1839, according to the Department of the Interior, the State of Ohio sold the lands covered by the bill, evidently upon the (erroneous) belief that title had passed to the State from the United States.

The 15 parties who would be the beneficiaries of H.R. 5716 hold titles based on the State's 1839 conveyances. The bill provides relief of the type that would be granted under the Color-of-Title Act, but the beneficiaries of the bill would not have to meet certain requirements of that act. The basis for conveyance would be fair market value, reduced by a credit for equities including (but not limited to) the amount the applicant paid for the land; the length of time of chain of title; the longevity of the applicant's claim; and the payment of taxes on the land.

All mineral rights to the lands covered by the bill would be reserved to the United States.

Mr. Speaker, I urge the passage of H.R. 5716.

Mr. LUJAN. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Ohio [Mr. LATTA], the sponsor of this legislation.

Mr. LATTA. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I listened intently to the statement just made by the gentleman from Ohio [Mr. SEIBERLING], and I agree with it completely.

Mr. Speaker, the purpose of H.R. 5716, the bill which is before you today, is to assist some of my constituents, who own land situated in section 16, Adams Township, Seneca County, OH. The Government has laid claim to and had planned to sell this land.

In 1839, the State of Ohio erroneously believed title to section 16 had passed to it and sold this land without color of title.

H.R. 5716, which I have introduced, would provide clear title for those presently owning property in section 16. The report from the U.S. Department of the Interior gives a history of the treaties involved with this land and indicates the Department's support of the legislation.

The controversy stems from a mistake made by the Ohio Legislature in 1839 when it erroneously sold section 16 of Adams Township in the county to raise money for schools. The State sold the 640-acre section without clear title because of a Federal treaty with the Seneca Indians. There has been a cloud on the title ever since even though the Government made a final settlement with the Indians in 1958. The 15 parties who would be benefited by H.R. 5716 hold title based on these conveyances by the State.

My bill provides the type of relief that would be granted the qualified applicants under the Color-of-Title Act, but eliminates certain provisions of the act that should not apply under the facts of this case. While the Color-of-Title Act has been used to convey title to one claimant in section 16 and could possibly be used by other claimants in the area, this legislation provides a clear, equitable remedy for every claimant in the section. The basis for conveyance under this bill would be fair market value of the land reduced by a credit for the same types of equities, in the same manner as the fair market values of the land would be reduced by a credit for equities in a claim under the Color-of-Title Act. Moreover, section 3 of H.R. 5716, which deals with surveys, presents a solution to a problem caused by local subdividing and is an acceptable procedure, supported by the U.S. Department of the Interior.

Additionally, enactment of H.R. 5716 provides an equitable and efficient method of disposing of the last public domain holding in the State of Ohio, which amounts to 400 acres. Without this legislation, the only alternative left to the Bureau of Land Management would be to initiate costly trespass procedures. Given the long history of these occupancies, this is not appropriate and would render an injustice on the present holders of title. These people have already been penalized by not having clear title to land which they bought in good faith. The Department of the Interior believes this would be the equitable way to solve their title problems.

I urge favorable consideration of H.R. 5716.

Mr. LUJAN. Further reserving the right to object, Mr. Speaker, let me say that I think this legislation is totally appropriate. It is supported by the Department of the Interior as the most efficient way of handling this matter.

With that, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore Is there objection to the request of the gentleman from Ohio [Mr. SEIBERLING]?

There was no objection.

The Clerk read the bill, as follows:

H.R. 5716

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of any other law, the Secretary of the Interior, subject to the terms and conditions set forth in sections 1-5 of this Act, may convey public lands in section 16, township 3 north, range 16 east, first principal meridian, Seneca County, Ohio, to citizens of the Untied States that claim title in good faith and in peaceful, adverse possession.

SECTION 1. The Secretary shall determine that such conveyance is in the public interest and will serve objectives which outweigh all public objectives and values which would be served by retaining such lands in Federal ownership and shall also determine that no other statutory authority exists whereby the Secretary may afford the appropriate relief.

SEC. 2. The Secretary may sell public land on a direct basis to a purported current title holder of record as evidenced by documents duly recorded in local government or State government offices. The Secretary shall appraise the land applied for on the basis of its fair market value at the time of appraisal. From this amount, the Secretary shall deduct the value of improvements or development by the applicant or his predecessors in interest in determining the price payable by the applicant. The Secretary may further discount the price payable based upon the equities of the applicant. Such equities may include but are not limited to:

(a) the amount the applicant paid for the land,

(b) length of time of chain of title,

(c) longevity of the applicant's claim, and

(d) payment of taxes on the land.

SEC. 3. Lands conveyed under this Act shall be described in accordance with the rectangular system of survey as reflected on the Federal plat of survey. In the event that an individual tract does not conform to said survey, the Secretary is authorized to convey to a trustee acting on behalf of more than one claimant for purposes of conforming the legal description to said plat.

SEC. 4. In any conveyance made pursuant to this Act, the Secretary shall reserve to the United States all mineral deposits found at any time in the land and the right to prospect for, mine, and remove the same.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

HUMAN SERVICES REAUTHORIZATION ACT

Mr. HAWKINS. Mr. Speaker, pursuant to the provisions of House Resolu-

tion 607, I move to take from the Speaker's table the Senate bill (S. 2565) to extend programs under the Head Start Act, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The text of the Senate bill is as follows:

S. 2565

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Human Services Reauthorization Act".

TITLE I—HEAD START

TECHNICAL AMENDMENT

SEC. 101. Section 637 (2) of the Head Start Act is amended by inserting "the Commonwealth of" before "the Northern Mariana Islands".

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. Section 639 of the Head Start Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 639. There are authorized to be appropriated for carrying out the provisions of this subchapter $1,003,030,000 for fiscal year 1985, and $1,221,000,000 for fiscal year 1986,".

RESERVATION OF FUNDS FOR TRAINING AND TECHNICAL ASSISTANCE

SEC. 103. (a) Section 640 (a) (2) (C) of the Head Start Act is amended by inserting before the semicolon the following: "as described in section 648 of this subchapter, in an amount for each fiscal year which is not less than the amount expended for training and technical assistance activities under this clause for fiscal year 1982".

(b) Section 640(a)(2) of the Head Start Act is amended by adding at the end thereof the following new flush sentences: "The minimum reservation contained in clause (C) of this paragraph shall not apply in any fiscal year in which the appropriation for the program authorized by this subchapter is less than the amount appropriated for fiscal year 1984. No funds reserved under this paragraph may be combined with funds appropriated under any other Act if the purpose of combining funds is to make a single discretionary grant or a single discretionary payment, unless such funds appropriated under this subchapter are separately identified in such grant or payment and are used for the purposes of this subchapter.".

DESIGNATION OF HEAD START AGENCIES

SEC. 104. (a) Section 641(a) of the Head Start Act is amended by inserting after "agency" the second time it appears ", within a community,".

(b) Section 641(c) of the Head Start Act is amended—

(1) by striking out ", except that" in the matter preceding clause (1) and inserting in lieu thereof "unless";

(2) by striking out "shall, before giving such priority, determine" in clause (1) and inserting in lieu thereof "makes a finding";

(3) by striking out "meets" in clause (1) and inserting in lieu thereof "fails to meet"; and

(4) by inserting "except that" before "if" in clause (2).

(c) Section 641 of the Head Start Act is amended by redesignating subsection (d) as subsection (f) and by inserting after subsection (c) the following new subsections:

"(d) If there is no Head Start agency as described in subsection (c)(2), and no existing Head Start program serving a community, then the Secretary may designate a Head Start agency from among qualified applicants in such community. Any such designation shall be governed by the program and fiscal requirements, criteria, and standards applicable on September 1, 1983, to then existing Head Start agencies.

"(e) The provisions of subsections (c) and (d) shall be applied by the Secretary in the distribution of any additional appropriations made available under this subchapter during any fiscal year as well as to initial designations of Head Start agencies.".

PARTICIPATION OF HEAD START PROGRAMS

SEC. 105. (a) Section 645(a) of the Head Start Act is amended by adding at the end thereof the following: "During the period beginning on the date of the enactment of the Human Services Reauthorization Act and ending on October 1, 1986, and unless specifically authorized in any statute of the United States enacted after such date of enactment, the Secretary may not make any change in the method, as in effect on April 25, 1984, of calculating income used to prescribe eligibility for the participation of persons in the Head Start programs assisted under this subchapter if such change would result in any reduction in, or exclusion from, participation of persons in any of such programs.".

(b) Section 645 of the Head Start Act is amended by adding at the end thereof the following new subsection:

"(c) Each Head Start program operated in a community may provide more than one year of Head Start services to children from age 3 to the age of compulsory school attendance in the State in which the Head Start program is located.".

TECHNICAL ASSISTANCE AND TRAINING

SEC. 106. Section 648 of the Head Start Act is amended—

(1) by striking out "may" and inserting in lieu thereof "shall"; and

(2) by inserting before the period at the end thereof a comma and the following: "including a centralized child development training and national assessment program which may be administered at the State or local level leading to recognized credentials for such personnel, and resource access projects for personnel of handicapped children".

RESEARCH, DEMONSTRATION, AND PILOT PROJECTS

SEC. 107. Section 649 of the Head Start Act is amended by adding at the end thereof the following new subsection:

"(c) No funds appropriated under this subchapter may be combined with funds appropriated under any other Act if the purpose of combining funds is to make a single discretionary grant or a single discretionary payment, unless such funds appropriated under this subchapter are separately identified in such grant or payment and are used for the purposes of this title.".

EVALUATION

SEC. 108. The second sentence of section 651(b) of the Head Start Act is amended to read as follows: "Any revisions in such standards shall not result in the elimination of nor any reduction in the score or types of health, education, parental involvement, social or other services required to be provided under the standards in effect on November 2, 1978.".

STATE GRANTS FOR DEPENDENT CARE PLANNING AND DEVELOPMENT

SEC. 109. Chapter 8 of title VI of the Omnibus Budget Reconciliation Act of 1981, relating to community services programs, is amended by inserting at the end thereof the following new subchapter:

"Subchapter D—Grants to States for Planning and Development of Dependent Care Programs and for Other Purposes

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 670A. For the purpose of allotments to States to carry out the activities described in section 670D, there are authorized to be appropriated $20,000,000 for each of the fiscal years 1985 and 1986.

"ALLOTMENTS

"SEC. 670B. (a) From the amounts appropriated under section 670A for each fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to the total amount appropriated under such section for such fiscal year as the population of the State bears to the population of all States, except that no State may receive less than $50,000 in each fiscal year.

(b) For the purpose of the exception contained in subsection (a), the term "State" does not include Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

"PAYMENTS UNDER ALLOTMENTS TO STATES

"SEC. 670C. The Secretary shall make payments, as provided by section 6503(a) of title 31, United States Code, to each State from its allotments under section 670B from amounts appropriated under section 670A.

"USE OF ALLOTMENTS

"SEC. 670D. (a) Subject to the provisions of subsections (c) and (d), amounts paid to a State under section 670C from its allotment under section 670B for fiscal year 1985 and fiscal year 1986 may be used for the planning, development, establishment, expension, or improvement by the States, directly or by grant or contract with public or private entities, of State and local resource and referral systems to provide information concerning the availability, types, costs, and locations of dependent care services. The information provided by any such system shall include—

"(1) the types of dependent care services available, including services provided by individual homes, religious organizations, community origanizations, employers, private industry, and public and private institutions;

"(2) the costs of available dependent care services;

"(3) the locations in which dependent care services are provided;

"(4) the forms of transportation available to such locations;

"(5) the hours during which such dependent care services are available;

"(6) the dependents eligible to enroll for such dependent care services; and

"(7) any resource and referred system planned, developed, established, expanded, or improved with amounts paid to a State under this subchapter.

In carrying our clause (7) of the previous sentence, no information shall be included with respect to any dependent care services which are not provided in compliance with the laws of the State and localities in which such services are provided.

"(b)(1) Subject to the provisions of subsections (c) and (d), amounts paid to a State

under section 670C from its allotment under section 670B for fiscal year 1985 and fiscal year 1986 may be used for the planning, development, establishment, expansion, or improvement by the States, directly, or by grant or contract, with public agencies or private nonprofit organizations of programs to furnish school-age child care services before and after school in public or private school facilities or in community centers in communities where facilities are not available.

"(2) The State, with respect to the uses of funds described in paragraph (1) of this subsections shall—

"(A) provide assurances, in the case of an applicant that is not a State local educational agency, that the applicant has or will enter into an agreement with the State or local educational agency, institution of higher education or community center containing provisions for—

"(i) the use of facilities for the provision of before or after school child care services (including such use during holidays and vacation periods),

"(ii) the restrictions, if any, on the use of such space, and

"(iii) the times when the space will be available for the use of the applicant;

"(B) provide an estimate of the costs of the establishment of the child care service program in the facilities;

"(C) provide assurances that the parents of school-age children will be involved in the development and implementation of the program for which assistance is sought under this Act;

"(D) provide assurances that the applicant is able and willing to seek to enroll racially, ethnically, and economically diverse as well as handicapped school-age children in the child care service program for which assistance in sought under this Act;

"(E) provide assurances that the child care program is in compliance with State and local licensing laws and regulations governing day care services for school-age children to the extent that such regulations are appropriate to the age group served; and

"(F) provide such other assurances as the Governor may reasonably require to carry out the provisions of this Act.

"(C) Of the allotment to each State in each fiscal year—

"(1) 40 percent shall be available for the activities described in subsection (a);

"(2) 60 percent shall be available for the activities described in subsection (b).

"(d) A State may not use amounts paid to it under this subchapter to—

"(1) pay the costs of operation of any resource and referral system or before or after school child care program established, expanded, or improved under subsection (a);

"(2) make cash payments to intended recipients of dependent care services including child care services;

"(3) subsidize the direct provision of dependent care services including child care services;

"(4) pay for construction or renovation; or

"(5) satisfy any requirement for the expenditure of non-Federal funds as a condition for the receipt of Federal funds.

"(e)(1) The Federal share of any project supported under this subchapter shall be not more than 75 percent.

"(2) Not more than 10 percent of the allotment of each State under this subchapter may be available for the cost of administration.

"(f) Projects supported under this section to plan, develop establish, expand, or improve a State or local resource and referral system or before or after school child care program shall not duplicate any services, which prior to the date of enactment of this subchapter, are provided by the State or locality which will be served by such system.

"(g) The Secretary may provide technical assistance to States in planning and operating activities to be carried out under this subchapter.

"APPLICATION AND DESCRIPTION OF ACTIVITIES; REQUIREMENTS

"SEC. 670E. (a)(1) In order to receive an allotment under section 670B, each State shall submit an application to the Secretary. Each such application shall be in such form and submitted by such date as the Secretary shall require.

"(2) Each application required under paragraph (1) for an allotment under section 670B shall contain assurances that the State will meet the requirements of subsection (b).

"(b) As part of the annual application required by subsection (a), the chief executive officer of each State shall—

"(1) certify that the State agrees to use the funds allotted to it under section 670B in accordance with the requirements of this subchapter; and

"(2) certify that the State agrees that Federal funds made available under section 670C for any period will be so used as to supplement and increase the level of State, local, and other non-Federal funds that would in the absence of such Federal funds be made available for the programs and activities for which funds are provided under that section and will in no event supplant such State, local, and other non-Federal funds.

The Secretary may not prescribe for a State the manner of compliance with the requirements of this subsection.

"(c) The chief executive officer of a State shall, as part of the application required by subsection (a), also prepare and furnish the Secretary (in accordance with such form as the Secretary shall provide) with a description of the intended use of the payments the State will receive under section 670C, including information on the programs and activities to be supported. The description shall be made public within the State in such manner as to facilitate comment from any person (including any Federal or other public agency) during development of the description and after its transmittal. The description shall be revised (consistent with this section) until September 30, 1987, as may be necessary to reflect substantial changes in the programs and activities assisted by the State under this subchapter, and any revision shall be subject to the requirements of the preceding sentence.

"(d) Except where inconsistent with the provisions of this subchapter, the provisions of section 1903(b), paragraphs (1) through (5) of section 1906(a), and sections 1906(b), 1907, 1908, and 1909 of the Public Health Service Act shall apply to this subchapter in the same manner as such provisions apply to part A of title XIX of such Act.

"REPORT

"SEC. 670F. Within three years after the date of enactment of this subchapter, the Secretary shall prepare and transmit to the Senate Committee on Labor and Human Resources and the House Committee on Education and Labor a report concerning the activities conducted by the States with amounts provided under this subchapter.

"DEFINITIONS

"SEC. 670G. For purposes of this subchapter—

"(1) the term 'community center' means facilities operated by nonprofit community-based organizations for the provision of recreational, social, or educational services to the general public;

"(2) the term 'dependent' means—

"(A) an individual who has not attained the age of 17 years;

"(B) an individual who has attained the age of 55 years; or

"(C) a person with a developmental disability;

"(3) the term 'developmental disability' has the same meaning as in section 102(7) of the Developmental Disabilities Assistance and Bill of Rights Act;

"(4) the term 'equipment' has the same meaning given that term by section 198(a)(8) of the Elementary and Secondary Education Act of 1965;

"(5) the term 'institution of higher education' has the same meaning given that term under section 1201(a) of the Higher Education Act of 1965;

"(6) the term 'local educational agency' has the same meaning given that term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

"(7) the term 'school-age children' means children aged five through thirteen;

"(8) the term 'school facilities' means classrooms and related facilities used for the provision of education;

"(9) the term 'Secretary' means the Secretary of Health and Human Services;

"(10) the term 'State' means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands; and

"(11) the term 'State educational agency' has the meaning given that term under section 198(a)(17) of the Elementary and Secondary Education Act of 1965.".

TITLE II—COMMUNITY SERVICES BLOCK GRANT

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. Section 672(b) of the Community Services Block Grant Act (hereinafter in this title referred to as the "Act") is amended by adding at the end thereof the following new sentence: "There is authorized to be appropriated $400,000,000 for the fiscal year 1985, and $415,000,000 for the fiscal year 1986, to carry out the provisions of this subtitle.".

DEFINITIONS

SEC. 202. (a)(1) The second sentence of section 673(1) of the Act is amended to read as follows: "The term 'eligible entity' also includes any limited purpose agency designated under title II of the Economic Opportunity Act of 1964 for fiscal year 1981 which served the general purposes of a community action agency under title II of such Act, unless such designated agency lost its designation under title II of such Act as a result of a failure to comply with the provisions of such Act, any grantee which received financial assistance under section 222(a)(4) of the Economic Opportunity Act of 1964 in fiscal year 1981, and any organization to which a State which applied for and received a waiver from the Secretary under Public Law 98-139 made a grant under this Act in fiscal year 1984.".

(2) Section 673(1) of the Act is amended by adding at the end thereof the following two sentences: "In any geographic area of a State not presently served by an eligible entity, the Governor of the State may decide to serve such a new area by—

"(A) requesting an existing eligible entity which is located and provides services in an area contiguous to the new area to serve the new area;

"(B) if no existing eligible entity is located and provides services in an area contiguous to the new area, requesting the eligible entity located closest to the area to be served or an existing eligible entity serving an area within reasonable proximity of the new area to provide services in the new area; or

"(C) where no existing eligible entity requested to serve the new area decides to do so, designating any existing eligible entity, any organization which has a board meeting the requirements of section 675(c)(3) or any political subdivision of the State to serve the new area. The governor's designation of an organization which has a board meeting the requirements of section 675(c)(3) or a political subdivision of the State to serve the new area shall qualify such organization as an eligible entity under this Act.".

(b) Section 673(2) of the Act is amended by inserting at the end thereof the following new sentence: "Whenever the State determines that it serves the objectives of the block grant established by this subtitle the State may revise the poverty line to not to exceed 125 percent of the official poverty line otherwise applicable under this paragraph.".

APPLICATIONS AND REQUIREMENTS

SEC. 203. (a)(1) Section 675(c)(2)(A)(i) of the Act is amended by striking "1982 only" and inserting in lieu thereof "1985 and for each subsequent fiscal year".

Section Section 675(c)(2)(A)(i) of the Act is amended by inserting before the semicolon a coma and the following: "except that no more than 7 percent of the funds available for this subclause shall be granted to organizations which were not eligible entities during the previous fiscal year".

(3) Section 675(c)(2)(A) of the Act is amended—

(A) by striking out "(i)"; and

(B) by striking out division (ii).

(4) Section 675(c)(2)(B) of the Act is amended by inserting after "than" the following: "the greater of $55,000 or".

(5) Section 675(c)(5) of the Act is amended—

(A) by striking out "or the energy" and inserting in lieu thereof "the energy", and

(B) by inserting ", or the Temporary Emergency Food Assistance Act of 1983" before the semicolon.

(b) Section 675 of the Act is amended—

(1) by striking out "and" at the end of clause (9);

(2) by striking out the period at the end of clause (10) and inserting in lieu thereof a semicolon and the word "and"; and

(3) by adding at the end thereof the following new clause:

"(11) provide assurances that any community action agency or migrant and seasonal farmworker organization which received funding in the previous fiscal year under this Act will not have its present or future funding terminated under this Act unless after notice, and opportunity for hearing on the record, the State determines that cause existed for such termination subject to review by the Secretary as provided in section 676A.".

(c) Section 675 is amended by adding at the end thereof the following new subsection:

"(i)(1) For purposes of determining compliance with this subchapter the Secretary shall conduct, in several States in each fiscal year, evaluations of the uses made of funds received under this subchapter by such States.

"(2) The results of such evaluations shall be submitted annually to the chairman of the Committee on Education and Labor of the House of Representatives and the chairman of the Committee on Labor and Human Resources of the Senate.".

(d) The Act is amended by inserting after section 676 the following new section:

"TERMINATION OF FUNDING REVIEW

"SEC. 676A. The Secretary shall upon request review any termination of funding to a community action agency or migrant and seasonal farmworker organization protected by a State's assurance under section 675(c)(11), Such review shall be conducted promptly and shall be based upon the record and no determination shall become effective until a finding by the Secretary confirming the State's finding of cause.".

DISCRETIONARY PROGRAM

SEC. 204. (a)(1) The matter preceding clause (1) of section 681(a) of the Act is amended by striking out "public and other organizations and agencies" both times it appears and inserting in lieu thereof "public agencies and private nonprofit organizations".

(2) Section 681(a) of the Act is amended—

(A) by striking out "and" at the end of clause (1);

(B) by striking out the period at the end of clause (2) and inserting in lieu thereof a semicolon and the word "and"; and

(C) by adding at the end thereof the following new clause:

"(3) training and technical assistance to aid States in carrying out their responsibilities under this subchapter.".

(b) Section 681(a) of the Act is amended by adding at the end thereof the following new flush sentence: "In addition, grants, loans, and guarantees made pursuant to this subsection may be made to a private nonprofit organization applying jointly with a business concern.".

WITHHOLDING

SEC. 205. (a) Section 679(b) of the Act is amended—

(1) in paragraph (2) by striking out "he" and inserting in lieu thereof "the Secretary", and

(2) in paragraph (3) by striking out "may" and inserting in lieu thereof "shall".

(b) Section 679 of the Act is amended by striking out subsection (d).

COMMUNITY FOOD AND NUTRITION PROGRAM

SEC. 206. The Act is amended by inserting after section 681 the following new section:

"COMMUNITY FOOD AND NUTRITION

"SEC. 681A. (a) The Secretary may through grants to public and private nonprofit agencies, provide for community-based, local, and statewide programs—

"(1) to coordinate existing private and public food assistance resources, whenever such coordination is determined to be inadequate, to better serve low-income populations;

"(2) to assist low-income communities to identify potential sponsors of child nutrition programs and to initiate new programs in underserved or unserved areas; and

"(3) to develop innovative approaches at the State and local level to meet the nutrition needs of low-income people.

"(b) There is authorized to be appropriated $2,500,000 for each of the fiscal years 1985 and 1986 to carry out the provisions of this section.".

CONSTRUCTION

SEC. 207. Notwithstanding any other provisions of law the provisions of section 675(c)(2) of the Act made by the amendments contained in paragraphs (1), (2) and (3) of section 203 of this Act shall apply to the funds appropriated for the Act for fiscal year 1985.

TITLE III—FOLLOW THROUGH

AUTHORIZATION OF APPROPRIATIONS

SEC. 301. Section 663(a)(1) of the Follow Through Act is amended to read as follows:

"(1) There is authorized to be appropriated for carrying out the purposes of this subchapter $10,000,000 for the fiscal year 1985 and $7,500,000 for the fiscal year 1986.".

REPEALER

SEC. 302. Section 670 of the Follow Through Act is amended by striking out "1984" and inserting in lieu thereof "1986".

TITLE IV—WEATHERIZATION PROGRAM

STATE ELECTION OF LITHEAP INCOME ELIGIBILITY LEVEL

SEC. 401. Section 412(7) of the Energy Conservation in Existing Buildings Act of 1976 (42 U.S.C. 6862(7)) is amended by striking out "or" before the beginning of clause (B), by striking out the period at the end of the paragraph and inserting in lieu thereof a comma, and by adding at the end of the paragraph "or (C) if a State elects, is the basis for eligibility for assistance under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621), provided that such basis is at least 125 percent of the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget.".

NEW TECHNOLOGY AND ELIMINATION OF A RULEMAKING REQUIREMENT

SEC. 402. Section 412(9) of the Energy Conservation in Existing Buildings Act of 1976 (42 U.S.C. 6862(9)) is amended by—

(1) amending paragraph (B) to read as follows:

"(B) furnace efficiency modifications, including, but not limited to—

"(i) replacement burners, furnaces, or boilers or any combination thereof;

"(ii) devices for minimizing energy loss through heating system, chimney, or venting devices; and

"(iii) electrical or mechanical furnace ignition systems which replace standing gas pilot lights;"; and

(2) striking out "by rule" in paragraph (G).

MAXIMUM EXPENSES

SEC. 403. Section 415 of the Energy Conservation in Existing Buildings Act of 1976 (42 U.S.C. 6865) is amended—

(1) by striking out the first sentence in subsection (a) and inserting in lieu thereof: "An average of at least forty percent of the funds provided in a State under this part for weatherization materials, labor, and related matters described in subsection (c) shall be spent for weatherization materials."; and

(2) by amending subsection (c) to read as follows:

"(c)(1) The expenditure of financial assistance provided under this part for labor, weatherization materials, and related matters shall not exceed an average of $1,600 per dwelling unit weatherized in that State. Labor, weatherization materials, and related matter includes, but is not limited to—

"(A) the appropriate portion of the cost of tools and equipment used to install weatherization materials for a dwelling unit;

"(B) the cost of transporting labor, tools, and materials to a dwelling unit;

"(C) the cost of having onsite supervisory personnel; and

"(D) the cost of making incidental repairs to a dwelling unit if such repairs are necessary to make the installation of weatherization materials effective.

"(2) Dwelling units partially weatherized under this part or under other Federal programs during the period September 30, 1975, through September 30, 1979, may receive further financial assistance for weatherization under this part.".

PERFORMANCE FUND

SEC. 404. Section 415 of the Energy Conservation in Existing Buildings Act of 1976 (42 U.S.C. 6862) is amended by adding at the end thereof the following new subsection:

"(d) Beginning in fiscal year 1986, not less than 5 percent and no more than 15 percent of the amount appropriated under this part for each fiscal year shall be allotted by the Secretary to a performance fund, which shall be available only to provide financial assistance under this part to those States which the Secretary determines to have demonstrated the best performance during the previous fiscal year in providing weatherization assistance. The Secretary shall make such determination on the basis of such information as may be available to the Secretary, to include, but not be limited to, the percentage of eligible dwelling units within the State which have been weatherized using low-income weatherization assistance program funds during the relevant reporting period. In assessing the quality of the weatherization assistance provided, the Secretary shall consider comparable energy savings data supplied by the States.".

TITLE V—HIGHER EDUCATION AND RESEARCH PROJECT

CENTER FOR EXCELLENCE IN EDUCATION AUTHORIZED

SEC. 501. (a) The Secretary of Education (hereinafter in this section referred to as the "Secretary") is authorized in accordance with the provisions of this title, to provide financial assistance to Indiana University located in Bloomington, Indiana, to pay the Federal share of the cost of the construction, and related costs, including renovation costs, for the Center for Excellence in Education facility at Indiana University, to be used as a national research and training resource for individuals who intend to become exemplary elementary and secondary school teachers and administrators.

(b)(1) No financial assistance may be made under this title unless an application is made at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

(2) For the purpose of this section, the Federal share of the cost of the Center for Excellence in Education facility at the Indiana University should not exceed 50 percent.

(c) There are authorized to be appropriated such sums, not to exceed $6,000,000, as may be necessary to carry out the provisions of this title. Funds appropriated pursuant to this title shall remain available until September 30, 1987.

RESEARCH CENTERS

SEC. 502. (a)(1) The Secretary of Health and Human Services (hereinafter in this section referred to as the "Secretary") is authorized, in accordance with the provisions of this section, to provide financial assistance to the University of Utah located in Salt Lake City, Utah, to pay the Federal share of the cost of the establishment and operation (including construction, and related costs, including renovation costs) of a center for research on the health effects of nuclear energy and other new energy technologies.

(2)(A) No financial assistance may be made under this subsection unless an application is made at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require.

(B) For the purpose of this subsection, the Federal share of the cost of the center shall not exceed 50 percent.

(3) There are authorized to be appropriated such sums, not to exceed $4,000,000, as may be necessary to carry out the provisions of this subsection. Funds appropriated pursuant to this subsection shall remain available until September 30, 1987.

(b)(1) The Secretary shall, through the National Cancer Institute, establish or support at least one clinic or health facility for cancer screening and research in St. George, Utah. Such clinic shall be affiliated with a health science center capable of providing clinical, research, and interdisciplinary technical assistance to such clinic or facility, and shall make its services accessible to the preponderance of the residents of the areas that have received the greatest fallout from the Nevada nuclear tests.

(2) There are authorized to be appropratred such sums, not to exceed $6,000,000, as may be necessary to carry out the provisions of this subsection. Funds appropriated pursuant to this subsection shall remain available until September 30, 1987.

TITLE VI—LOW-INCOME HOME ENERGY ASSISTANCE

AUTHORIZATION OF APPROPRIATIONS

SEC. 601. Section 2602(b) of the Low-Income Home Energy Assistance Act of 1981 (hereinafter in this title referred to as the "Act") is amended to read as follows:

"(b) There is authorized to be appropriated to carry out the provisions of this title $2,140,000,000 for the fiscal year 1985, and $2,275,000,000 for the fiscal year 1986.".

DEFINITION

SEC. 602. (a) Section 2603(1) of the Act is amended—

(1) by striking out "intervention"; and

(2) by inserting before the period "and other household energy-related emergencies".

(b) Section 2603(4) of the Act is amended to read as follows:

"(4) The term 'poverty level' means, with respect to a household in any State, the income poverty line as prescribed and revised at least annually pursuant to section 673(2) of the Community Services Block Grant Act, as applicable to such State.".

ENERGY CRISIS INTERVENTION

SEC. 603. (a) Section 2604(c) of the Act is amended—

(1) by inserting after "reserved" the following: "until March 15 of each program year"; and

(2) by adding at the end thereof the following new sentence: "The program for which funds are reserved by this subsection shall be administered by public or nonprofit entities which have experience in administering energy crisis programs under the Low-Income Energy Assistance Act of 1980, or under this Act, experience in assisting low-income individuals in the area to be served, and the capacity to undertake a timely and effective energy crisis intervention program.".

(b) Section 2604(d)(1) of the Act is amended by striking out "otherwise be paid" and inserting in lieu thereof "otherwise be payable".

(c) Section 2604(e) of the Act is repealed.

(d) Section 2604(f) of the Act is amended by striking out "its allotment" and inserting in lieu thereof "the funds payable to it".

STATE ALLOTMENTS

SEC. 604. (a) Section 2604(a)(2) is amended to read as follows:

"(2) For purposes of paragraph (1), for fiscal year 1985 and thereafter, a State's allotment percentage is the percentage which expenditures for home energy by low-income households in that State bears to such expenditures in all States, except that States which thereby receive the greatest proportional increase in allotments by reason of the application of this paragraph from the amount they received pursuant to Public Law 98–139 shall have their allotments reduced to the extent necessary to ensure that—

"(A)(i) no State for fiscal year 1985 shall receive less than the amount of funds the State received in fiscal year 1984; and

"(ii) no State for fiscal year 1986 and thereafter shall receive less than the amount of funds the State would have received in fiscal year 1984 if the appropriations for this title for fiscal year 1984 had been $1,975,000,000, and

"(B) any State whose allotment percentage out of funds available to States from a total appropriation of $2,250,000,000 would be less than 1 percent, shall not, in any year when total appropriations equal or exceed $2,250,000,000, have its allotment percentage reduced from the percentage it would receive from a total appropriation of $2,140,000,000.".

(b) Section 2604(a) is amended by adding at the end thereof the following new paragraph:

(4) For the purpose of this section, the Secretary shall determine the expenditure for home energy by low-income households on the basis of the most recent satisfactory data available to the Secretary.".

APPLICATIONS AND REQUIREMENTS

SEC. 605. (a)(1) Section 2605(b)(1) of the Act is amended by striking out "subsection" and inserting in lieu thereof "section".

(2) Subclause (B) of section 2605(b)(2) of the Act is amended by inserting after the semicolon and flush to the margin of subclause (B) the following: "except that no household may be excluded from eligibility under this subclause for payments under this title for fiscal year 1986 and thereafter if the household has an income which is less than 110 percent of the poverty level for such State for such fiscal year".

(3) Section 2605(b)(5) is amended by inserting before the semicolon a comma and the following: "except that the State may not differentiate in implementing this section between the households described in clauses (2)(A) and (2)(B) of this subsection".

(4) Section 2605(b)(7)(C) is amended by striking out "any differently" and inserting in lieu thereof "adversely".

(5) Section 2605(b)(8) of the Act is amended by inserting after "that" the following: "(A) the State will not exclude households described in clause (2)(B) of this subsection from receiving home energy assistance benefits under clause (2), and (B)".

(6) Section 2605(b)(9)(A) of the Act is amended to read as follows:

"(A) the State may use for planning and administering the use of funds under this title an amount not to exceed 10 percent of the funds payable to such State under this title for a fiscal year and not transferred pursuant to section 2604(f) for use under another block grant; and".

(7) Section 2605(b)(10) of the Act is amended by striking out "every year" and inserting in lieu thereof "every two years".

(8) Section 2605(b) of the Act is amended—

(A) by striking out "and" at the end of clause (12);

(B) by striking out the period at the end of clause (13) and inserting in lieu thereof a semicolon; and

(C) by adding at the end thereof the following new clauses:

"(14) describe the procedures by which households in the State are identified as eligible to participate under this title and the manner in which the State determines benefit levels;

"(15) describe the amount that the State will reserve in accordance with section 2604(c) in each fiscal year for energy crisis intervention activities together with the administrative procedures (A) for designating an emergency, (B) for determining the assistance to be provided in any such emergency, and (C) for the use of funds reserved under such section for the purposes under this title in the event any portion of the amount so reserved is not expended for emergencies;

"(16) describe energy usage and the average cost of home energy in the State, identified by type of fuel and by region of the State; and

"(17) cooperate with the Secretary with respect to data collecting and reporting under section 2610.".

(9) Section 2605(b) is amended by adding at the end thereof the following new sentence: "The Secretary shall issue regulations to prevent waste, fraud, and abuse in the programs assisted by this title.".

(b)(1) Section 2605(c)(1) of the Act is amended to read as follows:

"(c)(1) As part of the annual application required in subsection (a), the chief executive officer of each State shall prepare and furnish to the Secretary, in such format as the Secretary may require, a plan which—

"(A) describes how the State will carry out the assurances required under subsection (b);

"(B) contains estimates of the amount of funds the State will use for each of the programs under such plan;

"(C) describes the eligibility requirements to be used by the State for each type of assistance to be provided under this title;

"(D) describes weatherization and other energy-related home repair the State will provide under subsection (k); and

"(E) contains any other information determined by the Secretary to be appropriate for purposes of this title.

The chief executive officer may revise any plan prepared under this paragraph and shall furnish the revised plan to the Secretary.".

(2) Section 2605(c)(2) of the Act is amended—

(A) by inserting "and each substantial revision thereof" after "Each plan prepared under paragraph (1)", and

(B) by striking out the period at the end thereof and inserting in lieu thereof "or substantial revision.".

(c) Section 2605 (d) of the Act is amended to read as follows:

"(d) The State shall expend funds in accordance with the State plan under this title or in accordance with revisions applicable to such plan.".

(d) Section 2605(e) of the Act is amended to read as follows:

"(e) Each State shall, in carrying out the requirements of subsection (b)(1), obtain financial and compliance audits of any funds which the State receives under this title. Such audits shall be made public within the State on a timely basis. The audits shall be conducted at least every two years by an organization or person independent of any agency administering activities under this title. The audits shall be conducted in accordance with the Comptroller General's standards for audit of governmental organizations, programs, activities, and functions. Within 30 days after completion of each audit, the chief executive officer of the State shall submit a copy of the audit to the legislature of the State and to the Secretary.".

(e) Section 2605(f) of the Act is amended by inserting before the comma the first time it appears the following: "unless enacted in express limitation of this paragraph".

(f) Section 2605(h) of the Act is amended by inserting "(but not less frequently than every three years)" after "time" the second place it appears.

PAYMENTS TO STATES

SEC. 606. (a)(1) The second sentence of section 2607(b)(2)(A) of the Act is amended by inserting "or the amount payable to" after "of".

(2) Section 2607(b)(2)(A) of the Act is amended by inserting after the first sentence thereof the following: "Such request shall include a statement of the reasons that the amount allotted to such State for a fiscal year will not be used by such State during such fiscal year and a description of the types of assistance to be provided with the amount held available for the following fiscal year.".

(b)(1)(A) The first sentence of section 2607(b)(2)(B) of the Act is amended by striking out "25 percent" and inserting in lieu thereof "15 percent".

(B) The first sentence of section 2607(b)(2)(B) of the Act is further amended by striking out "allotted to such State for such prior fiscal year" and inserting in lieu thereof "payable to such State for such prior fiscal year and not transferred pursuant to section 2604(f)".

(2) The second sentence of section 2607(b)(2)(B) of the Act is amended by striking out "allotted to a State" and inserting in lieu thereof "payable to a State but not transferred by the State".

(c) Section 2607(b)(2) of the Act is amended by adding at the end thereof the following new subparagraph:

"(C) The Secretary shall reallot amounts made available under this paragraph for the fiscal year following the fiscal year of the original allotment in accordance with paragraph (1) of this subsection.".

STUDIES

SEC. 607. (a) Section 2610(a)(2) of the Act is amended—

(1) by inserting "amount," before "cost"; and

(2) by adding at the end thereof the following: "for households eligible for assistance under this title".

(b) Section 2610(a) of the Act is amended by—

(1) striking out "and" at the end of clause (4);

(2) redesignating clause (5) as clause (6); and

(3) inserting after clause (4) the following new clause:

"(5) the number of households which received such assistance and include one or more individuals who are 60 years or older or handicapped; and".

(c) Section 2610 (a) of the Act is amended by adding at the end thereof the following new flush sentence: "Nothing in this subsection may be construed to require the Secretary to collect data which has been collected and made available to the Secretary by any other agency of the Federal Government.

(d) Section 2610 (b) of the Act is amended to read as follows:

"(b) The Secretary shall, no later than June 30 of each fiscal year, submit a report to the Congress containing a detailed compilation of the data under subsection (a) with respect to the prior fiscal year.".

TECHNICAL AMENDMENT

SEC. 608. Section 2608(b)(2) of the Act is amended by striking out "he" and inserting in lieu thereof "the Secretary".

EFFECTIVE DATES

SEC. 609. (a) Except as provided in subsections (b), (c), and (d), the amendments made by this title shall take effect on the date of enactment of this Act.

(b) The amendments made by section 605 shall take effect on the first day of the first fiscal year beginning after the date of the enactment of this Act.

(c) The amendments made by section 606 shall apply to amounts held available for fiscal years beginning after September 30, 1985.

(d) The amendment made by section 607 shall apply to data collected and compiled after the date of the enactment of this Act. Section 2610 of the Act as in effect before the date of the enactment of this Act shall apply with respect to the report submitted under such section 2610 for fiscal year 1984.

TITLE VII—POSTSECONDARY EDUCATION SCHOLARSHIP PROGRAM

AMENDMENT TO TITLE V OF THE HIGHER EDUCATION ACT OF 1965

SEC. 701. Title V of the Higher Education Act of 1965 is amended by inserting after part D the following new parts E and F:

"PART E—CARL D. PERKINS SCHOLARSHIP PROGRAM

"DECLARATION OF PURPOSE; AUTHORIZATION OF APPROPRIATIONS

"SEC. 561. (a) It is the purpose of this part to make available, through grants to the States, scholarships during fiscal years 1986 through 1990 to a maximum of ten thousand individuals who are outstanding high school graduates and who demonstrate an interest in teaching, in order to enable and encourage those individuals to pursue teaching careers in education at the elementary or secondary level. Such scholarships shall be referred to as 'Carl D. Perkins Scholarships'.

"(b) There are authorized to be appropriated $20,000,000 for fiscal year 1986, $21,000,000 for fiscal year 1987, $22,000,000 for fiscal year 1988, and $23,000,000 for fiscal year 1989, for Carl D. Perkins Scholarships to eligible students under this part.

"ALLOCATION AMONG STATES

"SEC. 562. (a) From the sums appropriated pursuant to section 561 for any fiscal year, the Secretary shall allocate to any State an amount which bears as nearly as possible the same ratio to such sums as the number of persons in that State bears to the number of persons in all States.

"(b) For the purpose of this section, the number of persons in a State and in all States shall be determined by the most recently available data from the United States Census Bureau.

"GRANT APPLICATIONS

"SEC. 563. (a) The Secretary is authorized to make grants to States in accordance with the provisions of this part. In order to receive a grant under this part, a State shall submit an application at such time or times, in such manner, and containing such information as the Secretary may prescribe by regulation. Such application shall set forth a program of activities for carrying out the purposes set forth in section 561(a) in such detail as will enable the Secretary to determine the degree to which such program will accomplish such purposes and such other policies, procedures, and assurances as the Secretary may require by regulation.

"(b) The Secretary shall approve an application only if the application—

"(1) describes the selection criteria and procedures to be used by the State in the selection of scholarships under this part which satisfy the provisions of this part;

"(2) designates the State agency which administers the program under subpart 3 of part A of title IV, relating to State student incentive grants, or the State agency with with the Secretary has an agreement under section 428(b);

"(3) describes the outreach effort the State agency intends to use to publicize the availability of Carl D. Perkins scholarships to high school students in the State;

"(4) provides assurances that each recipient eligible under section 565(b) of this part who receives a Carl D. Perkins Scholarship shall enter into an agreement with the State agency under which the recipient shall—

"(A) within the ten-year period after completing the postsecondary education for which Carl D. Perkins Scholarship was awarded, teach, for a period of not less than two years for each year for which assistance was received, in a public elementary or secondary school in any State, in a public education program in any State, or in a private nonprofit school located and serving students in a district eligible for assistance pursuant to chapter 1 of the Education Consolidation and Improvement Act of 1981, or, on a full-time basis, handicapped children or children with limited English proficiency in a private nonprofit school, except that, in the case of individuals who teach in a school serving large numbers or high concentrations of economically disadvantaged students, or who teach children with limited English proficiency or handicapped children, the requirements of this subparagraph shall be reduced by one-half;

"(B) provide the State agency evidence of compliance with section 566 of this part as required by the State agency; and

"(C) repay all or part of a Carl D. Perkins Scholarship received under section 564 of this part plus interest and, if applicable, reasonable collection fees, in compliance with regulations issued by the Secretary under section 567 of this part, in the event that the conditions of clause (A) are not complied with except as provided for in section 568 of this part;

"(5) provides that the agreement entered into with recipients shall fully disclose the terms and conditions under which assistance under this part is provided and under which repayment may be required. Such disclosure shall include—

"(A) a description of the procedures required to be established under paragraph (6); and

"(B) a description of the appeals procedures required to be established under paragraph (7) under which a recipient may appeal a determination of noncompliance with any provision under this part;

"(6) provides for procedures under which a recipient of assistance received under this part who teaches for less than the period required under paragraph (4)(A) will have the repayment requirements reduced or eliminated consistent with the provisions of sections 567 and 568 of this part;

"(7) provides for appeals procedures under which a recipient may appeal any determination of noncompliance with any provision under this part;

"(8) provides assurances that the State agency shall make particular efforts to attract students from low-income backgrounds or who express a willingness or desire to teach in schools having less than average academic results or serving large numbers of economically disadvantaged students; and

"(9) provides assurances that Carl D. Perkins Scholarships will be awarded without regard to sex, race, handicapping condition, creed, or economic background.

"(c) The selection criteria and procedures to be used by the State shall reflect the present and projected teacher needs of the State, including the demand for and supply of elementary teachers in the State, the demand for and supply of secondary teachers in the State, and the demand for teachers with training in specific academic disciplines in the State.

"(d) In developing the selection criteria and procedures to be used by the State, the State shall solicit the views of State and local education agencies, private educational institutions, and other interested parties. Such views—

"(1) shall be solicited by means of (A) written comments; and (B) publication of proposed selection criteria and procedures in final form for implementation; and

"(2) may be solicited by means of (A) public hearings on the teaching needs of elementary and secondary schools in the State (including the number of new teachers needed, the expected supply of new teachers, and the shortages in the State of teachers with training in specific academic disciplines); or (B) such other methods as the State may determine to be appropriate to gather information on such needs.

"AMOUNT AND DURATION OF AND RELATION TO OTHER ASSISTANCE

"SEC. 564. (a) Subject to subsection (c), each Carl D. Perkins Scholar shall receive a $5,000 scholarship for each academic year of postsecondary education for study in preparation to become an elementary or secondary teacher. No individual shall receive scholarship assistance for more than four years of postsecondary education, as determined by the State agency.

"(b) Notwithstanding the provisions of title IV of this Act, scholarship funds awarded pursuant to this part shall be considered in determining eligibility for student assistance under title IV of this Act.

"(c) Carl D. Perkins Scholarship assistance awarded by the statewide panel established pursuant to section 565 to any individual in any given year, when added to assistance received under title IV of this Act, shall not exceed the cost of attendance, as defined under section 482(d), at the institution the individual is attending. If the amount of the Carl D. Perkins Scholarship assistance and assistance received under title IV of this Act, exceeds the cost of attendance, the Carl D. Perkins Scholarship shall be reduced by an amount equal to the amount by which the combined awards exceed the cost of attendance.

"(d) No individual shall receive an award under the Carl D. Perkins Scholarship established under this part, in any academic year, which shall exceed the cost of attendance, as defined under section 482(d), at the institution the individual is attending.

"SELECTION OF CARL D. PERKINSSCHOLARS

"SEC. 565. (a) Carl D. Perkins Scholars shall be selected by a seven-member statewide panel appointed by the chief State elected official, acting in consultation with the State educational agency, or by an existing grant agency or panel designated by the chief State elected official and approved by the Secretary of Education. The statewide panel shall be representative of school administrators, teachers and parents.

"(b) Selections of Carl D. Perkins Scholars shall be made from students who have graduated or who are graduating from high school and who rank in the top 10 per centum of their graduating class. The State educational agency shall make applications available to high schools in the State and in other locations convenient to applicants, parents and others. The statewide panel shall develop criteria and procedures for the selection of Carl D. Perkins Scholars. Such criteria may include the applicant's high school grade point average, involvement in extracurricular activities, financial need, and expression of interest in teaching as expressed in an essay written by the applicant. The panel may also require the applicant to furnish letters of recommendation from teachers and others.

"SCHOLARSHIP CONDITIONS

"SEC. 566. Recipients of scholarship assistance under this part shall continue to receive such scholarship payments only during such periods that the State agency finds that the recipient is (A) enrolled as a full-time student in an accredited postsecondary institution; (B) pursuing a course of study leading to teacher certification; and (C) maintaining satisfactory progress as determined by the postsecondary institution the recipient is attending.

"SCHOLARSHIP REPAYMENT PROVISIONS

"SEC. 567. Recipients found by the State agency to be in noncompliance with the agreement entered into under section 563(b)(3) of this part shall be required to repay a pro rata amount of the scholarship awards received, plus interest and, where applicable, reasonable collection fees, on a schedule and at a rate of interest to be prescribed by the Secretary by regulations issued pursuant to this part.

"EXCEPTION TO REPAYMENT PROVISIONS

"SEC. 568. (a) A recipient shall not be considered in violation of the agreement en-

tered into pursuant to section 563(b)(4)(C) if the recipient (1) returns to a full-time course of study related to the field of teaching at an eligible institution; (2) is serving, not in excess of three years, as a member of the armed services of the United States; (3) is temporarily totally disabled for a period of time not to exceed three years as established by sworn affidavit of a qualified physician; (4) is unable to secure employment for a period not to exceed twelve months by reason of the care required by a spouse who is disabled; (5) is seeking and unable to find full-time employment for a single period not to exceed twelve months; (6) is seeking and unable to find full-time employment as a teacher in a public elementary or secondary school or a public education program; or (7) satisfies the provisions of additional repayment exceptions that may be prescribed by the Secretary in regulations issued pursuant to this part.

"(b) A recipient shall be excused from repayment of any scholarship assistance received under this part if the recipient becomes permanently totally disabled as established by sworn affidavit of a qualified physician.

"FEDERAL ADMINISTRATION OF STATE PROGRAMS; JUDICIAL REVIEW

"SEC. 569. (a) The Secretary shall not finally disapprove any application for a State program submitted under section 563, or any modification thereof, without first affording the State agency submitting the program reasonable notice and opportunity for a hearing.

"(b) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State agency administering a State program approved under this part, finds—

"(1) that the State program has been so changed that it no longer complies with the provisions of this part, or

"(2) that in the administration of the program there is a failure to comply substantially with any such provisions,

the Secretary shall notify such State agency that the State will not be regarded as eligible to participate in the program under this part until the Secretary is satisfied that there is no longer any such failure to comply.

"(c)(1) If any State is dissatisfied with the Secretary's final action under subsection (b)(1) or (2), such State may appeal to the United States court of appeals for the circuit in which such State is located. The summons and notice of appeal may be served at any place in the United States. The Secretary shall forthwith certify and file in the court the transcript of the proceedings and the record on which the action was based.

"(2) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify any previous action, and shall certify to the court the transcript and record of further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

"(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

"PART F—NATIONAL TALENTED TEACHER FELLOWSHIP PROGRAM

"DECLARATION OF PURPOSE

"SEC. 571. It is the purpose of this part to establish a national fellowship program for outstanding teachers.

"AUTHORIZATION OF APPROPRIATIONS; ALLOCATION AMONG STATES

"SEC. 572. There are authorized to be appropriated $1,000,000 for fiscal year 1986. $2,000,000 for fiscal year 1987, $3,000,000 for fiscal year 1988, and $4,000,000 for fiscal year 1989, for fellowships to outstanding teachers under this part. Not more than 2½ per centum of these funds shall be used for purposes of administering this part.

"TALENTED TEACHER FELLOWSHIPS

"SEC. 573. (a)(1) Except as provided under paragraph (3), sums available for the purpose of this part shall be used to award one national teacher fellowship to a public or private school teacher teaching in each congressional district of each State, and in the District of Columbia, and the Commonwealth of Puerto Rico; and one such fellowship in Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

"(2) Fellowship awards may not exceed the average national salary of public school teachers in the most recent year for which satisfactory data are available, as determined by the Secretary. Talented teacher fellows may not receive an award for two consecutive years. Subject to the repayment provisions of section 576, talented teacher fellows shall be required to return to a teaching position in their current school district or private school system for at least two years following the fellowship award.

"(3) If the appropriation under section 572 is not sufficient to provide the number of fellowships required by paragraph (1) at the level required under paragraph (2), the Secretary shall determine and publish an alternative distribution of fellowship which will permit fellowship awards at that level and which is geographically equitable. The Secretary shall send a notice of such determination to each of the statewide panels established under section 574.

"(b) Talented teacher fellows may use such awards for such projects for improving public education as the Secretary may approve, including (1) sabbaticals for study or research directly associated with the objectives of this part, or academic improvement; (2) consultation with or assistance to other school districts or private school systems; (3) development of special innovative programs; or (4) model teacher programs and staff development.

"SELECTION OF TALENTED TEACHER FELLOWSHIPS

"SEC. 574. Recipients of talented teacher fellowships in each State shall be selected (in accordance with section 575) by a seven-member statewide panel appointed by the chief State elected official, acting in consultation with the State educational agency, or by an existing panel designated by the chief State elected official and approved by the Secretary of Education. The statewide panel shall be representative of school administrators, teachers, parents, and institutions of higher education.

"EVALUATION OF APPLICATIONS

"SEC. 575. (a) An applicant for talented teacher fellowship assistance shall submit proposals for projects under section 573(b), and shall indicate the extent to which the applicant wishes to continue current teaching duties. The applicant shall submit such proposals to the local education agency for comment prior to submission to the statewide panel (appointed under section 574) for the State within which the project is to be conducted. In evaluating proposals, such statewide panel shall consult with the local education agency, requesting two recommendations from teaching peers; a recommendation from the principal; and a recommendation of the superintendent on the quality of the proposal and its benefit to the local education agency; and any other criteria for awarding fellowships as is considered appropriate by such statewide panel. Selection of fellows shall be made in accordance with regulations prescribed by the Secretary of Education.

"(b) Announcement of awards shall be made in a public ceremony.

"FELLOWSHIP REPAYMENT PROVISIONS

"SEC. 576. Repayment of the award shall be made to the Federal Government in the case of fraud or gross noncompliance.

"MATH SCIENCE TECHNICAL AMENDMENT

"SEC. 702. Section 711 of the Education for Economic Security Act is amended by striking out "(a)" and by striking out subsection (b) of such section.

"TITLE VIII—FEDERAL MERIT SCHOLARSHIPS

"AMENDMENT TO THE HIGHER EDUCATION ACT OF 1965

"SEC. 801. (a) Part A of title IV of the Higher Education Act of 1965 (hereafter in this title referred to as "the Act") is amended by redesignating subpart 6 as subpart 7 and by inserting after subpart 5 the following new subpart:

"Subpart 6—Federal Merit Scholarships

"STATEMENT OF PURPOSE

"SEC. 419A. It is the purpose of this subpart to establish a Federal Merit Scholarship Program to promote student excellence and achievement and to recognize exceptionally able students who show promise of continued excellence.

"DEFINITION

"SEC. 419B. For the purpose of this subpart—

"(1) the term 'secondary school' has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965; and

"(2) the term 'State' means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

"SCHOLARSHIPS AUTHORIZED

"SEC. 419C. (a) The Secretary is authorized, in accordance with the provisions of this subpart, to make grants to States to enable the States to award scholarships to individuals who have demonstrated outstanding academic achievement and who show promise of continued academic achievement.

"(b) Scholarships under this section shall be awarded for a period of one academic year for the first year of study at an institution of higher education.

"(c) A student awarded a scholarship under this subpart may attend any institution of higher education.

"ALLOCATION AMONG STATES

"SEC. 419D. From the sums appropriated pursuant to section 419K for any fiscal year, the Secretary shall alllocate to each State having an agreement under section 419E—

"(1) $1,500 multiplied by the number of individuals in the State eligible for merit scholarships pursuant to section 419G(b), plus

"(2) $10,000, plus 5 percent of the amount to which a State is eligible under clause (1) of this section.

"AGREEMENTS

"SEC. 419E. The Secretary shall enter into an agreement with each State desiring to participate in the merit scholarship program authorized by this subpart. Each such agreement shall include provisions designed to assure that—

"(1) the State educational agency will administer the merit scholarship program authorized by this subpart in the State;

"(2) the State educational agency will comply with the eligibility and selection provisions of this subpart;

"(3) the State educational agency will conduct outreach activities to publicize the availability of Federal merit scholarships to all eligible students in the State, with particular emphasis on activities designed to assure that students from low-income and moderate-income families have access to the information on the opportunity for full participation in the merit scholarship program authorized by this subpart;

"(4) the State educational agency will pay to each individual in the State who is awarded a merit scholarship under this subpart $1,500 at an awards ceremony in accordance with section 419I; and

"(5) the State educational agency will use the amount of the allocation described in clause (2) of section 419D for administrative expenses, including the conduct of the awards ceremony required by section 419I.

"ELIGIBILITY OF MERIT SCHOLARS

"SEC. 419F. (a) Each student awarded a scholarship under this subpart shall be a graduate of a public or private secondary school or have the equivalent of a certificate of graduation as recognized by the State in which the student resides and must have been admitted for enrollment at an institution of higher education.

"(b) Each student awarded a scholarship under this subpart must demonstrate outstanding academic achievement and show promise of continued academic achievement.

"SELECTION OF MERIT SCHOLARS

"SEC. 419G. (a) The State educational agency is authorized to establish the criteria for the selection of merit scholars under this subpart.

"(b) The State educational agency shall adopt selection procedures which are designed to assure that ten individuals will be selected from among residents of each congressional district in a State (and in the case of the District of Columbia and the Commonwealth of Puerto Rico not to exceed ten individuals will be selected in such district or Commonwealth).

"(c) In carrying out its responsibilities under subsections (a) and (b), the State educational agency shall consult with school administrators, school boards, teachers, counselors, and parents.

"STIPENDS AND SCHOLARSHIP CONDITIONS

"SEC. 419H. (a) Each student awarded a merit scholarship under this subpart shall receive a stipend of $1,500 for the academic year of study for which the scholarship is awarded.

"(b) The State educational agency shall establish procedures to assure that a merit scholar awarded a scholarship under this subpart pursues a course of study at an institution of higher education.

"AWARDS CEREMONY

"SEC. 4191. (a) The State educational agency shall make arrangements to award merit scholarships under this subpart at a place in each State which is convenient to the individuals selected to receive such scholarships. To the extent possible, the award shall be made by Members of the Senate and Members of the House of Representatives (by the Delegate in the case of the District of Columbia and the Resident Commissioner in the case of the Commonwealth of Puerto Rico) who represent the State, Commonwealth, or District, as the case may be, from which individuals come.

"(b) The selection process shall be completed, and the awards made prior to the end of each secondary academic year.

"CONSTRUCTION OF NEEDS PROVISIONS

"SEC. 419J. Nothing in this subpart, or any other Act, shall be construed to permit the receipt of a merit scholarship under this subpart to be counted for any needs test in connection with the awarding of any grant or the making of any loan under this Act or any other provision of Federal law relating to educational assistance.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 419K. There are authorized to be appropriated $8,000,000 for each of fiscal years 1986, 1987, and 1988 to carry out the provisions of this subpart.".

(b)(1) Section 419 of the Act is redesignated as section 420.

(2) Section 420 of the Act is redesignated as section 420A.

TITLE IX—LEADERSHIP IN EDUCATIONAL ADMINISTRATION

SHORT TITLE; PURPOSE

SEC. 901. (a) This title may be cited as the "Leadership in Educational Administration Development Act of 1984".

(b) It is the purpose of this title to improve the level of student achievement in elementary and secondary schools through the enhancement of the leadership skills of school administrators by establishing technical assistance centers for each State to promote the development of the leadership skills of elementary and secondary school administrators with particular emphasis upon increasing access for minorities and women to administrative positions.

(c) It is the intention of Congress that contractors seeking to establish technical assistance and training centers should design programs which upgrade the skills of elementary and secondary school administrators in—

(1) enhancing the schoolwide learning environment by assessing the school climate, setting clear goals for improvement, and devising strategies for completing manageable projects with measurable objectives;

(2) evaluating the school curriculum in order to assess its effectiveness in meeting academic goals;

(3) developing skills in instructional analysis to improve the quality of teaching through classroom observation and supervision;

(4) mastering and implementing objective techniques for evaluating teacher performance; and

(5) improving communication, problem-solving, student discipline, time-management, and budgetary skills.

AUTHORIZATION OF APPROPRIATIONS

SEC. 902. (a) There are authorized to be appropriated to carry out this title for fiscal year 1985 and each succeeding fiscal year ending prior to October 1, 1990, such sums as may be necessary but not to exceed $20,000,000 in any fiscal year.

(b) Of the amount appropriated pursuant to subsection (a) for any fiscal year, the secretary shall make available such amount, not less than $150,000 for each State, as may be necessary for establishing and operating a technical assistance center in each State.

TECHNICAL ASSISTANCE CENTERS

SEC. 903. (a) The Secretary shall, subject to the availability of funds pursuant to section 902, enter into contracts with local educational agencies, intermediate school districts, State educational agencies, institutions of higher education, private management organizations, or nonprofit organizations (or consortium of such entities) for the establishment and operation of training centers in each State in accordance with the requirements of this section and section 904.

(b) Each contract entered into under subsection (a) shall require the contractor—

(1) to make the services of the technical assistance center available to school administrators from any of the local educational agencies located within the State served by that contractor;

(2) to collect information on school leadership skills;

(3) to assess the leadership skills of individual participants based on established effective leadership criteria;

(4) to conduct training programs on leadership skills for new school administrators and to conduct training seminars on leadership skills for practicing school administrators, with particular emphasis on women and minority administrators;

(5) to operate consulting programs to provide within school districts advice and guidance on leadership skills;

(6) to maintain training curricula and materials on leadership skills drawing on expertise in business, academia, civilian and military governmental agencies, and existing effective schools;

(7) to conduct programs which—

(A) make available executive from business, scholars from various institutions of higher education, and practicing school administrators; and

(B) offer internships in business, industry, and effective school districts to school administrators,

for the purpose of promoting improved leadership skills of such administrators;

(8) to disseminate information on leadership skills associated with effective schools; and

(9) to establish model administrator projects.

(c) In making a selection among applicants for any contract under this section, the Secretary shall take into account whether the applicant, if selected, would be able to operate its programs in a manner which would emphasize development of leadership skills identified by graduate schools of management and graduate schools of education.

GENERAL CRITERIA FOR CONTRACTS

SEC. 904. (a) The following criteria shall apply to each contract:

(1) The contract shall assure the involvement of private sector managers and executives in the conduct of such programs.

(2) The contract shall contain assurances of an ongoing organizational commitment to carrying out the purposes of this title

through (A) obtaining matching funds for such programs in cash or in kind at least equal in amount to the amount of funds provided under this title, (B) making inkind contributions to such programs, (C) demonstrating a commitment to continue to operate such programs after expiration of funds under this title, and (D) organizing a policy advisory committee including (but not limited to) representatives from business, private foundations, and local and State educational agencies.

(3) The contract shall demonstrate the level of development of human relations skills which its programs will instill by (A) identifying the credentials of the staff responsible for such development; (B) describing the manner in which such skills will be developed; and (C) describing the manner in which the program deals with human relations issues facing education administrators.

(4) The contract shall establish a system for the evaluation of the programs conducted.

(b) Each contract shall be for a term of three years. Such contract shall not be renewable, except that a single three-year extension may be granted if the contractor agrees to maintain the programs with assistance under this title reduced by one-half.

REGULATIONS

SEC. 905. The Secretary is authorized to prescribe such regulations as may be necessary to carry out this title.

DEFINITIONS

SEC. 906. For the purposes of this title—

(1) the term "Secretary" means the Secretary of Education;

(2) the term "institution of higher education" has the meaning provided by section 1201 of the Higher Education Act of 1965;

(3) the term "school administrator" means a principal, assistant principal, district superintendent, and other local school administrators;

(4) the term "local educational agency" has the meaning provided by section 595 of the Education Consolidation and Improvement Act of 1981; and

(5) the term "leadership skills" includes, but is not limited to, managerial, administrative, evaluative, communication and disciplinary skills and related techniques.

TITLE X—NATIVE AMERICAN PROGRAMS

SHORT TITLE

SEC. 1001. This title may be cited as the "Native American Programs Act Amendments of 1984".

DISTRIBUTION OF FINANCIAL ASSISTANCE

SEC. 1002. (a) Section 803(a) of the Native American Programs Act of 1974 is amended by adding at the end thereof the following: "Every determination made with respect to a request for financial assistance under this section shall be made without regard to whether the agency making such request serves, or the project to be assisted is for the benefit of, Indians who are not members of a federally recognized tribe. To the greatest extent practicable, the Secretary shall insure that each project to be assisted under this title is consistent with the priorities established by the agency which receives such assistance.".

(b) Section 803(c) of the Native American Programs Act of 1974 is amended—

(1) by inserting "(1)" after "(c)", and

(2) by adding at the end thereof the following new paragraph:

"(2) No project may be disapproved for assistance under this title solely because the agency requesting such assistance is an Indian organization in a nonreservation area or serves Indians in a nonreservation area.".

ADMINISTRATION OF PROGRAMS

SEC. 1003. Section 812 of the Native American Programs Act of 1974 is amended to read as follows:

"ADMINISTRATION; DELEGATION OF AUTHORITY

"SEC. 812. (a)(1) The general administration of the programs authorized by this Act shall remain within the Department of Health and Human Services and, notwithstanding any authority under any other law, may not be transferred outside of such Department.

"(2) The Secretary shall continue to administer grants under section 803 through the Administration for Native Americans. The Commissioner of such Administration may not delegate outside of the Administration the functions, powers, and duties of the Commissioner to carry out such section.

"(b)(1) Except as provided in subsection (a)(2), the Secretary may delegate only to the heads of agencies within the Department of Health and Human Services any of the functions, powers, and duties of the Secretary under this title, and may authorize the redelegation only within such Department of such functions, powers, and duties by the heads of such agencies.

"(2) Funds appropriated to carry out this title, other than section 803, may be transferred between such agencies if such funds are used for the purposes for which they are authorized and appropriated.

"(c) Nothing in this section shall be construed to prohibit interagency funding agreements made between the Administration for Native Americans and other agencies of the Federal Government for the development and implementation of specific grants or projects.".

DEFINITIONS

SEC. 1004. Section 813 of the Native American Programs Act of 1974 is amended—

(1) in paragraph (3) by striking out the period and inserting in lieu thereof "; and", and

(2) by adding at the end thereof the following new paragraph:

"(4) 'Secretary' means the Secretary of Health and Human Services.".

EXPENDITURE OF AVAILABLE FUNDS

SEC. 1005. Section 814 of the Native American Programs Act of 1974 is amended—

(1) by striking out "1981" and inserting in lieu thereof "1986",

(2) by inserting "(a)" after "SEC. 814.", and

(3) by adding at the end thereof the following new subsection:

"(b) Not less than 90 per centum of the funds made available to carry out the provisions of this title for a fiscal year shall be expended to carry out section 803(a) for such fiscal year.".

The SPEAKER pro tempore. Pursuant to the provisions of the House Resolution 607, an amendment to strike out section 502 is considered as pending.

Under the rule, the gentleman from California [Mr. HAWKINS] will be recognized for 15 minutes, the gentleman from Wisconsin [Mr. PETRI] will be recognized for 15 minutes, the gentleman from Michigan [Mr. DINGELL] will be recognized for 15 minutes, and the gentleman from North Carolina [Mr. BROYHILL] will be recognized for 15 minutes.

The Chair recognizes the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Committee on Education and Labor presents for consideration today S. 2565, the Human Services Reauthorization Act. This bill represent the efforts of both the House and Senate to reauthorize those programs which assist those in our country who are in need—the poor and disadvantaged—young and old alike. This bill reflects much of what the House, on June 26, overwhelmingly passed in H.R. 5885, the Head Start and Human Services Amendments of 1984. It includes the reauthorization of Head Start, Follow Through, the Native Americans Program, and low-income energy assistance and provides for other new initiative and legislative finetuning.

Head Start is a program which continually proves itself. As recently as 2 weeks ago, new research was presented by the administration validating the positive impact of early education programs like Head Start as long as 15 years after the children participated. Among those children who participated, rates for dropping out of school, being arrested, needing special education, being on welfare, or having teenage pregnancies were remarkably lower than for similar children who did not participate. Rates for graduating from high school, being employed, and attending college were remarkably higher. The return through cost savings on the Federal dollar invested was documented at 7 to 1. That is a primary reason I am pleased to bring S. 2565 before the House.

Mr. Speaker, it is imperative that we reauthorized Head Start. Its authority expired 9 days ago. While it can certainly be continued intermittently, as part of a continuing resolution, that prospect does not bode well for program consistency. In addition, Head Start spending would be locked in at last year's appropriation level which would not be sufficient to maintain the level of current services. Based on what we now know, at the very time that we should be expanding Head Start participation, it is all too likley that we would be forced to trim children from the Head Start roles. Even now, Head Start provides for only 1 of 5 eligible children. It would be a shame if the House of Representatives—through no fault of its own, I might add, since we acted last June—should be depicted as allowing those disadvantaged children who are being served to become victims of inflation, or of our failure to act.

S. 2565 also contains modest perfecting amendments which will make Head Start a stronger and better pro-

gram. They will guarantee that the quality services which have been the hallmark of Head Start will be maintained. The functions critical to supporting Head Start workers will continue to be funded, including training for staff and parents; training assessment and credentialing components of the child development associate program and, resource access projects which improve services to handicapped children. Finally, the bill ensures that Head Start's highly effective comprehensive performance standards will continue to help programs across the country deliver the best possible care to Head Start children and their families.

The other programs being reauthorized by S. 2565—Follow Through Native American programs, and low-income energy assistance—all make vital contributions to the well-being of those members of our Nation who are most vulnerable. They all have the common goal of giving those in need "Hand ups" rather than "hand outs".

Our bill also makes several legislative changes in the Community Services Block Grant Program which were included in the bipartisan, House-passed H.R. 5885. Several small new initiatives, also presented in H.R. 5885, are included as well. S. 2565 adds authority for a scaled-down community food and nutrition program, and expands the scope of information and referral programs to include services for the elderly and handicapped, as well as children. Other education initiatives, some of which were passed by the House in other bills, such as the Carl D. Perkins Scholarship Program, are provided for also.

In conclusion, let me strongly recommend this bill for support by the House. It has the support of Republicans and Democrats in both Chambers of the Congress—as well it should. Let me also recognize the contribution of members of the Subcommittee on Human Resources who have worked for the development and improvement of these programs. Congressman TOM PETRI has provided his able assistance and cooperation in this matter and was a coauthor of H.R. 5885. The efforts of subcommittee members, Congressman PAT WILLIAMS, The author and major proponent of the Native Americans programs, and Congressman MAJOR OWENS, the author or the Low-Income Energy Assistance Act are to be particularly commended.

The House voted to reauthorize the programs contained in S. 2565 on June 26, by a vote 409 to 10. The Senate dragged its feet on the bill, then after an agreement had been struck late last week, added on some of its favorite programs in the 11th hour, holding Head Start and other needed activities hostage. Though I am the chairman of the Education and Labor Committee, I was not privy to these last minute maneuvers. Nor should the House be held accountable. I urge my colleagues to rise above partisanship and reauthorize these needed and proven programs. To do anything less would be an abdication of the role of Congress in helping those who need it most.

Usually, in closing, I would ask the House for its support—hopefully its bipartisan support. In this instance I feel confident, in view of the importance of the programs involved, in suggesting unanimous support.

□ 1550

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wisconsin [Mr. PETRI].

Mr. PETRI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to urge my colleagues to join me in voting for S. 2565. S. 2565 is not simply the work of the Senate Labor and Human Resources Committee, but the result of hours of negotiations between House and Senate staff representing legislators from both parties. The new chairman of the House Education and Labor Committee, Mr. HAWKINS, deserves special credit for the way he has quickly assumed leadership in getting the matter before us today. S. 2565 represents the equivalent of a conference report without a formal conference ever having been called. Like a conference report, no one is perfectly content with every provision in the Senate amendments, but all participants in the negotiations seem generally satisfied with the overall compromise that was reached. On that basis, and with time running out in this session of Congress, I urge an affirmative vote on this measure today.

The core of this legislation, the balloon carrying all the other provisions, is reauthorization of the Head Start Program. A recent study by the High/Scope Educational Research Foundation confirmed what most of us on the Education and Labor Committee believed already, that Head Start does make a difference. The study found that two-thirds of disadvantaged youngsters attending preschool later graduated from high school, compared to one-half of a similar control group not attending preschool. Preschooling also halved the percentage of such individuals classified as retarded later in life while doubling the percentage later enrolling in postsecondary education. Those participating in preschool education also showed significantly lower arrest, unemployment, and teenage pregnancy rates when they got older than the others. In short, Head Start was shown to be a key force for breaking the poverty cycle that binds all too many disadvantaged American families. I have seen this at work in my own central Wisconsin district, where the University of Wisconsin-Oshkosh and a number of CAP agencies' run top-notch Head Start programs.

This legislation is needed to maintain and improve Head Start. With formal authorization for the program having expired 9 days ago, it's high time we pass this legislation continuing this exceptional program for 2 additional years. One possibly ambiguous provision included here modifies the requirement for selecting Head Start grantees to require the Secretary of Health and Human Services to make a finding that an existing grantee fails to meet programmatic and fiscal requirements before a priority for designation can be denied. It is my understanding, based on the Senate committee report on this bill, that it is not the purpose of the amendments to bar the Department of Health and Human Services from awarding an expansion grant to a new grantee in an area already served by an existing grantee. Rather, the purpose of the amendments is only to require that such an expansion grant not be made to a new grantee until after the Department has first given priority to the existing grantee.

In one sure sign that this session is drawing to a close, the Senate has added a variety of education and public assistance programs to this bill reauthorizing Head Start. Certainly the most controversial is a new formula from the Senate for low-income energy assistance. The most I can say good about this formula is that it contains a basic hold-harmless provision protecting needy senior citizens and other low-income individuals from devastating cuts in the assistance needed to defray heating costs during the cold Wisconsin winters.

Perhaps the best new program added to this bill is the revised Leadership in Educational Administration Development [LEAD] Act. I joined the gentleman from Pennsylvania [Mr. GOODLING], in introducing the original version of this measure as H.R. 4775 last February. Since then, we have received much support for our effort to improve principal education from our colleagues and several outside organizations, including the American Association of School Administrators, the National Association of Secondary School Principals, and the National Education Association. I especially want to thank the junior Senator from Rhode Island [Mr. CHAFEE], and the senior Senator from Florida [Mr. CHILES], for their dogged support of this act in the Senate and their deep commitment to excellence in education. Further. I have been particularly encouraged by the interest in the LEAD concept expressed by the Wisconsin Department of Public Inspection, led by Superintendent Herbert J. Grover who hopes to establish a LEAD academy in my State. Several

other States are also moving in similar directions, including New Jersey, South Carolina, Utah, and Minnesota.

During the past 8 months, we have also received several suggestions about how we could make our LEAD proposal even better. The version contained in S. 2565 incorporates some of those suggestions without changing our basic concept. Studies have shown that the key to a good school is a good school administrator. Yet, too little has been done on the Federal level to help improve the quality of school administrators. This measure provides Federal seed money to start—or expand—a nationwide network of LEAD academies where school administrators can receive continuing education in the latest leadership and management techniques drawn from business executives, expert educators, and the military. I know of no more cost-effective way to improve the quality of public education in America than this modest investment in principal education.

The core programs contained in this measure are authorized or reauthorized through 1986. That means we must look at them over again next session. This includes the Community Services Block Grant Act, which was not due to expire until 1986 anyway. I have talked with the chairman of the Human Resources Subcommittee, the gentleman from North Carolina [Mr. ANDREWS], about the need to closely examine the CSBG program before it is extended for any additional time. I am supporting the minor changes in the CSBG Act contained in this measure as merely a prelude to a more comprehensive review of the act during the next Congress.

With these comments in mind, let me close by again urging my colleagues to vote for this measure. Head Start is too good a program to let die, or let hang in the limbo of a continuing resolution. Children are our most valuable resource. Head Start maximizes this resource. It deserves to be reauthorized. Vote for S. 2565.

Mr. HAWKINS. Mr. Speaker, I yield 30 seconds to the gentleman from Indiana [Mr. MCCLOSKEY].

Mr. McCLOSKEY. Mr. Speaker, I rise in support of the Human Resources Reauthorization Act, and of title V in particular. In addition to reauthorizing Head Start. Program of historic significance to the children of Indiana, and programs such as low Income Energy Assistance, which helps many Hoosiers during Indiana's cold winters, this legislation will also authorize funds for a center which will help all American children, a model Center for Excellence in Education at Indiana University at Bloomington.

In the past 2 years, a series of reports have heightened our awareness of the dire need for a national commitment to revitalize and improve the quality and level of education in our elementary and secondary schools. These reports, which include the National Commission on Excellence in Education and the Task Force on Education for Economic Growth, spoke to America's need for:

The application of computer and communication technology to teaching and learning;

The need for new teacher training methods;

The need to retrain elementary and secondary school teachers in science, math, and foreign language; and

The need to develop partnerships between educational institutions, business, and private industry, and Government to prepare for the needs of the next century.

The National Science Board wrote in its report:

> We must return to the basics, but the "basics" of the 21st century are not only reading, writing, and arithmetic. They include communication and higher problem solving skills, and scientific and technological literacy—the thinking tools that allow us to understand the technological world around us.

As our society changes with the computer and telecommunications, so our educational needs change. I am proud to say that Indiana University is stepping forward to meet this challenge.

In addition to training primary and secondary school teachers, the center will also:

Provide an active model for an education partnership that involves schools, universities, business, industry, and every level of government.

The Indiana University Center will bring the new interactive computer and telecommunications technology into the educational process. It will conduct research in innovative methods of instruction. And it will provide educational materials and training programs for teachers and administrators all over the country.

This facility will benefit from the resources of Indiana University's prestigious:

College of Arts and Sciences;

Departments of Computer Sciences and Telecommunications;

The School of Business;

The School of Library and Information Sciences;

The School of Public and Environmental Affairs; and

The School of Education.

In addition to the authorization provided by this legislation, Indiana University is bringing together other necessary funds for the success of this project. The university is raising $17,300,000 from private corporations and foundations. The State of Indiana has designated a $15 million facility to be used for the center. And the State has committed itself to providing annual operating support for the next 6 years, totaling $44 million.

Education flourishes in a nurtured and disciplined environment, tended by teachers and parents, by texts and equipment, by scholarship and research. The Center for Excellence in Education at Indiana University will bring these factors together, and match them with its financial commitments and skillful faculty to help secure our educational integrity. Because we cannot persevere as a Nation at risk, I ask that my colleagues support title V of this important legislation.

Mr. HAWKINS. Mr. Speaker, I yield 30 seconds to the gentleman from New York [Mr. OWENS].

Mr. OWENS. Mr. Speaker, I rise in support of S. 2565, the Human Services Reauthorization Act. The bill before us represents a compromise among competing interests and perspectives. As such, it will disappoint some and please others. Overall, however, it must be viewed as the means by which divergent perspectives were reconciled to maintain programs and services which are vital to the American people.

Head Start was born out of the hope that an early educational experience would have a significant impact on later school performance. It has proved its worth. A recent study not only showed that Head Start children did better in school, but that they also experienced lower rates of delinquency, dropping out of school, and lower rates of adolescent pregnancy. The results are not surprising. Children who perform well in school are given the message that there is hope in their future—that they will be able to attain the skills and education needed for better jobs. Children without such a positive vision of the future are far more likely to fall by the wayside early in life. Head Start is one important way in which we prevent these early casualties and teach confidence in the future.

The Reauthorization Act, in recognition of the need to find ways to care for school-age children with working parents, includes a small but new program to address the need for after-school care. Going home to an empty house may be unpleasant for an adult. Children are placed at a greater disadvantage and because of the fact that there is no one to see that homework is done and safety assured there is a constant problem for both children and parents. The act takes a step forward by beginning to address this problem.

The reauthorization of Follow Through is another positive aspect of the bill before us. Although the authorization level has been reduced, it will provide the needed funds to keep this program alive until its accomplishments can be evaluated. It is my belief that Follow Through is a critical

element in preserving the gains made by Head Start.

The community services block grant is reauthorized for 2 years. This gives the Community Action Programs a new lease on life as they seek to ameliorate the devastating problems of the rapidly increasing poor. The CAP's are needed as a finger in the dike, but we must understand that they cannot stem the tide of misery caused by rampant unemployment in an economy which is experiencing an increasing gap between jobs and workers.

The Community Food and Nutrition Program is a new and small initiative to identify food resources and to develop networks to share information and resources. Recent efforts to distribute surplus foods through community-based organizations make it clear that community groups need some assistance to accomplish this and similar tasks. Community groups which want to develop food pantries or provide meals need support. This very minimal program should serve to encourage and assist community groups.

The last major component of the Reauthorization Act is the Low Income Energy Assistance Program. As the sponsor of House legislation on LIEAP, I am pleased that several important changes are included in this bill. There has been a problem with serving the noncategorically eligible, be they workers or retirees. The reauthorizaton prevents discrimination against low-income people who are not categorically eligible. It also requires that the States report on the households served with elderly or handicapped individuals. Nondiscrimination and reporting should serve to facilitate access to the program by the working poor, the elderly, and the handicapped. This change is responsive to the widely held belief that these groups are not adequately served.

I strongly support the Human Services Reauthorizaton Act and urge all of my colleagues to join me. Reaching a resolution on so many issues has not been easy and I commend my colleagues for their patience and tenacity.

Mr. HAWKINS. Mr. Speaker, I yield 4 minutes to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

I rise today to support S. 2565, the Human Services Reauthorization Act, and the vitally important programs it contains.

One of these programs is the Talented Teacher Act which I cosponsored with Representatives PAUL SIMON, BILL GOODLING, TOM COLEMAN. Senators ORRIN HATCH, TED KENNEDY, and DON RIEGLE all deserve great credit for their support for the legislation in the Senate.

The Talented Teachers Act provides scholarships to the brightest students in our high schools who agree to go into the teaching profession—and fellowships for outstanding teachers now in the classroom, to advance themselves professionally.

With the Talented Teachers Act, Congress can add a new focus to the Federal role in education: Excellence. Traditionally, the Federal Government has focused on access and equity with regard to education. Today, by passing the Talented Teacher Act we can make a clear statement that now is the time to create new incentives so that we can enlist some of the most talented to teach our young.

We've had innumerable commissions and blue ribbon task forces that have all reached one conclusion—our education system lacks the magnets to attract excellence to this critical area.

The Talented Teacher Act is one of the first major legislative efforts to directly address these recommendations.

The goal of the Talented Teacher Act is simple: To help ensure that the best and brightest of our young people are attracted to the teaching profession—and encouraged to stay there.

And it sets about achieving this goal in a straightforward—and cost-conscious—fashion. The act sets up a 4-year experimental program which will provide up to $5,000 a year in scholarships for the best and brightest high school graduates to attract them to the teaching profession. The students will be required to teach for 2 years for each year they received this college scholarship.

The program also provides fellowships for outstanding teachers to take a 1-year sabbatical for study and further development of their teaching skills. One teacher in each congressional district will be singled out for his or her contributions to education. After the year, the teachers will return to their school districts to share the knowledge they've gained with their students and colleagues.

The Talented Teacher Act does not pretend to solve all the problems of our education system. But it does acknowledge that while good facilities, books, and high-tech gadgetry are important to a quality education, without top-notch teachers, they are mere window dressing. In other words, the Talented Teacher Act is a first step toward recognizing that teachers are the essential component for learning in the classroom.

Not only is the Talented Teacher Act an important first step in the effort to achieve the goal of excellence in American education, but it is a modestly priced one. The price tag is $96 million over 4 years, for both the fellowship and scholarship programs.

The authorization is as follows: For the scholarship program, for fiscal year 1986, $20 million; for fiscal year 1987, $21 million; for fiscal year 1988, $22 million; for fiscal year 1989, $23 million. For the fellowship program the following is authorized, for fiscal year 1986, $1 million; for fiscal year 1987, $2 million; for fiscal year 1988, $3 million; for fiscal year 1989, $4 million.

The Talented Teacher Act has been endorsed by every major education association and has received widespread bipartisan support both here in Congress and around the country.

Finally and very importantly, I would like to give special thanks to Albert Shanker, the president of the American Federation of Teachers, and Ernest Boyer, president of the Carnegie Foundation for the Advancement of Education for their technical assistance and generous support. Both men worked hard for the passage of this legislation, with the American Federation of Teachers legislative staff working almost around the clock in recent days as interested Senators and House Members worked to hammer out the details of the legislation.

Before this Congress leaves, let's pass this bill and send the country a message that education reform consists of more than studies. Let's show we're ready to act on a good idea. The Talented Teacher Act is an appropriate and needed first step to give teachers the recognition they deserve. I urge my colleagues to support this bill. Thank you.

□ 1600

Mr. PETRI. Mr. Speaker, the gentleman from Illinois [Mr. ERLENBORN] the ranking Republican member of the Education and Labor Committee, was called away from the floor a few minutes ago for a meeting at the White House, and he has noted his opposition to this bill in a statement that will be submitted for the RECORD under general leave.

Mr. Speaker, I yield 2 minutes to my colleague, the gentleman from Missouri [Mr. COLEMAN].

Mr. COLEMAN of Missouri. Mr. Speaker, I am pleased that the bill before us includes the Talented Teachers Act, a bill on which I am an original cosponsor.

As a member of the Merit Pay Task Force, I was involved in studying the many problems facing the teaching profession and considering possible solutions. The Talented Teachers Act, which recognizes the importance of the teacher in the classroom, embodies two of the recommendations shaped by the Merit Pay Task Force.

The bill provides for scholarships to scholastically high ranking college students who pursue teaching in return for a pledge to teach for up to 8 years. It also provides for fellowships to able teachers allowing them to conduct research, study, and travel which would

enable them to enhance their future teaching pursuits.

The Talented Teachers Act addresses two of the most fundamental problems facing the teaching profession today: attracting the best and the brightest students into teaching and keeping the most talented teachers in the classroom.

This legislation gives us a tremendous opportunity to take a first step toward obtaining and keeping quality teachers in the classroom.

I am pleased to see the inclusion of the Talented Teachers Act in the Human Services Amendments of 1984.

Mr. HAWKINS. Mr. Speaker, I yield such time as I have remaining to the gentleman from North Carolina [Mr. ANDREWS].

However, first, may I say at this time that the passage of this bill is a tribute to his leadership as chairman of the subcommittee. I know of no one who has worked as hard as he has in connection with the passage of this legislation. It certainly is a great privilege to be able to yield at this time to him for a brief statement.

The SPEAKER pro tempore. The gentleman from California [Mr. HAWKINS] has 7 minutes remaining, and the gentleman from North Carolina [Mr. ANDREWS] will be recognized for 7 minutes.

Mr. ANDREWS of North Carolina. Mr. Speaker, I am pleased to rise in support of S. 2565, the Human Services Reauthorization Act. Under the able guidance of GUS HAWKINS, the Committee on Education and Labor Chair, the House has a chance to renew programs that are vital to the lives of many Americans less fortunate than some of us. Among them are three which I would like to mention briefly, Head Start, Follow Through, and Programs for Native Americans.

Head Start has a proven track record of helping poor preschoolers by addressing their physical, social and intellectual development, and the needs and well-being of their families. Over 90 percent of all Head Start families live below the poverty line. Almost two-thirds of all Head Start children are minority; about 12 percent are handicapped. Today almost 415,000 children are enrolled in full-time Head Start programs. Head Starts unique approach, emphasizing direct parental involvement, strong community support and a deep commitment to helping families meet all their needs, more than pays for itself through lower dropout rates and increased self-sufficiency.

Follow through develops and provides high quality classroom programs and supportive services to disadvantaged children across the United States. The program literally "Follows Through" on gains made by children in preschool programs such as Head Start. Some 30,000 children are currently served by the program directly, with another 500,000 benefiting indirectly. Follow Through provides a high quality full-day classroom program covering basic skills, social studies, arts, and sciences, as well as access to comprehensive health, social, nutritional and psychological services. Parental involvement is also an integral part of the program

Native American Programs seek to foster the development of stable, diversified local economies and economic activities which provide jobs, promote economic well-being and reduce dependency on welfare services. Programs also support local access to, and coordination of, services which safeguard the health and well-being of Native Americans which are essential to a stable economy. One of the primary objectives of the programs are reductions in the rates of unemployment among Native Americans.

Mr. PETRI. Mr. Speaker, I would just like to say that the necessity to manage this bill on the floor made it impossible for me to be over at the signing of the Older Americans Act as well. But it is certainly a great day to see that bill signed into law.

Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from Massachusetts, the Honorable SILVIO CONTE.

Mr. CONTE. Mr. Speaker, S. 2565 is a funny bill. It contains some very worthwhile programs, like the Head Start reauthorization, the community services block grant reauthorization, and even the Low Income Home Energy Assistance Program reauthorization.

But the Senate has tacked a number of other things on, including authorizations for projects in Utah, and others, as well as authorizations for a number of programs that we know very little about, including Federal merit scholarships, leadership in educational administration and others. And the Senate has put the House in a position of accepting these items or having time expire before a program like Head Start can be reauthorized.

I have no problem with the Head Start reauthorization. In fact, I support it, and supported it when the House bill was passed here.

But there are a number of provisions that concern me, and one provision that concerns me greatly.

In this bill, there is a new formula for low income energy assistance. Those involved in negotiating this formula have indicated to me that the formula arrived at is the best of all the formulas that have been considered in this session of Congress. I have had a letter from the Governor of Massachusetts, stating that he favored this formula, as well as calls from people like the Massachusetts Secretary of the Executive Office of Economic Development, Amy Anthony, stating their agreement with the formula.

The formula will lower the allocation to the region of the country that has the highest per capita expenditures due to heating costs, New England. In the formula, there is a hold harmless, such that in fiscal year 1985, no State will receive less than it did in fiscal year 1984.

However, in the provision for a hold harmless for fiscal year 1986, that hold-harmless figure drops from $2.075 billion to $1.975 billion. As a result, there will be decreases in certain States in fiscal year 1986. I am shocked that the Governor of the State of Massachusetts would consent to that provision, but he has, as have other Representatives of Massachusetts.

I have had conversations with some of the key people in the Senate who were working on this formula. In fact, in the Senate debate on this bill, Senator JOHNSTON included a statement that the only reason he had agreed to any hold harmless was in deference to the Speaker's and my concern over the effect of this formula on Massachusetts.

But frankly, I cannot understand why there has been acceptance of a hold harmless in fiscal year 1986 that is below the current level of appropriations, which means that some people who have been kept out of the cold will no longer receive assistance with their high New England heating bills. That greatly distresses me.

When I found out about this bill, and the procedure by which it would be considered in the House, I contacted various Members of both the House and the Senate on this issue. The Senate was intransigent on this one small change of raising the hold harmless, and the House went ahead to get a closed rule while I was in conference on the continuing resolution.

Meanwhile, everyone has been telling me, don't try to change this bill, it will kill it, and programs like Head Start won't get reauthorized. The Children's Defense Fund offered me a dozen roses if I didn't try to change the bill, and in the meantime, mysteriously, my office began to get many, many calls from Head Start folks in my district.

This is not the way we should be legislating. The House has never passed a low income energy reauthorization, and now we are being asked to swallow whole the Senate package. I am disappointed in this bill, and in the process. In fact, the only way to express concern over any particular provision in the bill is on the up or down vote on final passage. I feel that is patently unfair to the Members of this House.

Mr. PETRI. Mr. Speaker, I now yield 3 minutes to my colleague, the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, I rise in support of S. 2565, the "Human Services Reauthorization Act," which extends and amends the Head Start, Follow Through, and Low-Income Home Energy Assistance Programs. In addition to providing for a series of changes in the Community Services Block Grant Program, this measure authorizes a new State grant program for Dependent Care Planning and Development. The Senate also has included five additional education authorizations that I will not be addressing in these brief remarks.

On June 26, the House passed H.R. 5885, the Human Services Amendments of 1984, by a vote of 409–10. Final action in the other Chamber has been delayed because of disagreements over authorization levels for expiring programs, the merits of continuing the Follow Through Program, certain features in the House-passed Child Care Information and Referral initiative and some very difficult Low-Income Energy Assistance Program formula issues.

It now appears that the outstanding points of difference have been resolved and we can take final action here today to insure that a number of vital human services programs will be extended and their important benefits and services continued.

I would have preferred a 3-year reauthorization of the expiring Head Start Program, rather than the 2-year reauthorization provided for in the Senate measure, and the higher House-approved funding levels. On balance, however, I believe that the Head Start provisions incorporated in the bill we have under consideration are sound and constructive ones and the authorizations sufficient to enable this successful program to continue to provide vital education and support services to low-income pre-school children.

I am pleased that the Human Services package that has come over to us calls for a new 2-year Dependent Care State Grant Program. Authorized at $20 million each for fiscal years 1985 and 1986, this program is designed to assist the States in planning for, developing, and improving State and local resource and referral systems to provide information concerning the availability, types, costs, and locations of a variety of dependent care services.

Again, while I would have preferred language similar to that included in the House-passed title that would have provided some assistance for operational costs for these types of programs, I believe that the Senate provisions represent an important first step forward.

Finally, the bill contains a 2-year authorization of the Low-Income Home Energy Assistance Program (LIHEAP). For years, this program has been plagued by a complex and confusing allocation formula. The LIHEAP provisions in this bill include a revised allocation formula based upon factors that reflect the total heating and cooling expenditures to low-income households in a State. To minimize the disruption that a change in formula can sometimes cause in program operation, there is a hold harmless provision included so that no State shall receive less than it did in fiscal year 1984, at an appropriations level of $2.075 billion. Additionally, the fiscal year 1986, there is a lower hold harmless at an appropriations level of $1.975 billion, and a small State minimum which is triggered at an appropriations level of $2.25 billion. In effect then, the formula change will not be felt until fiscal year 1986.

There were further changes made to the law that respond to criticisms related to fraud, waste, and abuse in program administration. States will be required to expend funds received under this program in accordance with their State plans, and to explain for what purpose funds are being carried over from one year to the next. In addition, the percent of funds that can be carried forward is reduced from 25 to 15 percent. Current law specifically prevents the Secretary from promulgating regulations for this program. This bill requires the Secretary to issue regulations to prevent waste, fraud, and abuse. The intent is clear—to strengthen the program against current criticisms.

I am particularly pleased that this bill contains a provision that clarifies that States cannot differentiate between households that are, and are not, receiving other public assistance benefits in order to receive benefits under this program. This provision has great import to the working poor and the elderly who have, in some instances, been excluded from participating under the current program.

None of these compromises was easily reached. In each instance, the intent was to improve the quality of the program and the services provided. I urge my colleagues to vote in support of this conference report.

Mr. HAWKINS. Mr. Speaker, I yield 1 minute to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS of Montana. Mr. Speaker, S. 2565 is a very important bill. It not only strengthens the Head Start Program, but also helps to insure Federal funds to improve the quality of child care through the Child Development Associate Program. There has been increased concern about the quality of child care in this country. By providing funds for child development associate training as well as assessment and credentialing, this bill encourages workers to improve their skills as care-givers.

Without Federal resources, the costs of a CDA credential would be beyond the reach of low-paid Head Start and Child Care workers. CDA was created under the Nixon administration as a tool to improve the quality of child care; 15,000 child care workers currently have a CDA credential. S. 2565 guarantees that many more will be able to become Child Development Associates and strive to provide better support to children and their families.

Mr. PETRI. Mr. Speaker, I yield 1 minute to the gentleman from Utah [Mr. NIELSON].

Mr. NIELSON of Utah. Mr. Speaker, I would like to engage the ranking minority member of the subcommittee on this issue in a colloquy.

I would like to address my inquiry by way of clarification. My inquiry is this: Could a State use a portion of its dependent care grant funds for planning or developing or improving resource and referral systems that extend to programs for senior citizens who are in need of elder day-care services?

Mr. PETRI. Mr. Speaker, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Wisconsin.

Mr. PETRI. The gentleman is correct in his understanding. A portion of a State's allotment could be used for these purposes. The bill defines "dependent" to include persons over 55 years of age.

Mr. NIELSON of Utah. I thank the gentleman.

I would like to make one other comment. I am pleased to see that a compromise in low-income energy assistance has been reached. The formula which was adopted is similar to that first proposed in the Energy and Commerce Committee, on which I have the privilege of sitting. It was a good formula because it recognized total energy used in both heating and cooling by low-income recipients.

In the Education and Labor Committee on which I also sit, I tried unsuccessfully to get the formula amendment passed but I am happy with the compromise reached because I think the formula is fair to all Americans.

I thank the gentleman for yielding and urge support of the bill.

Mr. HAWKINS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. PETRI. Mr. Speaker, I understand I have 1 minute remaining, and I yield that remaining time to my colleague, the gentleman from Pennsylvania, [Mr. WILLIAM GOODLING].

□ 1610

Mr. GOODLING. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to bring to our attention some very good programs here. Head Start has been one that got off to a slow start but is one of the better programs that we are involved in from the Federal level, along with

title I or chapter 1. The lead program is necessary because we always spend so much time doing a lot of things for teachers but we never do anything about the leaders, and the leaders are the principals.

Mr. Speaker, nothing changes in a school unless the principal leads.

The Talented Teachers Act is a good program now that it is cleaned up. The latchkey part of the dependent care is good.

I would recommend to the Appropriations Committee that they not fund the Federal Merit Scholarship Program because that is a redundant program. We already are doing it in some of these other programs that are already in this bill. That was something attached on the Senate side.

Mr. Speaker, as I said, I hope the Appropriations Committee would not fund that particular part of the program.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Michigan [Mr. DIGELL].

Mr. DINGELL. Mr. Speaker, I yield such time as he may consume to the gentleman from Indiana [Mr. SHARP].

Mr. SHARP. Mr. Speaker, I stand in support of S. 2565. The legislation we are now considering is comprised of six programs that cross the spectrum of human need—from the educational needs of our Nation's disadvantaged children to the heating, cooling, and nutritional needs of our Nation's low-income elderly. There is little dispute among the Members on this floor today that these are worthy programs. Yet several of these programs have disproportionately been the target of efforts to balance the budget, not by belt tightening for all programs, but rather at the expense of people who have nothing more to give. This bill does not fully meet the needs of the people using these programs, but it is an appropriate compromise between human concerns and budgetary concerns.

The bill contains the Head Start Program which, through its high-quality preschool education effort, has provided rich benefits to our Nation's children. A new study by the High-Scope Education Research Foundation provides the first real measure of what rewards can be reaped from the modest Head Start expenditures.

The researchers compared disadvantaged children who attended preschool with those who did not. They found that those with the additional early schooling had substantially higher high school graduation rates, lower incidence of teenage pregnancy, markedly less incidence of criminal arrest, and only 18 percent were on welfare at age 19 compared with 32 percent of those who did not attend preschool.

The bill also contains the Community Services Block Grant Program. In the State of Indiana this program is run through the department on aging and community services, the same department which administers the Low-Income Weatherization and Energy Assistance Programs.

The proposed funding level for Indiana is approximately $5 million. This $5 million is used for occupational development centers, job training, low-income elderly housing rental, financial counseling, consumer awareness, food co-ops, and meals-on-wheels to mention a few. Since its inception no program has been as comprehensive, responsive, innovative, and successful in meeting the needs of low-income citizens.

The weatherization portion of this bill will allow the State to conform the eligibility requirements of the Department of Energy Low-Income Weatherization Program with the Low-Income Home Energy Assistance Program. It also adds the authority to fund furnace modifications, which in many instances can save as much or more than simple insulation efforts.

The bill also provides the States with needed flexibility in deciding how to get the most out of each home retrofit by providing a maximum average expenditure of $1,600 per household rather than the current $1,400 per household absolute ceiling. This flexibility will serve in the long run to greatly diminish the need for low-income fuel bill aid. Finally, the weatherization title provides for the Department of Energy to review what has worked in the States and, in turn, to use this to reward successful States by increasing their allocation from a newly created performance fund. For the State of Indiana, which has been widely recognized for its superior efforts in this area, this would be a welcome pat on the back for work well done.

Finally, of greatest interest to the Subcommittee on Fossil and Synthetic Fuels which I chair, is the Low-Income Home Energy Assistance Program. The Committee on Energy and Commerce has worked hard over the past 2 years with the Committee on Education and Labor to hammer out the provisions of this title.

Although the legislation contains several program adjustments, there are three major issues that have been the central focus of subcommittee hearings and heated debate: Funding level, allocation formula, and information requirements.

The foremost issue is that the poor and elderly are increasingly being faced with utility bills they cannot pay. I have heard from people in Indiana whose gas bills are higher than their monthly mortgage payment. These are not deadbeats; they are for the most part solid citizens who do not want a handout. But people on Social Security, or people out of a job, or people struggling to make ends meet cannot pay utility bills that keep on going up.

Since 1978, the average electricity bill in America has increased by 65 percent, the average natural gas bill by 100 percent, and the average heating oil bill by 140 percent. And if this is a cold winter, the impact will be even worse. I have had people in Indiana call my office, crying, asking how they can keep their heat from being shut off. I believe most Americans want to help those in greatest need. But I also know that the rates for other consumers will go up further if the poor and elderly are unable to pay their bills.

In the past 3 years, the administration's budget request for energy assistance has been abysmally low. A bipartisan majority of the Congress has raised it each year.

In past hearings the committees have heard testimony that to protect the poor against residential energy price increases since 1978 would require at least $3.5 billion in fiscal year 1985.

Even in face of this clear need, the House committees' decision on the appropriate authorization level for this program took into account the need to reduce Federal deficits.

In an attempt to balance these factors, the original House committee version provided $2.26 billion in fiscal year 1985, rising to $2.80 billion by fiscal year 1988.

The bill as seen today would authorize $2.14 billion for fiscal year 1985 and $2.275 billion for fiscal year 1986. Thus, the bill, although lower in funding level, still allows for modest inflationary increases.

Second, and probably the most hotly debated issue, is how to allocate funds to the States. Currently allocation formulas are based on a variety of complex factors, including heating degree days, heating degree days squared, the increase in home heating expenditures from 1978 to 1980, and population below 125 percent of poverty, to mention a few.

Witnesses and Members have expressed concern that the current allocation formula is flawed because it calculates State need based upon energy price increases only between 1978 and 1980. Without question, to approximately distribute funds to those most affected by rising energy prices, it is essential that the base period for calculating these increases be updated to use the most current data available. This is done by requiring the most recent available expenditure data be used. By making this change, the allocation formula in the proposed legislation would take into account the rapid

natural gas price increases of the past 3 years.

Further, the formula has been streamlined to consider only the heating and cooling expenditures of low-income households rather than all household energy expenditures. This change gets to the heart of the philosophy behind the program and most accurately reflects the needs of the eligible population.

Because some States could potentially receive funding levels under the formula lower than they had planned for, the formula change would provide a hold-harmless provision for fiscal year 1985. This provides that for any appropriation above $2.075 billion, no State shall receive fewer dollars than they would have received at $2.075 billion under the old formula. In fiscal year 1986 this hold harmless level would drop to $1.975 billion, recognizing that the States have had time to adapt their programs to the new funding procedures. Finally, the new formula recognizes that certain very small States would have their funds cut in half at certain funding levels, and thus they are given a modest protection. In sum, the formula will now be easier to understand and more logically related to the purposes of this program.

Finally, States currently are required to report very little to the Department of Health and Human Services or the Congress on program operation. Consequently, several Members have expressed their concern with the potential for waste, fraud, and abuse to which this lack of information contributes. The proposed legislation addresses this concern by requiring slightly more detailed information for program oversight. For some States there would be no increased burden other than sending data they have already collected to the Department of Health and Human Services.

I believe this bill responsibly balances budgetary concerns with our requirement to meet basic human needs, and I strongly urge the passage of their legislation.

JOHNSTON-STAFFORD FISCAL YEAR 1985 (FLOOR AT FISCAL YEAR 1984 SHARES OF $2.075B) FUNDING ASSUMPTION —$2.1B

HEALTH AND HUMAN SERVICES DESCRIPTION OF ROBIN HOOD HOLD-HARMLESS

The proportional increases of States are capped at whatever point is needed to provide just enough funds to bring other States to the floors provided by the formula. If a State's share of home energy expenditures represents an increase from fiscal year 1984 which is less than the proportional increase cap needed to bring losing States up to the floor, that State's share of total funds available is simply its share of home energy expenditures. In fiscal year 1985, with a floor of 1984 shares of $2.075 billion and total funds of 2.1 billion, all but one State are either being reduced from their shares of home energy expenditures or being raised to the minimum floor.

Mr. DINGELL. Mr. Speaker, under the rule granted this bill, an amendment to strike section 502 is pending by action of the Rules Committee.

Mr. Speaker, I commend the Rules Committee for granting the rule and I commend them for that section. At the time the rule was granted and at the time that action was taken, the amendment was important. The section that I have referred to provides for $10 million for a uranium health effects laboratory and clinic in Utah.

I support the purpose of the section and I support the clinic and the health effects laboratory in Utah. When the Committee on Energy and Commerce participated in the request for this rule, it was the intention of our committee that the provision referred to should be stricken from this bill. That is, there should be stricken from this bill. That is, there should be stricken from this bill provisions nearly identical to those contained in a conference report on the National Institutes of Health authorization legislation. And it did not seem at that time to make sense to approve the same provision in two bills at the same time.

However, in the interest of saving time in the House and avoiding a situation which could require further action by the other body which is now to approve the NIH conference report this afternoon, I would urge defeat of the amendment at this time as a housekeeping action by this Congress, not terminating the provision of the uranium health effects laboratory and clinic in Utah, which as I have indicated is meritorious, but which does not need to be in two bills.

It is clear that when these pieces of legislation are codified, the appropriate technical and conforming changes can then be made to insure that only one provision actually becomes law, as I have mentioned. I would therefore urge my colleagues to reject the pending amendment permitting final passage of the Head Start bill in a form

identical to that passed by our colleagues in the other body.

In addition to the Head Start legislation which I strongly support, the legislation contains also an extremely important reauthorization for the low-income home energy assistance program, as well as making some changes in the administration of the low-income weatherization programs.

To sum up, Mr. Speaker, I urge my colleagues to defeat the pending amendment. It will not hurt the purposes of those who have sought the amendment, since it is included in other legislation; and, then to pass this important legislation.

Mr. Speaker, I reserve the balance of my time

The SPEAKER pro tempore. The Chair recognizes the gentleman from California [Mr. MOORHEAD].

Mr. MOORHEAD. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Maine [Ms. SNOWE].

Ms. SNOWE. Mr. Speaker, I rise in support of S. 2565, legislation to reauthorize the Head Start Program, and other programs including the Low Income Home Energy Assistance Program. Recognizing the vital need for the continuation of energy assistance for Maine residents, I support its reauthorization, but I also wish to register my dissappointment that Maine and other States will receive a smaller apportionment under the new formula for this program during fiscal year 1986.

This winter, over 68,000 Maine households will receive energy assistance funding. The average recipient in Maine received $350 from this program. This assistance provides an essential service to help eligible recipients cope with our high energy costs. Low income households in Maine are paying up to 40 percent of their hard-earned income on heating fuel. Without this assistance, the results would be tragic; with this assistance, the State is still left short of meeting these needs adequately. The waiting list in Maine to receive LIHEAP assistance grows longer every year.

Mr. Speaker, I believe that it is extremely disappointing that Maine and other States stand to receive smaller portions of the Federal funding for such an important program. Under the new formula for this 2 year reauthorization, Maine stands to receive a smaller allocation. While a "hold harmless" provision for fiscal year 1985 will keep Maine's level of assistance from declining below the level the State received this year, $28 million, no such provision is in place for 1986, and Maine stands to lose $1.35 million as a result.

It is especially discouraging to note that Maine will lose under this formula, whereas other States whose cold weather energy assistance needs are not as great stand to gain significantly. States in the Northeast have argued strongly against unfair legislative proposals to shift funds to other States who use most of their funds for air-conditioning. Given that an earlier alternative proposal would have provided Maine and other Northeast States a significantly smaller allocation of total funding for the LIHEAP Program, I recognize that this proposal has come as the result of a compromise, which I reluctantly accept. I believe the implications raised by not reauthorizing the LIHEAP Program are far worse for Maine. In short, it appears that this is the best distribution formula the State of Maine can obtain, and I urge the support of my colleagues.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Head Start bill before us today includes a title reauthorizing the low-income energy assistance program. An important feature of this authorization is a new formula for allocating LIHEAP funds among the States.

Almost a year ago, the House expressed its judgment that the current formula needed to be changed when it adopted an amendment I offered that would have established a new formula. We agreed that the current formula was unfair and failed to respond to the assistance needs of low-income households. We acted to address this problem—and mandated that low-income energy assistance be distributed, at least in part, on the basis of energy expenditures by low-income households. Unfortunately, because this amendment was tacked on to an unrelated bill and taken to the floor in late November, the formula change was not enacted into law. The amendment was dropped in conference after representations were made that the authorizing committees would address the formula issue this year.

I commend my colleagues in both bodies and on both sides of the aisle who have taken up this challenge and who have joined with me in working diligently to respond to the concerns expressed by the House last year. This has been an extremely difficult task. It is not an easy proposition to fashion a formula that is fair to all 50 States.

While I am not entirely satisfied with the formula before us today, I believe it represents an important step in the right direction. It is simple and easily understood. It begins to end the current discrimination against large areas of our country. But most importantly, by allocating LIEAP funds on the basis of low-income households' energy expenditures, this new formula is designed to further the stated goals of the LIEAP Program—providing low-income energy assistance to those Americans truly in need of such assistance.

I believe, Mr. Speaker, that it would be best that this legislation be adopted without amendment. It is late in the session. It should be adopted without the need of a conference which perhaps would be necessary if we made changes in the bill which passed the Senate.

Mr. Speaker, I have no further request for time, and I yield back the balance of my time.

Mr. DINGELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

● Mr. ERLENBORN. Mr. Speaker, I rise in opposition to S. 2565, the Human Services Reauthorization Act. This bill has also been described as a bill to reauthorize the Head Start Program and for other purposes.

At the outset, Mr. Speaker, let me state for the record my support for the Head Start title of this bill. The funding levels established for the 2-year extension of this highly successful program are adequate; they are not excessive. The remaining Head Start policy changes provided for are appropriate and should enable this important and proven education and support service program to continue to serve well educationally disadvantaged preschool children.

So, my quarrel is clearly not with the Head Start provisions of this legislation. I would, nonetheless, have preferred a free-standing measure limited in its scope to the Head Start Program.

Let's take a closer look at the other provisions—those other purposes—that are now part and parcel of this 1984 Human Services reauthorization package.

Again, we are being asked to reauthorize the Follow Through Program as a separate categorical activity for 2 additional years, with authorizations of appropriations of $10 million and $7.5 million for fiscal years 1985–86, respectively. It is important to review the original intent and purpose of the Follow Through Program. It was created and designed to develop, implement, and refine innovative approaches to meet the special educational and support service needs of disadvantaged children—approaches that would enable them to retain and build upon gains recorded through Head Start and similar preschool compensatory educational experiences.

Since its inception in 1968, an estimated $750 million has been spent on this program to date.

As I indicated when our committee considered H.R. 2148, the Follow Through Amendments of 1983, this program has achieved its original purpose and goal. It has provided the Nation's educational system with a broad spectrum of proven, replicable models

which provide the comprehensive education, health, nutrition, social and related services necessary to the continued development of its target population.

I believe that Follow Through can continue to be an invaluable resource to State and local educators in the development of education curricula in school districts across the Nation. To this end, however, it need not be continued as a categorical program with separate authorizations of appropriations. Under the terms of the Omnibus Budget Reconciliation Act of 1981, Follow Through is phased into chapter 2 of the Education Consolidation and Improvement Act. This is as it should be. Since Follow Through models are widely recognized as being tried, proven successful, and cost effective, in my view many State and local education planners will place a high priority on investing their chapter 2 ECIA resources in replicating or custom tailoring Follow Through models to meet their special educational needs.

In a word, Mr. Speaker, I find no compelling argument for reauthorizing this program for an additional 2 years at total authorizations of $17.5 million to continue to reinvent the wheel.

S. 2565 creates a $40 million 2 year program of State grants and dependent care planning and development.

I am sympathetic to the need for quality day care type services for preschool children, school-age children before and after school hours, and for others who may be in need of supervision.

I believe, however, that, to date, we have addressed the provision of child care, elder care, and dependent care, in general, in a piecemeal fashion.

If Federal financial assistance is needed, I believe that we should identify first those groups who are in greatest need of such care, and then proceed to carefully develop a comprehensive measure that will address fully this area of growing concern.

The Low-Income Home Energy Assistance Program [LIHEAP] has effectively provided heating assistance to low-income families during the past several years. My objection to the inclusion of this program in a bill of this magnitude is not on the merits of the program itself, but rather with the process we have utilized to bring the program before us today.

As I stated in my views when the Committee on Education and Labor considered this bill in May of this year, "Rushed and superficial consideration of LIHEAP legislation is becoming something of a tradition in the Committee on Education and Labor." It appears that not only is this manner of legislative consideration becoming a tradition in that committee, but on the floor of this body as well. Hasty action always seems justified at the time, but in submitting to the pressure, we abrogate our responsibility as legislators. Programs of this size deserve our careful and detailed consideration before we sanction their provisions.

LIHEAP was brought before the full Education and Labor Committee 48 hours after its introduction. Subcommittee consideration had been waived despite the fact that not a single oversight hearing had been held. The bill was never brought to the House floor for consideration because the two committees of record could not reach accord on the allocation formula. Similarly, prior to the Senate taking action on the LIHEAP Program, negotiations took place among staff to devise a new allocation formula that none of us has really had adequate time to analyze or to understand fully. There are States that will suffer the loss of millions of dollars should this allocation formula be accepted. I wonder if the Members of this House from those States will be able to explain to their constituents the rationale for that loss? This haphazard approach to legislation should not be allowed to continue.

Again, I am not questioning the overall merits of this program, but rather the manner in which we are being pressed into accepting what could be significant changes to the program. I cannot, in good conscience, go along with this last minute casual approach.

I am also disturbed by the inclusion in S. 2565 of authorizations for not one, but five education or research programs. As presently written, the bill would authorize up to $171 million in new Federal expenditures for programs of questionable merit.

The so-called Talented Teachers Act, for example, is included in the bill. Supposedly, the bill addresses the need for educational reform called for in the report, "A Nation at Risk;" 48 States, however, have already responded to the recommendations included in the report. These States are raising graduation requirements, establishing master teacher or career ladder programs, and raising teacher salaries. The Talented Teachers Act would add little or nothing to these efforts. In fact, the false promises of legislation like the Talented Teachers Act may unintentionally have the effect of discouraging State legislatures to take the steps necessary to improve education in their States.

The bill also contains a merit-scholarship proposal designed to reward the outstanding academic achievement of college-bound students. Under the bill, 10 students from each congressional district would receive one-time awards of $1,500. Members of Congress and Senators would be encouraged to participate in the awards ceremonies. This proposal has not been the subject of hearings in either the Senate or the House. Yet today we are asked to enact it into law. I question whether this new program is advisable in light of the fact that Federal funding for existing student aid programs is as limited as it is.

Also in the bill are special authorizations for a research center on excellence in education at Indiana University and for a research center on the effects of nuclear radiation to be housed at the University of Utah. Also to be located in Utah is a cancer screening center for persons exposed to radiation from nuclear testing. Why are these authorizations in S. 2565? Because the sponsors of these pork-barrel projects suspect that authorizations such as these would never be enacted in the normal legislative process.

Finally, the bill includes the leadership in Educational Administration Development Act. This bill was sponsored by my good friends, the gentleman from Wisconsin, Mr. PETRI, and the gentleman from Pennsylvania, Mr. GOODLING. I believe this proposal, unlike some of the others included in S. 2565, has substantial merit. I do not, however, believe that its inclusion in what was supposed to be a bill reauthorizing various human service, antipoverty programs is appropriate.

Christmas has arrived early this year, Mr. Speaker, as it seems to in every election year. And, in the spirit of this season, we should perhaps refer to S. 2565, not as the Human Services Reauthorization Act, but, more accurately, as the "Christimas Tree Act of 1984." Clearly, we are looking at a very large, green tree, onto which many gleeful admirers have skillfully hung a long and expensive string of "me too" tinsel and ornaments totaling over $7 billion.

Mr. Speaker, I urge my colleagues to join me in voting against S. 2565 and, in so doing, reject this collection of "me too" social sugar plums.●

● Mr. ECKART. Mr. Speaker, S. 2565 includes a provision which I sponsored in the Education and Labor Committee to reestablish the Community Food and Nutrition Program [CFNP] as a national program to be administered by the Office of Community Services at HHS to provide grants to local and statewide public and private nonprofits.

These grants are for the purpose of funding innovative programs to initiate or expand child nutrition programs to unserved or underserved areas and to better coordinate public and private resources to improve ongoing efforts to provide adequate nutrition to all Americans. For example, in my State, the Ohio Hunger Task Force has targeted the expansion of the Outside School Hours Program as a priority activity.

CFNP could fund the initial site visits and establish a local advisory committee and perform other tasks necessary to meet the critical need for this program created by the huge increase of mothers with school age children in the work force.

Cuts in child nutrition programs have caused drops in participation in these programs. For example, 3 million children have dropped out of the School Lunch Program.[1] It is my hope that CFNP support can assist local sponsors of child nutrition programs in identifying private sources of support to these programs and in making more creative use of existing resources to expand participation.

Although my original amendment in the Education and Labor Committee called for a separate authorization of $5 million per fiscal year, I feel that the compromise authorization of $2.5 million for 1985–86 is at least a starting point and that this program should receive an appropriation to its full authorization level.●

● Mr. SIMON. Mr. Speaker, I rise in support of the bill, S. 2565, the Human Services Reauthorization Act. Included in this omnibus bill are several programs in which I have had a great interest and I strongly support.

Recent studies have shown that Head Start preschool education has a significant long-term impact on disadvantaged children who participate. A 22-year study shows that preschool education helps these children by improving their performance in school and work, as well as their general social adjustment.

As a result of preschool education, fewer students are placed in special education, while more students graduate from high school and attend college or postsecondary vocational programs. The students who attend preschool also have a lower rate of arrests and a higher employment rate. The teenage pregnancy rate of women in the preschool group is half the rate of their peers.

Unfortunately, however, only one out of every five disadvantaged 3-year-olds, and only two out of five 4-year-olds are enrolled in an educational program.

Mr. Speaker, we need to expand Head Start and Follow Through, not cut it back. It should serve more than the 430,000 students now participating, not less, especially since the cost of preschool programs is returned at least seven times over.

The Senate bill also includes the Indiana University Center for Excellence in Education. The center will conduct research, develop products, conduct practice, and publish studies on the structure and organization of schools, school curriculum and school personnel.

This center will be placed at Indiana University at Bloomington, and will be enriched by Indiana University's outstanding departments and professional schools and its vast experience working with elementary and secondary schools, other higher education institutions and the professional and business communities.

This center exemplifies several recommendations of the Education and Labor Committee's Merit Pay Task Force regarding heightening school-university interaction, developing partnerships between business, universities and schools for improving school management, and conducting research on teacher performance and evaluation. I am very pleased that it has been included in S. 2565.

Mr. Speaker, there is another provision of S. 2565 in which I have an obvious interest—the Talented Teacher Act. This bill passed the House on August 8 as H.R. 4477. It contains a program of 10,000 4-year scholarships named for Carl D. Perkins, for outstanding students who want to become teachers and competitive fellowship grants for classroom teachers.

The Senate provisions have modified the House bill somewhat. The fellowships have been reduced in number from two per congressional district to one, and the authorization in the bill have been set for the out-years at $25 million for fiscal year 1986, $30 million for fiscal year 1987, and $35 million for fiscal year 1988, instead of such sums in the House bill.

The Senate bill also allows participation by private school teachers in the fellowship competition. These changes were made to accommodate cost concerns by the Senate, and while I would like to see the Talented Teacher Act expanded rather than contracted, the program does allow this experimental program to begin.

I would also like to take this opportunity to clarify several provisions in S. 2565 as they apply to title IV of the Higher Education Act, as amended by the bill. A concern has been raised in the financial aid community about the impact of certain sections of the House-passed bill on low- and middle-income students who might qualify for title IV assistance and be awarded a Carl D. Perkins Scholarship.

It was the intent of the House that such a student receive all of his or her Perkins Scholarship—up to the $5,000 limit—as long as the cost of attendance at the institution was not exceeded. If that student also qualified for a Pell Grant or other title IV aid, those grants, work study or loans could be added to the Perkins Scholarship up to the cost of attendance.

Section 564 of S. 2565 clarifies similar provisions in H.R. 4477, by requiring that Perkins Scholarships be considered in the determination of need for title IV assistance and requiring the reduction of a Perkins Scholarship if the total exceeds the cost of attendance.

It is our intent that the Perkins Scholarship shall first be used to replace self-help student assistance to ensure that such students receive maximum grant awards. This language is an important improvement and harmonizes this new program with the other title IV programs.

This bill has obtained widespread nationwide attention and its congressional support is strongly bipartisan. Moreover, Mr. Speaker, it is a fitting memorial to our beloved colleague Carl Perkins, who championed educational opportunity and excellence throughout his distinguished congressional career.

So, Mr. Speaker, I urge my colleagues in the House to vote "aye" on H.R. 2565, completing Congress's work on education and human services in the 98th Congress.●

● Mr. HILLIS. Mr. Speaker, I rise in support of S. 2565, and congratulate the members of the Education and Labor Committee on putting this compromise legislation together under the time limitations which have pressed on all of us these last few weeks.

I would especially like to urge my colleagues' support of this legislation because of the important inclusion of an authorization for a Center of Excellence in Education at Indiana University. As we are all so well aware, the publication of the report of the National Commission on Excellence in Education, "A Nation at Risk," emphasized some very basic weaknesses in our educational system. Congress has acted this year to help the States correct these problems, and the research and informational resources which can only be provided in an academic setting will now be addressed with the passage of this measure.

There are other, very important steps being taken in this measure to address the problems of our educational systems. The Talented Teachers Act and Leadership in Educational Administration Development Act provide the necessary seed money to improve the overall quality of both the students who will choose teaching as a career and the administrators of our schools.

Without the academic support of higher education, however, these efforts will be incomplete. Indiana University is uniquely able and suited to serve the Midwest and the Nation as a center for educational research and information. The $6 million authorization is only a portion of the funds which are needed for the Center of Excellence in Education. The State of Indiana and the University are providing the facility for the center, and are

[1] Statistics from an analysis of USDA published data comparing average monthly participation on school lunch progams in 1980–81—(year before cuts) as opposed to 1981–82 (first year cuts.) Study by Center on Budget and Policy Priorities.

pursuing private donations to fund the start-up costs. The State also has committed a total of $44.4 million to the operation of the center.

Thus, the Federal contribution is necessary to guarantee full utilization and national nature of the center's program, and to give private contributors confidence in the future of this necessary program. I urge my colleagues' support for the authorization for the Center for Excellence in Education and for S. 2565.●

● Mr. MILLER of California. Mr. Speaker, I rise in support of S. 2565. S. 2565 will insure the Head Start continue to provide high quality and effective services to children and families. S. 2565 reauthorizes this successful program which has demonstrated that comprehensive child development services can improve the futures of low-income children. This bill also strengthens Head Start by assuring that adequate funds are available for training Head Start workers and parents.

The bill also guarantees the continuation of the training, assessment, and credentialing component of the Child Development Associate [CDA] program which encourages workers to seek training and earn a credential which improves their skills as child care providers. In addition, S. 2565 provides Resource Access Projects which help Head Start to work with handicapped children.

Existing grantees with successful track records in serving children and their families will be given priority when new Head Start funds are distributed, insuring that those agencies which have built Head Start continue to effectively service their communities. Head Start's important Performance Standards, which guarantee a high level of quality in each program, are also maintained.

Finally, this bill guarantees that programs will provide a rich enough Head Start experience to insure that our most vulnerable children and families derive significant benefits from the program by giving grantees the option of serving children for more than 1 year.

I would like to take particular note of the fact that "Families and Child Care: Improving the Options," a major report issued late last week by my Select Committee on Children, Youth and Families, highlights both Head Start and the Child Development Associates Program.

One of the 11 major recommendations of this bipartisan report calls for:

The Department of Health and Human Services [to] continue without interruption current national training and credentialing programs, and, in addition, expand those efforts to ensure training for family day care providers and infant caregivers.

I am also pleased that 11 of our colleagues joined Representative PAT SCHROEDER and me in urging expansion of Head Start. Our views follows:

HEAD START

The importance of the high quality preschool education provided to disadvantaged children has been again confirmed by a recent privately funded long-term study of a Michigan early childhood education program.

For 20 years the High/Scope Educational Research Foundation in Ypsilanti, MI followed the lives of 123 black children with low test scores, from families with little education, half of whom lived with only one parent. Half of them received high quality preschool education beginning at age 3 and the others had no early childhood education, following instead the traditional school program.

The results of the study, "Changed Lives," were startling. Preschool graduates required far less remedial work in their elementary and secondary years. Almost twice as many preschool graduates hold jobs or have gone on to college or post-high school vocational training. Of the girls studied, only half as many became pregnant as teenagers. Substantially fewer preschool students dropped out of school, became involved in crime, or received welfare. The authors of the study estimate that the reductions in crime have saved the taxpayer over $3,000 for each person in the preschool group.

In spite of Head Start's proven effectiveness in providing high quality early childhood education for disadvantaged children, the program still serves fewer than one out of five eligible children.

Since a comprehensive early childhood education program can reverse the trends for low income, disadvantaged children, we strongly recommend an annual incremental increase in the number of children who can participate in the Head Start Program, without any dimunition in the scope or quality of the services provided. It is essential that we continue programs that are effective in improving the long-term prospects of disadvantaged children.

Mr. Speaker, S. 2565 is a sound bill that continues one of the soundest investments that the Federal Government has made in families with children.●

● Mr. GILMAN. Mr. Speaker, I rise in strong support of the legislation now before us, S. 2565, a measure combining several educational programs which I full endorse. Among the programs encompassed by this bill are reauthorizations for the Head Start and Follow Through Programs, the important low-income energy assistance program, and several other new programs which I am pleased to support.

Of the new provisions are funds for thousands of scholarships to outstanding students to help them pursue careers as teachers. In return for this, these students agree to teach in a designated area for 2 years for every year of assistance received. Another provision of the bill, which I had cosponsored, would incorporate the Leadership in Educational Administration Development Act, which establishes LEAD academies in each State to develop business and educational leadership skills among school administrators. Each State will receive at least $150,000 for the project. The measure before us would mandate at least 50 percent in State matching funds for these LEAD academies.

Another new program worthy of mention is the merit aid program, wherein each State can award 10 scholarships, of $1,500 to recognize and assist exceptionally able students who show continued promise of excellence. Each student recipient must be a graduate of secondary school, and must have been accepted at a postsecondary institution. Through S. 2565, we have now established parallel recognition of the importance of encouraging excellence by principals, and distinguished high school and college students. Earlier this Congress, legislation was enacted which authorizes funding for teachers, as contained in the Emergency Math and Science Education Act.

This multifaceted approach is an important recognition of the new priorities we have established for education in this country. And to further round out this legislation, I am especially pleased that a block grant program has been established to assist States in planning and developing various childcare services programs.

The growing number of parents in the work force necessitates the need for a comprehensive approach to day care information. The legislation now pending authorizes $20 million for day care information programs, so that interested parents have one complete source to turn to when considering the types and costs of day care services. I know that many parents in my district have been frustrated in their efforts to pinpoint the one service that is right for them—this new program is meant to ease that search.

One other aspect of S. 2565, which I mentioned earlier, is the Low Income Energy Assistance Program. This important initiative is, through this legislation, reauthorized for 2 years, at $2.1 billion for fiscal year 1985, and $2.3 billion for fiscal year 1986. One specific, important aspect of this reauthorization is that no State can receive less than its fiscal year 1984 appropriation; for a State such as New York, where the need for this program is great, such a provision is welcome indeed.

Mr. Speaker, S. 2565 is truly a piece of legislation that we all can support. It has been carefully crafted to recog-

nize and aid excellence in education, and to ensure the continued viability of programs that benefit the needy. Accordingly, I urge my colleagues to join me in passage of this measure.●

The SPEAKER pro tempore. All time has expired.

Pursuant to the provisions of House Resolution 607, the previous question is considered as ordered on the amendment and on the bill.

The question is on the amendment.

The amendment was rejected.

The SPEAKER pro tempore. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the Senate bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. PETRI. Mr. Speaker, I object to the vote on the ground that a quorum is not present, and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 376, nays 6, not voting 50, as follows:

[Roll No. 453]

□ 1630

Mr. BARTLETT changed his vote from "nay" to "yea."

So the Senate bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 calendar days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ST. ELIZABETH'S HOSPITAL AND DISTRICT OF COLUMBIA MENTAL HEALTH SERVICES ACT

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6224) to provide for the assumption of selected functions, programs, and resources of Saint Elizabeths Hospital by the District of Columbia, to provide for the establishment of a comprehensive mental health care system in the District of Columbia, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments as follows:

Page 10, line 14, strike out "and".

Page 10, line 19, strike out "services." and insert "; and".

Page 10, after line 19, insert:

(7) identify the specific real property, buildings, improvements, and personal property to be transferred pursuant to section 8(a)(1) of this Act needed to provide mental health and other services provided by the Department of Human Services under the final system implementation plan.

Page 21, line 11, after "property" insert: needed to provide mental health and other services provided by the Department of Human Services identified pursuant to section 4(c)(7) of this Act

Page 21, after line 15, insert:

(b) On or before October 1, 1991, the Mayor shall prepare, and submit to the Committee on the District of Columbia of the House of Representatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate, a master plan, not inconsistent with the comprehensive plan for the National Capital, for the use of all real property, buildings, improvements, and personal property comprising Saint Elizabeths Hospital in the District of Columbia not transferred or ex-

cluded pursuant to subsection (a) of this section. In developing such plan, the Mayor shall consult with, and provide an opportunity for review by, appropriate Federal, regional, and local agencies. Such master plan submitted by the Mayor shall be approved by a law enacted by the Congress within the twelve-month period following the date such plan is submitted to the Committee on the District of Columbia of the House of Representatives and the Committees on Governmental Affairs and Labor and Human Resources of the Senate. Immediately upon the approval of any such law, the Secretary shall transfer to the District, without compensation, all right, title, and interest of the United States in and to such property in accordance with such approved plan. The real property, together with the buildings and other improvements thereon, including personal property used in connection therewith, known as the Oxon Cove Park and operated by the National Park Service, Department of the Interior, shall not be transferred under this Act.

Page 21, line 16, strike out "(b)" and insert "(c)".

Mr. DELLUMS (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

□ 1640

Mr. McKINNEY. Mr. Speaker, reserving the right to object, I would ask the gentleman to explain the amendments.

I yield to the gentleman from California for his response.

Mr. DELLUMS. If the gentleman will yield, the Senate amendment requires the Mayor to submit to the Congress before October 1, 1991, a master plan for the use of any land and facilities at the St. Elizabeths Hospital grounds which is not specifically used for the comprehensive mental health care system.

Such plan shall be approved by the Congress and enacted into law within 1 year of its submission.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman for his explanation.

Mr. Speaker, I thank the gentleman for his explanation. Although I would personally have preferred retaining the House passed provisions concerning the property and facilities at St. Elizabeths Hospital, I realize that to insist on that position could result in no legislation being passed. Resolving a dilemma that has faced the Congress for 20 years is more important than having that resolution exactly as I or any other Member of Congress would like to have it read.

I think the House passed version of this bill implicitly expressed a measure of trust in the local government. The amendment attached in the other body adds some guarantees that should the city propose to do something outrageous or inappropriate with any portion of the land or facilities at St. Elizabeths Hospital the Congress can easily prevent such action from taking place. Rather than relying on the ability of Congress to step in at any time and undo what the city has done, we now require advance approval before certain things can be done by the local government. I believe the House passed bill is consistent with the letter and the spirit of home rule.

Yet in the final analysis, the difference is not between a good bill and a bad bill, but rather between a good bill and a better one. Either version deserves support, and on that basis, I urge approval of the bill, as amended.

Mr. McKINNEY. Mr. Speaker. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California.

There was no objection.

A motion to reconsider was laid on the table.

ESTABLISHING PROCEDURES REGARDING JUDICIAL SERVICES OF RETIRED JUDGES OF DISTRICT OF COLUMBIA COURTS

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6007) to establish certain procedures regarding the judicial service of retired judges of District of Columbia courts, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 4, after line 11, insert:

CHANGES IN THE SMALL CLAIMS COURT OF THE DISTRICT OF COLUMBIA

SEC. 4. Section 1321 of title 11 of the District of Columbia Code is amended by striking out "$750" and inserting in lieu thereof "$2,000".

Page 4, line 13, strike out "SEC. 4" and insert "SEC. 5.".

Mr. DELLUMS (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

Mr. McKINNEY. Mr. Speaker, reserving the right to object, I would ask that the gentleman explain the amendment.

I yield to the gentleman from California for his response.

Mr. DELLUMS. The Senate amendments adds a sentence which has already passed the House of Representatives as part of another bill. It raises the dollar limit of cases which can be handled in small claims court in the District of Columbia from the present $750 ceiling to a $2,000 ceiling.

I say to my colleagues this is a piece of legislation that already passed the House added on by the Senate to another piece of legislation.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman for his explanation. H.R. 6007, as amended, is the combination of that bill plus one part of H.R. 5951, which passed the House on the same date. What has been accomplished by the other body is the defusing of what some have considered a hot potato. Gone is the House-passed provision for the mayoral appointment of local judges, subject to confirmation by the City Council. Unfortunately, that will have to wait, perhaps until we can give the District of Columbia full judicial autonomy and prosecutorial authority.

In any event, Mr. Speaker, half a loaf is better than none, and in the case of H.R. 6007, as amended, I believe we have the more important half of that loaf. The administrative improvements in the local judicial system that will result from this legislation will go a long way toward removing the enormous case backlog in the District of Columbia Superior Court, first by providing for the use of retired judges who are properly certified for additional service, and next, by increasing the jurisdiction of the local small claims court from the current $750 to $2,000.

We have tried to do our best to fashion these and other administrative improvements in the operation of the local judicial system, and I urge support for the bill as amended.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 3398, TARIFF AND TRADE ACT OF 1984

Mr. ROSTENKOWSKI. Mr. Speaker, pursuant to the unanimous-consent agreement of Friday, October 5, 1985, I call up the conference report on the bill (H.R. 3398) to amend the trade laws, authorize the negotiation of trade agreements, extend trade preferences, change the tariff treatment with respect to certain articles and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The clerk will read the conference report.

The Clerk proceeded to read the conference report.

(For conference report and statement, see proceedings of the House of Friday, October 5, 1984, part II, at page H11531.)

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, inasmuch as the conference report was printed in Friday's CONGRESSIONAL RECORD, I ask unanimous consent that further reading be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. STARK. Mr. Speaker, reserving the right to object, under my reservation I yield to the chairman of the Ways and Means Committee and ask if he could explain why a provision to protect American cordage manufacturers from inexpensive Korean imports, and amendment which I authored which passed our committee by a vote, I believe, of 20 to 10, was dropped from the conference report.

I yield to the gentleman for his response.

Mr. ROSTENKOWSKI. Some members of the conference including some on the House side, objected to it, and because of that I did not have the votes, so we receded.

Mr. STARK. Mr. Speaker, further reserving the right to object, I ask the gentleman if there was a vote of the conferees on that issue.

I again yield to the gentleman for his response.

Mr. ROSTENKOWSKI. Well, as the gentleman knows, it was in the House bill and the Senate conferees would not accept it. Therefore the House conferees dropped it.

Mr. STARK. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 30 minutes and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am bringing to the floor for immediate consideration the conference agreement on H.R. 3398. As H.R. 3398 passed the House on June 28, 1983, it contained numerous miscellaneous tariff and customs provisions. The Senate then passed H.R. 3398 on September 20, 1984, after adding a number of provisions to the bill amending the countervailing duty and antidumping laws; authorizing trade agreements with Israel, Canada, and other countries subject to congressional approval; renewing the program of generalized system of preferences for 10 years; measures relating to reciprocal trade relations and negotiating objectives on services, foreign investment, and high technology goods; measures to expand foreign market opportunities for U.S. wine exports; amending the criteria for industries to obtain import relief; providing special import protection for the copper and ferroalloy industries; and additional tariff and customs measures.

On October 3, prior to going to conference on H.R. 3398, the House added its versions of a 5-year GSP renewal; authority for a free trade area with Israel only; amendments to improve the operation of the trade remedy laws as originally passed the House in H.R. 4784; requirements for adjustment by the steel industry and steel import enforcement authority; a services industries development program; authorization of appropriations for major trade agencies as earlier passed by the House; and all of the miscellaneous tariff and customs provisions originally passed by the House in H.R. 3398, H.R. 6064, and H.R. 4901.

Mr. Speaker, the conference agreement I bring you today represents a compromise between the House and Senate versions, that removes the most controversial elements while retaining the basic elements of the House bill. The agreement contains essential changes in the trade remedy laws addressing foreign subsidies and dumping to reduce the time and expense of processing cases, to improve administration of the laws, and to assist small business.

The provisions in the House bill on rule-of-origin requirements, application of existing trade remedy laws, and expedited relief for agricultural imports were retained in the authority for a free trade area with Israel. That agreement will be subject to a congressional expedited approval procedure; no tariff agreement with any other country could be negotiated under the expedited congressional approval procedure without prior agreement of the House Ways and Means and Senate Finance Committees and a congressional consultation period.

The conference agreement renews the GSP Program for 8½ years. The agreement retains the House criteria for designating countries, including protection of intellectual property rights and of internationally recognized worker rights. While the agreement does not include all the House provisions to reduce benefits for advanced developing countries it does contain limits similar to those in the House bill on authority to waive competitive need ceilings and requires graduation of countries from GSP that reach a per capita GNP of $8,500.

The House agreed to Senate provisions which include the program for service industries passed by the House plus amendments to provide greater reciprocity in trade relations on services, foreign investment, and high technology trade similar to provisions on H.R. 1571 as passed by the Committee on Ways and Means.

The agreement includes provisions similar to the House bill on wine. On steel, the House bill required the steel industry and each of the major steel companies to commit substantially all of their net cash flow to reinvestment and modernization, and to set aside 1 percent of net cash flow for worker retraining, as a condition for continued enforcement of steel export restraints. The Senate version would have granted the President enforcement authority without either of these commitments from the industry. The conference agreement retains both an industry-wide commitment to reinvestment and modernization, and a company specific commitment of 1 percent to worker retraining, but does not require termination of the enforcement authority if one company fails to comply. The conference agreement also includes an expectation that steel imports would be reduced to a market share of 17 to 20.2 percent as opposed to 17 percent in the House bill.

Mr. Speaker, we have wrestled with the dilemma of our steel industry for years. The committee has granted numerous tax incentives in an attempt to foster greater competition, to boost investment and to retain the industry's highly skilled work force. We have continuously fought for assistance to both steel companies and workers displaced by foreign imports.

The compromise House plan, worked out with cooperation with members of the Steel Caucus, stops short of out-and-out quotas—but does demand stiffer import levels than does the President's plan. And we go far beyond the White House in linking import relief to the industry's investment performance.

To do nothing today is to invite further unfair trade practices among some steel exporting countries—and the need for long-term restructuring of one of America's most fundamental industries.

The conference agreement also includes the House provisions authorizing appropriations for the U.S. Cus-

toms Service and other major trade agencies, about 90 miscellaneous tariff and customs measures and provisions relating to customs seizure and forfeiture. The House accepted Senate provisions on copper and import relief only after their controversial aspect were removed.

Mr. Speaker, it was not possible to obtain agreement by the Senate conferees on every provision of the House bill amending the countervailing duty and antidumping laws and ensure a bill that would not be vetoed by the President. The agreement, however, contains basic and essential improvements of these and other trade laws representing the work of the Committee on Ways and Means and the House during the past 2 years.

Finally, Mr. Speaker, there is no way I can adequately express my appreciation for the leadership and expertise of the distinguished chairman of the Subcommittee on Trade, my friend and colleague, SAM GIBBONS. I know that all members of the Committee on Ways and Means appreciate the hard work and fairness that SAM and the members of his subcommittee brought to this bill.

SAM spent countless hours with the subcommittee over the past 2 years working on ways to improve and make more available our complex trade laws. He also undertook thorough hearings on the State of the U.S. steel industry and initiated extensive hearings on the causes of the U.S. trade deficit. But most importantly, SAM was the impetus behind much of this legislation we have before us today. He not only authored the substantial changes in U.S. trade remedy laws, but also championed the legislation authorizing the free trade area with Israel. His fair handling of the numerous, and very important miscellaneous tariff bills, his role in fashioning a reasonable wine equity bill, and his useful suggestions on the steel provisions all have made this a good trade.

Mr. Speaker, this bill walks a very bold line between protectionism and neglect. America remains the most open trader in the world. It has been a hallmark in our economic and foreign policy. Recently, however, our trade deficit has jumped to historic levels—sectors of our economy are threatened by mounting imports—and we continue to suffer unfair trade policies abroad.

The conference agreement recognizes these dynamics. It demands no dramatic shifts in policy. It stiffens our traditional trade ties—and opens new doors. It is both moderate and timely.

□ 1650

Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, It is hard to imagine a larger, more comprehensive trade package than is contained in this conference report. It includes over 100 separate bills, most of them responsible, trade-enhancing legislation. It is also hard to imagine a conference report that could have more successfully removed bad policy from both House and Senate bills. There were at least a half-dozen veto possibilities.

What is being presented today is not pure, singing trade law, but it is a surprisingly good package which makes the very best of some very sticky situations. It panders modestly to protectionism without long-term perversion of trade law, and makes important trade-expansion progress with the GSP extension and the United States-Israel Free Trade Agreement.

The Washington Post correctly characterized both Houses' bills as antitrade bills. The Senate wine version, the House trade remedies bill, the Senate 201 language, and part of the House steel and GSP bills were potential violations of our international treaties, and certainly represented counterproductive trade policy.

The first miracle is that the conferees, the managers of both Houses, and the administration, mostly Ambassador Bill Brock, approached the reconciliation of the two bills in a businesslike manner with a clear intent to make a good, acceptable conference report. The second miracle is that they succeeded.

The package is voluminous. It includes the administration's two priorities, GSP extension and Israel free trade. It also includes the steel bill with its necessary powers to enforce the previously announced protection program of the administration. The wine bill is in it, too, although in a less harsh version.

The many reciprocity bills, which have passed several committees in both Houses, are, in this package, in a relatively constructive form. Three noncontroversial authorizations are included. Over 100 tariff bills, most suspensions and reductions, carefully pruned to set no dangerous precedent, are included.

Some originally virulently-protectionist relief features from the House trade remedies bill and some equally nasty Senate section 201 language has been mostly defanged. What remains will not make free-traders dance with joy, but it won't make major cataclysmic trade policy changes, either.

Peripheral issues in the package include a customs forfeiture law to help drug enforcement, and a customs broker's bill to make the paperwork of trade easier.

When the Ways and Means Committee narrowed the changes in the definition of "industry" to include only wine and grape producers, and this amendment of mine was later approved by the House, it was intended that the grape growers to be included as a part of the industry be only those whose grape production went primarily into the production of wine. The definition would not include grape production not associated with wine, such as table grapes and raisins. The conference accepted the House position.

Title VI of the bill contains 23 provisions that will, for the most part, streamline the administration of the antidumping and countervailing duty laws, as well as codify existing administrative practice in this area so that certainty will be brought into these procedures for relief.

I wish to comment specifically on one provision, section 613, which relates to the notion of "upstream subsidies" as a practice to which the countervailing duty laws apply. The conferees adopted compromise language intended to clarify this area of the law. Section 613 would add at the end of section 771 of the 1930 Tariff Act a paragraph defining upstream subsidies as subsidies on significant inputs or components of the finished product which bestow a competitive benefit on that product—some or all of the subsidy bestowed on the input producer is passed through to the producer of the finished product. The provision does not affect the basic definition of subsidy in any way. The potential for an upstream subsidy exists only when a sector-specific benefit meeting all other criteria for being a subsidy is provided to the input producer.

Members with strong protectionist inclinations will be a little disappointed in the bill, but even they will probably want to vote for it to salvage a few of the half-loaves that are in it. Steel caucus members would like a stronger, more comprehensive steel section, but they will surely want to vote for the enforcement language that remains.

The 300-plus authors of the wine bill will certainly want to be recorded in favor of their bill. The Energy and Commerce and Foreign Affairs Committee members who helped fashion the reciprocity bill will want to support their own work. So will the Judiciary members who worked on customs forfeiture.

Members who support Israel, and that must be nearly all of us, will want to put a vote on the board, too. And the several hundred sponsors of the tariff suspension bills will likely feel the same.

My suspicion is that this bill will be one of the more popular bills of the session. There are a lot of things in it that a lot of Members like. To be sure, there is still a little bit of mischief in it, too, but compared to what might have been, the mischief is minimal.

One must compliment the chairmen of subcommittee jurisdiction, our own SAM GIBBONS and the Senate's JOHN DANFORTH. It has already been noted that the bill's passage was miraculous. The distinguished gentlemen from Florida and Missouri were the principal miracle workers, ably encouraged and abetted by Chairmen ROSTENKOWSKI and DOLE.

Also, our former colleague, Bill Brock, the U.S. Trade Representative, must be congratulated. When the year began, his and the administration's chances to pass their priorities were 1 in 1,000. His patience, persistence, and persuasion keep everybody involved in the process hard at work even when chances for any bill looked slim. Ambassador Brock has proved himself a worthy encumbent in a long line of distinguished Trade Representatives.

Finally, it is especially important to note that protectionism is still in the ascendency, both in the Congress and in the country at large. Receding unemployment has not caused protectionism to wane.

For the future, American firms can expect to face continuing competition from abroad in local markets. Our major goal must be to reduce the deficit, to reduce interest rates, to reduce the artificial strength of the dollar. That, plus reasonable world recovery, and improvements in productivity and competitiveness, will begin to right the inbalance of trade, and ease the pressure on U.S. producers. And, we hope that will take a little pressure off of us, too.

It is a pleasure for me to have worked on this conference, and to recommend the bill to this House.

I reserve the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Speaker, this bill should be supported. It is a very comprehensive and very complex bill, and before I try to explain the provisions of it I cannot think of anything that I should say that would be more appropriate than to salute the chairman for the masterful way he handled the parliamentary situation and handled the conference.

I also want to say some very fine things about the Members of my subcommittee who worked so hard on this. Mr. PEASE and Mr. FRENZEL and Mr. DOWNEY all did outstanding work.

Mr. FRENZEL and Mr. PEASE on the very complex matter of the GSP, the Generalized Special Preference Program. This was an orphan type of program that really had no strong supporters in the House of Representatives. It took a great deal of dedication on the part of Mr. PEASE and Mr. FRENZEL to put this compromise together.

I think it is a good compromise. It held up through conference and I commend both of them for their outstanding work.

□ 1700

The gentleman from New York [Mr. DOWNEY] was outstanding in his work on Israel. Many other members of the subcommittee assisted him on that, but it was his leadership and his toughness and his ability to explain the legislation and to explain the problems that made it necessary to structure this legislation as the committee did.

The gentleman from California [Mr. THOMAS] was particularly careful to craft the agricultural section so as not to injure industries and agricultural interest.

Out of all the hard work by committee members, we got a good bill. There are so many things in this bill that 4 minutes is not nearly an adequate amount of time to explain it all.

There is one particular provision that I want to explain. The provision dealing with Israel also grants to the President the power to negotiate free trade arrangements with other countries around the world if the President first consults with the Committee on Ways and Means and with the Senate Finance Committee. I point this out particulary because this was a provision that was forced on the House conferees by the other body. It was a crucial matter in the conference. It was one that I support in principle, but I regret that we did not have a thorough discussion of that when we had this bill here on the House floor.

I think all of my colleagues who have followed this legislation, both in the House and the Senate, knew that it was one of the ultimate compromises that we must make in the conference, and the conferees came to a position of supporting that ability of the President to negotiate those matters.

The gentleman from Illinois [Mr. ROSTENKOWSKI] made the best of a real bad situtation in the steel industry and he provided, I think, a far better and far more workable proposal than the other body had, and I commend him for his outstanding work in that area.

None of this could be done without a fine and outstanding staff, both at the full committee level and at the subcommittee level.

This is a good bill and I urge its adoption.

Mr. CAMPBELL. Mr. Speaker, would the gentleman yield for just a moment?

Mr. GIBBONS. I do not have much time, but I yield to the gentleman from South Carolina.

Mr. CAMPBELL. I thank the gentleman for yielding.

Mr. Speaker, the gentleman might remember a colloquy that we had on the floor concerning the commitment that Ambassador Brock made on free trade zones concerning three points: First, that they would take into consideration the sensitivity of the textile and apparel problem in negotiations; second, that they would require Israel to eliminate all of their subsidies in these areas before the granting of the free trade zone; and third, that they would negotiate a phasing out of traiffs on sensitive categories of textiles and apparel.

The SPEAKER pro tempore. The time of the gentleman from Florida [Mr. GIBBONS] has expired.

Mr. FRENZEL. Mr. Speaker, I yield 2 additional minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. CAMPBELL. If the gentleman will yield further, was there anything done in conference to change that understanding?

Mr. GIBBONS. There was nothing done in conference that would change the understanding that we had at the time the House bill passed the House on the items that the gentleman mentioned.

Mr. CAMPBELL. Is it still the understanding of the distinguished chairman of the Trade Subcommittee of the House that that understanding still exists with the Ambassador and the administration?

Mr. GIBBONS. There was nothing that was done in the conference that I had any knowledge of, and I think I would have known about it, that affected the colloquy that the gentleman and I had at the time the bill passed the House.

Mr. CAMPBELL. That would be our understanding of the situation as we discussed it.

Mr. BROYHILL. Mr. Speaker, will the gentleman yield on that point, or at least an allied point?

As I understand, the conference report does provide the President the authority to proclaim duties on those Israeli products that the International Trade Commission determines are a substantial cause of serious injury to the industries that seek relief under section 201; that if the industry seeks relief and there is such a finding, that there have been substantial cause of serious injury, the President can suspend duty-free treatment. Is that correct? That is what I read in the report.

Mr. GIBBONS. I do not want to make any legislative history that I am not familiar with, and the gentleman has gone past my area of competence, I would say to the gentleman.

Mr. FRENZEL. If the gentleman will yield, I think the gentleman is referring to 201 relief, which we can get under the current law. That is not modified. We would be able to get the same relief under the free trade agreement.

Mr. GIBBONS. Yes. We did not change any of the basic, fundamental

laws about the relief provisions or the unfair trade practices in the Israeli section. We did change a lot of unfair trade practices laws in the unfair trade practices section, but I think all of the ones we changed the gentleman would approve of. In fact, we did not get as many as the gentleman and I may have approved of, but that is not the fault of the gentleman or I.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. LUNDINE].

Mr. LUNDINE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to ask the distinguished chairman of the Committee on Ways and Means to clarify a provision contained in the steel section of the conference report. It is my understanding that the conference report provides the President with authority to enforce bilateral arrangements between the United States and any foreign country setting quantitative limitations or other restrictions on the exportation to the United States of steel products. In agreeing to this provision, I understand that the House receded to the Senate in terms of the definition of "steel products" and "steel industry." Is my understanding correct?

Mr. ROSTENKOWSKI. Mr. Speaker, if the gentleman will yield, the gentleman from New York is correct that the House did recede to the Senate on these definitions. Therefore, the terms "steel products" and "steel industry," as used in the conference report, encompass whatever was covered by the Senate amendment.

Mr. LUNDINE. Mr. Speaker, I thank the gentleman.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. MURTHA].

Mr. MURTHA. I thank the gentleman for yielding this time to me.

Mr. Speaker, I want to express the appreciation of so many of us who have unemployed steelworkers throughout the country. In 1977 I had 15,000 working in Johnstown, and today I have 3,500, and one of the big problems has been this subsidized steel coming into the United States.

The President came up with a proposal which he felt would reduce steel, but we thought it had to be implemented, and your plan, we appreciate the work the gentleman did and the cooperation of the gentleman on not only this bill but over the years in trying to help us reduce the amount of steel coming into the United States.

I know the United Steelworkers themselves are particularly appreciative of the chairman and the work he has done in helping us to try to reduce this and put some Americans back to work. We hear all kinds of things about helping people go to work, but one of the things that is so important is reducing the amount of subsidized steel coming in and reducing what they call free trade and we say we need fair trade.

The steelworkers and those of us who are working on this are deeply obligated to the chairman for his work. I know the gentleman does not have a lot of steel in Chicago, and we are not going to have much steel left in Pennsylvania if they keep sending it in from foreign countries, but we appreciate the technical work that the gentleman from Ohio [DON PEASE] did and all his help in this thing.

We know this: Over the years the chairman has been good to not only the steelworkers but the steel industry in trying to help in this very, very complicated and difficult situation. I appreciate all the work the gentleman has done over the years and applaud his efforts in helping the steel industry, but also in helping to get the steelworkers back to work in the steel industry.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Louisiana [Mr. MOORE], a member of the Committee on Ways and Means.

Mr. MOORE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I am going to support this conference report. It is a good one. All the people who have worked on it deserve to be credited and to be thanked.

But it is not perfect. That is reflective of the fact that the trade situation that the United States faces today is not perfect, and I want to take this time to express a concern, not a complaint about this conference report, but to express a concern.

I am very, very concerned from what I have seen in my years on the Committee on Ways and Means that the trade laws we have now and the way we go about settling complaints about violations of those trade laws are not working as they should. They are not perfect. I do not think they are satisfactory.

We also still have problems with foreign countries in terms of unfair trade. We find situations where we have tariffs that ought to be higher or lower, and we ask why they aren't and we are told it is because we have not negotiated on them yet. I think we have to realize that negotiating process is also not satisfactory.

There are two provisions I believe should have been in this conference report that were in House or Senate bill in conference.

On the Senate side there was a provision raising the duty on imported melamine, a chemical product manufactured in my State. It is a bill I introduced in the House and I think should have been passed as it was in the Senate. The duty on melamine in other countries is higher than here creating an unfair trade advantage for foreign producers of melamine. It was dropped in conference.

□ 1710

There was also a provision in the House bill dealing with subsidies of raw materials. It was a provision I helped draw and this House passed. It was dropped in conference. This ignores subsidies by foreign government of raw materials on natural resources creating another unfair trade advantage.

Those are things that someone like me who unabashedly says that I am a free trader thinks ought to be done to bring some fair trade into free trade. When that gets dropped, you are putting people like me in a situation where you are slowly backing us into a protectionist corner as we see more and more industries not being able to survive due to unfair trade, and we are not even willing to do some minimal things, in my opinion, to try to make these laws tougher and free trade fairer.

So I simply express a concern that I do not think we have done enough. I foresee we are going to have more industries in trouble. I believe we are fast approaching the day where a future Congress will be outright protectionist, because it will have no other political choice, as we seem to be the only ones living under the idealistic notion that free trade is in all instances fair, that everything is working satisfactorily, that negotiations and that complaint procedures are all adequate.

Talk to the business people who are trying to work in this morass, and you will find that it is not. They spend years without any resolution and then they are told we will negotiate, but there are no negotiations ongoing and we do not know when the next ones will be.

So I express this concern, no complaint, this concern that all is not working as it should. And that is putting great pressure on those of us who support free trade.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. DOWNEY].

Mr. DOWNEY of New York. Mr. Speaker, I want to thank our subcommittee chairman, SAM GIBBONS, who feels strongly about the issue of trade and is probably as knowledgeable as any Member of Congress regarding the issue of trade. It is because of his hard work, and the diligence the gentleman from Ohio [Mr. PEASE] and Minnesota [Mr. FRENZEL] and the other members of the Trade Subcommittee that we were able to get a good bill.

This is a good bill. This is a bill that is not going to make everyone happy, as my friend, the gentleman from Louisiana just said.

We have a tendency when we have industries that have problems to represent their interests, when in the back of our minds we realize that the United States is a remarkably competitive nation and that if barriers to trade were reduced, we would be able to out compete most of of the countries we have to compete against.

There are two provisions in this bill I want to make a special effort to point out to the Members. One is the landmark legislation on free trade zones. It would not have been possible without the work of the gentleman from Florida [Mr. GIBBONS], the chairman of the committee [Mr. ROSTENKOWSKI] and members of the minority who, in a bipartisan way, decided that a free trade zone with Israel was not only good trade policy, but good economic policy for the United States as well.

With respect to GSP, the gentleman from Ohio [Mr. PEASE] must get enormous credit for the work that he did in this difficult and sensitive area. The GSP program has few here who care about it, but it is important to our country. It is important also to our trading partners.

Throughout the process of renewing GSP, I have been particularly concerned about the problem of counterfeiting and pirating. I believe that the way the GSP program is structured in this legislation enables us to deal with the Taiwanese, the people from Hong Kong, the people from Singapore, the people from Korea, in an effective and imaginative way. Hopefully, over time, it will shut down the piracy that is ongoing and costing American jobs.

I would hope that when our special trade representative carefully reads the transcript of this particular debate, he will recognize that the Members of Congress are concerned about counterfeiting and that we want him to use GSP as a lever over the countries who have done the pirating and the counterfeiting.

Again, my heartfelt thanks to the gentleman from Florida [Mr. GIBBONS] for all he has done this year to bring us a meaningful and rational trade policy.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from New York [Mr. LENT], a member of the conference committee from the Energy and Commerce Committee.

Mr. LENT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I also want to commend the conferees and join my colleagues in supporting the conference report on H.R. 3398. I am particularly pleased to support and draw attention to the provisions of title III which are designed to promote the export of U.S. services. Much of this title is derived from H.R. 2848, the Service Industries Commerce Development Act of 1984, which passed the House on Tuesday night.

Trade in services is a vital part of our economy and our international trade. While U.S. exports in general have been hard hit, growing exports of U.S. services have been one of the few bright spots. Recently, however, service exports have not grown as much as they should have. Americans who would provide services in other countries are being frustrated by an array of barriers similar to those that have been erected against U.S. goods.

This bill is intended to send a clear signal to our trading allies that we are committed to the pursuit of an open trade environment for services as well as goods.

I see this bill accomplishing just that by:

First, making the negotiation of an international agreement on services a principal trade objective under the Trade Act of 1974; second, establishing a comprehensive service industries development program in the Department of Commerce; and third, strengthening the President's authorities to address service sector problems.

I had concerns about the data collection authority in the House-passed bill. The Secretary of Commerce would have been authorized to require persons to submit information to the Department of Commerce. If the person did not submit such information, the Secretary could have brought civil action to require submission of the information and imposed a penalty. I am pleased to report to my colleagues that these provisions were dropped in conference.

In conclusion, I want to reiterate my support for the conference report on H.R. 3398. I am confident that this bill will enhance the international competitiveness of the U.S. service sector, thereby producing more jobs and a better standard of living for all Americans.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Ohio [Mr. MILLER].

Mr. MILLER of Ohio. Mr. Speaker, it appears that the conference report on H.R. 3398, the omnibus trade bill, will help, in some degree, the steel industry. It should help these workers, and I am grateful to the members of the Ways and Means Committee for the work that they have done in order to accomplish this; but I am concerned that the bill does not help to solve the problems of the ferroalloy workers in the United States who are being hurt by foreign subsidized ferroalloy imports.

The Senate version of this bill included an amendment that would have helped the ferroalloy industry and its workers. Unfortunately, our House conferees disagreed and wiped out that amendment that would have helped the ferroalloy industry people. The Senate amendment would have established a break point price tariff for ferroalloy imports. I believe that this amendment would have helped the industry.

So I guess what I want now is some assurance from the chairman of the Ways and Means Committee that somewhere down the line we are going to help those people that are in the ferroalloy industry and the many workers in my congressional district. I might add that the State of Ohio contains about 40 percent of the ferroalloy producing capacity in the United States. Somewhere along the line these ferroalloy workers need assistance and we had a means of assistance in this bill before that language was struck. The House wiped it out in conference.

I am wondering, when are we going to help save the ferroalloy industry?
